# TABLE OF CONTENTS

|                                                                                                                                                           |           |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>(103a) Organelle Separation with a Microfluidic Ratchet.....</b>                                                                                       | <b>1</b>  |
| <i>Alexandra Ros, Edgar A. Arriaga, Daihyun Kim</i>                                                                                                       |           |
| <b>(103b) Cell Surface Complexity Modulates Membrane Capacitance and Differentiation of Human Neural Stem Cells .....</b>                                 | <b>2</b>  |
| <i>Shubha Tiwari, Estelle Kim, Jamison Nourse, Citra Soemardy, Lisa A. Flanagan</i>                                                                       |           |
| <b>(103c) Characterizing Human Embryonic Stem Cells Function with Dielectrophoresis and Flow Cytometry.....</b>                                           | <b>3</b>  |
| <i>Tayloria N.G. Adams, Clarissa C. Ro, Shubha Tiwari, Lisa A. Flanagan</i>                                                                               |           |
| <b>(103d) Electrical Detection of Zika Virus on Paper Microchip with Silver-Graphene-Nano-Composite Electrode.....</b>                                    | <b>4</b>  |
| <i>Mohamed Draz, Harini Lakshminarayanan, Manasa Venkataramani, Kamyar Mehrabi, Maryam Moazeni, Hadi Shafiee</i>                                          |           |
| <b>(103e) Characterization of <math>\hat{A}</math> Dielectrophoretic Response of Candida Cells Using 3D Carbon-Electrode Dielectrophoresis .....</b>      | <b>5</b>  |
| <i>Monsur Islam, Jordon Gilmore, Rodrigo Martinez-Duarte</i>                                                                                              |           |
| <b>(103f) A Method for the Sustainable Synthesis of Carbon Fibers Using Dielectrophoresis of Bacteria and Pyrolysis .....</b>                             | <b>6</b>  |
| <i>Devin Keck, Monsur Islam, Rodrigo Martinez-Duarte</i>                                                                                                  |           |
| <b>(103g) Microscale Extraction of Rare Earth Elements Using Biosorption and Dielectrophoresis .....</b>                                                  | <b>7</b>  |
| <i>Ezekiel Adekanmbi, Soumya Srivastava</i>                                                                                                               |           |
| <b>(103h) Electrophysiology of Borrelia Burgdorferi .....</b>                                                                                             | <b>8</b>  |
| <i>Ezekiel Adekanmbi, Soumya Srivastava</i>                                                                                                               |           |
| <b>(182a) Understanding the Role of Electrokinetics-Hydrodynamics in Electrical-Field Based Soil Remediation .....</b>                                    | <b>9</b>  |
| <i>Oluwatosin Owoseni, Pedro E. Arce, Yung-Way Liu</i>                                                                                                    |           |
| <b>(182b) Electrohydrodynamics of a Viscous Drop .....</b>                                                                                                | <b>10</b> |
| <i>Yuan-Nan Young, Herve Nganguia, On Shun Pak</i>                                                                                                        |           |
| <b>(182c) Electro-Hydrodynamic Behavior of Soft Liquid Metal Plugs Under Low Voltages .....</b>                                                           | <b>11</b> |
