Index

An effective Approach for Optimal hole shape with Evolutionary Structural Optimization, pp.1-8

An effective Approach for Optimal hole shape with Evolutionary Structural Optimization, pp.9-16

Bivariate Population Balance Equations for Progressive Weakening and Fragmentation of Base Metal Ores in Tumbling Mills, pp.17-24

Neutron diffraction based non-destructive techniques for integrity studies on Copper-Stainless steel hybrid composites fabricated by friction stir forming, pp.25-31

Rotating and non-rotating sensors for improving condition monitoring of wind turbines, pp.32-39

Left Ventricular Patient-Specific Fluid Dynamics Simulations for Artificial Mitral Valve Placement, pp.40-47

Natural fibre composite channel sections of flax, jute and hemp for structural applications, pp.48-54

Compressive deformation behaviour of high carbon steel at quasi-static strain rates, pp.55-61

A Method for Modelling Grate Flow Characteristics in Autogenous and Semi-Autogenous Grinding Mills, pp.62-69

Buckling of Thin-Walled Laminated Composite Beams having Open and Closed Sections subjected to Axial Load and End Moment, pp.70-77

Using Advanced Measurement Techniques to Improve Understanding of Fatigue Crack Behaviour in Aerospace Alloys, pp.78-85

Exploiting Particle Methods to Investigate the Structural Integrity of Maritime Platforms, pp.86-97

Evaluation of Blade Blending Induced Mistuning In an Integrally Bladed Disk, pp.98-105

Serial Impact Loading and the Design of Protective Structures to Resist Falling Objects, pp.106-113

Investigation on the Surface Treatment of Short S2-Glass Fibre for Dental Composites, pp.114-120

Fatigue Spectra Simplification Approaches for Accelerated Testing in Composite Aircraft Structures, pp.121-129

A Comparison of Meshing Techniques used for Modelling Composite Materials at the Meso-Mechanical Level, pp.130-139

Identification and Characterisation of Delamination Damage in Composites utilising Embedded Optical Strain Gauges, pp.140-147

Strain Measurement in Unidirectional Carbon Fibre utilising Embedded Optical Strain Gauges, pp.148-155

Realistic Modelling of Squat Cracks, pp.156-163

Analysis of Compression and Shear Strengths of Closed-cell Foams based on the Kelvin and Weaire-Phelan Structures, pp.164-172

Whipping analysis of a submerged free-free cylinder, pp.173-181

The properties of fibre and their influence on post-crack behaviour of fibrecrete, pp.182-193

Fabrication of microlattices by additive manufacturing and study on their applications, pp.194-197

Disruptive New Analyses of the Buckling of Thin Shells that Satisfy *All* of the Requirements Instead of Only *Some* of Them, pp.198-217

Design considerations for a PIN-PMN-PT relaxor ferroelectric based vibration energy harvester for use on a helicopter main-transmission, pp.218-225

Slow waves in blocky rock mass, pp.226-233

Use of FBG sensors for monitoring Mode I delamination damage propagation, pp.234-241

Feasibility of Inflight Aircraft Loads Calibration, pp.242-249

Modelling of Drilling Woven-fabric Composites Using a Dagger Drill, pp.250-257

Multifunctional rubber based composites for marine applications: a review, pp.258-265

Hybrid random and fuzzy analysis of structural response using mathematical programming approach, pp.266-273

Bragg-Edge Neutron Strain Tomography: A Review and Path Forward to General Tomographic Reconstruction, pp.274-282

Modal Parameter Based Identification of Systems with General Damping, pp.283-290

Disruptive New Analyses of the Buckling of Thin Shells that Satisfy *All* of the Requirements Instead of Only *Some* of Them, pp.291-310

The impact of track related parameters on catastrophic injury rate of racing greyhounds, pp.311-317

Constricting Effect of Bridges in Hydraulic Fracturing, pp.318-323

Railway Turnout Failure Mode Analysis, pp.324-331

Fracture Toughness Measurement for Aluminium 6061-T6 using Notched Round Bars, pp.332-339

Fracture Toughness Measurement for Aluminium 6061-T6 using Notched Round Bars, pp.340-348

Tremor Suppression in Wrist Joint Using Active Force Control Method, pp.349-357

Non-contact measurement of nonlinear Rayleigh waves using the scanning laser vibrometer, pp.358-363

Effect of Build Condition and Direction on Fatigue Crack Growth Rates of Selective Laser Melted Ti-6Al-4V Specimens, pp.364-370

Stress monitoring using the change in velocity of Rayleigh waves, pp.371-378

Simulating discrete cracking in fibre reinforced composite structures using an integrated cohesive network, pp.379-385

Characterization of Mode I fracture behavior of a shear thickening fluid using a cohesive zone model, pp.386-394

Failure Behaviour of Thermoplastic Composites, pp.395-401

Failure Analysis of Dental Restorative Composites in Class II (MOD) cavity using FEM, pp.402-408

Optimization of Conductor Geometry of an Eddy Current Damper, pp.409-416

A Length Offset based Controller for Trajectory Tracking of Two-link Planar Robot Arms, pp.417-424

The Simulation of Vibration at the Supine Patient's Body in HEMS, pp.425-432

Dynamics of Fragmented Geomaterials with Rotations, pp.433-440

Fatigue Damage Analysis of Power Engineering Materials Using ESPI Method, pp.441-448

Wave Propagation Through Bimodular Geomaterial With Damping, pp.449-454

Finite element analysis of thermal cycle in laser cladding for railway repair, pp.455-463

Stress concentration factors for flat endcaps, pp.464-468

Mechanical characterization of advanced welding processes applied to DH36 butt welds, pp.469-475

Optimisation of proppant use in the application of the channel fracturing technique, pp.476-483

Determination of Essential Work of Fracture of High Strength G450 Steel Using Digital Image Correlation, pp.484-491

Numerical study on flexural behaviour of steel reinforced polyvinyl alcohol-engineered cementitious composite beams, pp.492-499

Rapid Inspection of Advanced Fibre-Composite Structures via Automated Line Scan Thermography, pp.500-507

On Development of NiMo-SiC Alloys via Powder Metallurgy for the Use in Molten Salt Environment, pp.508-515

Reconstruction of Comprehensive Information Using Fully-distributed FBG Sensors in Structural Health Monitoring, pp.516-523

Prediction of Higher Harmonic Generation of Guided Waves at Breathing Cracks in Beams Using Time-domain Spectral Finite Element Method, pp.524-532

Numerical Simulation and Experimental Verification of Lamb Wave Scattering and Mode Conversion at Delaminations in Composite Laminates. Pp.533-539

Computational modelling of multiple crack growth: a comparison between discrete and phase field models, pp.540-548

A single yield surface damage plasticity model incorporating pressure and strain rate dependency, pp.549-556

Numerical analysis to determine critical height for multi layered laser cladding for die repair applications, pp.557-564

Effect of nanoclay addition on the lap shear strength of epoxy adhesive bonded joints, pp.565-570

U-joint flywheel to passively balance inertia variation in engines, pp.571-577

Wheel and Rail Damage and Detection –A Review, pp.578-586

Time Reversal invariance and contact acoustic nonlinearity: application for closed crack characterization, pp.587-594

Apex seal vibration analysis of limaçon positive displacement machines, pp.595-603

Modelling of Grease Lubrication Decay, pp.604-612

In-vitro Investigation of S-2 Glass Fibre Aspect Ratio on Flexure Strength, Hardness and Wear Performance of Fibre Reinforced Flowable Dental Composites, pp.613-620

Effect of Temperature on the Forming of Steel based Fibre Metal Laminate Systems, pp.621-627

Residual Stress Measurement in Laser Cladded Rail Utilizing Neutron Diffraction Technique, pp.628-635

Mathematical and Numerical Modelling of Porous Geomaterials Based on Generalized Rheological Approach, pp.636-643

Signals in Transition from Deformation to Failure, pp.644-650

Image-based evaluation of effective material properties for composites using scaled boundary finite element method, pp.651-659

Improving the cutting quality of metal products in compound dies, pp.660-668

Modeling Multiple Damage Mechanisms Via a Multi-Fiber Multi-Layer Representative Volume Element (M2RVE), pp.669-676

Tailoring Composites – Opening up the Design Space, pp.677-683

Multi-Signal Quality Monitoring of Aluminium Resistance Spot Welding using Principal Component Analysis, pp.684-691

Effect of Fiber Orientation Control in Cellulose Nanofiber-reinforced Green Composites, pp.692-695

A Fan-Structure of Extreme Shear Ruptures as a Transient Phenomenon, pp.696-703

The development of Asset Management Relevant Good Practice for the UK Office for Nuclear Regulation (ONR), pp.704-711

An Influence of Pore Pressure Gradient on Hydraulic Fracture Propagation, pp.712-723

Nonlinear Vibro-Acoustic Intermodulation to Detect Weak Adhesive Bonds, pp.724-732

Experimental and computational investigations on the scattering of fundamental symmetric Lamb wave by edge crack at a circular hole in an isotropic plate, pp.733-740

Numerical Simulation of Size Effect on Rock Fracture using SPH and a Size-dependent Constitutive Model, pp.741-747

A Damage Model-based Force Feedback Strategy for On-line Fracture Prediction in Two-point Incremental Metal Forming, pp.748-756

Bivariate Population Balance Equations for Progressive Weakening and Fragmentation of Base Metal Ores in Tumbling Mills, pp.757-764

Bragg-Edge Elastic Strain Tomography, pp.765-772

Hydrofoil Manufacture with Automated Fibre Placement, pp.773-781

Honeycomb Energy Absorbing Device for Improved Falling Object Protection System in Fire Fighting Tractors, pp.782-789

A scaled boundary finite element based node-to-node scheme for 2D frictional contact problem, pp.790-797

Transitional Negative Stiffness and Numerical Modelling of Failure of Particulate Material, pp.798-803

Finite Element Modelling of high-porosity open-cell metal foams using a digital framework, pp.804-811

A comparison of thermoplastic materials prepared by 3D printing and injection moulding, pp.812-819

Numerical analysis of cavitation about marine propellers using a compressible multiphase VOF fractional step method, pp.820-827

On Evaluation of Fatigue Crack Front Shapes, pp.828-835

An experimental study on the flexural behaviour of reinforced polyvinyl alcohol-engineered cementitious composite beams, pp.836-841

Numerical modelling of shear band localisation in biaxial test with Smoothed Particle Hydrodynamics method, pp.842-847

Numerical Study on the Compressive Responses of BCC Hollow Truss Lattice Structures, pp.848-859

The Mechanics and Mechanisms of Interfacial Bonding of Cold Sprayed Aluminium Alloy Coatings on Aluminium Alloy Substrates, pp.860-867

Distributed Strain Measurements on Defence Platforms using Continuous Fibre Bragg Gratings, pp.868-875
