Thermal Performance of the Exterior Envelopes of Whole Buildings XIII International Conference

December 4–8, 2016
Clearwater, FL

Session 1

Practices: Attics

Field Measurements of Moisture in Cold Ventilated Attics with Different Types of Insulation Materials and Vapor Barrier Thor Hansen, Eva B. Møller	1
Monitoring of Two Unvented Roofs with Air-Permeable Insulation in Climate Zone 2A Kohta Ueno, Joseph W. Lstiburek	14
Cost-Effective High-Performance Unvented Attics Francis Babineau, Jr	34

Principles: Insulation Performance And Material Properties

Wind Washing Effects on Mineral Wool Insulated Sheathings Randy Van Straaten, John Straube, Trevor Trainor, Antoine Habellion	46
Improving Polyiso Thermal Performance at Low Temperature John B. Letts, Jennifer Yao, Michael J. Hubbard	59
Determination of Linear Thermal Transmittance of Vacuum Insulation Panels (VIPs) by Measurement in a Guarded Hot-Plate (GHP) Apparatus or a Heat-Flow Meter (HFM) Apparatus Christoph Sprengard, Andreas H. Holm, Christine Maderspacher	68

Session 2

Practices: Heritage and Retrofit Considerations for Buildings

Refurbishing Heritage and Historic Buildings—Key Motivation, Benefits and Challenges Torben Valdbjørn Rasmussen	75
Treatment of Rising Damp in Historic Buildings Using a Wall Base Hygro-Regulated Ventilation System—Case Study V.P. de Freitas, M.F.C. Barbosa, A.S. Guimarães, J.M.P.Q. Delgado	84
Study of Energy Intensity and WWRs of Existing Office Buildings Viktoriya Mykytyak, Hitesh Doshi, Ramani Ramakrishnan	95

Principles: Walls—Moisture and Durability, Part 1

Using Fiber Insulation as a Means of Drying Internally Insulated Walls Ekaterina Tzekova, Kim Pressnail	102
--	-----

A Public Domain, Transient, Experimental Database on the Hygrothermal Performance of Durable, Energy-Efficient Full Basement Foundation Walls in a Cold Climate Anna C. Harmon, Louise F. Goldberg	113
---	-----

Session 3

Practices: Taking Stock

Field Demonstration of an Attic Retrofit Strategy Using Cellulose Insulation and Phase-Change Material Kaushik Biswas, Som Shrestha, Andre O. Desjarlais, Nicholas M. Josefik, Andrew J. Nelson, Larry D. Stephenson, Jeffrey L. Lattimore, Robert De Vries	124
Evaluating Summertime Overheating in Multi-Unit Residential Buildings Using Surveys and In-Suite Monitoring Marianne F. Touchie, Ekaterina S. Tzekova, Jeffrey A. Siegel, Bryan Purcell, Jonathan Morier	135
Online Airtightness Savings Calculator for Commercial Buildings in the United States, Canada, and China Som Shrestha, Diana Hun, Lisa Ng, Andre Desjarlais, Steven Emmerich, Laverne Dalglish	152

Principles: Material Durability

Critical Property Contrasts of Fluid-Applied Air and Water Barrier Membranes Used for Envelope Chemistries, Performance, and Durability Patrick H. Young, Ben Meyer	161
Critical Freeze/Thaw Saturation Measurement of In-Service Masonry Randy Van Straaten, Trevor Trainor, Chris Schumacher	177
Thermal and Moisture Properties of Extruded Polystyrene from Inverted Roofs: A Pilot Study Leslie B.B. Peer, Fitsum Tariku, Wendy Ying Simpson	187

Session 4

Practices: Airtightness in Buildings

Commercial Building Airtightness Testing—Lessons Learned from the Red River College Airtightness Testing Program Gary Proskiw, Rob Spewak, Kevin Knight, Cory Carson	197
Impact of Large Building Airtightness Requirements Lorne Ricketts	206
Air Sealing Tight Commercial and Institutional Buildings David Bohac, James Fitzgerald, Martha Hewett, Joshua Novacheck, Andrew Lutz	214

Principles: Moisture and Durability, Part 2

Protocol to Evaluate the Moisture Durability of Energy-Efficient Walls Philip Boudreaux, Simon Pallin, Diana Hun, Manfred Kehrer, Roderick Jackson, Andre Desjarlais	223
A Systematic Method of Assessing the Durability of Wood-Frame Wall Assemblies: Towards the Limit-States Design Approach Michael A. Lacasse, Martin Morelli	235
Risk of Condensation and Mold Growth in Highly Insulated Wood Frame Walls Hamed H. Saber, Michael A. Lacasse, G. Ganapathy, Silvio Plescia, Anil Parekh	246

Session 5

Practices: Ventilation and Air Movement

Practical Applications and Case Study of Temperature-Based Smart Ventilation Controls Michael Lubliner, Paul Francisco, Eric Martin, Iain Walker, Brennan Less, Robin Vieira, Rick Kunkle, Zachary Merrin	265
Smart Ventilation Control of Indoor Humidity in High-Performance Homes in Humid U.S. Climates Brennan Less, Iain Walker	272
Measured Commercial and Institutional Building Pressures David Bohac, Joshua Quinnell, Martha Hewett, James Fitzgerald, Joshua Novacheck, Andrew Lutz	281

Principles: Attic and Roof Performance

Sealed Attics Exposed to Two Years of Weathering in a Hot and Humid Climate William Miller, Sudhir Railkar, Ming Shiao, Andre Desjarlais	290
Field Study on the Thermal and Hygrothermal Performance of Insulated Ventilated Nail Base System Ming L. Shiao, Sudhir Railkar, William A. Miller, Andre Desjarlais	305
Annual Energy and Heat Flows in Vented and Sealed Attics—Parametric Study: Climate Zone 2A Mikael Salomvaara, Achilles Karagiozis, William Miller	317

Session 6

Practices: Horizontal Envelope Assemblies

- Innovative Roof Design for Passive Low-Income Housing in Western India 327
Madeline Gradillas, Qin Zhang, Emma Nelson, Bradley Tran, Leon Glicksman, Tejas Kotak
- Vegetative Roof Performance During Summer—Critical Analysis of the Irrigation Effect 335
S. de Freitas, N.N.M. Ramos, V.P. de Freitas, H.M. Künzel, D. Zirkelbach
- Effective Floor Cavity and Knee Wall Construction Techniques in Two-Story Homes in Hot Climates 348
Charles R. Withers, Jr.

Principles: Indoor Environmental and Thermal Comfort

- Performance Factor for Floor Heating Systems Using New Analytical Formula 356
Henrik Karlsson, Carl-Eric Hagentoft
- Measured Differences of Ground and Space Temperatures for Side-by-Side Slab-on-Grade Residences with and without Carpet 364
Robin K. Vieira, Danny S. Parker, Jamie Kono, Eric Martin, John Sherwin
- Characterizing Indoor Humidity for Comparison Studies: The Moisture Balance Approach 372
William B. Rose, Stacy L. Gloss

Session 7

Practices: High-Performance Insulation Systems

- Method to Evaluate and Develop Next-Generation Vacuum Insulation Panels for Implementation in the Retrofit of Existing Building Envelopes 380
Kyle Vansice, Ulrike Passe
- Development of High-Performance Composite Foam Insulation with Vacuum Insulation Cores 389
Kaushik Biswas, Andre Desjarlais, Douglas Smith, John Letts, Jennifer Yao
- Field Demonstration of Superior Performance of Advanced Building Envelope Technologies 396
Nitin Shukla, Alliston Watts, Jan Kosny

Principles: Rain

- Analysis of Wind-Driven Rain Exposure Based on Long-Term Monitoring 407
Fitsum Tariku, Wendy Ying Simpson, Elsa Ngudjiharto
- Laboratory Study of Rates of Inward Leakage in Seven Different Gaps in a Facade Exposed to Driving Rain or Water Splash 415
Lars Olsson

Session 8

Practices: Insulated Assemblies

- Thermal and Moisture Performance of Buried Ducts 423
Mikael Salonvaara, Katrina Keeley, Achilles Karagiozis
- Field Test on Two Interior Insulation Systems with Large Thickness—Influence of Orientation and Airtightness 432
M. Stelzmann, B. Nusser, U. Möller
- Approach to Assessing Continuous Insulation Products 439
Jonathan Smegal, John Straube, Theresa Weston, Aaron Grin

Principles: Intentional and Unintentional Airflow

- Duct Leakage Repeatability Testing 452
Iain Walker, Max Sherman, Paul W. Francisco
- Airflow through Lightweight Wall Assemblies—Influence of Size and Location of Leakages 459
Philipp Kölsch, Daniel Zirkelbach, Bernd Nusser, Ralf Wagner, Andreas Zegowitz, Hartwig Künzel
- Simulating Air Leakage in Walls and Roofs Using Indoor and Outdoor Boundary Conditions 485
Simon Pallin, Diana Hun, Philip Boudreaux

Session 9

Practices: Hygrothermal Performance and Durability

- Comparison of Measured Hygrothermal Performance of Wood-Frame Walls Built with Continuous Exterior Insulation versus Walls Built with Housewrap and Oriented Strand Board Sheathing in Single-Family Homes in a Cold Climate 493
Gary D. Parsons, Brian Lieburn, Greg Stewart, Peter Eastman
- Measured and Predicted Moisture Performance of High-R Wall Assemblies in Cold Climates 504
Trevor M. Trainor, Jonathan Smegal, John Straube, Anil Parekh
- Field Evaluation of Thermal and Moisture Response of Highly Insulated Wood-Frame Walls 515
Michael A. Lacasse, Hamed H. Saber, Wahid Maref, G. Ganapathy, Silvio Plescia, Anil Parekh

Principles: Thermal Performance and Thermal Bridging

- Potential and Limitations of Infrared Thermography on Unventilated Walls 527
Katrien Maroy, Nathan Van Den Bossche, Marijke Steeman
- Thermal Analysis of Curtain Wall Systems—A Parametric Study 540
Nathan Van Den Bossche, Wahid Maref

Session 10

Practices: Performance of Wall and Glazing Systems

Window Condensation—Theory into Practice	554
Alex McGowan	
Thermal Performance Evaluation of Walls with Gas-Filled Panel Insulation	561
Som Shrestha, Andre Desjarlais, Dahtzen Chu, Axy Pagan-Vazquez	
Mind The Gap: Summary of Window Residential Retrofit Solutions	567
Joseph Petersen, Katherine Cort, Sarah Widder, Thomas Culp, Greg Sullivan	

Principles: Innovative Approaches

Application of Glass Bubbles for Vacuum Insulation	576
Boyce Chang, Muft Akinc	
Big Area Additive Manufacturing Applied to Buildings	583
Kaushik Biswas, Randall Lind, Brian Post, Roderick Jackson, Lonnie Love, Johney Green, Jr., Lucas Tryggestad, Andrew Obendorf, Leif Eikevik, Maged Guerguis	
Economic Efficiency of Thermal Insulation Aimed at Saving Energy: A Critical Assessment	591
Andreas Holm, Christoph Sprengard	

Session 11

Practices: Assessment of Heat and Moisture Flow

Evaluation of a Modified Co-Heating Test for In-Situ Measurements of Thermal Transmittance of Single-Family Houses	598
Angela Sasic Kalagasidis, Emma Brycke, Jannicke Nilssen, Pär Johansson	
A Simplified Energy Savings Calculation Tool for the Lifetime Energy and Environmental Impact Assessment of Insulation Materials	609
Mahabir Bhandari, Som Shrestha, Kaushik Biswas, Andre Desjarlais	
Moisture-Related Durability of In-Service High-R Wall Assemblies in Pacific Northwest Climates	617
Jonathan Smegal, Robert Lepage, Chris Schumacher	

Principles: Whole-Building Performance

Using the Thermal Mass of a Building to Reduce the Magnitude of the Peak Power Demand of the Primary Heating System—A Whole-Building Simulation with Parametric Analysis	628
Victor Fransson, Dennis Johansson, Hans Bagge	
Implementation and Validation of a Long-Wave Heat Exchange Model	636
Matthias Winkler, Florian Antretter, Jan Radon	
A New Approach for Analysis of Complex Building Envelopes in Whole-Building Energy Simulations	645
Jan Kosny, Charlie Curcija, Anthony D. Fonanini, Handan Liu, Elizabeth Kossecka	

Session 12 and Session 13

Practices: Low-Energy Buildings

Evaluation of Energy Efficiency of U.S. Army Hard Shelters	661
Som Shrestha, Axy Pagan-Vazquez, Dahtzen Chu, Megan Kreiger, Kaushik Biswas	
Building Energy and Envelope Performance of a Near Net Zero Energy Building	668
Stanley D. Gatland II, Julie M. Dinh-Ngoc, Remi Goulet, Parhum Delgoshaei, David Riley, Diana Elliott	

Principles: Building Envelope Performance Studies

High-Rise Wood Building Enclosures	679
Graham Finch	
Guiding Design Teams by Hygrothermal, Energy, and Thermal Comfort Analysis While Managing Uncertainty	693
Ivan Lee, Patrick Roppel, Randy Van Straaten, Jamie McKay	
Overcladding for Thermal Performance and Building Resiliency	706
Daniel McKelvey, David Copley, Kendal Foster, Allison Wilson
