# 2017 International Conference on Software Security and Assurance

## ICSSA 2017

### Table of Contents

|                                  |      |
|----------------------------------|------|
| Message from General Chairs..... | viii |
| Conference Organization.....     | ix   |
| Program Committee.....           | x    |
| Keynotes.....                    | xi   |
| Panels.....                      | xiii |

---

### Internet of Things (IoT) and Internet of Everything (IoE)

|                                                                                                        |    |
|--------------------------------------------------------------------------------------------------------|----|
| On the Impact of Kernel Code Vulnerabilities in IoT Devices .....                                      | 1  |
| <i>Sebastian Eresheim, Robert Luh, and Sebastian Schrittwieser</i>                                     |    |
| An In-Depth Analysis of the Mirai Botnet .....                                                         | 6  |
| <i>Joel Margolis, Tae (Tom) Oh, Suyash Jadhav, Young Ho Kim, and Jeong Noyo Kim</i>                    |    |
| IoE Security Threats and You .....                                                                     | 13 |
| <i>Jungwoo Ryoo, Soyoung Kim, Junsung Cho, Hyoungshick Kim, Simon Tjoa, and Christopher Derobertis</i> |    |

### Secure Software Development

|                                                                                                                 |    |
|-----------------------------------------------------------------------------------------------------------------|----|
| Cookies and Sessions: A Study of What They Are, How They Work and How They Can Be Stolen .....                  | 20 |
| <i>Kenneth LaCroix, Yin L. Loo, and Young B. Choi</i>                                                           |    |
| Security Patterns As Architectural Solution - Mitigating Cross-Site Scripting Attacks in Web Applications ..... | 25 |
| <i>Priya Anand and Jungwoo Ryoo</i>                                                                             |    |
| COAT: Code Obfuscation Tool to Evaluate the Performance of Code Plagiarism Detection Tools .....                | 32 |
| <i>Sangjun Ko, Jusop Choi, and Hyoungshick Kim</i>                                                              |    |
| Security Pattern Detection Using Ordered Matrix Matching .....                                                  | 38 |
| <i>Aleem Khalid Alvi and Mohammad Zulkernine</i>                                                                |    |

## Vulnerability and Attack Detection

|                                                                                   |    |
|-----------------------------------------------------------------------------------|----|
| An Automatic Software Vulnerability Classification Framework .....                | 44 |
| <i>Maryam Davari, Mohammad Zulkernine, and Fehmi Jaafar</i>                       |    |
| Creation and Integration of Remote High Interaction Honeypots .....               | 50 |
| <i>Martin Valicek, Gregor Schramm, Martin Pirker, and Sebastian Schrittwieser</i> |    |
| Endpoint Data Classification Using Markov Chains .....                            | 56 |
| <i>Stefan Marschalek, Robert Luh, and Sebastian Schrittwieser</i>                 |    |

## Organizational Aspects of Security I

|                                                                                                                      |    |
|----------------------------------------------------------------------------------------------------------------------|----|
| CNN-Based Android Malware Detection .....                                                                            | 60 |
| <i>Meenu Ganesh, Priyanka Pednekar, Pooja Prabhuswamy, Divyashri Sreedharan Nair, Younghee Park, and Hyeran Jeon</i> |    |
| Secure Password Translation for Document Protection of SOHO Companies .....                                          | 66 |
| <i>Hyung-Jong Kim and Soyeon Park</i>                                                                                |    |

## Organizational Aspects of Security II

|                                                                                                       |    |
|-------------------------------------------------------------------------------------------------------|----|
| Cloud Reliability and Independence Standard: A Three Tiered System<br>for Optimal Cloud Storage ..... | 69 |
| <i>Evan Michael English, Daniel Paul Stacey, Syed Rizvi, and Donte Perino</i>                         |    |
| Multi-Layer Defense Model for Securing Online Financial Transactions .....                            | 75 |
| <i>Joseph Gualdoni, Andrew Kurtz, Ilva Myzyri, Megan Wheeler, and Syed Rizvi</i>                      |    |

## Applied Crypto

|                                                                                                                      |    |
|----------------------------------------------------------------------------------------------------------------------|----|
| Discovering Cryptographic Algorithms in Binary Code Through Loop<br>Enumeration .....                                | 80 |
| <i>Damjan Buhov, Patrick Kochberger, Richard Thron, and Sebastian Schrittwieser</i>                                  |    |
| Software Application to Evaluate the Complexity Theory of the RSA<br>and Elliptic Curves Asymmetric Algorithms ..... | 87 |
| <i>Wendy Ayala, Walter Fuertes, Fernando Galárraga, Hernán Aules, and Theofilos Toulkeridis</i>                      |    |

## Security Training & Education

|                                                                                                    |     |
|----------------------------------------------------------------------------------------------------|-----|
| Software-Based Platform for Education and Training of DDoS Attacks Using<br>Virtual Networks ..... | 94  |
| <i>Walter Fuertes, Anabel Tunala, Ronnie Moncayo, Fausto Meneses, and Theofilos Toulkeridis</i>    |     |
| Enriching Security Education Hands-on Labs with Practical Exercises .....                          | 100 |
| <i>Min Jin Kwon, Gowoon Kwak, Siyoung Jun, Hyung-Jong Kim, and Hae Young Lee</i>                   |     |

|                                                   |     |
|---------------------------------------------------|-----|
| Automated Synthesis of Access Control Lists ..... | 104 |
| <i>Xiao Liu, Brett Holden, and Dinghao Wu</i>     |     |

## Lightning Talks

|                                                                                                    |     |
|----------------------------------------------------------------------------------------------------|-----|
| A Quantification of Effectiveness of Simulation Models by Managing Cost<br>of Development .....    | 110 |
| <i>Hyung-Jong Kim and Hae Young Lee</i>                                                            |     |
| Common Requirements for Web Application Vulnerability Scanners for<br>the Internet of Things ..... | 111 |
| <i>Hae Young Lee and Young Sun Park</i>                                                            |     |

## Secure Architectures

|                                                                                                  |     |
|--------------------------------------------------------------------------------------------------|-----|
| Adopting Attribute-Based Access Control to Data Distribution Service .....                       | 112 |
| <i>Priya Murugesan, Swanim Chinnappa, Alaa Alaerjan, and Dae-Kyoo Kim</i>                        |     |
| An Architectural-Enhanced Secure Embedded System with a Novel Hybrid<br>Search Scheme .....      | 116 |
| <i>Weike Wang, Muyang Liu, Pei Du, Zongmin Zhao, Yuntong Tian, Qiang Hao,<br/>and Xiang Wang</i> |     |
| An Efficient Method for Securely Storing and Handling of Genomic Data .....                      | 121 |
| <i>Youngjoon Ki and Ji Won Yoon</i>                                                              |     |

|                           |            |
|---------------------------|------------|
