2018 IEEE International Conference on Software Architecture
ICSA 2018

Table of Contents

Message from the General Chair and PC Chairs of ICSA 2018 ix
Ian Gorton (Northeastern University), Barbora Buhnova (Masaryk University), Neil Ernst (University of Victoria), and Clemens Szyperski (Microsoft)

Organizing Committee xi
Program Committee xii
Keynotes xiv

Highly Distributed Ecosystems

The Anatomy of a Large-Scale Experimentation Platform 1
Somit Gupta (Microsoft), Lucy Ulanova (Microsoft), Sumit Bhardwaj (Microsoft), Pavel Dmitriev (Microsoft), Paul Raff (Microsoft), and Aleksander Fabijan (Microsoft)

A Blockchain-Based Micro Economy Platform for Distributed Infrastructure Initiatives 11
Jan Kramer (The Things Network), Jan Martijn van der Werf (Utrecht University), Johan Stokking (The Things Network), and Marcela Ruiz (Utrecht University)

Reducing Development Overheads with a Generic and Model-Centric Architecture for Online Games 21
Sebastian Apel (Friedrich Schiller University Jena)

Microservices

Migrating Towards Microservice Architectures: An Industrial Survey 29
Paolo Di Francesco (Gran Sasso Science Institute), Patricia Lago (Vrije Universiteit Amsterdam), and Ivano Malavolta (Vrije Universiteit Amsterdam)

Microservices: Architecting for Continuous Delivery and DevOps 39
Lianping Chen (Lianping Chen Limited)

Towards Micro Service Architecture Recovery: An Empirical Study 47
Nuha Alshuqayran (University of Brighton), Nour Ali (Brunel University London), and Roger Evans (University of Brighton)

Automotive and Robotics Architecture

Architecting a Software-Based Ecosystem for the Automotive Aftermarket: An Experience Report .57
Matthias Naab (Fraunhofer IESE), Dominik Rost (Fraunhofer IESE), and Jens Knodel (Caruso Dataplace GmbH)

Data-Centric Communication and Containerization for Future Automotive Software Architectures .65
Stefan Kugele (Technical University of Munich), David Hettler (Ludwig Maximilian University of Munich), and Jan Peter (Technical University of Munich)

An Architecture for Decentralized, Collaborative, and Autonomous Robots .75
Sergio García (Chalmers), Claudio Menghi (Chalmers), Patrizio Pelliccione (Chalmers), Thorsten Berger (Chalmers), and Rebekka Wohlrab (Chalmers)

Architecture Decision Making

An Expert Recommendation System for Design Decision Making: Who Should be Involved in Making a Design Decision? .85
Manoj Bhat (Technical University of Munich), Klym Shumaiev (Technical University of Munich), Kevin Koch (Technical University of Munich), Uwe Hohenstein (Siemens AG - Corporate Technology), Andreas Biesdorf (Siemens AG - Corporate Technology), and Florian Matthes (Technical University of Munich)

Recovering Architectural Design Decisions .95
Arman Shahbazian (University of Southern California), Youn Kyu Lee (University of Southern California), Duc Le (University of Southern California), Yuriy Brun (University of Massachusetts Amherst), and Nenad Medvidovic (University of Southern California)

EASIER: An Evolutionary Approach for Multi-objective Software ArchItecturE Refactoring .105
Davide Arcelli (University of L'Aquila), Vittorio Cortellessa (University of L'Aquila), Mattia D'Emidio (University of L'Aquila), and Daniele Di Pompeo (University of L'Aquila)

Models and Model-Based Approaches

Architectural Design Decisions for Systems Supporting Model-Based Analysis of Runtime Events: A Qualitative Multi-method Study .115
Michael Szvetits (Software Engineering Group) and Uwe Zdun (Software Architecture Research Group)

Availability-Driven Architectural Change Propagation Through Bidirectional Model Transformations Between UML and Petri Net Models .125
Vittorio Cortellessa (University of L'Aquila), Romina Eramo (University of L'Aquila), and Michele Tucci (University of L'Aquila)

Modeling of Parametric Dependencies for Performance Prediction of Component-Based Software Systems at Run-Time .135
Simon Eismann (Universität Würzburg), Jürgen Walter (Universität Würzburg), Jóakim von Kistowski (Universität Würzburg), and Samuel Kounev (Universität Würzburg)

Data-Intensive Architecture

A Generic and Highly Scalable Framework for the Automation and Execution of Scientific Data Processing and Simulation Workflows .145
Jianlei Liu (Institute for Automation and Applied Informatics (IAI) Karlsruhe Institute of Technology (KIT)), Eric Braun (Institute for Automation and Applied Informatics (IAI) Karlsruhe Institute of Technology (KIT)), Clemens Düpmeier (Institute for Automation and Applied Informatics (IAI) Karlsruhe Institute of Technology (KIT)), Patrick Kuckertz (Institute of Electrochemical Process Engineering (IEK-3) Forschungszentrum Jülich GmbH), D. Severin Ryberg (Institute of Electrochemical Process Engineering (IEK-3) Forschungszentrum Jülich GmbH), Martin Robinius (Institute of Electrochemical Process Engineering (IEK-3) Forschungszentrum Jülich GmbH), Detlef Stolten (Chair of Fuel Cells), and Veit Hagenmeyer (Institute for Automation and Applied Informatics (IAI) Karlsruhe Institute of Technology (KIT))

Infrastructure-as-Code for Data-Intensive Architectures: A Model-Driven Development Approach .156
Matej Artac (XLAB), Tadej Borovšak (XLAB), Elisabetta Di Nitto (Politecnico di Milano), Michele Guerriero (Politecnico di Milano), Diego Perez-Palacin (Linnaeus University), and Damian Andrew Tamburri (Politecnico di Milano)

Predicting the Performance of Privacy-Preserving Data Analytics Using Architecture Modelling and Simulation .166
Rajitha Yasaweerasinghelage (CSIRO Data61), Mark Staples (CSIRO Data61), Ingo Weber (CSIRO Data61), and Hye-Young Paik (CSIRO Data61)

Architectural Knowledge and Quality

An Empirical Study of Architectural Decay in Open-Source Software .176
Duc Minh Le (University of Southern Califonia), Daniel Link (University of Southern Califonia), Arman Shahbazian (University of Southern Califonia), and Nenad Medvidovic (University of Southern Califonia)

Improving the Search for Architecture Knowledge in Online Developer Communities .186
Mohamed Soliman (University of Hamburg), Amr Rekaby Salama (University of Hamburg), Matthias Galster (University of Canterbury), Olaf Zimmermann (University of Applied Sciences of Eastern Switzerland (HSR FHO)), and Matthias Riebisch (University of Hamburg)

IoT and Cyber-Physical Systems

Self-Commissioning Industrial IoT-Systems in Process Automation: A Reference Architecture .196
Heiko Koziolek (ABB Corporate Research), Andreas Burger (ABB Corporate Research), and Jens Doppelhamer (ABB Corporate Research)

View-Centric Context Modeling to Foster the Engineering of Cyber-Physical System Networks . 206
Bastian Tenbergen (State Universtiy of New York at Oswego), Marian Daun (paluno – The Ruhr Institute for Software Technology University of Duisburg-Essen), Patricia Aluko Obe (paluno – The Ruhr Institute for Software Technology University of Duisburg-Essen), and jennifer Brings (paluno – The Ruhr Institute for Software Technology University of Duisburg-Essen)
