TABLE OF CONTENTS

| Paper ID | Title / Page |
|----------|---|
| 3 | An Extended Parametric Analysis of Transformer Maintenance Plan Using Markov State Diagram 1 |
| 4 | Reliability Evaluation for Microgrids Using Cross-Entropy Monte Carlo Simulation 7 |
| 5 | A Data-Driven Method for Operational Reliability Prediction on Electric Devices Considering Multiple Meteorological Factors 13 |
| 7 | Aging Reliability Model for Generation Adequacy 19 |
| 8 | Probabilistic Power Flow for Power Quality Assessment of Islanded Microgrid 25 |
| 9 | Distribution Network Outage Data Analysis and Repair Time Prediction Using Deep Learning 31 |
| 10 | A New Approach for Reliability Assessment of a Static Var Compensator Integrated Smart Grid 37 |
| 11 | Reliability consideration in the energy storage system design process 44 |
| 12 | An Approach to Create All Line In Service Node/Breaker Model Using State Estimator Cases 50 |
| 13 | Probabilistic Method for Assessing the System-wide Impact of Electric Vehicle Charging on Distribution System Assets 56 |
| 14 | A New Spectral Estimator for Identifying Dominant Modes and Detecting Events in Power Systems 62 |
| 15 | Analyzing Mutual Influences of Conventional and Distributed FACTS via Stochastic Co-optimization 68 |
| 16 | Estimation of Operating Reserve Capacity in Interconnected Systems with Variable Renewable Energy Using Probabilistic Approach 74 |
| 17 | Evaluation Of Year 2020 IEEE RTS Generation Reliability Indices 80 |
| 19 | Identification of hydro turbine governors using PMU data 85 |
| 20 | Application of Poisson Distribution in LFU Curve Modeling 91 |
| 22 | Probabilistic socio-economic cost assessment integrating power market and reliability analysis 96 |
| 23 | Distinguishing Among the Sources of Electric Service Interruptions 102 |
| 25 | Impact of Power System Protection and Fault Current Limiters on Component Failure Rates 108 |
| 27 | Investment Optimization to Improve Power System Resilience 114 |
| 28 | A Feature-Based Method for Automatic Anomaly Identification in Power Quality Measurements 120 |
| 29 | A holistic simulation tool for long-term probabilistic power system reliability analysis 126 |
| 30 | Modelling transmission line failures due to lightning using reanalysis data and a Bayesian updating scheme 132 |
| 31 | Verification and upgrades of an advanced technique to model forecast uncertainties in large power systems 137 |
| 32 | A probabilistic risk-based security assessment tool allowing contingency forecasting 143 |
| 34 | Offshore Cable Optimization by Probabilistic Thermal Risk Estimation 149 |
| 35 | Development of Methods for an Optimized Infeed Forecast of Renewable Energies 155 |
| 36 | Correlation between EVs and Other Loads in Probabilistic Load Flow for Distribution Systems 161 |
| 37 | Composite Power System Reliability Evaluation Incorporating Network Topology Optimization and Demand Side Management 167 |
| 38 | Modelling of Recurrent Circuit Breaker Failures with Regression Models for Count Data 173 |
| 39 | A Diagnostics Tool for Risk-based Dynamic Security Assessment of Renewable Generation 179 |
| 40 | Base Cases for Assessing Risk in Transmission System Planning 185 |
| 42 | A Markov-Based Cascading Outage Searching Method Considering Load-Dependent Outages 191 |
| 43 | A Linearized Probabilistic Load Flow Method to deal with Uncertainties in Transmission Networks 197 |
| 44 | An Anomaly Detection Approach Based on Machine Learning and SCADA Data for Condition Monitoring of Wind Turbines 203 |
| 45 | Understanding Inter-Annual Variability of PV Energy Production in the Contiguous United States 209 |

| | | |
|----|---|-----|
| 46 | A Test for Non-Stationarity of Synchrophasor Measurements | 213 |
| 47 | Chance-constrained optimal location of damping control actuators under wind power variability | 219 |
| 48 | Impact of Modeling Errors and Randomness on Topology Identification of Electric Distribution Networks | 224 |
| 49 | Two-stage Stochastic Scheduling of Transportable Energy Storage Systems for Resilient Distribution Systems | 230 |
| 50 | Evaluating the Effectiveness of Conservation Voltage Reduction with Multilevel Robust Regression | 236 |
| 51 | Probabilistic Balancing of Grid with Renewables and Storage | 242 |
| 53 | Monte Carlo Based Method for Parallelizing Quasi-Static Time-Series Power System Simulations | 248 |
| 56 | Potential Capacity Contribution of Renewables at Higher Penetration Levels on MISO System | 254 |
| 57 | A Reliability Model to Local Area System Capacity Adequacy Assessment | 260 |
| 58 | A Hierarchical Approach to Probabilistic Wind Power Forecasting | 266 |
| 59 | Towards Incorporating Protection and Uncertainty into Cascading Failure Simulation and Analysis | 272 |
| 60 | Reliability and Environmental Benefits with Market Operation of Compressed Air Energy Storage in a Wind Integrated Power System | 277 |
| 62 | A Data-Driven Approach to Dynamic Var Compensator Placement for Local Voltage Stabilization on Feeders with High PV Penetration | 283 |
| 63 | Post-contingency corrective control failure: a risk to neglect or a risk to control? | 289 |
| 64 | Benchmarking Quasi-Steady State Cascading Outage Analysis Methodologies | 295 |
| 65 | Optimizing Storage Operation for a Probabilistic Locational Marginal Pricing Forecast | 301 |
| 66 | Using Probabilistic Risk Indices for Bulk System Reliability Analysis | 307 |
| 67 | Impact of Transmission and Subtransmission Failures on Distribution Reliability Indices | 312 |
| 68 | Spinning Reserve Assessment in Multiarea Systems via Monte Carlo Simulation and CE Method | 318 |
| 70 | Reliability Modeling Considerations for Emerging Cyber–Physical Power Systems | 324 |
| 71 | Demand Response based Power System Reliability Enhancement | 331 |
| 74 | Analysis of XLPE Power Cables Thermal Modelling for Short and Long Transients by means of Monte Carlo Approach | 337 |
| 75 | Meta-Heuristic Approach for Validation and Calibration of Cascading Failure Analysis | 343 |
| 76 | Risk and economic analysis of utilizing dynamic thermal rated transformer for wind farm connection | 349 |
| 77 | Risk analysis of wind farm connection to existing grids using dynamic line rating | 355 |
| 78 | Probabilistic Prioritization as an Improvement for Risk-based Contingency Screening Methods | 360 |
| 79 | Exploring the impact of renewables on supply-demand balance: a probabilistic model | 366 |
| 80 | Asymptotic Risk of Unit Commitment Schedule Due to Generating Unit Outages | 372 |
| 82 | Probabilistic Forecasting of Household Electrical Load Using Artificial Neural Networks | 378 |
| 83 | Reliability Assessment of Transmission Reinforcements Delay in the Brazilian Expansion Planning | 384 |
| 84 | A Stochastic Multi-Agent Resource Planning Model: The Impact of Capacity Remuneration Mechanisms | 390 |
| 86 | Minimizing Variance in Variable Renewable Energy Generation in Northern Europe | 396 |
| 87 | Use of meteorological data for improved estimation of risk in capacity adequacy studies | 402 |
| 88 | Can an influence graph driven by outage data determine transmission line upgrades that mitigate cascading blackouts? | 408 |
| 89 | A stochastic generation capacity expansion planning methodology using linear distribution factors and hourly load modeling | 414 |

| | | |
|-----|--|-----|
| 90 | Optimum Turbine Number and Data Determination for Short Term Wind Power Forecasting in Complex Terrains: A case study in Turkey | 420 |
| 91 | Stochastic Small Signal Stability of Power System with Random Wind | 426 |
| 92 | Probabilistic Assessment of Electric Vehicle Charging Demand Impact on Residential Distribution Transformer Aging | 432 |
| 94 | Stochastic Optimal and Robust Control Scheme for Islanded AC Microgrid | 438 |
| 95 | Optimizing Distributed Photovoltaic System Set Points Under Uncertainty | 444 |
| 97 | Reliability Assessment of Industrial Circuit Breakers with Design Enhancements | 450 |
| 98 | Iterative Availability Assessment Approach for Multi-Feeder Industrial Energy System Sections | 456 |
| 99 | Distribution System Reliability Evaluation Considering Power Quality Effects | 462 |
| 100 | Identifying high-impact operating states in power system reliability analysis | 468 |
| 101 | Transmission Security Probabilistic Techniques - Hybrid Integration of Probabilistic Methods into the Creation of Deterministic Base Cases For Transmission Planning | 474 |
| 102 | Robust Probabilistic Analysis of Transmission Power Systems based on Equivalent Circuit Formulation | 480 |
| 103 | Annual Benchmarking of Intra-facility Hydroelectric Unit Dispatch Decisions for Reliability | 486 |
| 104 | Probabilistic Reliability Assessment of Entergy transmission system | 490 |
| 105 | Effective Scenario Selection for Preventive Stochastic Unit Commitment during Hurricanes | 495 |
| 106 | Impact of Wind Speed Correlations on Probabilistic Power Flow by using the Nataf Transformation | 501 |
| 107 | On the Security of Electricity Supply in Power Distribution Systems | 507 |
| 109 | Limited-Knowledge Economic Dispatch Prediction using Bayesian Averaging of Single-Node Models | 513 |
| 110 | Probabilistic Sizing of Battery Energy Storage System in Presence of Renewable Generation | 519 |
| 111 | Optimal Scheduling of Electrolyzer in Power Market with Dynamic Prices | 525 |
| 112 | Robust Real-Time Control of Power Grids in the Presence of Communication Network Non-Idealities | 531 |
| 113 | Analytical Challenges in Reliability and Resiliency Modeling | 537 |
| 114 | Investigation of Generator Ramp Rates in High Renewable Penetration Systems using an Academic New York Network Model | 542 |
| 115 | Performance Analysis of North American AC Circuits on Common Structures using TADS and CEA Outage Statistics | 548 |
| 117 | Historical Performance Analysis of Transmission Lines Using Idaho Power Company's Outage Database GTORS | 554 |
| 118 | Method for Developing Consistent Future Energy Scenarios as Input for Transmission Expansion Planning | 560 |
| 119 | A Fast and Accurate Approximation Algorithm for Failure Frequency of Power Distribution Systems | 566 |
| 121 | Machine Learning of Factors Influencing Damping and Frequency of Dominant Inter-area Modes in the WECC Interconnect | 572 |
| 122 | Hourly-Assessment of Grid Hosting Capacity for Active Distribution Network | 578 |
| 124 | An evolutionary EM algorithm for distribution system state estimation | 585 |
| 125 | Dominant Contracting Strategies for Hydropower Projects Considering Inflow Uncertainties – Application to the Brazilian Case | 591 |
| 127 | Reliability Indices and Performance Statistics for Transmission Elements of the North American Bulk Power System | 597 |
| 128 | Probability Characterization of Wind Farm Power Output and Impact on System Reliability | 602 |
| 130 | Evaluations of Aggregators and DERs in Distribution System Operations with Uncertainties | 608 |
| 131 | Optimal Strategies for Scheduling the Hourly Demand Response Considering Uncertainties of Renewable Energy in Day-ahead Market | 614 |
| 132 | Reliability and Cost Impacts of Home Energy Management Systems | 620 |
| 133 | Time Synchronization in Wide Area Damping Control of Power Systems | 626 |

| | | |
|-----|--|-----|
| 134 | System-Level RCAM Assessment of Power Transformers Using Fuzzy Multi-Attribute Scoring Procedure | 632 |
| 135 | Analysis of the Quality of Long-term Synthetic Solar Radiation Data Generated from Stochastic Models | 638 |
| 136 | A Comparison of The Renewable Distributed Generation Models used in Reliability Assessment | 644 |
| 137 | A Two-stage Planning Strategy for Reliability Enhancement and Loss Reduction in Distribution Systems | 650 |
| 138 | Historical Data Analysis for Extending Dynamic Line Ratings Across Power Transmission Systems | 656 |
| 139 | Coherent Probabilistic Solar Power Forecasting | 662 |
| 140 | An Investigation of Potential Intermittency Induced Outage Modes for Wind Generation | 668 |
| 141 | A Study on Probabilistic Reliability of Power System including WTG for HVDC Transmission Expansion Planning | 674 |
| 144 | Power Grid Security Improvement by Remedial Action Schemes Using Vulnerability Assessment Based on Fault Chains and Power Flow | 680 |
| 146 | Security versus Computation Time in IV-ACOPF with SOCP Initialization | 686 |
| 147 | Multi Label RBF Classification Method for Composite System Reliability Evaluation | 692 |
| 148 | Using a Markov Chain Monte Carlo Technique to Simulate Synthetic Natural Inflow Energy Scenarios | 697 |
| 149 | Use of PMU-Based Framework to Improve Power System Resilience and Reliability | 703 |
| 150 | Modeling of Equipment Susceptibility in the Presence of Voltage Dip Sequences in Smart Distribution Systems | 709 |
| 151 | Impact of Input Model Accuracy on Probabilistic Load Flow Outputs | 715 |
| 152 | Hierarchical Reliability Modeling of an Islanded Hybrid ACDC Microgrid | 721 |
| 154 | Probabilistic Short-term Wind Forecasting Based on Pinball Loss Optimization | 726 |
| 155 | Effective Load Demand of Electric Vehicles in Power System Adequacy Assessment | 732 |
| 156 | Chance-constrained Service Restoration for Distribution Networks with Renewables | 737 |
| 157 | Generation and Storage Expansion Co-optimization with Consideration of Unit Commitment | 743 |
| 158 | Combining Statistical Clustering Techniques and Exploratory Data Analysis to Compute Typical Daily Load Profiles – Application to the Expansion and Operational Planning in Brazil | 749 |
| 159 | Stochastic Unit Commitment Performance Considering Monte Carlo Wind Power Scenarios | 755 |
| 161 | Impact of EV Parking Lot on Distribution System Reliability | 761 |
| 162 | An Efficient Scenario Generation Technique for Short-Term Wind Power Production | 766 |
| 163 | Analysis of Power System Mode Meters Under Various Oscillatory Conditions | 772 |
| 164 | Sample-Derived Disjunctive Rules for Secure Power System Operation | 778 |
| 166 | A New Algorithm for Reliability Assessment of Distribution System Based on Reliability Network Equivalent Technique | 784 |
| 167 | Electric Vehicle User Behavior Prediction Using Hybrid Kernel Density Estimator | 789 |
| 168 | Balancing Needs Assessment Using Advanced Probabilistic Forecasts | 795 |
| 169 | Probabilistic OPF Incorporating Uncertainties in Wind Power Outputs and Line Thermal Ratings | 801 |
| 170 | Operational Risk Impact of Flexibility Requirements and Ramp Forecast on the North American Bulk Power System | 807 |
| 171 | Correlation of Wind Speed and Wind Turbine Reliability in System Adequacy Assessment | 813 |
| 173 | Distributed Real-Time Simulations and its Applications to Wind Energy Research | 819 |
| 174 | Stochastic Scheduling of Onsite Solar Power Generation for Large Customers | 825 |
| 175 | Analysis of Energy Demand for Island Microgrids Based on Spatial-Temporal Dynamics of Moving Energy Storage | 831 |
| 176 | Probability Characterization of Solar Farm Power Output and Impact on System Reliability | 837 |
| 177 | Impact of controlled and uncontrolled charging of electrical vehicles on a residential distribution grid | 843 |
| 178 | Stochastic correlation analysis to rank the impact of intermittent wind generation on unreliability margins of power systems | 848 |
| 179 | A Study on the Generator Maintenance Scheduling Considering CO ₂ and Economical Efficiency | 854 |

182 A Statistical Approach for Line Outage Detection in Power Systems with Transient Dynamics 859

184 Sensitivity of Resource Adequacy to Sample Error in Systems with Dependent Renewable Generation 864

185 Probabilistic Reliability Planning at Idaho Power: 75-Year Buildout Transmission Strategies 870

186 Online Frequency Response Identification using Synchrophasor Data 876

187 Online Anomaly Detection Using Machine Learning and HPC for Power System Synchrophasor Measurements 882

189 Stackelberg Game Approach on Modeling of Supply Demand Behavior Considering BEV Uncertainty 887

190 Data-Driven Static Load Model Parameter Estimation with Confidence Factor 893

191 Accounting for Spatial and Temporal Variability in Electric Power Model Point-Source Emissions 899
