

Pipelines 2018

Planning and Design

Proceedings of Sessions of the Pipelines 2018 Conference

Toronto, Canada
15 – 18 July 2018

Editors:

Christopher C. Macey
Jason S. Lueke

ISBN: 978-1-5108-6815-1

Printed from e-media with permission by:

Contents

Design

Design Considerations for Water Supply Intakes on the Great Lakes.....	1
J. Warren Green	
Design Considerations for Dual 96-Inch Water Transmission Pipeline Pig Retrieval Station and Flow Distribution Basin.....	11
Dorian French, David Miller, Jonathan Howard, and Heidi Fischer	
Using Hydraulic Modeling Software to Design, Plan, Optimize, and Operate a 200,000 BPD Produced Water Gathering System	20
Jonathan Faughtenberry	
Improving Infrastructure Resilience through Design and Construction Standards: Twinning of the East Brampton Trunk Sewer—The Construction Experience	33
Mark Belanger, Brandon Gorr, Olena Gordiyenko, Simon Hopton, and Seamus Tynan	
Abandoned Coal Mines Make for Challenging HDD Design and Installation.....	39
Jason Lueke, Amber McQuarrie, Patrick Bain, Renato Clementino, Niels Rasmussen, Tamer Elshimi, and Christopher Lamont	
Testing the Modified Iowa Formula to Calculate the Deflection of Two Flexible Pipes Buried in Sand into One Trench under Live Loads.....	50
Alaa Abbas, Felicite Ruddock, Rafid Alkhaddar, Glynn Rothwell, and Robert Andoh	
Bridge Crossing Piping System Design Using Welded Steel Pipe or Ductile Iron Pipe	60
Brett P. Simpson	
Design and Construction of the South Hartford CSO Tunnel	69
James Sullivan and Andrew Perham	
Riser Pipe and Port Design for the Toronto Ashbridges Bay Treatment Plant Outfall	81
Kevin Waher, Graeme Henderson, Colleen Gammie, Justyna Kempa-Teper, and Vlad Petran	
WISE Local Infrastructure Project in the Town of Castle Rock Demanded a Unique Set of Design and Construction Solutions	91
Michael Lehrburger, Matthew D. Gallagher, and Marvin Lee	

New Transmission Watermain Specifications—City of Toronto	100
Henry W. Polvi, Prapan Dave, Chad Stephen, and Stewart Dickson	
Pipe Dynamic Load Analysis for Transient Multiphase Flow	111
David Cheng, Mohan Rathinasabapathy, and Sukanta Bhattacharjee	
The New Interactive AWWA M11—Flange Bolt Torque Calculator—A Technical Guide to Its Background, Relevance, and Use.....	122
John H. Bambei Jr., Elizabeth S. Ralph, David Lay, and Brent D. Keil	
Innovative Steel Casing Pipe Installation Using Mechanical Interlocking Joints	128
Brent Keil, Robert Card, and Trevor Gonterman	
How DC Water Created an In-House Design Team.....	138
William Elledge	
Pipe Considerations for Deep St. Louis LMRDP CSO Tunnel Dewatering Pump Station	148
Cale Underberg, Jeffrey Gratzner, Rebecca Elwood, and Patricia Pride	
Between a Track and a Hard Place—Thrust Restraint Alternatives in a Constrained Location	157
Keith R. Bushdiecker, Jeremy M. Ross, and Michael D. Gossett	
Challenges Associated with Designing Large Diameter Feedermain Interconnections	165
Daniel Meskell, Jacek Pawlus, and Wendy Tian	
Understanding Pneumatically-Induced Hydraulic Surges and Geysers in Sewers.....	176
Anthony Margevicius	
Innovative Twin-Pipe Design to Serve Short Term and Long Term Operating Needs.....	185
Wendy Tian, Cian McDermott, and Joseph Ng	
Holistic Transient Analysis of a Large Pressure Zone	195
Eppo Eerkes	
Large Diameter Feedermain Takes Advantage of Grooved Technology	206
Chris Sundberg	
Design, Manufacture, and Microtunnel Construction Using Wet Retrieval of the 108-Inch Diameter Low Level Outlet at NYC’s Gilboa Dam.....	217
Everette Knight, Emory Chase, Richard Mielke, and Leszek Glodkowski	

Planning

Not All Projects Are Created Equal—The King County North Mercer Enatai Project Goes from 945 Alternatives to 1.....226
James Chae, Grizelda Sarria, and Sibel Yildiz

Using the Alternative Delivery CMAR Method to Reline Two 12-ft Diameter Steel Pumping Plant Discharge Pipes and Discharge Manifold Piping at the Central Arizona Project237
Jess Chism and Jim Geisbush

The Importance of Terrain Analysis for Pipeline Planning and Pipeline Asset Management245
Dennis O’Leary, Bailey Theriault, Anne Sommerville, and Mark Nixon

Breaking In: Planning Your Next Large Diameter Pipeline Shutdown256
Justin C. Reeves and J. Warren Green

The Amazing Race, Oklahoma Edition: Fast-Track Alignment Selection for a 70-Mile Pipeline.....265
Clay Herndon, Scott Maughn, and Amanda Powers

Planning for the Future: 30-Inch HDD FM Crossing of Halifax River.....274
Blake Peters, Nichole Lloyd, and Robert Tatum

Balancing Prescription and Innovation through Design-Build of a Major Recycled Water Conveyance Project284
William Wong, Jonathon P. Marshall, Kyle Rhorer, and Ryan Sellman

Negotiating and Executing High-Risk, Contractor-Proposed 30-Inch Horizontal Direction Drill along Colonial-Era, Historical Structure in Urban, Downtown Corridor293
Will Gibson, Matthew Francis, and Tim Marsh

Keys to Successful Delivery of a Design-Build Pipeline305
Gregory S. Harris, Janet L. Atkinson, and Matthew B. Carpenter

Sustainable Construction for Large Diameter Steel Pipeline on the Integrated Pipeline Project318
Jonathan D. Shirk

Which Delivery Method Is Best for Water and Wastewater Infrastructure Projects? An Analysis of Alternative Project Delivery Methods Performance328
Mounir El Asmar and Samuel T. Ariaratnam

A New Source of Water for the U.K.’s Second Largest City334
Steve MacKellar

Planning, Sequencing, and Design of Canada’s Largest CSO Project345
 Allan Rocas and Daniel Cressman

Research

**Thin-Walled Steel Fiber Reinforced Concrete Pipes Performance under
 Three-Edge Bearing Load.....355**
 Fouad T. Al Rikabi, Shad M. Sargand, Joh Kurdziel, and Husam H. Hussein

New Deep Burial Testing Facility at Queen’s University364
 Van Thien Mai, Ian Moore, and Neil Hoult

**Measurement of Ground Heave Due to Horizontal Borehole Instability
 during Horizontal Directional Drilling Experiments in Sand373**
 Haitao Lan, Ian D. Moore, and Dong Wang

**Experimental Full Scale Tests on Shallow Buried Pipes under Live
 Load Conditions384**
 Bert Bosseler, Mark Klameth, Martin Liebscher, Bernhard Falter,
 and Martin Achmus

**Two-Dimensional Analysis of Invert Paving of Deteriorated Steel
 Culverts.....397**
 Abdul Qaium Fekrat and Teruhisa Masada

**Overview of the Geometric Parameters of a Press-Fit Interlocking
 Mechanism: Experimental and FEA Analysis of Steel Pipe Joint406**
 Urso Campos, David Hall, John Matthews, Christopher Morgan,
 Shaurav Alam, and Hadi Baghi

Seismic

**Using API Line for Improved Seismic Performance of Water
 Transmission Mains.....415**
 Mike Dadik, Wayne Gresh, Mark Havekost, and Tim Collins

Creating a Seismic Resilient Pipe Network for Los Angeles.....425
 C. A. Davis

**Experimental Results of Steel Lap Welded Pipe Joints in Seismic
 Conditions.....433**
 Brent D. Keil, Fritz Gobler, Richard D. Mielke, Gregory Lucier, Gregory C. Sarvanis, and
 Spyros A. Karamanos

**Numerical Simulation of Steel Lap Welded Pipe Joint Behavior in
 Seismic Conditions444**
 Giannoula Chatzopoulou, Dimitris Fappas, Spyros A. Karamanos,
 Brent D. Keil, and Richard D. Mielke
