30th International Symposium on Superconductivity (ISS2017)

13–15 December 2017, Tokyo, Japan

Accepted papers received: 28 June 2018 Published online: 26 July 2018

Preface

30th International Symposium on Superconductivity (ISS2017)

Peer review statement

1. Physics and Chemistry

1.1 Novel materials

<u>Structural Modulation in LaO_{0.9}F_{0.1}BiSe₂ Single Crystals Revealed by Scanning</u> <u>Tunneling Microscopy/Spectroscopy</u>

N Ishida, S Demura, Y Fujisawa, S Ohta, K Miyata and H Sakata....1

Effect of non-magnetic rare earth substitution for Zr on mixed anion Zr(P, Se)₂ superconductors

K Iwakiri, T Nishio, K Kawashima, S Ishida, K Oka, H Fujihisa, Y Gotoh, A Iyo, H Ogino, H Eisaki, Y Yoshida and H Kitô.....5

Single Crystal growth of mixed anion Zr(P, Se)₂ superconductor and related materials

H Kitô, K Iwakiri, T Nishio, K Kawashima, S Ishida, K Oka, H Fujihisa, Y Gotoh, A Iyo, H Ogino, H Eisaki and Y Yoshida.....11

Electronic Structure of Novel Binary Superconductor SrGe2: A First-Principles Study

I Hase, T Yanagisawa, A Iyo, H Eisaki, Y Yoshida and K Kawashima.....16

1.2 Cuprate superconductorsexperimental studies

TEM and electron backscatter diffraction analysis (EBSD) on superconducting nanowires

A. Koblischka-Veneva, M. R. Koblischka, X. L. Zeng, J. Schmauch and U. Hartmann.....22

<u>Cu hyperfine coupling constants of HgBa₂CaCu₂O_{$6+\delta$}</u>

Yutaka Itoh, Takato Machi and Ayako Yamamoto.....30

Effects of the Ba-substitution for Sr in the Bi-2201 phase of BiPb(Sr,La)₂CuO_{6+δ}

D Hayakawa, T Watanabe, T Luo, T Kawamata, T Noji, M Kato and Y Koike.....38

Superconductivity above 100 K in the Bi-2212 phase of (Bi,Pb)₂Sr₂CaCu₂O₈

K Sugawara, C Sugimoto, T Luo, T Kawamata, T Noji, M Kato and Y Koike.....42

<u>Preparation of (11*n*) oriented $Bi_2Sr_2CaCu_2O_{8+x}$ thin films by solution methods using NdGaO₃ (100) substrates</u>

Y Yamada and T Okamoto.....46

Intermediate Phase Evolution of YBCO Superconducting Films Fabricated by Fluorine Free MOD Method

J L Zuo, Y Zhao, W Wu, J Y Chu, X Y Wu, Z W Zhang, Z Y Hong and Z J Jin.....51

Dependence of T_{c} on the *RE*-ion size in (*RE*,Ca)Ba₂Cu₃O₆

K Nakagawa, Y Sumino, H Chiba, K Kim, T Noji, M Kato and Y Koike.....58

1.3 Cuprate superconductorstheoretical studies

<u>Frequency-dependent structure of superconducting gap function in two-dimensional</u> <u>Hubbard model</u>

Shiro Sakai.....63

Phase diagram of high-temperature superconducting cuprates and pnictides

Kazuhisa Nishi.....70

Impurity-induced Mott transitions in partially filled antiferromagnetic states

Hisatoshi Yokoyama, Ryo Sato and Kenji Kobayashi.....78

Interhole correlation and phase separation in *t-J* model

Ryo Sato and Hisatoshi Yokoyama.....85

Interplay between staggered flux and *d*-wave superconducting orders in *t-t'-J* model

Kenji Kobayashi, Hisatoshi Yokoyama and Yuta Toga.....91

Optimized wave function by kinetic renormalization effect in strongly correlated region of the three-band Hubbard model

Takashi Yanagisawa, Izumi Hase, Mitake Miyazaki and Kunihiko Yamaji.....99

1.4 Iron-based superconductors

Electrotransport and magnetic measurements on bulk FeSe superconductors

T Karwoth, K Furutani, M R Koblischka, X L Zeng, A Wiederhold, M Muralidhar, M Murakami and U Hartmann.....106

Temperature insensitivity of Fermi surface in electron-doped high-temperature FeSe films on SrTiO₃

K. Shigekawa, K. Nakayama, G. N. Phan, M. Kuno, K. Sugawara, T. Takahashi and T. Sato....114

Anisotropy of critical current densities in $Ba_{1-x}K_x Fe_2As_2$ and $Ba(Fe_{1-x}Co_x)_2As_2$ with splayed columnar defects

N Ito, S Pyon, T Kambara, A Yoshida, S Okayasu, A Ichinose and T Tamegai.....119

Direct Current Measurement of Hall Effect in the Mixed State for the Iron-chalcogenide Superconductors

R. Ogawa, T. Ishikawa, M. Kawai, F. Nabeshima and A. Maeda.....125

1.5 Thin film

Anomalous Metal Interface Effect of Iron-based Superconductors

R Tajima, Y Miyamoto, T Fujii and A Matsuda.....132

Transport properties of FeSe epitaxial thin films under in-plane strain

M Kawai, F Nabeshima and A Maeda.....138

FABRICATION OF GRAIN BOUNDARY JUNCTIONS USING NdFeAs(O,F) SUPERCONDUCTING THIN FILMS

T Omura, T Matsumoto, T Hatano, K Iida and H Ikuta.....145

1.6 Vortex physics

AC Resistance of Driven Vortices of Superconductors Measured by Microwave Technique

H Kurokawa, F Nabeshima and A Maeda.....151

Paramagnetic and Glass States of a YBCO Film Containing Nanorods at Low Magnetic Fields

H Deguchi, A Harada, T Yamada, M Mito, T Horide and K Matsumoto.....157

Effects of chirality of a helical magnetic field on a superconductor

Saoto Fukui, Masaru Kato, Yoshihiko Togawa and Osamu Sato.....162

Size effects of critical temperatures and order parameter distributions under four-fold symmetry of nano-structured superconductors

Masaki Umeda, Masaru Kato and Osamu Sato.....169

Critical states in a superconducting plate: Effects of heat generation from flux motion

Shinsuke Ooi and Masaru Kato.....176

1.7 Josephson junction

<u>Fabrications of Small and High-quality Intrinsic Josephson Junctions by Combinatorial</u> Method of Ar-ion and Focused Ga-ion Etchings

Shumpei Umegai, Ayami Yamaguchi, Yoshihiro Kakizaki, Daiki Kakehi and Haruhisa Kitano.....182

Dynamics of Phase Switch in the Intrinsic Josephson Junctions Made of Bi2212 with Perfectly-stoichiometric Cation Compositions

Yuji Watabe, Shumpei Umegai, Haruka Ohnuma, Ayami Yamaguchi, Jun-ichi Shimoyama and Haruhisa Kitano.....188

2. Wires and Bulk

2.1 Coated conductors

Improvement of uniformity of I_{c} distributions in long REBCO with BMO coated conductors by in-plume PLD method

A Ibi, T Machi, K Nakaoka and T Izumi.....195

Development of Scribing Technique by using Multiple-laser Beams for Multi-filamentary Coated Conductors

Takato Machi, Akira Ibi and Teruo Izumi.....200

Development of surface planarization process using MOD-Gd-Zr-O layer

K Nakaoka, Y Takahashi, Y Usui, A Ibi, T Machi and T Izumi.....204

Angular dependence of J_c in YBCO films with *c*-axis correlated nano-rods and in-planedistributed nano-particles

T Sueyoshi, M Suenaga, T Furusawa, S Matsuyuki and T Fujiyoshi.....208

<u>Electrical Characteristics of Twisted Soldered-Stacked-Square (3S) Wires Consisting of</u> <u>HTS Narrow Tapes with 1mm Width</u>

Y S Luo, M Y Yin, Y K Zhou, M Song, N N Hu, Z Y Li, Z Hong and Z Jin.....214

AC Loss Property of Stacked REBCO Superconducting Multifilamentary Tapes under Perpendicular Magnetic Field

H Sasa, T Ito, M Iwakuma, S Miura, T Izumi, T Machi and A Ibi.....222

2.2 Joint, simulation

Superconducting joint of REBCO wires for MRI magnet

Shinichi Mukoyama, Akinobu Nakai, Hisaki Sakamoto, Shinji Matsumoto, Gen Nishijima, Mamoru Hamada, Kazuyoshi Saito and Yasuyuki Miyoshi.....229

Numerical Simulation on Coupling Current for Multifilamentary HTS Wire

T Koizumi, E Morikawa, S B Kim and H Ueda.....235

2.3 Bi-based superconducting wires

The microstructure characterization and phase composition analysis of (Bi,Pb)-2223 Ag/tapes with SnO, MgO and Ag₂O mix-doping

X Y Lu, D Yi, T Fujino and A Nagata.....241

Effects of intermediate annealing on the microstructure and transport properties of Bi-2223 wires and tapes

Xiaobo Ma, Shengnan Zhang, Zeming Yu, Guoqing Liu, Huiling Zheng, Chengshan Li, Jinshan Li and Pingxiang Zhang.....246

Effect of grinding method on the precursor powder of Bi2223 and properties of strip

G Q Liu, Q B Hao, H L Zheng, S N Zhang, X Y Xu, G F Jiao, L J Cui, P F Wang and C S Li....253

Longitudinal magnetic field effect in critical current characteristics of Bi-2223 superconducting tape

Xuan Wu and Baorong Ni.....259

2.4 Iron-based superconducting materials and wires

<u>Fabrication Process and Pressure Dependence of Critical Current Density in $Ba_{1-x}K_x$ </u> <u>Fe₂As₂ Superconducting HIP Wires</u>

Sunseng Pyon, Takahiro Suwa, Tsuyoshi Tamegai, Katsutoshi Takano, Hideki Kajitani, Norikiyo Koizumi and Satoshi Awaji.....265

Enhancement of critical current density in AgSn-sheathed (Sr,Na)Fe₂As₂ superconducting tapes

T Suwa, S Pyon, T Tamegai and S Awaji.....271

2.5 Bulk materials and their applications

History and recent progress of QMGTM and QMG bulk magnets

M Morita.....276

Collecting Ni-Sulfate Compound from Electroless Plating Waste by Magnetic Separation Technique with Use of HTS Bulk Magnets

T Oka, S Sasaki, H Sasaki, S Fukui, J Ogawa, T Sato, T Nakano, M Ooizumi, M Tsujimura and K Yokoyama.....284

Optimization of growth parameters for fabricating single grain (Gd, Dy)BCO bulk superconductors in top-seeded infiltration growth process

S Pavan Kumar Naik, M Muralidhar and M Murakami.....290

The effect of cooling rate on critical current density and microstructure of single grain bulk YBa₂Cu₃O_y superconductors grown by IG process

M. Santosh, S Pavan Kumar Naik and M. Murakami.....295

Trapping Large Magnetic Field by Suppression of Thermomagnetic Instability in Coated Conductor Stacks

T Hashimoto, S Pyon and T Tamegai.....300

Effects of SPS pressure on the mechanical properties of high packing ratio bulk MgB₂ superconductor

A Murakami, A Iwamoto and J G Noudem.....305

Flux Pinning and Superconducting Properties of MgB₂-Diamond Nanocomposites

J Longji Dadiel, M Muralidhar and M Murakami.....313

3. Electronic Devices

3.1 Detectors

Evaluation of YBa₂Cu₃O_{7-δ}-based microwave kinetic inductance detectors with rewound spiral resonators

K Sato, S Ariyoshi, S Negishi, S Hashimoto, H Mikami, K Nakajima and S Tanaka.....318

Neutron signal features of Nb-based kinetic inductance detector with ¹⁰B convertor

Yuya Miki, Hiroyuki Yamaguchi, Yuki Iizawa, Hiroaki Shishido, Kenji M Kojima, Kenichi Oikawa, Masahide Harada, Shigeyuki Miyajima, Mutsuo Hidaka, Takayuki Oku, Kazuhiko Soyama and Takekazu Ishida.....325 Electrodynamic theory for the operation principle of a superconducting kinetic inductance stripline detector

T Koyama and T Ishida.....331

Physical characteristics of delay-line current-biased kinetic inductance detector

Yuki Iizawa, Hiroyuki Yamaguchi, Yuya Miki, Kazuma Nishimura, Hiroaki Shishido, Kenji M. Kojima, Kenichi Oikawa, Masahide Harada, Shigeyuki Miyajima, Mutsuo Hidaka, Takayuki Oku, Kazuhiko Soyama, Tomio Koyama and Takekazu Ishida.....339

3.2 SQUID

Superconducting devices based on coherent operation of Josephson junction arrays above <u>77K</u>

Boris Chesca.....349

Magnetometer based on transfer and modulation of magnetic flux using high-criticaltemperature superconductor coils

K Enpuku, M Matsuo, Y Yoshida, S Yamashita, T Sasayama and T Yoshida.....357

Constructing a Vector Scanning SQUID System

Vu The Dang, Masaki Toji, Atsuki Ito, Yoshitsugu Ninomiya, Shigeyuki Miyajima, Ho Thanh Huy, Hiroaki Shishido, Masaru Kato, Mutsuo Hidaka, Masahiko Hayashi and Takekazu Ishida.....363

3.3 High-frequency devices

A Thirty-year History of Superconducting Microwave Devices and Fundamental Studies <u>Thereof</u>

Shigetoshi Ohshima.....370

HTS Filter with Dielectric Rods for Tuning the Center Frequency and Trimming the Passband ripple

T Unno and N Sekiya.....378

3.4 Digital circuit and novel devices

A double-flux-quantum amplifier with a single flux-biasing line

Yuma Arai, Yoshiaki Urai, Tomoki Watanabe, Komei Higuchi, Hiroshi Shimada and Yoshinao Mizugaki.....385

A random-access-memory cell based on quantum flux parametron with three control lines

Hiroshi Takayama, Naoki Takeuchi, Yuki Yamanashi and Nobuyuki Yoshikawa.....393

Pico pulse response analysis of Josephson weak-link using time-dependent Ginzburg-Landau model

Shigeru Yoshimori.....400

<u>Replacement of NbN by $YBa_2Cu_3O_{7-\delta}$ in superconducting thin film coil in a spiral trench on a Si-wafer for compact SMESs</u>

Y Ichiki, K Adachi, Y Suzuki, M Kawahara, A Ichiki, T Hioki, C-W Hsu, S Kumagai, M Sasaki, J-H Noh, Y Sakurahara, O Takai, H Honma and T Motohiro.....405

4. Large Scale System Applications

4.1 Superconducting magnet technology and applications

<u>R&D of applied superconductivity by a small business: experiences and future perspective</u>

D Pooke, V Chamritski, M Christian, M Fee and T Huang.....412

Effect of electromagnetic force on a quad-pancake coil wound with a Nb₃Sn CIC conductor

T Obana, K Takahata, S Hamaguchi, H Chikaraishi, S Imagawa, T Mito, H Murakami, K Natsume and K Kizu.....419

<u>Protection System for Normal Transitions in a Single-phase Bi2223 Full Superconducting</u> <u>Transformer by the Active Power Method under Flowing Currents of Various</u> <u>Frequencies</u>

N Nanato, T Ono, T Adachi and T Yamanishi.....423

<u>High resolution locating of normal transitions in a high temperature superconducting coil</u> <u>by capacitor type voltage terminals</u>

N Nanato and H Kumagai.....430

Study on a Magnetic Flux Detection Coil for Detection of Normal Transitions in a Hybrid Single-phase Bi2223 Superconducting Transformer by the Active Power Method

N Nanato, S Tanaka and S Tenkumo.....437

Design of a high temperature superconducting magnet for a single silicon crystal growth system

V Q Dao, C K Lee, J H Choi, M Park and I K Yu.....442

Comparison of Trapped Field Characteristic of Bulk Magnet System Using Various Type Refrigerators

K Yokoyama, A Katsuki, A Miura and T Oka.....450

4.2 Electric power devices superconducting cables

Design of 23kV 50MVA class HTS Cable in South Korea

Jin Bae Na, Heo Gyung Sung, Chang Yeol Choi, YoongSeo Jang and Yang Hun.....456

Installation Design of 23kV 50MVA class HTS Cable in South Korea

Young-jin Won, Dong Cheol Koo, Joong-gu Jeon, Jae Hwan Song, Yong Hee Won, Young Woong Kim and Jin Bae Na.....465 Development of Tri-axial superconducting cable system for type test

Tasuku Kitamura, Kazuhisa Adachi, Hideo Sugane, Tatsuhisa Nakanishi, Yuji Aoki, Nobuhiro Mido, Masataka Iwakuma and Takayo Hasegawa.....473

Heat leak and pressure drop measurements of the 1000 m class superconducting DC power transmission system in Ishikari

Hirofumi Watanabe, Yury V Ivanov, Noriko Chikumoto, Satarou Yamaguchi, Kotaro Ishiyama, Zenji Oishi, Michihiko Watanabe and Takato Masuda.....481

Fluid characteristic of liquid nitrogen flowing in HTS cable

O Maruyama and T Mimura.....489

4.3 Electric power devices other applications

Three-Dimensional Thermal Analysis of an SFCL REBCO Coil Immersed in Liquid Nitrogen

Kezhen Qian, Toshiki Shiratani, Yutaka Terao and Hiroyuki Ohsaki.....496

Design and performance analysis of a 1500 A, 400 mH superconducting DC reactor coil using 2G multi-ply HTS wire

J I Lee, T K Kim, M Park and I K Yu.....504

Design and Demonstration of a Double-pancake Coil for SMES using MgB₂ Multi-strand cable

T Yagai, S Mizuno, T Okubo, S Mizuochi, M Kamibayashi, M Jinbo, T Takao, Y Makida, T Shintomi, N Hirano, T Komagome, K Tsukada, T Onji, Y Arai, M Tomita, D Miyagi, M Tsuda and T Hamajima.....512

4.4 Motors and generators

Superconducting rotating machines: A review of the past 30 years and future perspectives

T Nitta.....520

Optimal Design of a Superconducting Motor for Electric-drive Aeropropulsion Based on Finite-Element Analysis and Genetic Algorithm

Weilu Kong, Yutaka Terao and Hiroyuki Ohsaki.....527

Design and analysis of air-core superconducting generator for wind power applications

H W Cho, M Feddersen and K S Haran.....535

Structural design and heat load analysis of a flux pump-based HTS module coil for a large-scale wind power generator

O Tuvdensuren, H J Sung, B S Go, T T Le, M Park and I K Yu.....542

4.5 Magnetic separation and levitation

Numerical Simulation on Behaviour of Magnetic Beads in Magnetic Filter for Medical Protein Screening System using High Gradient Magnetic Separation

M Kubota, Y Mori, S B Kim and H Ueda.....550

Magneto-Archimedes levitation of precious metals under a high magnetic field gradient

O Miura, K Yamagishi and D Yamamoto.....557

Numerical Studies on the Dynamic Responses of Levitated High-temperature Superconductor with a Strongly Coupled Thermo-electromagnetic Model

C Q Ye, T Y Gong, G T Ma, W J Yang and Z Y Yang.....561

Levitation stability of superconducting stators with addition of a ring-shaped magnet

Muneo Futamura and Ryo Shindo.....569

Effect of vertical vibration on the stability of Side-Suspending HTS Maglev Rotating System with trimodal structure PMG

Li-Feng Zhao, Meng-Liang Yao, Lin-Bo Li, Xifeng Pan, Da-Jin Zhou, Jing Jiang, Yong Zhang and Yong Zhao.....577
