2018 IEEE International Conference on Software Quality, Reliability and Security Companion QRS-C 2018

Table of Contents

Invited Talk

Lessons Learned from Developing Permissioned Blockchains .1..... Wei-Tek Tsai (Beijing Tiande Technologies) and Lian Yu (Beijing Tiande Technologies)

Industry Track

DFT+Emulation – A Faster Way to Close Verification .1.1. *Jitendra Aggarwal (Emulation Arm Ltd.), Tran Nguyen (Emulation Arm Ltd.), and Piyush Kumar Gupta (Emulation Arm Ltd.)*

Using Software Development Artifacts to Improve the Software Development Process <u>13</u>..... Shannon Burns Conners (JMP/SAS) and Joseph Morgan (JMP)

Automated Intelligent Software Testing

An AI Software Test Method Based on Scene Deductive Approach .1.4..... Xinghan Zhao (27th Research Institute of CETC) and Xiangfei Gao (27th Research Institute of CETC)

FeT: Hybrid Cloud-Based Mobile Bank Application Testing .21 Chaonian Guo (Fujian Rural Credit Union), Shaomin Zhu (Tongji University), Tongsen Wang (Fujian Rural Credit Union), and Hao Wang (Norwegian University of Science and Technology)
Defect Prediction Based on the Characteristics of Multilayer Structure of Software Network.27 Yiwen Yang (Beihang University), Jun Ai (Beihang University), and Fei Wang (Beihang University)
A New Software Reliability Evaluation Model Based on the Probability of the Failure Mode .35 Yunqiang Yan (China Academy of Engineering Physics), Yanhong Peng (China Academy of Engineering Physics), Chang Liu (Beihang University), and Haifeng Li (Beihang University)
Design and Application of a Sikuli Based Capture-Replay Tool .42. Jin-lei Sun (Army Engineering University of PLA), Shi-wen Zhang (PLA Air Force Ordnance), Song Huang (Army Engineering University of PLA), and Zhan-wei Hui (Army Engineering University of PLA)
Full Digital Simulation Testing of Networked Embedded Software .45. Feng Gao (China Academy of Engineering Physics), Fei Deng (China Academy of Engineering Physics), Yuanqiang Yan (China Academy of Engineering Physics), and Chunlei Li (China Academy of Engineering Physics)
Automated Warship Software Testing System Based on LoadRunner Automation API .51 Xinyu Han (China State Shipbuilding Corporation), Nan Zhang (China State Shipbuilding Corporation), Wei He (China State Shipbuilding Corporation), Kai Zhang (China State Shipbuilding Corporation), and Longli Tang (China State Shipbuilding Corporation)
MURE: Making Use of MUtations to REfine Spectrum-Based Fault Localization .56 Zijie Li (Chinese Academy of Sciences), Lanfei Yan (Chinese Academy of Sciences), Yuzhen Liu (Chinese Academy of Sciences), Zhenyu Zhang (Chinese Academy of Sciences), and Bo Jiang (Beihang University)
Research on the Reuse of Test Case for Warship Equipment Software .64 Zhang Nan (China Institute of Marine Technology and Economy), Chai Haiyan (China Institute of Marine Technology and Economy), and Han Xinyu (China Institute of Marine Technology and Economy)
Metamorphic Testing of Image Region Growth Programs in Image Processing Applications .70 Chao Jiang (Army Engineering University of PLA), Song Huang (Army Engineering University of PLA), and Zhan-wei Hui (Army Engineering University of PLA)
Scenario-Based Software Reliability Testing and Evaluation of Complex Information Systems .7.3 Lijin Wu (China Institute of Marine Technology and Economy), Wei He (China Institute of Marine Technology and Economy), Bojiang Liu (China Institute of Marine Technology and Economy), Xinyu Han (China Institute of Marine Technology and Economy), and Longli Tang (China Institute of Marine Technology and Economy)
A New Method of Evolutionary Testing for Path Coverage .7.9. Qingjie Wei (Chongqing University of Posts and Telecommunications), Yijin Li (Yunnan Power Grid Co., Ltd.), and Yuheng Zhang (Chongqing University of Posts and Telecommunications)

Automatic Test Transition Paths Generation Approach from EFSM Using State Tree .87 Yuan Chen (Chinese Academy of Sciences), Anbang Wang (Chinese Academy of Sciences), Junjie Wang (Chinese Academy of Sciences), Luo Liu (CChinese Academy of Sciences), Yuanzhang Song (Chinese Academy of Sciences), and Qinghua Ha (Chinese Academy of Sciences)
Research on Software Failure Analysis and Quality Management Model .9.4 Yusong Chen (Beijing Institute of Applied Meteorology), Jianguang Chen (Beijing Institute of Applied Meteorology), Yang Gao (Beijing Institute of Applied Meteorology), Dongfeng Chen (China Satellite Launch and Tracking Control General), and Yuming Tang (China Satellite Launch and Tracking Control General)
Towards a Bayesian Network Model for Predicting Flaky Automated Tests .1.00 Tariq M. King (Ultimate Software), Dionny Santiago (Ultimate Software), Justin Phillips (Ultimate Software), and Peter J. Clarke (Florida International University)
MuNN: Mutation Analysis of Neural Networks .1.08 Weijun Shen (Nanjing University), Jun Wan (Nanjing University), and Zhenyu Chen (Nanjing University)
Fault Localization: Analyzing Covering Arrays Given Prior Information .1.16 Ryan Lekivetz (SAS Institute Inc.) and Joseph Morgan (SAS Institute Inc.)

Blockchain, Smart Contracts, and Digital Society

Blockchain and Scalability .122 Anamika Chauhan (Delhi Technological University), Om Prakash Malviya (Delhi Technological University), Madhav Verma (Delhi Technological University), and Tejinder Singh Mor (Delhi Technological University)
On the Similarities between Blockchains and Merkle-Damgård Hash Functions <u>129</u> <i>Kimmo Halunen (VTT Technical Research Centre of Finland Ltd.), Visa</i> <i>Vallivaara (VTT Technical Research Centre of Finland Ltd.), and Anni</i> <i>Karinsalo (VTT Technical Research Centre of Finland Ltd.)</i>
Smart Contracts for a Mobility-as-a-Service Ecosystem .1.3.5. Anni Karinsalo (VTT Technical Research Centre of Finland Ltd.) and Kimmo Halunen (VTT Technical Research Centre of Finland Ltd.)
A Multiple Blockchains Architecture on Inter-Blockchain Communication .1.39 Luo Kan (Beihang University), Yu Wei (Beihang University), Amjad Hafiz Muhammad (Beihang University), Wang Siyuan (Beihang University), Gao Linchao (Beijing Power Puhua Information Technology Co. Ltd.), and Hu Kai (Beihang University)
Blockchain-Based Proof of Location .146. Michele Amoretti (University of Parma), Giacomo Brambilla (University of Parma), Francesco Medioli (University of Parma), and Francesco Zanichelli (University of Parma)

Application of Blockchain to Trade Clearing .1.5.4..... Wei-Tek Tsai (Beijing Tiande Technologies), Enyan Deng (Beijing Tiande Technologies), Xiaoqiang Ding (Letv Holding), and Jie Li (Guangzhou Clearing Corporation)

Human and Social Aspects of Software Quality

Qualitative Software Reliability Requirements: Concept, Classification and Practical Elicitation Methods .164.
Cong Pan (Beihang University), Minyan Lu (Beihang University), Hong Zhang (Beihang University), and Biao Xu (Beihang University)
A Method of Optimizing Multi-Locators Based on Machine Learning .1.72 Yu Zheng (Army Engineering University of PLA), Song Huang (Army Engineering University of PLA), Zhan-wei Hui (Army Engineering University of PLA), and Ya-Ning Wu (Army Engineering University of PLA)
Research on Judicial Data Standard .1.75. Zemin Qin (State Key Laboratory of Novel Software Technology), Tieke He (State Key Laboratory of Novel Software Technology), Hao Lian (State Key Laboratory of Novel Software Technology), Yuanhan Tian (State Key Laboratory of Novel Software Technology), and Jia Liu (State Key Laboratory of Novel Software Technology)
Research on the Information Quality Measurement of Judicial Documents .1.78 Hao Lian (State Key Laboratory of Novel Software Technology), Tieke He (State Key Laboratory of Novel Software Technology), Zemin Qin (State Key Laboratory of Novel Software Technology), Haoyu Li (State Key Laboratory of Novel Software Technology), and Jia Liu (State Key Laboratory of Novel Software Technology)

Quality-Oriented Engineering

Functional Dependency Detection for Integration Test Cases .207. Sahar Tahvili (RISE SICS Västerås), Marcus Ahlberg (Royal Institute of Technology), Eric Fornander (Royal Institute of Technology), Wasif Afzal (Mälardalen University), Mehrdad Saadatmand (RISE SICS Västerås), Markus Bohlin (RISE SICS Västerås), and Mahdi Sarabi (Bombardier Transportation AB)
A Test Path Generation Method Based on SSM Models .215 Hao Lan (Southwest Jiaotong University), Yin Tong (Southwest Jiaotong University), Jin Guo (Southwest Jiaotong University), Yadong Zhang (Southwest Jiaotong University), Yao Li (Southwest Jiaotong University), and Chang Rao (Southwest Jiaotong University)
A FPGA Based SAT Solver with High Random and Concurrent Strategies .22.1 Anping He (Lanzhou University), Lvying Yu (Lanzhou University), Haitao Zhang (Lanzhou University), Lian Li (Lanzhou University), and Jinzhao Wu
A Study of the Extraction of Bug Judgment and Correction Times from Open Source Software Bug Logs .229 Seher Razzaq (City University of Hong Kong), Yan-Fu Li (Tsinghua University), Chu-Ti Lin (National Chiayi University), and Min Xie (City University of Hong Kong)
Software Component Reliability Evaluation Method Based on Characteristic Parameters .235 Renya He (China State Shipbuilding Corporation), Longli Tang (China State Shipbuilding Corporation), Xinyu Han (China State Shipbuilding Corporation), Wei He (China State Shipbuilding Corporation), and Zehui Zhao (Beihang University)
Generating Complex Paths for Testing from an EFSM .242 Ana Turlea (University of Bucharest), Florentin Ipate (University of Bucharest), and Raluca Lefticaru (University of Bradford)
A Data-Driven Smart Fault Diagnosis Method for Electric Motor .250 Xiaodong Gou (Beihang University), Chong Bian (Beihang University), Fuping Zeng (Beihang University), Qingyang Xu (Beijing Jiaotong University), Wencai Wang (Hangzhou Hollias Automation Co., Ltd.), and Shunkun Yang (Beihang University)
Simulation Design of Shop Material Supply Based on Queuing Theory .258 Shengqi Guo (Beihang University) and Min Huang (Beihang University)
Research on Network Malicious Code Detection and Provenance Tracking in Future Network .264 Lan Liu (Guangdong Polytechnic Normal University), Jun Lin (China Electronic Product Reliability and Environmental Testing Research Institute), Qiang Wang (China Electronic Product Reliability and Environmental Testing Research Institute), and Xiaoping Xu (College of Electronic and Information, Guangdong Polytechnic Normal University)

Reliability and Resilience of Complex Systems

Service Oriented Resilience Strategy for Cloud Data Center .269..... Yue Liu (Beihang University), Xiaoyang Li (Beihang University), and Lianghua Xiao (China Life Insurance Company Ltd.)

How Does Node Resilience Effect on Complex Networks? .275 Qiang Dong (Beihang University), Chong Jin (Beihang University), Ruiying Li (Beihang University), and Rui Kang (Beihang University)
Space-Based Unidirectional Networks and Resiliency .28.1 Vaughn H. Standley (National Defense University) and Edward A. Boucheron (Aerospace Corporation)
Dynamic Importance Measure for K-out-of-n System in Presence of Dependent Failure .28.7 Dong Lyu (Northwestern Polytechnical University) and Shubin Si (Northwestern Polytechnical University)
A Hybrid Method of Redundancy System Reliability Analysis Based on AADL Models .294 Yin Lu (Northwestern Polytechnical University), Yunwei Dong (Northwestern Polytechnical University), Xiaomin Wei (Northwestern Polytechnical University), and Mingrui Xiao (Northwestern Polytechnical University)
Construction of User Concurrent Profile Based on Usage Logs .30.1 Yongqiang Zhang (Beihang University), Hong Zhang (Beihang University), Cong Pan (Beihang University), and Chao Feng (Beihang University)

Cong Pan (Beihang University), And Chao Feng (Beihang University)

Software Engineering and Knowledge Management

Tracing Error Propagation in C/C++ Applications .308. Shiyi Kong (Beihang University), Minyan Lu (Beihang University), and Luyi Li (Beihang University)
Energy Optimization and Fault Tolerance to Embedded System Based on Adaptive Heterogeneous Multi-Core Hardware Architecture .316 Xing Liu (Wuhan University of Technology), Panwen Liu (Wuhan University of Technology), Xin Yan (Wuhan University of Technology), Chengming Zou (Wuhan University of Technology), Ruoshi Xia (Wuhan University of Technology), Haiying Zhou (Hubei University of Automotive Institute), Kun Mean Hou (LIMOS Laboratory), and Christophe De Vaulx (LIMOS Laboratory)
Optimum Post-Disruption Restoration Plan of Interdependent Critical Infrastructures .324 Lili Rong (Dalian University of Technology), Kesheng Yan (Dalian University of Technology), and Jingwen Zhang (Dalian University of Technology)
Research on the Impact of Consumer Review Sentiments from Different Websites on Product Sales .332
Jiangning Wu (Dalian University of Technology), Lingyu Du (Dalian University of Technology), and Yanzhong Dang (Dalian University of Technology)
A Study of Software Testing Practices in Sri Lankan Software Companies .339 Shanmuganathan Vasanthapriyan (Sabaragamuwa University of Sri Lanka)

Improved Heatmap Visualization of Pareto-Optimal Set in Multi-Objective Optimization of

Defensive Strategy .345

Erqing Li (Wuhan University of Technology), Chuangming Xia (Wuhan University of Technology), Dongdong Zhao (Wuhan University of

Technology), Liping Lu (Wuhan University of Technology), Jianwen Xiang (Wuhan University of Technology), Yueying He (CNCERT/CC), Jin Wang (CNCERT/CC), and Jiangning Wu (Dalian University of Technology)

System Reliability in Cloud Computing and Big Data

Service Reliability Oriented Modeling for the Failure of Cloud Data Center .353 Bang-An Tong (Beihang University), Xiaoyang Li (Beihang University), and Lianghua Xiao (China Life Insurance Company Ltd.)	
Predictability of Resource Intensive Big Data and HPC Jobs in Cloud Data Centres .358 Christopher B. Hauser (Ulm University), Jörg Domaschka (Ulm University), and Stefan Wesner (Ulm University)	
Bug Patterns Localization Based on Topic Model for Bugs in Program Loop .366 Yong Wang (Anhui Polytechnic University), Jun Li (Anhui Polytechnic University), Nan Yan (Anhui Polytechnic University), Weiwei Li (Nanjing University of Aeronautics and Astronautics), Yong Li (Nanjing University of Aeronautics and Astronautics), and Sanming Liu (Anhui Polytechnic University)	
Task Resource Planning and Verification Method Based on Intelligent Planning .37.1 Haiqing Wang (China Electronics Technology Group Corporation) and Peng Sun (University of Electronic Science and Technology of China)	••
An Unsupervised Parameter Grouping Algorithm for Combinatorial Testing .377 Peng Sun (University of Electronic Science and Technology of China), Xiaochuang Tang (University of Electronic Science and Technology of China), and Liang Luo (University of Electronic Science and Technology of China)	•••

Security, Reliability, and Resilience in Wireless Sensor Networks and Smart Grid

Research on Abnormal Behavior Detection Technology of Launch Vehicle Controlled Network .382.. Yang Liu (Beijing Institute of Astronautical System Engineering), Qingping Shi (Beijing Institute of Astronautical System Engineering), Xiaotao Yan (Beijing Institute of Astronautical System Engineering), Heng Zhang (Beijing Institute of Astronautical System Engineering), Hang Yi (Beijing Institute of Astronautical System Engineering), Weiqiang Xia (Beijing Institute of Astronautical System Engineering), Hongwei Ma (Beijing Institute of Astronautical System Engineering), and Jian Kang (Beijing Institute of Astronautical System Engineering),

A Complex Network Evolution Model Based on Microscopic Characteristic of Nodes .388..... Yong Wang (Harbin Engineering University), Jiahe Cui (Harbin Engineering University), Tao Zhang (Harbin Engineering University), Jing Yang (Harbin Engineering University), and Jianpei Zhang (Harbin Engineering University) A Comparative Analysis of SVM, Naive Bayes and GBDT for Data Faults Detection in WSNs .394.... Ye Yuan (Harbin Engineering University), Shouzheng Li (Harbin Engineering University), Xingjian Zhang (Harbin Engineering University), and Jianguo Sun (Harbin Engineering University)

Research on the Node Information Security of WSN Based on Multi-Party Data Fusion Algorithm .400. Hanqi Yin (Harbin Engineering University), Zhiming Yin (Harbin Engineering University), Yang Yang (Harbin Engineering University), and Jianguo Sun (Harbin Engineering University)

Industrial Wireless Sensor Network Topology Non-Uniform Node Optimization Deployment .406...... Jianguo Sun (Harbin Engineering University), Duo Liu (Harbin Engineering University), Yiqi Shi (Harbin University of Commerce), Ye Yuan (Harbin Engineering University), and Yang Yang (Harbin Engineering University)

Research on Cross-Layer Optimization of Smart Grid Demand Side Based on WSNs .414...... Yuan Ren (Harbin Engineering University), Shuyu He (Harbin Engineering University), Pengyu Hu (Harbin Engineering University), and Jianguo Sun (Harbin Engineering University)

Nonlinear Dynamic Analysis of Air Traffic Flow at Different Temporal Scales: Nonlinear Analysis Approach versus Complex Networks Approach .421..... Chao Wang (Civil Aviation University of China), Zhaoyue Zhang (Civil Aviation University of China), and Ming Zhu (Civil Aviation University of China)

Safety and Security in Cyber-Physical Systems

Lightweight Key Agreement for Wireless Sensor Networks .432. Jaruwan Mesit (Grambling State University), Matthias R. Brust (University of Luxembourg), and Pascal Bouvry (University of Luxembourg)
Information Security Considerations for Wireless Infusion Pumps .438 Pooja Rajendraprasad (Concordia University of Edmonton), Sergey Butakov (Concordia University of Edmonton), and Fehmi Jaafar (Concordia University of Edmonton)
Simulation Testing of Fault-Tolerant CPS Based on Hierarchical Adaptive Policies .443 Siyou Ma (China Academy of Engineering Physics) and Yunqiang Yan (China Academy of Engineering Physics)
Safety-Based Software Reconfiguration Method for Integrated Modular Avionics Systems in AADL Model 450.
Xiaomin Wei (Northwestern Polytechnical University), Yunwei Dong (Northwestern Polytechnical University), and Mingrui Xiao (Northwestern Polytechnical University)
Collaborative Simulation Testing with State Behavior Tree .456 Yunqiang Yan (China Academy of Engineering Physics) and Siyou Ma (China Academy of Engineering Physics)

Automatic Exploit Generation for Buffer Overflow Vulnerabilities .463
Luhang Xu (National University of Defense Technology), Weixi Jia
(National University of Defense Technology), Wei Dong (National
University of Defense Technology), and Yongjun Li (Northwestern
Polytechnical University)
Modeling and Analyzing Cyber Physical Systems Using High Level Petri Nets .469

Xudong He (Florida International University)

Guide Fuzzing with Multi-Factor Potential Analysis .477. Luhang Xu (National University of Defense Technology), Wei Dong (National University of Defense Technology), Liangze Yin (National University of Defense Technology), and Qiuxi Zhong (National University of Defense Technology)

Trustworthy Computing

Introduction of a Tool-Based Continuous Information Security Management System: An Exploratory Case Study .483 Michael Brunner (University of Innsbruck), Andrea Mussmann (University of Innsbruck), and Ruth Breu (University of Innsbruck)
A Titration Mechanism Based Congestion Model .491. Chunlin Wang (Beihang University), Ning Huang (Beihang University), Lina Sun (Beihang University), and Guoyi Wen (Beihang University)
Stateless Multiparty Trust Negotiation Protocol for Distributed Systems .497 Maha Ali Allouzi (Kent State University) and Javed Khan (Kent State University)
An Analysis of Android Malware Behavior .505. Fehmi Jaafar (Concordia University of Edmonton), Gagandeep Singh (Concordia University of Edmonton), and Pavol Zavarsky (Concordia University of Edmonton)

Verification and Validation of Adaptive Software Systems

Case Study: Adaptive Test Automation for Testing an Adaptive Hadoop Resource Manager .5.13..... Benedikt Eberhardinger (University of Augsburg), Hella Ponsar (University of Augsburg), Gerald Siegert (University of Augsburg), and Wolfgang Reif (University of Augsburg)

Adaptive System for Autonomous Driving .519.... Franz Wotawa (Technische Universität Graz) and Martin Zimmermann (Technische Universität Graz)

- An Approach for Detecting Critical Adaptations in Automated Adaptive Software Systems .526...... Shuji Morisaki (Nagoya University) and Norimitsu Kasai (Mitsubishi Electronic Co., Ltd.)
- Formal Transaction Modeling and Verification for an Adaptable Web Service Orchestration .53.1..... Sara Zatout (Constantine 2 University), Maya Souilah Benabdelhafid (Constantine 2 University), and Mahmoud Boufaida (Constantine 2 University)

Influence Maximization Algorithms Research Based on Big Graphs .537..... Guigang Zhang (Chinese Academy of Sciences) and Chuanchuan You (Chinese Academy of Sciences)

Software Engineering and Big Data

An Approach to Automatic Test Case Generation for Unit Testing .545.	
Pan Liu (Shanghai Business School), Zhenning Xu (University of	
Southern Maine), and Jun Ai (Beihang University)	

Embedded Software Fault Prediction Based on Back Propagation Neural Network .553..... Pengyang Zong (Beihang University), Yichen Wang (Beihang University), and Feng Xie (Antares Testing International Ltd.)

Personalized Recommender System for Digital Cultural Resources .559..... Shufeng Ye (Chinese Academy of Sciences and University of Chinese Academy of Sciences), Yi Yang (Chinese Academy of Sciences), Weixing Huang (Chinese Academy of Sciences), and Jian Wang (Chinese Academy of Sciences)

Tag Recommendation for Cultural Resources .566..... Zhiwen Lei (Chinese Academy of Sciences), Yi Yang (Chinese Academy of Sciences), Weixing Huang (Chinese Academy of Sciences), and Jian Wang (Chinese Academy of Sciences)

Model-Based Verification and Validation

Regular Expression Based Test Sequence Generation for HDL Program Validation .585..... Onur Kilinccceker (University of Paderborn and Mugla Sitki Kocman University), Ercument Turk (Ege University), Moharram Challenger (Ege University), and Fevzi Belli (University of Paderborn and Izmir Institute of Technology)

Cyber Resilience Economics

Mission Assurance: Beyond Secure Processing .593..... Michael Vai (Massachusetts Institute of Technology), David Whelihan (Massachusetts Institute of Technology), Jacob Leemaster (Massachusetts Institute of Technology), Haley Whitman (Massachusetts Institute of Technology), Willahelm Wan (Massachusetts Institute of Technology), Yunsi Fei (Massachusetts Institute of Technology), Roger Khazan (Massachusetts Institute of Technology), Ilia Lebedev (Massachusetts Institute of Technology), Kyle Hogan (Massachusetts Institute of Technology), and Srini Devadas (Massachusetts Institute of Technology)

Open Source Value Chains for Addressing Security Issues Efficiently .599
Arnd Weber (Karlsruhe Institute of Technology), Steffen Reith
(RheinMain University of Applied Sciences), Dirk Kuhlmann (Tilix
Ltd.), Michael Kasper (Fraunhofer Singapore), Jean-Pierre Seifert
(Technische Universität Berlin), and Christoph Krauß (Fraunhofer SIT)
Implementing Cyber Resilient Designs through Graph Analytics Assisted Model Based Systems Engineering .607.

Anurag Dwivedi (Johns Hopkins University)

Conflicts and Synergies among Reliability, Security, and Other Qualities

Emtinan Mustafa (University of Khartoum) and Rasha Osman (University of Khartoum)

Fast Abstracts

Reusable Support for Task-Based Adaptive Navigation .631 Yonglei Tao (Grand Valley State University)
A Proposal for a New Way of Classifying Network Security Metrics: Study of the Information Collected through a Honeypot .633 Alejandro Carrasco (Universidad de Sevilla), Jorge Ropero (Universidad de Sevilla), Paulino Ruiz de Clavijo (Universidad de Sevilla), Jaime Benjumea (Universidad de Sevilla), and Amalia Luque (Universidad de Sevilla)
What Software Quality Characteristics Most Concern Safety-Critical Domains? .635 Fuqun Huang (Institute of Interdisciplinary Scientists), Yichen Wang (Beihang University), Yikun Wang (Antares Testing LLC), and Pengyang Zong (Beihang University)
An AHP-Based Risk Assessment for an Industrial IoT Cloud .63.7 Yu-Lun Huang (National Chiao Tung University) and Wen-Lin Sun (National Chiao Tung University)
The Research on Optimization of Flame Tube Welding Process Reliability Based on Numerical Simulation .639 Rui Du (Beihang University), Min Huang (Beihang University), and Yu Zheng (Beihang University)

Poster Papers

A Software Defect Management System Based on Knowledge Base .652..... Haiyan Chai (China State Shipbuilding Corporation), Nan Zhang (China State Shipbuilding Corporation), Bojiang Liu (China State Shipbuilding Corporation), and Longli Tang (China State Shipbuilding Corporation)

Author Index 655
