A

- A Dual PV Panel Defects Diagnosis Using the Photovoltaic Plant Reflectometry Profile.....1*
- A Modified Fuzzy Hysteresis Controller For Shunt Active Power Filter.....6*
- a passivity-based control applied to a double cascade DC/DC converter using a fuel cell.....11*
- A SCADA compliant open source supervisory platform for power grid systems.....17*
- Aerodynamic design and 3D analysis of wind turbine rotor.....22*
- An Advanced comparative study of selforganization protocols in wireless sensor network.....28*
- An Energy-Efficient Clustering Algorithm Based on Residual Energy for Wireless Sensor Network.....34*
- An Improved Perturb and Observe Maximum Power Point Tracking Algorithm for Photovoltaic Systems.....40*
- An Optimal Speech Recognition Module for Patient's Voice Monitoring System in Smart Healthcare Applications.....46*
- Analysis of ways of solving the problem of hybrid energy complexes based on reserve for power supply of autonomous rural consumers in Myanmar.....52*
- Autonomous Collaborative Solar Home System- Public Lighting (SHS-PL) using Bin Packing algorithm in rural Off-Grid environment.....58*

B

- Backstepping with Integral Action Controller for a Solar Photovoltaic Powered Induction Motor.....64*
- Battery Charger for Electric Vehicles based ICPT and CPT - A State Of The Art.....70*

C

- Characteristics and Parameters Extracting of Subcells in Dual-Junction solar cells via Capacitance-Voltage Measurement.....76*
- Comparative study between different types of control of the wind turbine in case of voltage dips.....81*
- Cooperative Wireless Transmission for Smart Neighbor Area Networks.....86*
- Cultural Factors impacting the Global Energy Transition - A Review.....90*

D

- Defects Detection In Bi-facial Photovoltaic Modules PV Using Pulsed Thermography.....96*
- Design and Implementation of a Switched Beam Smart Antenna For Wireless Power Transfer System at 5.8GHz.....102*
- Double loop nonlinear PI-Controller Strategy of the Boost Inverter.....108*
- Drag coefficient effect on efficiency of Wave Energy Converter of Power Buoy type.....113*
- Dynamic Approach to Secure Smart City Applications (DCESA).....119*

E

- Economic intelligence a global approach to business competitiveness and the emergence of smart cities.....125*
- Energy management based fuzzy logic control of hybrid system wind/photovoltaic with batteries.....130*
- Evaluation of the Effect of Successive Approximation ADC Nonlinearity on the Measurement Error of the Phase Spectrum.....136*
- Evaluation of the LVRT Requirement for Wind Farms specified in the Moroccan Grid Code.....142*
- Evaluation of the Moroccan Electrical Grid Dynamic Stability after Large Scale Renewable Energies Integration.....147*
- Exact analytical expressions modelling effects of incident irradiance and temperature on physical parameters of photovoltaic solar module.....152*
- Experimental study of magnetic pulse generator and the field shaper effect on the current pulse.....158*
- Experimental study of the quantification of the quality of the electrical energy of a low voltage network.....163*

F

Firefly Algorithm for Solving Load Flow Problem.....168

First-order mathematical modeling of biogas production: Application for the controlled landfill of fez.....173

Flatness based control of single phase multicellular shunt active power filter for power quality improvement.....179

flooding attack on AODV IN WSN.....185

H

Heat and mass transfer in tubular adsorber of a solar adsorption cooling machine.....190

High-pressure alkaline water electrolyzer for renewable energy storage systems.....196

Hydrodynamic characteristics of an OWC device for Wave Energy Conversion.....201

I

Implementation of a Fuzzy logic controller for a BLDC motor.....206

Industrial Fish Wastewater Treatment By Electrocoagulation Processes Powered By Solar Energy.....211

Intellectual method for predicting electrical loads based on analysis of big data.....217

Islanding operation of an HTA network, Analysis of the impact of decentralized energy generation on the transient stability of an HTA distribution network.....222

M

Management Strategy of a hybrid renewable energy system.....228

Maximum Power Point Tracking in Photovoltaics: Overview and Application.....234

Microgrid Sizing with Environmental and Economic Optimization.....240

Multi-Objective Optimization for Smart Energy Grids Using Synergistic Fibroblast Optimization Algorithm.....246

N

New Use of the Photovoltaic Cells and Modules Current-Voltage Characteristic to Extract the Simple Diode Model Parameters.....252

Nonlinear Control for Three Phase Single Stage Grid Connected PV System.....257

Nonlinear Control of PV System with the Series Resonant converter.....263

Nonlinear Control Strategy of Photovoltaic System tied Three-phase Grid.....269

O

On the Problem of Power Systems Stability in presence of Photovoltaic Generator.....274

Optimal Control of Semi-Active Suspension Quarter Car Employing Magnetorheological Damper and Dahl Model.....279

Optimal Energy Exchange in Micro-Grid Networks: Cooperative Game Approach.....285

Optimal Management of Energy Flows in a Multi-Source Grid.....291

Optimization of physico-chemical parameters of hydrogen production by electrolysis of water.....297

Output Feedback Control For Wind Energy Systems.....303

Output Feedback Control of Sensorless Photovoltaic Systems, with Maximum Power Point Tracking.....309

Oxygen evolution reaction study on platinized carbon and transition metals (Ni, Co, Mn) for electrolysis of alkaline water.....315

P

Power Flow Analysis by Numerical Techniques and Artificial Neural Networks.....320

R

Reducing energy consumption by energy management and energy audits in the pumping stations.....325

Reference Speed Optimizer Controller for Maximum Power Tracking in Wind Energy Conversion System Involving DFIG.....331

S

Service Abstraction Layer for Smart Grid Measurement.....343

SGS: Load Profile Generator For Smart Grid Applications.....349

Significant Events Detection and Identification through Electrical Grid Load Profile.....355

Simple model for short-term photovoltaic power forecasting using statistical learning approach.....360

Smart and autonomous communication for hybrid energy management in smart grid.....366

Smart City concept's energy awareness assessment through sustainable development standards.....371

Smart Grid Technologies and Electricity Demand Management in KSA.....377

Spectral classification for a robust clustering in an Heterogenous Wireless Sensor Networks.....382

Speed Sensorless DTC for Three-level Inverter-Fed Induction Motor using Different Observers.....387

Standalone solar-wind-electrochemical energy systems for northern territories.....392

T

The Impact of Power Harmonics and Noise on the Measurement Error of the Frequency by Derivative Technique.....397

The socioeconomic determinants of use of Smartphones by the inhabitants of the metropolis of Casablanca.....402

U

Usage efficiency of renewable energy sources for charging passenger electric transport.....409

Use of big data technologies for the implementation of energy-saving measures and RES in buildings.....414

V

Vulnerabilities of Industrial Control Systems Outside.....419

W

Wind Parameters Estimation: Case of Mohammedia - Morocco.....424
