CONTENTS

SESSION 1 E-BOOSTING SYSTEMS, FUEL CELLS, TRANSIENT RESPONSE AND ALTITUDE PERFORMANCE, INTERACTION WITH HYBRID

	SESSION 2 COMPRESSORS: AERODYNAMICS AND FLOW ANALYSIS OF CFD, OPTIMISATION AND MULTI-PHYSICS	
CON6516/173	Turbocharger compressor development for unmanned aerial vehicles H Chen, Marine Engineering College, Dalian Maritime University, China; A Xu, GD Wang, ISEM-Tech Shanghai Ltd, China	45
CON6516/247	Analysis of a highly downsized gasoline engine operating at lambda 1 <i>M Bassett, C Vogler, J Taylor, J Hall, MAHLE Powertrain Ltd,</i> <i>Costin House, St James Mill Rd, Northampton, UK; K Gray,</i> <i>Aeristech Ltd, Unit G, Princes Drive Ind Est, Coventry Rd,</i> <i>Kenilworth, UK</i>	27
CON6516/241	Comparative system level assessment of different electric boosting architectures S Vankayala, Powertrain, Honeywell Technology Solutions Lab Pvt Ltd, India; JS Roux, D Jeckel, P Davies, Powertrain, Honeywell Garrett S.A., France; P Haug, Advance Concepts, Honeywell International Inc, USA	17
CON6516/206	Preliminary design of a partial admission turbine for waste heat recovery in fuel cells <i>T Fischer, OW Willers, JR Seume, Leibniz Universität Hannover,</i> <i>Institute of Turbomachinery and Fluid Dynamics, Germany</i>	3

CON6516/218Variable geometry compressor development to improve57operating range and efficiency for automotive turbocharger7T Fujiwara, T Bamba, R Numakura, Y Sasaki, Y Yokoyama,111IHI Corporation, Japan57

CON6516/203	Flow range of variable cross-section compressors T Fischer, T Kleine Sextro, JR Seume, Leibniz Universität Hannover, Institute of Turbomachinery and Fluid Dynamics, Germany; J Flinte, P Eilts, Technische Universität Braunschweig, Institute of Internal Combustion Engines, Germany	71
CON6516/1007	Numerical investigation of compressor wheel and inlet duct geometry influence on turbocharger compressor surge W Eißler, S Rusche, Hochschule RheinMain University of Applied Sciences, Institute for Sustainable Mobility and Energy, Germany	89
CON6516/254	On the effect of engine pulsations on the performance of a turbocharger centrifugal compressor <i>ME Barrera-Medrano, R Martinez-Botas, Imperial College London;</i> <i>I Tomita, S Ibaraki, Mitsubishi Heavy Industries Ltd.</i>	101
CON6516/161	Inducer design of centrifugal impellers HR Hazby, CJ Robinson, PCA Engineers Ltd., UK	127
CON6516/180	Further development of a high-efficiency compressor stage suited to post Euro VI emissions and fuel economy legislation RD Lotz, DN Andrews, JP McHenry, D VanSaun, JP Watson, BorgWarner Turbo Systems, USA	139
CON6516/208	Automated turbocharger compressor development at Daimler Trucks M Wöhr, M Schneid, T Palenschat, A Dillmann, M Müller, Daimler AG, Truck Turbocharger Development, Germany; V Harsha, Mercedes-Benz Research & Development India	153

SESSION 3

IMPROVED STRENGTH, FATIGUE LIFE, BEARING DESIGN AND ROTODYNAMIC AND MATERIALS

CON6516/1004	Thermal-hydraulic coupling of floating ring bearings in transient run-up simulations <i>M Baldauf, Dr S Tuzcu, Dr M Klaus, Continental AG, Germany;</i> <i>Prof. A Rienäcker, University Kassel, Germany</i>	169
CON6516/230	Reduction of on-road turbocharger sub-synchronous response using tapered and lobed bearings Z Ashton, K Bischof, BorgWarner Turbos: Core Science Bearings, USA	183
CON6516/1043	Stability optimisation of turbocharger rotor-floating ring bearing system: a combination of linear and nonlinear approaches L Tian, M Wakelin, C Lancaster, Cummins Turbo Technologies, UK; Y Lu, Wuxi Cummins Turbo Technologies, China; JM Ramamoorthy, Cummins Turbo Technologies, India	195
CON6516/232	Durability prediction technique for high rotational speed compressor wheel in automotive turbocharger K Sakamoto, Y Fujita, Mitsubishi Heavy Industries, Ltd., Japan; M Ebisu, Mitsubishi Heavy Industries Engine and Turbocharger, Ltd., Japan	207

CON6516/1036	Development of High Temperature Material Constitutive model for Thermo-Mechanical Fatigue (TMF) Loadings in Turbochargers G Rajkumar, R Kannusamy, A Kulkarni, A Kumar, Structures and Fatigue Center of Excellence, Honeywell Transportation System	217
CON6516/239	The tribological performance of coated and non-coated materials in high temperature environments <i>RF Chinchilla Adell, D Proprentner, B Shollock, WMG Warwick Manufacturing Group, University of Warwick, Coventry, UK;</i> <i>M Burkinshaw, M Lindsay, Cummins Turbo Technologies (CTT),</i> <i>Huddersfield, UK</i>	231
CON6516/227	The development of a lead-free corrosion resistant bearing system for turbocharger applications <i>M Burkinshaw, L Franks, R Quayle, Materials Engineering,</i> <i>Cummins Turbo Technologies, UK</i>	247
CON6516/1075	The application of additive manufacturing to turbomachinery C Boig, M Burkinshaw, Cummins Turbo Technologies, UK; C Boig, I Todd, University of Sheffield, UK	261
	SESSION 4 SIMULATION MODELLING, COST EFFECTIVE OPTIMISATION	
CON6516/190	Implementation of heat transfers in turbocharger models in a system simulation context T Sanguinetti, V Thomas, Siemens Industry Software S.A.S., France; P Chesse, N Perrot, Ecole Centrale de Nantes, France; V Talon, RENAULT NISSAN Alliance, France	273
	SESSION 5 TURBINE: AERODYNAMICS AND FLOW ANALYSIS OF CFD, OPTIMISATION, MULTI-PHYSICS AND T/C CHT	
CON6516/256	Multi-injection turbine housing: a novel concept for performance improvement in radial turbines H Liu, A Romagnoli, Nanyang Technological University, Singapore; MI Ismail, R Martinez-Botas, Imperial College London, London, United Kingdom; S Rajoo, MH Padzillah, Universiti Teknologi Malaysia, Johor Bahru, Malaysia	291
CON6516/193	Optimisation of wastegate bypass flow reintroduction for increased turbine stage efficiency C Hasler, Cummins Turbo Technologies – Advanced Technology Dept, England	309
CON6516/104	Optimization of nozzle vane surface treatment using multi- grooves to mitigate shock wave for a variable nozzle turbine X Shi, F Li, M Oi, School of Mechanical Engineering, Beijing Institute of Technology, Beijing, China; B Zhao, Department of Mechanical Engineering, Michigan State University, USA	321

CON6516/231	Optimization of a variable turbine geometry for turbocharging a hybrid optimized gasoline engine S Keich, F Frese, D Hagelstein, Volkswagen AG, Germany; R Baar, TU Berlin, Germany	331
CON6516/211	Improvement of Monoblock by-pass valve for sealing, controllability and catalyst light off D Marsal, Honeywell, France; F Tomanec, M Zatko, A Ondrejka, A Forbelsky, Honeywell, Czech Republic	343
CON6516/242	Validation of meanline performance prediction method for radial and mixed flow turbine Y Gao, P Petrie-Repar, Department of Energy Technology, KTH Royal Institute of Technology, Sweden	357
CON6516/214	Turbocharger turbine aerodynamic optimization for reduced fuel consumption and CO ₂ emissions from heavy-duty diesel engines: Experimental validation and flow field analysis E Ioannou, AW Costall, U Khairuddin, Imperial College London, Mechanical Engineering Dept., South Kensington Campus, London, UK; P Ramasamy, E Haigh, Industrial Power Systems Division, Caterpillar UK, Frank Perkins Way, Peterborough, UK	373
CON6516/1003	CHT-Simulation on a turbocharger turbine with resolution of the ambient convective heat flow X Gao, B Savic, R Baar, Technical University of Berlin, Germany	389
CON6516/202	Steady and transient conjugate heat transfer analysis of a turbocharger A Dimelow, Cummins Turbo Technologies – Aerodynamics Department, UK	405
CON6516/201	Performance and flow analysis of a mixed flow turbine with twin-entry nozzled volute YX Xue, MY Yang, KY Deng, Shanghai Jiao Tong University, Shanghai, China; A Romagnoli, Nanyang Technology University, Singapore; RF Martinez-Botas, Imperial College London, London, UK	425
CON6516/167	Numerical study of the quasi-steady approach applied to an asymmetric twin-scroll volute turbocharger turbine for a heavy duty diesel engine under realistic boundary conditions <i>T Palenschat, JF Cortell, P Newton, RF Martinez-Botas, Imperial</i> <i>College London, United Kingdom; T Palenschat, M Müller,</i> <i>Daimler AG, Truck Turbocharger Development, Germany; S Rajoo,</i> <i>Universiti Teknologi Malaysia, Malaysia</i>	443
CON6516/195	Aerothermodynamics and exergy analysis of a turbocharger radial turbine integrated with exhaust manifold SM Lim, M Mihaescu, Competence Center for Gas Exchange (CCGEx); A Dahlkild, M Mihaescu, Linné Flow Centre (FLOW); SM Lim, A Dahlkild, M Mihaescu, Mechanics department, KTH Royal Institute of Technology, Sweden	459

SESSION 6 NOVEL TESTING/MEASUREMENT METHODS AND VALIDATION FOR SIMULATION

CON6516/1009	Impact of the turbine flow condition of double entry turbines on the wastegate's discharge behaviour <i>M Stadermann, F Falke, Institute for Combustion Engines RWTH</i> <i>Aachen University, Germany; D Lückmann, R Aymanns,</i> <i>FEV Europe GmbH, Germany</i>	475
CON6516/132	Twin-Scroll turbocharger turbine stage evaluation of experimental data and simulations N Anton, C Fredriksson, P-I Larsson, Scania CV AB, Södertälje, Sweden; M Genrup, Lund Faculty of Engineering, Lund, Sweden; A Christiansen-Erlandsson, Royal Institute of Technology, Stockholm, Sweden	487
CON6516/1045	Compressor pressure investigation of surge onset at steady and unsteady operations of an automotive turbocharger C Avola, T Duda, P Dimitriou, R Burke, C Copeland, University of Bath, UK	503
	SESSION 7	
	SINGLE, TWO-STAGE, VTG, SUPERCHARGED, PARALLEL/SEQUENTIAL, TURBO-COMPOUND	
	WHR, EGR, CYLINDER DEACTIVATION SYSTEMS	
CON6516/196	Thermodynamic advantages and challenges of a parallel sequential twin boosting system on a high efficiency 1.0 l CNG engine <i>M Sterr, S Slavic, I Sandor, N Al-Hasan, J Ehrhard, Continental</i>	517
	Automotive GmbH; U Kramer, 1 Stump, Ford-Werke GmbH	
CON6516/243	A direct comparison among different layouts of regulated two-stage turbocharging system in a heavy duty diesel engine Gu YC, Yang MY, Deng KY, Shi L, Shanghai Jiao Tong University, Shanghai 200240, China; Yang ZH, North Engine Research Institute, Tianjin 300400, China; Wang JJ, Dongfeng Motor Corperation, Wuhan 430056, China	531
CON6516/245	Design and testing of a mechanically driven turbocharger for improved efficiency and drivability <i>R Sherrill, J Brown, T Waldron, SuperTurboTM Technologies, USA</i>	549
CON6516/114	Gasoline VTG – a new trend for gasoline Miller engines? R Christmann, M Gugau, S Weiske, BorgWarner Turbo Systems, Germany	563
CON6516/1074	Low load optimized air management for large 2-stroke engines R Ryser, C Mathey, ABB Turbo Systems Ltd., Switzerland	577

CON6516/246 Vehicle Application of a Parallel-Sequentially Turbocharged Gasoline Engine, equipped with switchable exhaust valves *H Stoffels, J Wojahn, F Brinkmann, K Grieser, K Hohenboeken, T Konieczny, C Weber, Ford-Werke GmbH*
