Table of Contents

Topic 1. Conceptual issues of construction and development of relay protection systems, emergency and regime automatics (RPA) and automation systems of electric power facilities with considering of the prospects of innovative development of the electric power industry and the creation of intelligent networks

E. Voloshin, A. Voloshin, E. Rogozinnikov	**Intelligent control system of power supply within microgrid based on personal power units**	**7**
D. Blagorazumov, A. Voloshin, E. Voloshin, N. Gracheva	**Development of the new method for transmission of current and voltage Measurements in accordance with IEC 61850 providing reduction of the traffics to the "process bus"**	**19**
E. Soldusova, V. Goldshtein, L. Inahodova, A. Kazantzev, A. Pronichev	**Analysis of distribution network regimes using innovative electrical equipment**	**33**
K. Aprosin, S. Semenenko	**New transmission line capability assessment method in emergency control tasks**	**44**
A. Voloshin, E. Voloshin, T. Busygin	**The application of artificial intelligence techniques for automatic synthesis substation configuration files in accordance with IEC 61850**	**63**
V. Tochilkin, T. Kovyrshina, M. Burmeyster	**Type-defined design and optimization of engineering activities based on the corporate type-defined technical solutions of federal grid company**	**80**
D. Bliznyuk	**Development and implementation of distribution grid control automation algorithms**	**88**

Topic 2. Development issues and methods for increasing the effectiveness of RPA systems.

D. Etingov, D. Fedosov	Analysis of restraint current forging algorithms for digital differential protection	103
E. Voloshin, A. Voloshin, S. Usachev, A. Ententeev, B. Maksudov, S. Livshits	Increase of efficiency of relay protection reliability in modes with deep saturation of current transformers using the methodology based on the application of artificial neural networks	114
V. Shuin, G. Filatova, N. Lebedeva	The analysis of efficiency of methods of distant single-phase earth fault location in cable networks	128
V. Lebedev, A. Yablokov, G. Filatova, N. Lebedeva	Specific features of digital current and voltage transformers for relay protection, automation and commercial electric power metering	143
V. Shuin, E. Vorobyeva, O. Dobryagina, T. Shadrikova	Universal earth fault protection of compensated And uncompensated cable networks of medium voltage	155

Topic 3. Increasing the accuracy of modeling processes and characteristics of network elements.

S. Popov, P. Vorona, M. Gushin	The method of creating diagnostic stands for monitoring and control tools using software and hardware modeling	172
D. Dadonov, D. Slipenchuk, A. Pronichev, E. Soldusova M. Shcerbakov	Package of measures for reliability growth of the Balakovskaya npp`s scheme of power distribution	185
E. Basharova, Yu. Piskovatskiy	Experimental investigations of complex method for detecting ice coating overhead Transmission lines on wires	202
A. Askarov, N. Ruban, M. Andreev, R. Ufa, A. Suvorov	Universal testbed for algorithm researches And setting of relay protection and automation in power systems with distributed generation and renewable energy sources	213
A.Pazderin, V. Samoylenko, V. Tashchilin, P. Chusovitin, A. Dymshakov, Yu. Ivanov	Platform for testing IEC 61850 control systems using real-time simulator	227
A. Kupchinov, A. Ovechkin, N. Smotrov, Y. Monakov	The application of supercapacitors for limitation of switching overvoltage in dc Auxiliary installations of power plants and substations	241

Topic 4. Conceptual issues of development and application of «digital substation», including the evaluation of reliability indicators.

A. Gibadullin, V. Pulyaeva, Y.Yerygin	**The need for a digital substation during the digitalization of energy**	**254**
E. Khromtsov, A. Mokeev, A. Miklashevich	**Aspects of implementation of digital substation technology in medium voltage switchgear**	**266**
A. Voloshin, E. Voloshin, N. Gracheva, Blagorazumov D.O.	**Application of multi-agent system for calculation of reliability indexes of PACS for digital substation**	**280**
A. Sokolov, O. Gazizova	**Improving the accuracy mathematical modeling of transients emergency mode industrial facilities distributed generation**	**291**

Topic 5. Application and development issues of technologies for phasor measurement of energy management parameters for management, control and protection (WAMPACS).

D. Timofeev, T. Klimova	**Analysis of possibility of using pmu based methods for providing the correct operation of distance protection**	**306**
S. Tukaev, R. Khuzyashev, I. Kuzmin	**Investigation of change of the time parameters of transient signals in the distribution grids 6 (10) kV for the problem of traveling-wave fault location**	**320**
F. Gaidamakin, R. Kadyrov R. Teploukhov	**Perspectives for the further development of monitoring system for system regulators**	**341**
D. Stepanov, T. Klimova	**Research of the possibility of using synchronized vector meter for the realization of automatic reclouser**	**353**
P. Avdonin, A. Krasnoslov, T. Klimova	**Use of measurements of the phasor measurement unit for high-speed relay protection of various energy objects**	**367**
A. Lebedev, T. Klimova	**Analysis of emergency situations in the electric power system to the data of phasor measurement unit**	**381**
A. Rodionov, D. Popov, A. Sosnin, A. Mokeev, A. Popov	**Extending functionality and application scope of synchronised phasor measurement technology**	**396**

P. Bartolomey, S. Semenenko	**Power systems state estimation acceleration on the basis of the synchronized phasor measurements in the power system steady state control tasks**	**411**

Author Index **421**
