Editor's Forward

The Journal of the Interdisciplinary Society for Quantitative Research in Music and Medicine has collected articles reflecting the diverse backgrounds of music being used as a healing art around the world, as well as the many crossing points of the disciplines of music and medicine. The ISQRMM reflects many fields joined together in the pursuit of quantitative research. This is a platform which accommodates an expanse of various disciplines under one goal - the furtherment of the ancient and living art of promoting health and wellness with music.

I am honored to have served as editor for this journal, and found both the depth and the diversity of the articles of our contributors to be fascinating. It is my hope that the contents of this journal will spark further academic and clinical research, and promote discussion and collaboration in the pursuit of healing with music.

Raymond Hong
Board Member
