24th International Conference on
FLUID SEALING
Manchester, UK: 7th – 8th March 2018

CONTENTS

FOREWORD	1
 ADVANCED MATERIALS	
Arrhenius polymer life prediction <i>E Ho, BHR Group, UK</i>	5
Assessment of leak tightness for swellable elastomeric seals considering fluid-structure interaction with the CEL approach <i>Y Gorash, University of Strathclyde, UK; A Bickley, Weir Advanced Research Centre, UK; F Gozalo, Weir Minerals, USA</i>	15
Consideration of fluid-structure interaction with the CEL approach for the FE-prediction of a blow-off pressure for an elastomeric seal <i>N Morrison, Y Gorash, R Hamilton, University of Strathclyde, UK</i>	31
Development of elastomeric materials for seals to be used in gas distribution systems <i>A Farid, ARTIS, UK</i>	47
Evaluation of compounding techniques for optimisation of sealing performance of nitrile rubbers <i>A Farid, ARTIS, UK</i>	67
Low temperature sealing – a practical guide to measurement <i>A Douglas, M Mitchell, D Edwin-Scott, European Sealing Association</i>	91
 FLANGE JOINTS & VALVES	
FEM superelement technique applied to oil and gas bolted flange connections <i>I Coria, I Martin, I Heras, M Abasolo, University of the Basque Country, Spain; A-H Bouzid, University of Quebec, Canada</i>	105
 LIP SEALS	
A new innovative design for shaft seals <i>M Stoll, N Dakov, L Hörl, F Bauer, University of Stuttgart, Germany</i>	119

Friction reduction and reliable sealing with rotating radial shaft seals <i>V Pelzer, G Poll, Leibniz Universität Hannover, Germany</i>	133
Influence of belt ground and superfinished shaft counterfaces on the tribological and functional behaviour of elastomeric lip seals <i>M Schulz, M Baumann, F Bauer, University of Stuttgart, Germany</i>	143
Multiscale simulation of a novel PTFE lip seal design <i>N Dakov, M Stoll, L Hörl, S Feldmeth, F Bauer, University of Stuttgart, Germany</i>	161

LIQUID & MECHANICAL SEALS

Effects of surface topography on sealing performance of spiral groove liquid film seal <i>W J Yang, M M Hao, H C Cao, L S Xu, Y L Wang, J M Yuan, China University of Petroleum (East China), China</i>	179
Generalization of lubricating and sealing performance using dimensionless parameters on low-friction and zero-leakage mechanical seals <i>Y Tokunaga, H Inoue, Eagle Industry Co. Ltd, Japan; J Sugimura, Kyushu University, Japan</i>	193
Influence of misalignment on full-face cavitation and steady-state performance of liquid film seals <i>Y F Li, M M Hao, Y L Wang, Z T Li, China University of Petroleum (East China), China</i>	207
Influence of taper and angular misalignment on performance of spiral groove two-phase seals <i>H C Cao, M M Hao, Y H Wang, W J Yang, China University of Petroleum (East China), China</i>	221
Influence of the fluid flow regime on the performance of water lubricated spiral groove face seals <i>M Rouillon, N Brunetière, CNRS - Université de Poitiers – ENSMA, France</i>	231
The multi-objective optimization focused on the pumping action for zero-leakage and low-friction texturing mechanical seals <i>H Suzuki, T Imura, Y Tokunaga, Eagle Industry Co. Ltd, Japan</i>	245

RECIPROCATING SEALS

Friction behaviour of contact seals in the boundary condition (stick slip) <i>M Wilke, H Jordan, Trelleborg Sealing Solutions, Germany</i>	257
One-dimensional model for the dirt ingress behaviour of wiper seals <i>F Will, J Popken, J Weber, TU Dresden, Germany</i>	265

TURBO/GAS SEALS

Bearing chamber sealing and the use of aircraft bleed air 279
S Michaelis, University of Stirling, UK

The performance of high-pressure dry gas seal influenced by the real gas
choked flow at the exit 295
H Xu, P Song, Kunming University of Science and Technology, China
