24th International Conference on

WATER JETTING

Manchester, UK 5th – 7th September, 2018

CONTENTS

FOREWORD 1

CLEANING AND SURFACE PREPARATION

Forced pulsed waterjet peening potential of VAR 300M steel for aerospace applications in comparison to conventional glass bead peening 5
A Nastic, M Yandouzi, B Jodoin, University of Ottawa, Canada;
A Tieu, M Vijay, VLN Advance Technologies Inc., Canada

Integration of jetting technology in metal additive manufacturing 23
R Pahuja, M Ramulu, University of Washington, USA; M Hashish, Flow International Corporation, USA

New metal surface produced by ultra-high-temperature and pressure cavitation 37
T Yoshimura, M Ijiri, D Shimonishi, K Tanaka, Sanyo-Onoda City University, Japan

EMERGENCY SERVICES

Technical countermeasures research on deep sea shipwreck water cutting engineering 49
S Xue, Z Chen, Q Ren, Y Wang, S Cao, C Han, D Zhang, Hefei General Machinery Research Institute, China

EQUIPMENT

Development of water-jet nozzle for ultra-high temperature and pressure cavitation 61
T Yoshimura, M Ijiri, D Shimonishi, K Tanaka, Sanyo-Onoda City University, Japan

FUNDAMENTALS

Abrasive waterjet process monitoring through acoustic and vibration signals 75
R Pahuja, M Ramulu, University of Washington, USA

Effects of particle fragmentation on performance of the abrasive waterjet 89
A Henning, P Miles, E Schubert, OMAX Corporation, USA

Flow characteristics of air-ventilated water jets under submerged condition 103
G Peng, Y Oguma, S Shimizu, Nihon University, Japan

Periodical shedding of cavitation cloud induced by a cavitating jet 111
H Kamisaka, Sugino Machine Limited, Japan; H Soyama, Tohoku University, Japan

MACHINING

3D measurements of abrasive waterjet cut surfaces 127
P Miles, A Henning, OMAX Corporation, USA

An experimental investigation of abrasive waterjet milling circular pocket of titanium alloy 143
T Sun, Y Yu, Y Yuan, X Wang, H Gao, Dalian University of Technology, China; Z Wu, Shenyang APW Technology Co., Ltd, China

Effects of abrasive waterjet trepanning on the kerf formation 155
E Uhlmann, C Männel, Technische Universität Berlin, Germany

High-pressure jet cutting with liquid CO_2 of plastics 167
E Uhlmann, P John, Technische Universität Berlin, Germany

Micromachining with abrasive waterjets – Intrinsic material properties retrained by nanosecond ablation at MHz frequency 179
D S Miller, Miller Innovations, UK

Recent advancement in abrasive waterjet for precision multimode machining 189
(Peter) H-T Liu, N Webers, OMAX Corporation, USA; V Cutler, Independent Waterjet Specialist and Glass Artist, UK

Waterjets for aeroengine applications 207
M Hashish, Flow International Corporation, USA

NUCLEAR APPLICATIONS

AWJ piercing of pressurised nuclear waste canisters 221
M Fairhurst, BHR Group, UK

Multiple applications of water jetting in the nuclear industry 229
E Ostle, A Jenkins, G Yates, Sellafield Limited, UK

The impact of ultra high pressure water jetting on the near surface microstructure of type 304L stainless steel 243
I P Nedyalkova, D L Engelberg, The University of Manchester, UK; A Jenkins, Sellafield Ltd, UK; G T W Law, The University of Manchester, UK and The University of Helsinki, Finland

AUTHOR INDEX
