# TABLE OF CONTENTS

|                                                                                                                                                       |            |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>FAULT DETECTION AND LOCATION IN POWER TRANSMISSION LINE USING CONCURRENT NEURO FUZZY TECHNIQUE.....</b>                                            | <b>1</b>   |
| <i>Patrick.S Pouabe Eboule ; Jan Harm C Pretorius ; Nhlanhla Mbuli ; Collins Leke</i>                                                                 |            |
| <b>A VERY DEEP ONE DIMENSIONAL CONVOLUTIONAL NEURAL NETWORK (VDOCNN) FOR APPLIANCE POWER SIGNATURE CLASSIFICATION .....</b>                           | <b>7</b>   |
| <i>Prajna Dash ; Kshirasagar Naik</i>                                                                                                                 |            |
| <b>CURRENT-BASED PROTECTION SCHEME FOR FAULTS WITHIN UTILITY-SCALE PHOTOVOLTAIC ARRAYS.....</b>                                                       | <b>13</b>  |
| <i>Khaled A. Saleh ; Ehab F. El-Saadany ; Hatem Zeineldin</i>                                                                                         |            |
| <b>A POWER QUALITY AND LOAD ANALYSIS OF A CRYPTOCURRENCY MINE.....</b>                                                                                | <b>19</b>  |
| <i>Keaton A. Wheeler ; Anthony W. Bowers ; Charlie H. Wong ; Jonathan Y. Palmer ; Xue Wang</i>                                                        |            |
| <b>ON THE NECESSITY OF EXOGENOUS VARIABLES FOR LOAD, PV AND WIND DAY-AHEAD FORECASTS USING RECURRENT NEURAL NETWORKS.....</b>                         | <b>25</b>  |
| <i>Henning Wilms ; Marco Cupelli ; Antonello Monti</i>                                                                                                |            |
| <b>INFLUENCE OF THE MAGNETIC BRIDGES ON THE FLUX FOCUSING TYPE AXIAL FLUX PERMANENT MAGNET MOTOR .....</b>                                            | <b>31</b>  |
| <i>Qurban Ali Shah Sved ; Ingo Hahn</i>                                                                                                               |            |
| <b>DIRECTIONAL SOLAR VARIABILITY ANALYSIS .....</b>                                                                                                   | <b>37</b>  |
| <i>Alexandre Gagné ; Nayeem Ninad ; John Adeyemo ; Dave Turcotte ; Steven Wong</i>                                                                    |            |
| <b>IMPACT OF DG ON VOLTAGE UNBALANCE IN CANADIAN BENCHMARK RURAL DISTRIBUTION NETWORKS .....</b>                                                      | <b>43</b>  |
| <i>Anastasios C. Papachristou ; Ahmed S. A. Awad ; Dave Turcotte ; Steven Wong ; Alexandre Prieur</i>                                                 |            |
| <b>MODELING OF FERRORESONANCE PHENOMENA IN MV NETWORKS .....</b>                                                                                      | <b>49</b>  |
| <i>Krzysztof Solak ; Waldemar Rebian</i>                                                                                                              |            |
| <b>MAXIMUM LIKELIHOOD PARAMETERS ESTIMATION OF SINGLE-DIODE PHOTOVOLTAIC MODULE/ARRAY: A COMPARATIVE STUDY AT STC .....</b>                           | <b>55</b>  |
| <i>Albert Ayang ; René Wamkeue ; Mohand Ouhrouche ; Boudoue Hubert Malwe</i>                                                                          |            |
| <b>TWO-FOLD INTELLIGENT APPROACH FOR SUCCESSFUL FDI ATTACK ON POWER SYSTEMS STATE ESTIMATION .....</b>                                                | <b>61</b>  |
| <i>Abdullah Sawas ; Hany E.Z. Farag</i>                                                                                                               |            |
| <b>EFFECT OF UNSTEADY SURFACE WAVE ON THE PERFORMANCE OF TIDAL IN-STREAM POWER SYSTEMS.....</b>                                                       | <b>67</b>  |
| <i>Ali Fituri ; Hamed H. Aly ; W M. E. El-Hawary</i>                                                                                                  |            |
| <b>CALCULATION OF POWER TRANSFORMER LOSSES BY FINITE ELEMENT METHOD .....</b>                                                                         | <b>71</b>  |
| <i>Saeed Mousavi ; Mahshid Shamei ; Alireza Siadatan ; Farzaneh Nabizadeh ; S.H. Mirimani</i>                                                         |            |
| <b>INVESTIGATION OF AN ENERGY EFFICIENT PUMP SPEED CONTROL ALGORITHM FOR CONTROLLING SUMP LEVEL .....</b>                                             | <b>75</b>  |
| <i>Josh Dubey ; Keith Goossen</i>                                                                                                                     |            |
| <b>A NOVEL ALGORITHM FOR PERFORMANCE IMPROVEMENT OF SOLAR PHOTOVOLTAICS UNDER PARTIAL SHADING CONDITIONS .....</b>                                    | <b>81</b>  |
| <i>M.L.A.L.H. Liyanarachchi ; M.L.A.R.L. Liyanarachchi ; S.G. Abcyratne</i>                                                                           |            |
| <b>UNCERTANTY ANALYSIS OF PROJECT EMISSIONS .....</b>                                                                                                 | <b>88</b>  |
| <i>Abdollah Abdi ; Sharareh Taahipour</i>                                                                                                             |            |
| <b>DESIGN AND FIELD IMPLEMENTATION OF A MULTI-AGENT SYSTEM FOR VOLTAGE REGULATION USING SMART INVERTERS AND DATA DISTRIBUTION SERVICE (DDS) .....</b> | <b>94</b>  |
| <i>Shivam Saxena ; Nader A. El-Taweel ; Hany E. Farag ; Leigh St. Hilaire</i>                                                                         |            |
| <b>MICROGRID FEASIBILITY STUDY FOR FUTURE SMART COMMUNITIES: A CASE STUDY FOR LONDON, ONTARIO .....</b>                                               | <b>100</b> |
| <i>Elham Akhavan Rezai ; Gary Stevens ; Ehab F. El-Saadany</i>                                                                                        |            |
| <b>CHALLENGES IN ASSURING SECURITY AND RESILIENCE OF ADVANCED METERING INFRASTRUCTURE .....</b>                                                       | <b>106</b> |
| <i>Jason Jaskolka</i>                                                                                                                                 |            |
| <b>INCREASING RENEWABLE ENERGY PENETRATION THROUGH STRATEGIC DEPLOYMENT OF IOT DEVICES .....</b>                                                      | <b>112</b> |
| <i>Terri Chu ; Alejandro Mayoral-Banos ; Stephen Chen ; Riad Hartani</i>                                                                              |            |
| <b>ENERGY-EFFICIENT MOTION PLANNING FOR ELECTRICAL DRIVES.....</b>                                                                                    | <b>117</b> |
| <i>Sara Hosseini ; Ingo Hahn</i>                                                                                                                      |            |

|                                                                                                                                            |            |
|--------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>BUS-ANGLE DIFFERENCE STRUCTURAL CUTS FOR TRANSMISSION SYSTEM EXPANSION<br/>PLANNING WITH L-L RELIABILITY .....</b>                      | <b>124</b> |
| <i>Laura M. Escobar ; Adolfo R. Escobedo ; David Escobar ; Rubén Romero</i>                                                                |            |
| <b>POSSIBLE APPROACHES TO TRADE NON-ELECTRIC ENERGY SOURCES IN THE NEXT<br/>GENERATION SMART GRIDS .....</b>                               | <b>130</b> |
| <i>Ali R. Al-Roomi ; Mohamed E. El-Hawary</i>                                                                                              |            |
| <b>CAN LINEAR HEAT SENSORS BE A GOOD AND PRACTICAL REPLACEMENT OF<br/>TRADITIONAL PROTECTIVE FUSES? .....</b>                              | <b>136</b> |
| <i>Ali R. Al-Roomi ; Mohamed E. El-Hawary</i>                                                                                              |            |
| <b>HOW TO IMPROVE LINEAR FUEL-COST FUNCTION TO COMPETE WITH QUADRATIC<br/>AND CUBIC FUNCTIONS .....</b>                                    | <b>142</b> |
| <i>Ali R. Al-Roomi ; Mohamed E. El-Hawary</i>                                                                                              |            |
| <b>STABILITY ANALYSIS OF A HYBRID MODULAR MULTILEVEL VOLTAGE SOURCE<br/>CONVERTER.....</b>                                                 | <b>148</b> |
| <i>Charithri Nanayakkara Yapa ; Udaya D. Annakkage ; Shaahin Filizadeh</i>                                                                 |            |
| <b>A UTILITY MAXIMIZED DEMAND-SIDE MANAGEMENT FOR AUTONOMOUS MICROGRID .....</b>                                                           | <b>154</b> |
