2018 25th Australasian Software Engineering Conference (ASWEC) **ASWEC 2018**

Table of Contents

Message from the ASWEC 2018 Full Research Paper Program Committee Chairs viii	
ASWEC 2018 Full Research Paper Program Committee ix	
Message from the ASWEC 2018 Short Research Paper Program Committee Chairs _xi	
ASWEC 2018 Short Research Paper Program Committee xii	

Source Code Analysis

Towards Understanding Programs by Counting Objects .1 Ewan Tempero (University of Auckland) and Paul Ralph (University of Auckland)
Engineering Interactive Systems with Model-Driven Code Contracts .1.1 Judy Bowen (University of Waikato) and Steve Reeves (University of Waikato)
Generating Pseudo-Code from Source Code Using Deep Learning .21 Abdulaziz Alhefdhi (University of Wollongong), Hoa Khanh Dam (University of Wollongong), Hideaki Hata (Nara Institute of Science and Technology), and Aditya Ghose (University of Wollongong)
Symbolic Execution with Invariant Inlay: Evaluating the Potential .26 Eman Alatawi (University of Melbourne & Taibah University), Tim Miller (University of Melbourne), and Harald Sondergaard (University of

Melbourne)

Requirements Engineering

Semi-Automated Extraction of New Requirements from Online Reviews for Software Product Evolution 31
Jim Buchan (Auckland University of Technology), Muneera Bano (Swinburne University of Technology), Didar Zowghi (University of Technology Sydney), and Phonephasouk Volabouth (Auckland University of Technology)
Psychologically-Driven Requirements Engineering: A Case Study in Depression Care .41 Eman Alatawi (University of Melbourne & Taibah University), Antonette Mendoza (University of Melbourne), and Tim Miller (University of Melbourne)
Evaluating an Open Learner Model Visualisation Prototype Tool with User eXperience Metrics.51. Law Check Yee (Multimedia University, Malaysia), John Grundy (Monash University), Karola von Baggo (Swinburne University of Technology),

Andrew Cain (Deakin University), and Rajesh Vasa (Deakin University)

From User Stories to Use Case Scenarios towards a Generative Approach .61 Fabian Gilson (University of Canterbury) and Calum Irwin (University of Canterbury)
Automating Developers' Responses to App Reviews .66 Georgia Greenheld (University of Otago), Bastin Tony Roy Savarimuthu (University of Otago), and Sherlock A. Licorish (University of Otago)
Testing and Quality
A Perception of the Practice of Software Security and Performance Verification .7.1 Victor Vidigal Ribeiro (Federal University of Rio de Janeiro), Daniela Soares Cruzes (SINTEF Digital), and Guilherme Horta Travassos (Federal University of Rio de Janeiro)
Preliminary Evaluation of a Guided Usability Defect Report Form .81 Nor Shahida Mohamad Yusop (Universiti Teknologi MARA), John Grundy (Monash University), Jean-Guy Schneider (Swinburne University of Technology), and Rajesh Vasa (Deakin University)
Monitoring Informed Testing for IoT .91. Ahmed Abdullah (RMIT University), Heinz Schmidt (RMIT University), Maria Spichkova (RMIT University), and Huai Liu (Victoria University)
Metamorphic Testing for Machine Translations: MT4MT .96 Zhi Quan Zhou (University of Wollongong) and Liqun Sun (University of Wollongong)

Architecture and Design 2

 ADSL: An Embedded Domain-Specific Language for Constraint-Based Distributed Self-Management .1.01 Mohan Baruwal Chhetri (Swinburne University of Technology), Hien Luong (Swinburne University of Technology), Anton V. Uzunov (Defence Science and Technology Group), Quoc Bao Vo (Swinburne University of Technology), Ryszard Kowalczyk (Swinburne University of Technology), Surya Nepal (Data61), and Isuru Rajapakse (Swinburne University of Technology)
Challenges and Experiences with Applying Microsoft Threat Modeling in Agile Development Projects .1.1 Daniela Soares Cruzes (SINTEF Digital), Martin Gilje Jaatun (SINTEF Digital), Karin Bernsmed (SINTEF Digital), and Inger Anne Tøndel (Norwegian University of Science and Technology)
Driver Generation for Java EE Web Applications .121 Jens Dietrich (Victoria University of Wellington), François Gauthier (Oracle Labs Australia), and Padmanabhan Krishnan (Oracle Labs Australia)
Revealing Implicit Correspondence between Bytecode Instructions and Expressions Determined by Java Compilers .126 <i>Izuru Kume (Nara Institute of Science and Technology), Masahide</i> <i>Nakamura (Kobe University), and Naoya Nitta (Konan University)</i>

Software Engineering in Practice

Missing Clean Code Acceptance and Support in Practice - An Empirical Study .1.3.1 Paula Rachow (University of Hamburg), Sandra Schröder (University of Hamburg), and Matthias Riebisch (University of Hamburg)
Code Reuse in Stack Overflow and Popular Open Source Java Projects .1.4.1 Adriaan Lotter (University of Otago), Sherlock A. Licorish (University of Otago), Bastin Tony Roy Savarimuthu (University of Otago), and Sarah Meldrum (University of Otago)
Formal in the Informal: A Multi-Level Analysis of Core Python Developers' Tweets .1.5.1 Muhammad Yasir (University of Otago), Kevin Michael (University of Otago), Bastin Tony Roy Savarimuthu (University of Otago), and Sherlock A. Licorish (University of Otago)
Experience Building IT Infrastructure for Research with Online Youth Mental Health Tools .1.6.1 Jim Warren (University of Auckland), Ewan Tempero (University of Auckland), Ian Warren (University of Auckland), Anjuka Sathianathan (University of Auckland), Sarah Hopkins (University of Auckland), Matthew Shepherd (University of Auckland), and Sally Merry (University of Auckland)
Automated Analysis of the Impact of Weather Conditions on Medicine Consumption .1.6.6 Maria Spichkova (RMIT University)
How Is Logging Practice Implemented in Open Source Software Projects? A Preliminary Exploration .1.7.1 Guoping Rong (Nanjing University), Shenghui Gu (Nanjing University), He Zhang (Nanjing University), Dong Shao (Nanjing University), and Wanggen Liu (Transwarp Technology Co., Ltd.)

Architecture and Design 1

Application of Design Patterns for Structural Alignment in Software Porting .1.81 Tilmann Stehle (University of Hamburg) and Matthias Riebisch (University of Hamburg)
Developing Cross-Organisational Service-Based Software Systems through Decentralised Interface-Oriented Continuous Integration .1.9.1. Jameel Almalki (Flinders University) and Haifeng Shen (Flinders University)
Using Blog Articles in Software Engineering Research: Benefits, Challenges and Case–Survey Method .201. Austen Rainer (University of Canterbury) and Ashley Williams (University of Canterbury)
Identification of Technology Features to Understand and Maintain Software Architectures .210 Sebastian Gerdes (University of Hamburg), Tobias Fechner (University of Hamburg), and Matthias Riebisch (University of Hamburg)
