PROCEEDINGS OF SPIE

Detection and Sensing of Mines, Explosive Objects, and Obscured Targets XIX

Steven S. Bishop Jason C. Isaacs Editors

5–7 May 2014 Baltimore, Maryland, United States

Sponsored and Published by SPIE

Volume 9072

Proceedings of SPIE 0277-786X, V. 9072

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering
- system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

ix Conference Committee

SESSION 1 SONAR AND ACOUSTIC VIBRATION MEASUREMENT I

- 9072 03 **Representational learning for sonar ATR** [9072-2] J. C. Isaacs, Naval Surface Warfare Ctr. Panama City Div. (United States)
- 9072 04 Automated change detection for synthetic aperture sonar [9072-3]
 T. G-Michael, B. Marchand, J. D. Tucker, D. D. Sternlicht, Naval Surface Warfare Ctr. Panama City Div. (United States); T. M. Marston, Univ. of Washington (United States); M. R. Azimi-Sadjadi, Colorado State Univ. (United States)
- 9072 05 **Feature based recognition of submerged objects in holographic imagery** [9072-4] C. R. Ratto, N. Beagley, K. C. Baldwin, K. R. Shipley, W. I. Sternberger, Johns Hopkins Univ. Applied Physics Lab. (United States)
- 9072 06 **Target detection and identification using synthetic aperture acoustics** [9072-5] M. Knox, S. Tantum, L. Collins, Duke Univ. (United States)

SESSION 2 SONAR AND ACOUSTIC VIBRATION MEASUREMENT II

9072 08 A novel algorithm for buried target detection evaluated on a collection of seismo-acoustic data [9072-7]
 J. M. Malof, M. Knox, P. A. Torrione, L. M. Collins, K. D. Morton Jr., Duke Univ. (United States)

SESSION 3 EMI I

9072 09	High to very high frequency metal/anomaly detector [9072-8] D. C. Heinz, U.S. Army CERDEC Intelligence and Information Warfare Directorate (United States); M. L. Brennan, CACI International Inc. (United States); M. B. Steer, North Carolina State Univ. (United States); A. W. Melber, J. T. Cua, U.S. Army CERDEC Intelligence and Information Warfare Directorate (United States)
9072 0A	Homemade explosives in the subsurface as intermediate electrical conductivity materials: a new physical principle for their detection [9072-9] S. A. Grant, B. E. Barrowes, U.S. Army Engineer Research and Development Ctr. (United States); F. Shubitidze, Dartmouth College (United States); S. A. Arcone, U.S. Army Engineer Research and Development Ctr. (United States)
9072 OB	The magnetic polarizability of thin shells [9072-10] J. E. Gabbay, W. R. Scott Jr., Georgia Institute of Technology (United States)

- 9072 0C Experimental detection and discrimination of buried targets using an improved broadband CW electromagnetic induction sensor [9072-11]
 W. R. Scott Jr., G. D. Larson, C. E. Hayes, J. H. McClellan, Georgia Institute of Technology (United States)
- 9072 0D Implementation of optimized electromagnetic induction coils [9072-12] M. A. Reed, W. R. Scott Jr., Georgia Institute of Technology (United States)

SESSION 4 EMI II

9072 OE Optimizing electromagnetic induction sensors for dynamic munitions classification surveys [9072-13]

J. S. Miller, J. Keranen, G. Schultz, White River Technologies, Inc. (United States)

- 9072 OF Automatic classification of unexploded ordnance applied to live sites for MetalMapper sensor [9072-14]
 J. B. Sigman, K. O'Neill, Dartmouth College (United States); B. Barrowes, U.S. Army Engineer Research and Engineering Ctr. (United States); Y. Wang, F. Shubitidze, Dartmouth College
- 9072 0G A combined joint diagonalization-MUSIC algorithm for subsurface targets localization [9072-15]
 Y. Wang, J. B. Sigman, Dartmouth College (United States); B. E. Barrowes, K. O'Neill, Dartmouth College (United States) and U.S. Army Engineer Research and Development Ctr. (United States); F. Shubitidze, Dartmouth College (United States)

SESSION 5 EMI III

(United States)

9072 0H Acquisition and processing of advanced sensor data for ERW and UXO detection and classification [9072-16]

G. M. Schultz, J. Keranen, J. S. Miller, F. Shubitidze, White River Technologies, Inc. (United States)

9072 01 Detecting and classifying small and deep targets using improved EMI hardware and data processing approach [9072-17]

F. Shubitidze, Dartmouth College (United States) and White River Technologies, Inc. (United States); B. E. Barrowes, Dartmouth College (United States) and U.S. Army Engineer Research and Engineering Ctr. (United States); J. B. Sigman, Y. Wang, Dartmouth College (United States); I. Shamatava, White River Technologies, Inc. (United States) and Dartmouth College (United States); K. O'Neill, Dartmouth College (United States)

9072 0J Advanced EMI models for survey data processing: targets detection and classification [9072-18]

F. Shubitidze, Dartmouth College (United States) and White River Technologies, Inc. (United States); J. B. Sigman, Y. Wang, Dartmouth College (United States); J. Miller, J. Keranen, White River Technologies, Inc. (United States); I. Shamatava, Dartmouth College (United States) and White River Technologies, Inc. (United States); B. E. Barrowes, Dartmouth College (United States) and U.S. Army Engineer Research and Engineering Ctr. (United States); K. O'Neill, Dartmouth College (United States)

9072 0K Multi-channel transmit/receive metal detector coil design for vehicular applications [9072-19] M. A. Yeşil, Yeditepe Univ. (Turkey); K. Yeğin, Yeditepe Univ. (Turkey) and Tubitak Land Defense Systems Group (Turkey); H. Bellikli, L. Tura, H. Nazlı, M. Dağ, Tubitak Land Defense Systems Group (Turkey)

SESSION 6 GPR I

9072 OM	Experiment design for measuring the probability of detection in remote sensing: how many objects and how many passes [9072-21] P. A. Torrione, L. M. Collins, K. D. Morton Jr., Duke Univ. (United States)
9072 ON	Improved resistive-vee dipole based arbitrary polarization antenna system for ground penetrating radar [9072-22] J. W. Sustman, W. R. Scott Jr., Georgia Institute of Technology (United States)
9072 00	Comparisons of ring resonator relative permittivity measurements to ground penetrating radar data [9072-23] M. Fishel, P. Koehn, E. Rosen, Institute for Defense Analyses (United States)
9072 OP	Physics-based deformations of ground penetrating radar signals to improve the detection of buried explosives [9072-24] R. T. Sakaguchi, K. D. Morton Jr., L. M. Collins, P. A. Torrione, Duke Univ. (United States)
9072 0Q	Target localization and signature extraction in GPR data using expectation-maximization and principal component analysis [9072-25] D. Reichman, K. D. Morton Jr., L. M. Collins, P. A. Torrione, Duke Univ. (United States)
SESSION 7	GPR II
9072 OR	A robust Bayesian approach to target detection applied to explosive threat detection in handheld ground penetrating radar data [9072-26] K. D. Morton Jr., L. M. Collins, P. A. Torrione, Duke Univ. (United States)
9072 OS	Change detection using down-looking ground penetrating radar [9072-27] E. Ayers, E. Bressler, M. Fishel, E. M. Rosen, Institute for Defense Analyses (United States)
9072 OT	Multi-band sensor-fused explosive hazards detection in forward-looking ground penetrating radar [9072-29] T. C. Havens, J. Becker, A. Pinar, T. J. Schulz, Michiaan Technoloaical Univ. (United States)
9072 OU	Hyperbolic and PLSDA filter algorithms to detect buried threats in GPR data [9072-30] D. Kalika, K. D. Morton Jr., L. M. Collins, P. A. Torrione, Duke Univ. (United States)
SESSION 8	GPR III
9072 OV	Fusion of multiple algorithms for detecting buried objects using fuzzy inference [9072-31]

A. B. Khalifa, H. Frigui, Univ. of Louisville (United States)

- 9072 0W Fusion of forward looking infrared and ground penetrating radar for improved stopping distances in landmine detection [9072-32]
 J. M. Malof, K. D. Morton Jr., L. M. Collins, P. A. Torrione, Duke Univ. (United States)
- 9072 0X Shallow depth subsurface imaging with microwave holography [9072-33] A. Zhuravlev, S. Ivashov, V. Razevig, I. Vasiliev, Bauman Moscow State Technical Univ.
 - (Russian Federation); T. Bechtel, Franklin and Marshall College (United States)
- 9072 0Y Deep learning algorithms for detecting explosive hazards in ground penetrating radar data [9072-34]

L. E. Besaw, P. J. Stimac, Applied Research Associates, Inc. (United States)

9072 0Z Vehicle-mounted ground penetrating radar (Mine Stalker III) field evaluation in Angola [9072-35]
 S. Laudato, K. Hart, U.S. Army Night Vision & Electronic Sensors Directorate (United States);
 M. Nevard, The HALO Trust (United Kingdom); S. Lauziere, S. Grant, NIITEK Inc. (United

SESSION 9 CHEMICAL SENSING

States)

- 9072 10 Towards eye-safe standoff Raman imaging systems [9072-36]
 M. Glimtoft, P. Bååth, Swedish Defence Research Agency (Sweden); H. Saari,
 J. Mäkynen, A. Näsilä, VTT Technical Research Ctr. of Finland (Finland); H. Östmark, Swedish Defence Research Agency (Sweden)
- 9072 11 An excimer-based FAIMS detector for detection of ultra-low concentration of explosives
 [9072-37]
 A. A. Chistyakov, G. E. Kotkovskii, A. V. Sychev, National Research Nuclear Univ. (Russian

Federation); A. N. Perederiy, Moscow State Technical Univ. (Russian Federation); V. L. Budovich, D. V. Budovich, Chromdet Analytical Instruments Ltd. (Russian Federation)

 9072 12 Filter-based chemical sensors for hazardous materials [9072-38]
 K. J. Major, The Univ. of North Carolina at Charlotte (United States); K. J. Ewing, U.S. Naval Research Lab. (United States); M. K. Poutous, The Univ. of North Carolina at Charlotte (United States); J. S. Sanghera, U.S. Naval Research Lab. (United States); I. D. Aggarwal, The Univ. of North Carolina at Charlotte (United States)

SESSION 10 RF AND X-RAY SENSING

9072 14 Low-cost detection of RC-IED activation signals in VHF band [9072-40] V. H. Camargo Suarez, J. I. Marulanda B., Univ. EAFIT (Colombia)

SESSION 11 LASER AND LWIR APPLICATIONS I

9072 16 Ladar-based IED detection [9072-42] P. Engström, H. Larsson, D. Letalick, Swedish Defence Research Agency (Sweden)

- 9072 17 Investigation of context, soft spatial, and spatial-frequency domain features for buried explosive hazard detection in FL-LWIR [9072-43]
 S. R. Price, D. T. Anderson, Mississippi State Univ. (United States); K. Stone, J. M. Keller, Univ. of Missouri-Columbia (United States)
- A method of evolving novel feature extraction algorithms for detecting buried objects in FLIR imagery using genetic programming [9072-44]
 A. Paino, J. Keller, M. Popescu, K. Stone, Univ. of Missouri-Columbia (United States)
- 9072 19 **Convolutional neural network approach for buried target recognition in FL-LWIR imagery** [9072-45] K. Stone, J. M. Keller, Univ. of Missouri-Columbia (United States)
- 9072 1A **Road recognition in poor quality environments for forward-looking buried object detection** [9072-46] P. Plodpradista, J. M. Keller, M. Popescu, Univ. of Missouri-Columbia (United States)

SESSION 12 LASER AND LWIR APPLICATIONS II

- 9072 1B Detection of obscured and partially covered objects using partial network matching and an image feature network-based object recognition algorithm [9072-47] J. Straub, The Univ. of North Dakota (United States)
- 9072 1C **3DLASE-M: three-dimensional lidar airborne system emulator, maritime** [9072-48] M. J. DeWeert, BAE Systems (United States)
- 9072 1D Detection of obscured targets with IR polarimetric imaging [9072-49]
 J. L. Pezzaniti, D. Chenault, Polaris Sensor Technologies, Inc. (United States); K. Gurton, M. Felton, U.S. Army Research Lab. (United States)
- 9072 1E Investigation of disturbed earth detection in the very long wavelength infrared (VLWIR) [9072-50]

K. J. Ewing, J. S. Sanghera, U.S. Naval Research Lab. (United States)
