

PROCEEDINGS OF SPIE

Advanced Etch Technology for Nanopatterning VI

Sebastian U. Engelmann

Richard S. Wise

Editors

27 February – 1 March 2017

San Jose, California, United States

Cosponsored by

Lam Research Corporation (United States)

Published by

SPIE

Volume 10149

Proceedings of SPIE 0277-786X, V. 10149

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advanced Etch Technology for Nanopatterning VI*, edited by Sebastian U. Engelmann, Richard S. Wise, Proceedings of SPIE Vol. 10149 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

PATTERNING TECHNIQUES FOR ADVANCED TECHNOLOGY NODES

10149 08	Self-aligned block technology: a step toward further scaling [10149-7]
----------	---

PATTERNING CHALLENGES IN NANOPHOTONIC STRUCTURES

10149 0D	Silicon photonics and challenges for fabrication (Invited Paper) [10149-13]
10149 0F	Reducing Line Edge Roughness in Si and SiN through plasma etch chemistry optimization for photonic waveguide applications [10149-15]

PATTERNING MATERIALS AND ETCH: JOINT SESSION WITH CONFERENCES 10146 AND 10149

10149 0H	Plasma-assisted thermal atomic layer etching of Al₂O₃ [10149-17]
10149 0I	Self-aligned quadruple patterning using spacer on spacer integration optimization for N5 [10149-18]
10149 0J	Directed self-assembly patterning strategies for phase change memory applications [10149-19]

NOVEL PLASMA PATTERNING TECHNIQUES

10149 0K	Nanoimprint, DSA, and multi-beam lithography: patterning technologies with new integration challenges (Invited Paper) [10149-20]
10149 0L	Overview of several applications of chemical downstream etching (CDE) for IC manufacturing: advantages and drawbacks versus WET processes (Invited Paper) [10149-21]
10149 0M	Study of selective chemical downstream plasma etching of silicon nitride and silicon oxide for advanced patterning applications [10149-22]

LITHO ETCH PROCESS INTERACTION: JOINT SESSION WITH CONFERENCES 10147 AND 10149

- 10149 ON **Co-optimization of lithographic and patterning processes for improved EPE performance (Invited Paper)** [10149-25]
- 10149 OO **Self-aligned blocking integration demonstration for critical sub-40nm pitch Mx level patterning** [10149-26]

PATTERNING SOLUTIONS FOR EMERGING PRODUCTS

- 10149 OQ **Guiding gate-etch process development using 3D surface reaction modeling for 7nm and beyond (Invited Paper)** [10149-36]
- 10149 OR **Plasma processing of III-V materials for energy efficient electronics applications (Invited Paper)** [10149-29]
- 10149 OS **Design and fabrication of resonator-QWIP for SF₆ gas sensor application** [10149-30]

POSTER SESSION

- 10149 OT **Spin-on metal oxide materials for N7 and beyond patterning applications** [10149-8]
- 10149 OU **Improvement of a block co-polymer (PS-b-PDMS) template etch profile using amorphous carbon layer** [10149-24]
- 10149 OX **A method to accelerate creation of plasma etch recipes using physics and Bayesian statistics** [10149-33]
- 10149 OY **The line roughness improvement with plasma coating and cure treatment for 193nm lithography and beyond** [10149-34]
- 10149 OZ **The application of advanced pulsed plasma in Fin etch loading improvement** [10149-35]
- 10149 IO **Facile fabrication of Si-based nanostructures** [10149-37]
