SPIE

**Volume 10202**

Proceedings of SPIE 0277-786X, V. 10202

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Automatic Target Recognition XXVII*, edited by Firooz A. Sadjadi, Abhijit Mahalanobis, Proceedings of SPIE Vol. 10202 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

<b>SESSION 1</b>	<b>ADVANCED PROCESSING METHODS FOR ATR I</b>
10202 02	<b>Robust fusion-based processing for military polarimetric imaging systems</b> [10202-1]
10202 03	<b>Efficient generation of image chips for training deep learning algorithms</b> [10202-2]
10202 04	<b>Radiometric features for vehicle classification with infrared images</b> [10202-3]
10202 06	<b>Open set recognition of aircraft in aerial imagery using synthetic template models</b> [10202-5]
<b>SESSION 2</b>	<b>LEARNING METHODS IN ATR</b>
10202 08	<b>Combining high-speed SVM learning with CNN feature encoding for real-time target recognition in high-definition video for ISR missions</b> [10202-7]
10202 09	<b>Deep learning based multi-category object detection in aerial images</b> [10202-8]
10202 0A	<b>Person re-identification across aerial and ground-based cameras by deep feature fusion</b> [10202-9]
10202 0B	<b>Probabilistic SVM for open set automatic target recognition on high range resolution radar data</b> [10202-10]
10202 0C	<b>Infrared image segmentation based on region of interest extraction with Gaussian mixture modeling</b> [10202-11]
<b>SESSION 3</b>	<b>ADVANCED SYSTEMS FOR ATR</b>
10202 0D	<b>Enhancement of thermal imagery using a low-cost high-resolution visual spectrum camera for scene understanding</b> [10202-12]
10202 0E	<b>Target recognition and phase acquisition by using incoherent digital holographic imaging</b> [10202-13]
10202 0F	<b>Key features for ATA / ATR database design in missile systems</b> [10202-14]
10202 0G	<b>A data set for evaluating the performance of multi-class multi-object video tracking</b> [10202-15]

---

**SESSION 4     ADVANCED PROCESSING METHODS FOR ATR II**

---

- 10202 0H     **Underwater image mosaicking and visual odometry** [10202-16]
- 10202 0I     **Motion-seeded object-based attention for dynamic visual imagery** [10202-17]
- 10202 0J     **Fast Legendre moment computation for template matching** [10202-18]
- 10202 0K     **Automatic threshold selection for multi-class open set recognition** [10202-19]
- 10202 0L     **Automatic small target detection in synthetic infrared images** [10202-20]
- 10202 0M     **Physics-based modeling tool development for spectral-sensing measurements under atmospheric attenuation** [10202-21]

---

**SESSION 5     ADVANCED SIGNAL EXPLOITATION METHODS**

---

- 10202 0O     **THz identification and Bayes modeling (Invited Paper)** [10202-25]
- 10202 0P     **Object shape extraction from cluttered bags (Invited Paper)** [10202-24]
- 10202 0Q     **Heterogeneous sharpness for cross-spectral face recognition (Invited Paper)** [10202-23]
- 10202 0R     **Detecting necessary and sufficient parts for assembling a functional weapon (Invited Paper)** [10202-26]
- 10202 0S     **Multi-ball and one-ball geolocation and location verification (Invited Paper)** [10202-27]
