

PROCEEDINGS OF SPIE

High-Power Lasers: Technology and Systems, Platforms, and Effects

**Harro Ackermann
Willy L. Bohn
David H. Titterton**
Editors

**13–14 September 2017
Warsaw, Poland**

*Sponsored by
SPIE*

*Cooperating Organisations
CENSIS: Innovation Centre for Sensor & Imaging Systems (United Kingdom)
Polish Technological Platform on Photonics (Poland)
MIRPHAB (France)
Photonics Society of Poland (Poland)
Cranfield University (United Kingdom)*

*Published by
SPIE*

Volume 10436

Proceedings of SPIE 0277-786X, V. 10436

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Power Lasers: Technology and Systems, Platforms, and Effects*, edited by Harro Ackermann, Willy L. Bohn, David H. Titterton, Proceedings of SPIE Vol. 10436 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

LASER ARCHITECTURES FOR POWER SCALING AND PLATFORMS

10436 02	Analysis of optical scheme for medium-range directed energy laser weapon system (Invited Paper) [10436-1]
10436 05	Tunable line width all solid state double spectral line sodium beacon laser [10436-5]

DIODE PUMPED ALKALI LASERS

10436 0B	New results for temperature rise in gain medium of operating DPAL causing its degradation (Invited Paper) [10436-12]
10436 0C	Experimental studies and modeling of static Cs DPALs: dependence of the power and beam shape on different parameters (Invited Paper) [10436-13]
10436 0D	Scaling up and controlling beam quality of flowing-gas diode pumped potassium laser with different pumping geometries: 3D CFD modeling (Best Student Paper) [10436-14]
10436 0E	Modeling of multi-transversal mode lasing in static alkali vapor lasers [10436-15]
10436 0F	Three-dimensional simulation of beam propagation and heat transfer in static gas Cs DPALs using wave optics and fluid dynamics models [10436-16]

LASER INTERACTION, EFFECTS AND COMPONENTS

10436 0G	Standoff spectroscopic interrogation of samples irradiated by high energy lasers [10436-17]
10436 0H	Investigations of high power laser beam interaction with composite materials by means of digital image correlation and thermography [10436-19]
10436 0I	High-efficiency mid-infrared optical parametric amplifier with approximate uniform rectangular pump distribution [10436-4]

POSTER SESSION

- 10436 0M **High-peak power, athermal Nd:YAG transmitter** [10436-26]
- 10436 0N **Experimental investigation of the photodarkening induced core laser leakage in a 3kW co-pumping fiber amplifier** [10436-10]
- 10436 0O **Optimization for the fiber laser source through its temporal and spectral characteristics** [10436-11]
