SPIE

Volume 10482

Proceedings of SPIE 1605-7422, V. 10482

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optogenetics and Optical Manipulation 2018*, edited by Samarendra K. Mohanty, Nitish V. Thakor, E. Duco Jansen, Proceedings of SPIE Vol. 10482 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

CONTROL I

10482 0C	Optogenetic probing of nerve and muscle function after facial nerve lesion in the mouse whisker system [10482-5]
----------	---

CONTROL II

10482 0G	Towards optogenetic control of spatiotemporal cardiac dynamics [10482-9]
----------	---

DETECTION

10482 0I	A novel fiber-free technique for brain activity imaging in multiple freely behaving mice (Invited Paper) [10482-11]
10482 0M	A compact integrated device for spatially selective optogenetic neural stimulation based on the Utah Optrode Array [10482-15]

DELIVERY

10482 0Q	Hydrogels for efficient light delivery in optogenetic applications [10482-20]
10482 0R	Light propagation analysis in nervous tissue for wireless optogenetic nanonetworks [10482-21]

MANIPULATION

10482 0V	Peripheral nerve recruitment curve using near-infrared stimulation [10482-25]
10482 0W	Development of electro-conductive silver phosphate-based glass optrodes for in vivo optogenetics [10482-26]
