Volume 10581

Proceedings of SPIE, 1605-7422, V. 10581

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Medical Imaging 2018: Digital Pathology*, edited by John E. Tomaszewski, Metin N. Gurcan, Proceedings of SPIE Vol. 10581 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Authors*

xi *Conference Committee*

xiii *Introduction*

xv *Awards*

KEYNOTE AND EMERGING TRENDS

10581 03 **Creating synthetic digital slides using conditional generative adversarial networks: application to Ki67 staining** [10581-13]

10581 04 **Single stain normalization for IHC whole slide images** [10581-14]

MACHINE LEARNING TRENDS

10581 05 **SHIFT: speedy histopathological-to-immunofluorescent translation of whole slide images using conditional generative adversarial networks** [10581-1]

10581 06 **Tumor microenvironment for follicular lymphoma: structural analysis for outcome prediction** [10581-2]

10581 07 **Deep positive-unlabeled learning for region of interest localization in breast tissue images** [10581-3]

10581 08 **An application of transfer learning to neutrophil cluster detection for tuberculosis: efficient implementation with nonmetric multidimensional scaling and sampling** [10581-4]

10581 09 **Role of training data variability on classifier performance and generalizability** [10581-5]

DIAGNOSIS, PROGNOSIS, AND PREDICTIVE ANALYSIS

10581 0A **Computational analysis of the structural progression of human glomeruli in diabetic nephropathy** [10581-6]

10581 0B **Examining structural changes in diabetic nephropathy using inter-nuclear distances in glomeruli: a comparison of variously automated methods** [10581-7]

10581 0C **Deep variational auto-encoders for unsupervised glomerular classification** [10581-8]

10581 0D **Combination of nuclear NF-κB/p65 localization and gland morphological features from surgical specimens is predictive of early biochemical recurrence in prostate cancer patients** [10581-9]

10581 0E **A bottom-up approach for tumour differentiation in whole slide images of lung adenocarcinoma** [10581-10]

10581 0F **Mitotic cells detection for HEp-2 specimen images using threshold-based evaluation scheme** [10581-11]

DETECTION AND SEGMENTATION

10581 0G **Quantifying cell-type interactions and their spatial patterns as prognostic biomarkers in follicular lymphoma** [10581-15]

10581 0H **Automated T1 bladder risk stratification based on depth of lamina propria invasion from H and E tissue biopsies: a deep learning approach** [10581-16]

10581 0I **Cancer detection in histopathology whole-slide images using conditional random fields on deep embedded spaces** [10581-17]

10581 0J **Validation of multiplex immunohistochemistry assays using automated image analysis** [10581-18]

10581 0K **Color deconvolution method with DAB scatter correction for bright field image analysis** [10581-19]

10581 0L **Automatic color unmixing of IHC stained whole slide images** [10581-20]

PRECISION MEDICINE AND GRADING

10581 0M **RaPtomics: integrating radiomic and pathomic features for predicting recurrence in early stage lung cancer** [10581-21]

10581 0N **Deformable registration of histological cancer margins to gross hyperspectral images using demons** [10581-22]

10581 0O **Localization and classification of cell nuclei in post-neoadjuvant breast cancer surgical specimen using fully convolutional networks** [10581-23]

10581 0P **Context-based interpolation of coarse deep learning prediction maps for the segmentation of fine structures in immunofluorescence images** [10581-24]

10581 0Q **Automatic cancer detection and localization on prostatectomy histopathology images** [10581-25]

POSTER SESSION

10581 0R **A watershed and feature-based approach for automated detection of lymphocytes on lung cancer images** [10581-26]

10581 0S **Automated segmentation of epithelial tissue in prostatectomy slides using deep learning** [10581-27]

10581 0T **Registration parameter optimization for 3D tissue modeling from resected tumors cut into serial H and E slides** [10581-28]

10581 0U **Determining tumor cellularity in digital slides using ResNet** [10581-29]

10581 0V **3D human lung histology reconstruction and registration to in vivo imaging** [10581-30]

10581 0X **CNN based segmentation of nuclei in PAP-smear images with selective pre-processing** [10581-32]

10581 0Y **Tumor proliferation assessment of whole slide images** [10581-33]

10581 0Z **H and E stain augmentation improves generalization of convolutional networks for histopathological mitosis detection** [10581-34]

10581 10 **Simultaneous segmentation and classification of multichannel immuno-fluorescently labeled confocal microscopy images using deep convolutional neural networks** [10581-35]

10581 11 **Unsupervised pathology image segmentation using representation learning with spherical k-means** [10581-36]

10581 12 **Automatic segmentation of histopathological slides of renal tissue using deep learning** [10581-37]

10581 13 **Scalable storage of whole slide images and fast retrieval of tiles using Apache Spark** [10581-38]

10581 14 **Glomerular detection and segmentation from multimodal microscopy images using a Butterworth band-pass filter** [10581-39]

10581 16 **A performance comparison of low- and high-level features learned by deep convolutional neural networks in epithelium and stroma classification** [10581-41]

10581 17 **Image processing to extend effective OCT penetration depth in tissue** [10581-42]

10581 18 **Registration accuracy between whole slide images and glass slides in eeDAP workflow** [10581-43]

10581 19 **Classification of lung cancer histology images using patch-level summary statistics** [10581-44]

10581 1A **Segmentation of black ink and melanin in skin histopathological images** [10581-45]

10581 1B **Semantic segmentation for prostate cancer grading by convolutional neural networks** [10581-46]

10581 1C **SlideSeg: a Python module for the creation of annotated image repositories from whole slide images** [10581-47]

10581 1D **An unsupervised network for fast microscopic image registration** [10581-48]

10581 1E **Landmark-based reconstruction of 3D smooth structures from serial histological sections** [10581-49]

10581 1F **Detecting and segmenting overlapping red blood cells in microscopic images of thin blood smears** [10581-50]
