PROCEEDINGS OF SPIE

Advances in Patterning Materials and Processes XXXV

Christoph K. Hohle Editor

26 February–1 March 2018 San Jose, California, United States

Sponsored by SPIE

Cosponsored by Applied Materials, Inc. (United States)

Published by SPIE

Volume 10586

Proceedings of SPIE 0277-786X, V. 10586

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in Advances in Patterning Materials and Processes XXXV, edited by Christoph K. Hohle, Proceedings of SPIE Vol. 10586 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510616646 ISBN: 9781510616653 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/18/\$18.00.

Printed in the United States of America Vm7 i ffUb 5 ggc WUHY gž & Wži bXYf"]WY bgY Zfca 'GD-9.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

Vİİ	Authors

xi Conference Committee

	EUV: RESIST PROCESSES: JOINT SESSION WITH CONFERENCES 10583 AND 10586
10586 04	Aqueous developers for positive tone ultrathin chemically amplified EUV resists [10586-3]
10586 05	EUV via hole pattern fidelity enhancement through novel resist and post-litho plasma treatment [10586-4]
10586 06	EUV resist sensitization and roughness improvement by PSCAR™ with in-line UV flood exposure system [10586-5]
	EUV: METAL-BASED RESISTS: JOINT SESSION WITH CONFERENCES 10583 AND 10586
10586 07	Surface characterization of tin-based inorganic EUV resists [10586-6]
10586 08	Mechanisms of photodecomposition of metal-containing EUV photoresists: isotopic labelling studies [10586-7]
	MATERIALS AND ETCH INTEGRATION: JOINT SESSION WITH CONFERENCES 10586 AND 10589
10586 0A	Ultimate edge-placement control using combined etch and lithography system optimizations [10586-9]
	EUV: FUNDAMENTALS
10586 OC	Unraveling the role of photons and electrons upon their chemical interaction with photoresist during EUV exposure (Invited Paper) [10586-11]
10586 OD	Polymer effects on PAG acid yield in EUV resists [10586-12]
10586 OE	Characterization of metal resist for EUV lithography using infrared free electron laser [10586-13]
10586 OF	Investigations on EUVL metal resist dissolution behavior using in situ high speed atomic force microscopy [10586-14]

	EUV: NOVEL PROCESSES
10586 0G	Novel EUV resist materials for 7nm node and beyond [10586-15]
10586 OH	Study of electron beam and extreme ultraviolet resist utilizing polarity change and radical crosslinking [10586-16]
10586 01	Polymer brush as adhesion promoter for EUV patterning [10586-17]
10586 OJ	LWR enhancement for 300mm track processing [10586-18]
10586 OK	Novel Sn-based photoresist for high aspect ratio patterning [10586-19]
	HARDMASKS AND UNDERLAYER
10586 OL	The development of an SC1 removable SiARC [10586-20]
10586 OM	New spin on carbon materials made from hemicellulose for hardmask layer [10586-21]
10586 ON	High-carbon fullerene based spin-on organic hardmask [10586-22]
	DSA MATERIALS AND CHARACTERIZATION: JOINT SESSION WITH CONFERENCES 10586 AND 10584
10586 OP	Utilization of metal-polymer interactions for self-aligned directed self-assembly of device relevant features [10586-24]
10586 OQ	Pillars fabrication by DSA lithography: material and process options [10586-25]
	DSA: DEFECTIVITY AND HIGH-CHI
10586 OU	A simulation study on bridge defects in lamellae-forming diblock copolymers [10586-30]
10586 OV	Directed self-assembly of triblock copolymers for sub-10nm nanofabrication using polymeric additives [10586-31]
10586 OW	Straightforward directed self-assembly process flows enabled by advanced materials [10586-32]
	DSA: CYLINDER FORMING BCP AND METROLOGY
10586 OZ	Automated lamellar block copolymer process optimization with machine learning [10586-35]

	NOVEL PROCESSES
10504 11	Multi color fly out SAOD for reduced process variation [10594-27]
1000011	Multi-Color Hy-cut-SAQP for reduced process variation [10566-57]
10586 12	Thick photosensitive polyimide film side wall angle variability and scum improvement for IC packaging stress control [10586-38]
10586 13	Resist-polymer ablation by mid-infrared-free-electron laser [10586-39]
10586 15	Evaluation of anti-sticking layers performances for 200mm wafer scale Smart NIL™ process through surface and defectivity characterizations [10586-41]
	POSTER SESSION
10586 16	Application specific ratings of filters for negative-tone developer [10586-42]
10586 17	The intrinsic role of membrane morphology to reduce defectivity in advanced photochemicals [10586-43]
10586 18	Targeted removal of metallic contamination from lithography solvents using membrane purifiers [10586-44]
10586 1A	Improved airborne molecular contaminant filter performance for photolithography [10586-46]
10586 1D	Directed Self-Assembly (DSA) for contact applications [10586-49]
10586 1E	Fast annealing DSA materials designed for sub-5 nm resolution [10586-59]
10586 1F	Desirable material selection on self-aligned multi-patterning [10586-50]
10586 1G	Synthesis of metal nanoparticle and patterning in polymeric films induced by electron beam [10586-51]
10586 1H	Mechanism study of ion implantation on photoresist shrinkage [10586-52]
10586 11	Chemical trimming overcoat: an advanced composition and process for photoresist enhancement in lithography [10586-58]
10586 1K	Development of new polyphenols applied to spin-on carbon hardmask with characteristics of high-heat resistance and good planarization [10586-54]
10586 1M	Effects of fluorine contamination on spin-on dielectric thickness in semiconductor manufacturing [10586-56]
10586 1N	Investigating the threshold electron energy for reactions in EUV resist materials [10586-53]
10586 10	Nanoscale inhomogeneity and photoacid generation dynamics in extreme ultraviolet resist materials [10586-60]

10586 1P Molecular organometallic resists for EUV (MORE): reactivity as a function of metal center (Bi, Sb, and Te) [10586-61]
