Volume 10620

Proceedings of SPIE 0277-786X, V. 10620

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *2017 International Conference on Optical Instruments and Technology: Optoelectronic Imaging/Spectroscopy and Signal Processing Technology*, edited by Guohai Situ, Xun Cao, Wolfgang Osten, Proceedings of SPIE Vol. 10620 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Authors*

xi *Symposium Committee*

xiii *Conference Committee*

xv *Introduction*

xvii *Conference Organizers*

SESSION 1

10620 02 **Computational holography with random diffraction (Invited Paper)** [10620-68]

10620 03 **Speckle reduction in digital holography with resampling ring masks (Invited Paper)** [10620-53]

10620 04 **Pixel-super-resolved lens-free holography using adaptive relaxation factor and positional error correction (Invited Paper)** [10620-104]

10620 05 **Single shot imaging through turbid medium and around corner using coherent light** [10620-39]

10620 06 **Designation and verification of road markings detection and guidance method** [10620-63]

SESSION 2

10620 07 **Multiple-stage pure phase encoding with biometric information (Invited Paper)** [10620-9]

10620 08 **Temporal overlap estimation based on interference spectrum in CARS microscopy** [10620-96]

10620 09 **Portable smartphone based quantitative phase microscope** [10620-51]

10620 0A **Ultra-fast quantitative imaging using ptychographic iterative engine based digital micro-mirror device** [10620-52]

10620 0B **A new mapping function in table-mounted eye tracker** [10620-112]

SESSION 3

10620 0C **Image based method for aberration measurement of lithographic tools** [10620-34]

10620 0D **Study on the properties of infrared wavefront coding athermal system under several typical temperature gradient distributions** [10620-40]

10620 0E **Design of rapid prototype of UAV line-of-sight stabilized control system** [10620-47]

10620 0F **Micro-scanning error correction technique for an optical micro-scanning thermal microscope imaging system** [10620-4]

10620 0G **Spectral colors capture and reproduction based on digital camera** [10620-91]

10620 0H **E-Pad: a comfortable electrocutaneous-based tactile feedback display** [10620-121]

10620 0I **An integration time adaptive control method for atmospheric composition detection of occultation** [10620-23]

10620 0J **A real-time MTFC algorithm of space remote-sensing camera based on FPGA** [10620-29]

SESSION 4

10620 0K **Light field measurement based on the single-lens coherent diffraction imaging (Invited Paper)** [10620-107]

10620 0L **A light field depth estimation algorithm by edge disparity extraction** [10620-8]

10620 0M **Depth estimation of complex geometry scenes from light fields** [10620-49]

10620 0N **A novel shape-changing haptic table-top display** [10620-117]

10620 0O **High speed data transmission coaxial-cable in the space communication system** [10620-120]

SESSION 5

10620 0P **Research on assessment and improvement method of remote sensing image reconstruction** [10620-65]

10620 0Q **Fusion of visible and near-infrared images based on luminance estimation by weighted luminance algorithm** [10620-95]

10620 0R **Minimum resolvable power contrast model** [10620-115]

POSTER SESSION

10620 0S **Remote sensing image segmentation based on Hadoop cloud platform** [10620-7]

10620 0T **Discrimination of wild-growing and cultivated *Lentinus edodes* by tri-step infrared spectroscopy** [10620-10]

10620 0U **Edge detection of optical subaperture image based on improved differential box-counting method** [10620-22]

10620 0V **Application of principal component regression and partial least squares regression in ultraviolet spectrum water quality detection** [10620-24]

10620 0W **SAR target recognition and posture estimation using spatial pyramid pooling within CNN** [10620-27]

10620 0X **Terahertz spectral characteristics of two kinds of important functional oligosaccharides** [10620-28]

10620 0Y **Keyhole imaging method for dynamic objects behind the occlusion area** [10620-30]

10620 0Z **A moving target detecting and tracking system based on DSP** [10620-31]

10620 10 **Analyzing the misregistration of the pushbroom Offner hyperspectral imaging spectrometer caused by FOV separation and motion compensation design** [10620-32]

10620 11 **Analysis of Fourier ptychographic microscopy with half reduced images** [10620-37]

10620 12 **Optoelectronic imaging of speckle using image processing method** [10620-42]

10620 13 **An image guided algorithm for range map super-resolution** [10620-43]

10620 14 **Temporal compressive imaging for video** [10620-44]

10620 15 **Accurate measurement of imaging photoplethysmographic signals based camera using weighted average** [10620-45]

10620 16 **Fusion of LBP and SWLD using spatio-spectral information for hyperspectral face recognition** [10620-50]

10620 17 **A method of object recognition for single pixel imaging** [10620-58]

10620 18 **An efficient hole-filling method based on depth map in 3D view generation** [10620-59]

10620 19 **Mueller matrix imaging study to detect the dental demineralization** [10620-61]

10620 1A **The implementation of depth measurement and related algorithms based on binocular vision in embedded AM5728** [10620-64]

10620 1B **Implementation and image processing of a multi-focusing bionic compound eye** [10620-69]

10620 1C **3D morphology reconstruction using linear array CCD binocular stereo vision imaging system** [10620-71]

10620 1D **An improved three-dimension reconstruction method based on guided filter and Delaunay** [10620-75]

10620 1E **Hyperspectral light field image denoising** [10620-78]

10620 1F **Negative refractive behaviors of 2-D triangular-lattice photonic crystals by structure of SiO_2/TiO_2 layers** [10620-80]

10620 1G **A natural-color mapping for single-band night-time image based on FPGA** [10620-81]

10620 1H **Analysis of point source size on measurement accuracy of lateral point-spread function of confocal Raman microscopy** [10620-87]

10620 1I **Linear dependence between the wavefront gradient and the masked intensity for the point source with a CCD sensor** [10620-90]

10620 1J **3D super resolution range-gated imaging for canopy reconstruction and measurement** [10620-92]

10620 1K **Environmental noise forecasting based on support vector machine** [10620-93]

10620 1L **Study on spectral calibration of an ultraviolet Fourier transform imaging spectrometer with high precision** [10620-94]

10620 1M **Moving target detection in flash mode against stroboscopic mode by active range-gated laser imaging** [10620-100]

10620 1N **Influences of overlap index on Fourier ptychography imaging** [10620-102]

10620 1O **A motion deblurring method with long/short exposure image pairs** [10620-103]

10620 1P **Eye gaze tracking based on the shape of pupil image** [10620-105]

10620 1Q **Experimental scheme and restoration algorithm of block compression sensing** [10620-106]

10620 1R **Extracting information of fixational eye movements through pupil tracking** [10620-108]

10620 1S **Measurement of 3D refractive index distribution by optical diffraction tomography** [10620-114]

10620 1T **Research on capability of detecting ballistic missile by near space infrared system** [10620-116]

10620 1U **A modified approach combining FNEA and watershed algorithms for segmenting remotely-sensed optical images** [10620-119]
