PROCEEDINGS OF SPIE

Algorithms for Synthetic Aperture Radar Imagery XXV

Edmund Zelnio Frederick D. Garber Editors

19 April 2018 Orlando, Florida, United States

Sponsored and Published by SPIE

Volume 10647

Proceedings of SPIE 0277-786X, V. 10647

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in Algorithms for Synthetic Aperture Radar Imagery XXV, edited by Edmund Zelnio, Frederick D. Garber, Proceedings of SPIE Vol. 10647 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510618053 ISBN: 9781510618060 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/18/\$18.00.

Printed in the United States of America Vm7 i ffUb 5 ggc WUHY gž & Wži bXYf"]WY bgY Zfca 'GD-9.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Authors

vii Conference Committee

SYNTHETIC DATA AND DEEP LEARNING

- 10647 02 AFacet: a geometry based format and visualizer to support SAR and multisensor signature generation [10647-1]
- 10647 03 High performance computing strategies for SAR image experiments [10647-2]
- 10647 08 Mobile high-performance computing (HPC) for synthetic aperture radar signal processing [10647-7]
- 10647 09 Generative adversarial networks for SAR image realism [10647-8]
- 10647 0A Blending synthetic and measured data using transfer learning for synthetic aperture radar target classification [10647-9]
- 10647 0B Deep learning model-based algorithm for SAR ATR [10647-10]
- 10647 0C Development of Convolutional Neural Networks (CNNs) for feature extraction [10647-11]
- 10647 0D Using deep learning for SAR image optimization [10647-12]
- 10647 0E Deep learning for waveform estimation in passive synthetic aperture radar imaging [10647-13]

ADVANCED IMAGE FORMATION, 3D RECONSTRUCTION, AND MOVING TARGET EXPLOITATION

- 10647 OF SAR processing UWB VHF data without a motion measurement system [10647-14]
- 10647 0G Sparsity-driven coupled imaging and autofocusing for interferometric SAR [10647-15]
- 10647 0H Leveraging 3D models for SAR-based navigation in GPS-denied environments [10647-16]
- 10647 0I Three-dimensional total least square Prony method for 3D synthetic aperture scatterer localization [10647-17]
- 10647 0J Sparse 4D TomoSAR imaging in the presence of non-linear deformation [10647-18]

- 10647 0K A subaperture based approach for SAR moving target imaging by low-rank and sparse decomposition [10647-19]
- 10647 0L Insights into the complicated SAR signature shapes induced by braking targets [10647-20]
- 10647 0P Synthetic aperture radar quantized grayscale reference automatic target recognition algorithm [10647-24]
- 10647 OR Variance based joint sparsity reconstruction of synthetic aperture radar data for speckle reduction [10647-27]
