PROCEEDINGS OF SPIE

Illumination Optics V

Tina E. Kidger Stuart David Editors

14–16 May 2018 Frankfurt, Germany

Sponsored by SPIE

Cosponsored by OPTATEC (Germany)

Published by SPIE

Volume 10693

Proceedings of SPIE 0277-786X, V. 10693

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in *Illumination Optics* V, edited by Tina E. Kidger, Stuart David, Proceedings of SPIE Vol. 10693 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

ISSN: 0277-786X ISSN: 1996-756X (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/18/\$18.00.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- vii Authors
- ix Conference Committee
- xi Introduction

SESSION 1 OPTICAL MODELLING, EFFECTS, AND TECHNIQUES I

- 10693 02 **Design of an optical refocusing illumination system for use in laser-scanning devices** (Invited Paper) [10693-1]
- 10693 03 Prescribed intensity patterns from extended sources by means of a wavefront-matching procedure (Invited Paper) [10693-2]
- 10693 04 Etendue conserving light shaping using microlens arrays with irregular lenslets [10693-3]
- 10693 05 CSLM illumination for 1D and 2D encoded holographic 3D displays [10693-4]

SESSION 2 FREEFORM TECHNIQUES I

10693 06 Designing two freeform surfaces with Monge-Ampère equation method for point-like sources (Invited Paper) [10693-5]
10693 07 Solving the Monge-Ampère equation on triangle-meshes for use in optical freeform design [10693-6]
10693 08 Application of the multiple Cartesian oval method for glass lens design [10693-7]
10693 0A Monge-Ampère type equations for freeform illumination optics [10693-9]
10693 0C Irradiance and phase control with two freeform surfaces using partial differential equations [10693-11]

SESSION 3 FREEFORM TECHNIQUES II

10693 OE	Freeform road lighting lens design (Invited Paper) [10693-12]
10693 OF	Design of a freeform, luminance spreading illumination lens with a continuous surface [10693-13]

10693 0G Design of two-dimensional waveguide head-up display [10693-14]

10693 0H Modeling of free-form optical surfaces for forming required light distribution [10693-15]

10693 0J Free-form optics for non-idealized light sources in 3D: a phase-space approach [10693-17]

SESSION 4 OPTICAL MODELLING, EFFECTS, AND TECHNIQUES II

- 10693 OL Illumination optics of LED luminaires (Invited Paper) [10693-19]
- 10693 0M Methods to precisely generate arbitrary spectra using multi-coloured LED light engines [10693-21]
- 10693 ON Recent discoveries in the rich landscape of aplanatic optics [10693-22]
- 10693 00 **Opto-thermal simulation model for optimizing laser-excited remote phosphor systems** [10693-23]
- 10693 OP Problems of using the PMA adaptive mesh method in lens-array design for LED signal lighting [10693-25]

SESSION 5 ILLUMINATION APPLICATIONS

- 10693 0Q Optical realization and calibration of a light field generator [10693-26]
 10693 0R User evaluation study on illumination requirements to design an augmented reality projector for open liver surgery [10693-27]
- 10693 0S Development of LED lighting system for pressurized water reactor [10693-28]

SESSION 6 TRENDS IN AUTOMOTIVE LIGHTING

- 10693 0T Optimization of prismatic light extraction elements in automotive signal or ambience lighting (Invited Paper) [10693-29]
- 10693 0U Automotive interior illumination: challenges and requirements (Invited Paper) [10693-30]
- 10693 0V On a partially color corrected illumination system [10693-31]

POSTER SESSION

10693 0X	Modeling of LED scheme for street lighting on the basis of chip-on-board scheme [10693-33]
10693 OY	Design of single and two-lens laser flat-top reshaping systems [10693-34]
10693 10	Efficient methods of BSDF reconstruction from the micro-relief dataset for the lighting simulation tasks [10693-36]
10693 12	Optimization based on reconstruction of volume scattering medium parameters [10693-38]
10693 14	Calculation and computer modeling of radiation-tolerant LED luminaire [10693-40]
