Volume 10694

Proceedings of SPIE 0277-786X, V. 10694

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Computational Optics II*, edited by Daniel G. Smith, Frank Wyrowski, Andreas Erdmann, Proceedings of SPIE Vol. 10694 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*

vii *Conference Committee*

ix *Introduction*

SESSION 1 DESIGN AND OPTIMIZATION

10694 02 **Multi-resonant silicon nanoantennas by evolutionary multi-objective optimization (Invited Paper)** [10694-1]

10694 03 **Optimization and tolerancing of highly dispersive multilayer gratings for laser applications** [10694-2]

10694 04 **An application of the virtual prototyping approach to design of VR, AR, and MR devices free from the vergence-accommodation conflict** [10694-3]

10694 06 **Hybrid digital-optical imaging design for reducing surface asphericity cost while keeping high performance** [10694-5]

10694 07 **Solving inverse problems appearing in design and metrology of diffractive optical elements by using Bayesian optimization** [10694-6]

10694 08 **Application of deep learning algorithms for Lithographic mask characterization** [10694-7]

SESSION 2 COMPUTATIONAL IMAGING

10694 0B **Fourier ptychography for lithography high NA systems** [10694-10]

10694 0C **Optical phase retrieval using four rotated versions of a single binary mask: simulation results** [10694-11]

10694 0D **Realistic image synthesis in presence of birefrigent media by backward ray tracing technique** [10694-12]

SESSION 3 MICROSTRUCTURES AND ILLUMINATION

10694 0F **Rigorous modeling of light absorption in nanostructured materials using a parallel high order finite element time-domain technique** [10694-14]

10694 0H **Simulation study of illumination effects in high-NA EUV lithography** [10694-16]

10694 0I **Fast-physical optics modeling of microscopy system with structured illumination** [10694-17]

SESSION 4 PHYSICAL OPTICS I

10694 0J **Surface polarization scattering generated from a birefringent material with rough surface** [10694-19]

10694 0M **Accurate propagation of ultrashort pulses in nonlinear waveguides using propagation models for the analytic signal** [10694-22]

SESSION 5 PHYSICAL OPTICS II

10694 0N **Density estimation in optical phase space for optimizing micro-optical elements on freeform surfaces (Invited Paper)** [10694-23]

10694 0O **Semi-analytical Fourier transform and its application to physical-optics modelling** [10694-24]

10694 0P **Using the pupil difference probability density to understand OTF** [10694-25]

10694 0Q **The Gouy phase shift reinterpreted via the geometric Fourier transform** [10694-26]

10694 0R **Efficient optical simulation of nano structures in thin-film solar cells** [10694-28]

POSTER SESSION

10694 0S **3D ray tracing model for laser beams influenced by thermal lensing in solid-state gain media** [10694-29]

10694 0T **Analysis of three-dimensional diffraction wavefront error for point diffraction interferometer** [10694-32]

10694 0V **Multi-mode computing optical imaging technology based on software definition micro-nano satellite** [10694-34]
