Volume 10797

Proceedings of SPIE 0277-786X, V. 10797

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Technologies for Optical Countermeasures XV*, edited by David H. Titterton, Robert J. Grasso, Mark A. Richardson, Proceedings of SPIE Vol. 10797 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>
xi	<i>Introduction</i>

KEYNOTE I

10797 02	Review and prospects of optical countermeasure technologies (Keynote Paper) [10797-1]
----------	--

KEYNOTE II

10797 05	Miysis DIRCM: the smallest, lightest multi-head DIRCM system available today (Keynote Paper) [10797-4]
----------	---

LASERS AND SOURCES I

10797 07	Passively Q-switched Yb:YAG micro-laser for high peak power high repetition rate burst of pulses emission [10797-6]
----------	--

ATMOSPHERIC EFFECTS

10797 0B	Imaging theory and mitigation in extreme anisoplanatism (Invited Paper) [10797-10]
10797 0C	Correction of turbulence-induced aberration by modelling the atmosphere as a multimode coupler [10797-11]

KEYNOTE III

10797 0D	Innovation in optical countermeasures (Keynote Paper) [10797-33]
----------	---

LASER EFFECTS I

- 10797 OE **Evaluation of laser dazzling induced task performance degradation (Invited Paper)** [10797-12]
- 10797 OF **In-band low-power laser dazzle and pixel damage of an uncooled LWIR thermal imager**
[10797-14]

THREAT DETECTION AND IMAGING

- 10797 OG **Comparison of empirical and predicted UV aircraft signatures (Invited Paper)** [10797-15]
- 10797 OH **Non-mechanical beam steering: ways and means (Invited Paper)** [10797-16]
- 10797 OI **Ladar data generation fused with virtual targets and visualization for small drone detection system** [10797-17]
- 10797 OJ **Target coordinate system for robust LADAR systems to magnetic field variation** [10797-18]

QUANTUM CASCADE LASERS

- 10797 OL **Aliasing effect of a QCL on a fixed-framerate sensor and potential anti-aliasing algorithm designs (Invited Paper)** [10797-20]
- 10797 OM **Pulse shaping by incoherent beam combining of several Watt-level QCL modules at 4.0 μm**
[10797-21]

THREATS, THREAT DETECTION, AND DISCRIMINATION

- 10797 ON **Laser interception technique with heterodyne self-mixing interferometry** [10797-22]
- 10797 OP **Mid-infrared laser source for field tests** [10797-30]

LASER EFFECTS II

- 10797 OQ **Laser dazzling analysis of camera sensors** [10797-26]
- 10797 OR **Preventing image information loss of imaging sensors in case of laser dazzle** [10797-25]
- 10797 OS **Visible and near-infrared laser dazzling of CCD and CMOS cameras** [10797-27]

10797 OT **Modelled and experimental laser-induced sensor damage thresholds to continuous wave infrared sources** [10797-28]

POSTER SESSION

10797 OW **Research on relation model of optical camouflage similarity and identification probability of marine targets** [10797-32]
