

PROCEEDINGS OF SPIE

High-Power Lasers and Applications IX

Ruxin Li
Upendra N. Singh
Editors

11–12 October 2018
Beijing, China

Sponsored by
SPIE
COS—Chinese Optical Society

Cooperating Organizations

Tsinghua University (China) • Peking University (China) • University of Science and Technology of China (China) • Zhejiang University (China) • Tianjin University (China) • Beijing Institute of Technology (China) • Beijing University of Posts and Telecommunications (China) • Nankai University (China) • Changchun University of Science and Technology (China) • University of Shanghai for Science and Technology (China) • Capital Normal University (China) • Huazhong University of Science and Technology (China) • Beijing Jiaotong University (China) • Shanghai Institute of Optics and Fine Mechanics (China) • Changchun Institute of Optics and Fine Mechanics (China) • Institute of Semiconductors (China) • Institute of Optics and Electronics (China) • Institute of Physics (China) • Shanghai Institute of Technical Physics (China) • China Instrument and Control Society (China) • Optoelectronics Technology Committee, COS (China) • Optical Society of Japan (Japan) • Optical Society of Korea (Korea, Republic of) • The Australian Optical Society (Australia) • Optics and Photonics Society of Singapore (Singapore) • European Optical Society

Volume 10811

Proceedings of SPIE 0277-786X, V. 10811

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Power Lasers and Applications IX*, edited by Ruxin Li, Upendra N. Singh, Proceedings of SPIE Vol. 10811 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Symposium Committees</i>
xiii	<i>Conference Committee</i>

SESSION 1	HIGH-POWER LASERS AND APPLICATIONS I
------------------	---

10811 05	Brilliant x-ray sources generation based on high-quality laser-driven wakefield accelerator [10811-3]
10811 07	Generation of multiband annular beams by femtosecond Bessel laser beam in silica glass [10811-5]

SESSION 2	HIGH-POWER LASERS AND APPLICATIONS II
------------------	--

10811 08	Low noise single frequency DFB fiber laser (Invited Paper) [10811-6]
10811 09	Experimental study of mode instability in high power all-fiber amplifier under different pumping power distribution [10811-7]
10811 0B	47 GHz narrow linewidth linear polarized fiber amplifier injected by a simple fiber oscillator laser seed source [10811-9]
10811 0C	Mitigating stimulated brillouin scattering in fiber using tilted fiber Bragg grating [10811-10]
10811 0D	All-fiber structure mid-infrared fiber gas laser source [10811-11]

SESSION 3	HIGH-POWER LASERS AND APPLICATIONS III
------------------	---

10811 0F	Quasi-CW performance and reliability of dual laser bars on a micro-channel cooler [10811-13]
10811 0G	Intracavity deformable mirror for the performance improvement of a passively Q-switched laser [10811-14]
10811 0J	Sidelobe suppression of laser diode arrays by on-chip phase and amplitude manipulation [10811-17]

SESSION 4 HIGH-POWER LASERS AND APPLICATIONS IV

- 10811 OL **500Hz high-energy laser for PLIF application [10811-19]**
- 10811 OM **Access to the ultrafast dynamics of molecules-laser interaction with high harmonic spectroscopy [10811-20]**
- 10811 ON **Relationship between the longitudinal-mode structure and the relative intensity noise properties of the laser [10811-21]**

SESSION 5 HIGH-POWER LASERS AND APPLICATIONS V

- 10811 OP **Efficient cascade Raman source in methane-filled hollow-core fibers operating at 2.8 μm [10811-24]**
- 10811 OQ **Multipass stretcher for chirped-pulse amplification [10811-25]**
- 10811 OU **Experimental characterization of a SESAM mode-locked Yb:YAG thin disk laser [10811-29]**
- 10811 OV **Suppression of stimulated Raman scattering in a monolithic fiber laser oscillator using chirped and tilted fiber Bragg gratings [10811-30]**

POSTER SESSION

- 10811 OW **Nanoseconds square pulses generation in a figure-of-eight Yb-doped fiber laser [10811-31]**
- 10811 11 **Control of laser pulse waveform in longitudinally excited CO₂ laser by adjustment of gas medium [10811-36]**
- 10811 15 **Implementation of stochastic parallel gradient descent algorithm for coherent beam combining [10811-40]**
- 10811 16 **Numerical analysis of the temperature field in HgCdTe detector by CW laser irradiation [10811-41]**
- 10811 17 **Topological engineering of mode-locked fibre lasers: NALM/NALM2 technologies [10811-42]**
- 10811 18 **Combined model of laser rate equation and Ginzburg-Landau equation for pulsed thulium-doped fiber laser [10811-43]**
- 10811 19 **An all-reflective transient-grating based self-referenced spectral interferometry device for few-cycle laser pulses characterization [10811-44]**

- 10811 1B **Intense broadband optical-vortex pulses generation using a hollow core fiber** [10811-46]
- 10811 1G **High-power laser beam use in material connection** [10811-51]
