2018 IEEE Information Theory Workshop (ITW)

Polar Coding

<i>Universal Polar Coding for Asymmetric Channels</i> Venkata Karthik Nagarjuna Tunuguntula (UC San Diego, USA), Paul H. Siegel (University of California, San Diego, USA)	1
<i>RT-Polar: An HARQ Scheme with Universally Competitive Rates</i> Soumya Subhra Banerjee (Indian Institute of Science, India), Himanshu Tyagi (Indian Institute of Science, India)	6
<i>Efficient decoding of polar codes with some 16×16 kernels</i> Grigori Trofimuk (Saint-Petersburg Polytechnic University, Russia), Peter Trifonov (Saint-Petersburg Polytechnic University, Russia)	11
<i>Depth versus Breadth in Convolutional Polar Codes</i> Maxime Tremblay (Université de Sherbrooke, Canada), Benjamin Bourassa (Université de Sherbrooke, Canada), David Poulin (Université de Sherbrooke, Canada)	16

Capacity 1

<i>Capacity of the Vector Gaussian Channel in the Small Amplitude Regime</i> Alex Dytso (Princeton University, USA), Vincent Poor (Princeton University, USA), Shlomo (Shitz) Shamai (The Technion, Israel)	21
<i>On the Capacity of MIMO Optical Wireless Channels</i> Longguang Li (Telecom ParisTech, France), Stefan M. Moser (ETH Zurich, Switzerland & National Chiao Tung University (NCTU), Taiwan), Ligong Wang (ETIS & CNRS, France), Michele A Wigger (Telecom ParisTech, France)	26
<i>A Linearly Precoded Rate Splitting Approach and Its Optimality for MIMO Broadcast Channels</i> Zheng Li (CentraleSupélec, France), Sheng Yang (CentraleSupélec, France)	31
<i>The Optimal DoF Region for the Two-User Non-Coherent SIMO Multiple-Access Channel</i> Khac-Hoang Ngo (CentraleSupélec & Mathematical and Algorithmic Sciences Lab, Paris Research Center, Huawei Technologies, France, France), Sheng Yang (CentraleSupélec, France), Maxime Guillaud (Huawei Technologies, Mathematical and Algorithmic Sciences Lab, France)	36

Caching 1

<i>Storage-Repair Bandwidth Trade-off for Wireless Caching with Partial Failure and Broadcast Repair</i> Nitish Mital (Imperial College London, United Kingdom (Great Britain)), Katina Kravets (Norwegian University of Science and Technology, Norway), Deniz Gündüz (Imperial College London, United Kingdom (Great Britain)), Cong Ling (Imperial College London, United Kingdom (Great Britain))	41
<i>Full Coded Caching Gains for Cache-less Users</i> Eleftherios Lampiris (EURECOM, France), Petros Elia (EURECOM, France)	46
<i>Optimal coded caching in heterogeneous networks with uncoded prefetching</i> Emanuele Parrinello (EURECOM, France), Ayşe Ünsal (EURECOM, France), Petros Elia (EURECOM, France)	51
<i>Dynamic Edge Caching with Popularity Drifting</i> Linqi Song (City University of Hong Kong, Hong Kong), Jie Xu (University of Miami, USA)	56

Information Theoretic Security 1

<i>Optimal Inputs for Some Classes of Degraded Wiretap Channels</i> Alex Dytso (Princeton University, USA), Malcolm Egan (INRIA, France), Samir M. Perlaza (INRIA, France), Vincent Poor (Princeton University, USA), Shlomo (Shitz) Shamai (The Technion, Israel)	61
<i>Time-Division is Optimal for Covert Communication over Some Broadcast Channels</i> Vincent Y. F. Tan (National University of Singapore, Singapore), Si-Hyeon Lee (POSTECH, Korea)	66
<i>The Secure Two-Receiver Broadcast Channel With One-Sided Receiver Side Information</i> Jin Yeong Tan (University of Newcastle, Australia), Lawrence Ong (The University of Newcastle, Australia), Behzad Asadi (The University of Newcastle, Australia)	71
<i>The Caching Broadcast Channel with a Wire and Cache Tapping Adversary of Type II</i> Mohamed Nafea (The Pennsylvania State University, USA), Aylin Yener (Pennsylvania State University, USA)	76

LDPC Codes

<i>On Generalized LDPC codes for 5G Ultra Reliable Communication</i> Yanfang Liu (Universidad Carlos III de Madrid & Gregorio Marañón Health Research Institute, Spain), Pablo M. Olmos (Universidad Carlos III de Madrid & Gregorio Marañón Health Research Institute, Spain), David G. M. Mitchell (New Mexico State University, USA)	81
<i>Type-II Quasi-Cyclic LDPC Codes with Girth Eight from Sidon Sequence</i> Guohua Zhang (China Academy of Space Technology (Xi'an), P.R. China), Yulin Hu (RWTH Aachen University, Germany), Qinwei He (RWTH Aachen University, Germany), Juhua Wang (China Academy of Space Technology (Xi'an), P.R. China)	86
<i>Coding Theorem for Systematic LDGM Codes Under List Decoding</i> Wenchao Lin (Sun Yat-sen University, P.R. China), Suihua Cai (Sun Yat-sen University, P.R. China), Baodian Wei (Sun Yat-sen University, P.R. China), Xiao Ma (Sun Yat-sen University, P.R. China)	91

Free Pseudodistance Growth Rates for Spatially Coupled LDPC Codes over the BEC

Cunlu Zhou (University of Notre Dame, USA), David G. M. Mitchell (New Mexico State University, USA), Roxana Smarandache (University of Notre Dame, USA) 96

Shannon Theory

On The Reliability Function of Discrete Memoryless Multiple-Access Channel with Feedback

Mohsen Heidari (University of Michigan, USA), Achilleas Anastasopoulos (University of Michigan, USA), S. Sandeep Pradhan (University of Michigan, USA) 101

Saddlepoint approximation of the cost-constrained random coding error probability

Josep Font-Segura (Universitat Pompeu Fabra, Spain), Alfonso Martinez (Universitat Pompeu Fabra, Spain), Albert Guillén i Fàbregas (ICREA and Universitat Pompeu Fabra & University of Cambridge, Spain) 106

Simulation of Random Variables under Rényi Divergence Measures of All Orders

Lei Yu (National University of Singapore, Singapore), Vincent Y. F. Tan (National University of Singapore, Singapore) 111

A Geometric Property of Relative Entropy and the Universal Threshold Phenomenon for Binary-Input Channels with Noisy State Information at the Encoder

Shengtian Yang (Zhejiang Gongshang University, P.R. China), Jun Chen (McMaster University, Canada) 116

Information Rates and Error Exponents for Probabilistic Amplitude Shaping

Rana Ali Amjad (Technische Universität München, Germany) 121

Quantum Information Processing and Sequences

Secure Quantum Network Code without Classical Communication

Seunghoan Song (Nagoya University, Japan), Masahito Hayashi (Nagoya University, Japan) 126

Secret Message Transmission over Quantum Channels under Adversarial Quantum Noise: Secrecy Capacity and Super-activations

Holger Boche (Technical University Munich, Germany), Minglai Cai (Technische Universität München, Germany), Christian Deppe (Technical University of Munich, Germany), Janis Nötzel (Technische Universität Dresden, Germany) 131

Decoding Topological Subsystem Color Codes and Generalized Subsystem Surface Codes

Vinuta V. Gayatri (Madstreet Den Technologies Pvt Ltd., India), Pradeep K Sarvepalli (Indian Institute of Technology Madras, India) 136

A New One-Coincidence Frequency-Hopping Sequence Set of Length $p^2 - p$

Tae-Hwan Lee (Ulsan National Institute of Science and Technology, Korea), Hee-Heon Jung (Ulsan National Institute of Science and Technology, Korea), Jin-Ho Chung (Ulsan National Institute of Science and Technology, Korea) 141

A Distributed Unicast Scheme Based on Schedule Sequences in Ad Hoc Networks

Fang Liu (The Chinese University of Hong Kong, P.R. China), Kenneth W. Shum (Institute of Network Coding, Hong Kong), Wing Shing Wong (The Chinese University of Hong Kong, P.R. China) 145

Index Coding

Low Complexity Decoding and Capacity of Index Coding Problems with Symmetric Side-Information

Mahesh Babu Vaddi (Indian Institute of Science, India), B. Sundar Rajan (Indian Institute of Science, India) 150

Approximating Throughput and Packet Decoding Delay in Linear Network Coded Wireless Broadcast

Mingchao Yu (University of Southern California, USA), Parastoo Sadeghi (The Australian National University, Australia) 155

On the Broadcast Rate and Fractional Clique Cover of Single Unicast Index Coding Problems

Mahesh Babu Vaddi (Indian Institute of Science, India), B. Sundar Rajan (Indian Institute of Science, India) 160

An Information Theoretic Converse for the "Consecutive Complete" PICOD Problem

Tang Liu (University of Illinois at Chicago, USA), Daniela Tuninetti (University of Illinois at Chicago, USA) 165

Three-Layer Composite Coding for Index Coding

Yucheng Liu (Australian National University, Australia), Parastoo Sadeghi (The Australian National University, Australia), Young-Han Kim (UCSD, USA) 170

Caching 2

Coded Caching via Line Graphs of Bipartite Graphs

Prasad Krishnan (IIIT Hyderabad, India) 175

Coded Cache Placement for Heterogeneous Cache Sizes

Deyao Zhang (Southeast University, P.R. China), Nan Liu (Southeast University, P.R. China) 180

Centralized Caching with Unequal Cache Sizes

Behzad Asadi (The University of Newcastle, Australia), Lawrence Ong (The University of Newcastle, Australia), Sarah J Johnson (University of Newcastle, Australia) 185

Learning

Information Theory of Mixed Population Genome-Wide Association Studies

Behrooz Tahmasebi (Sharif University of Technology, Iran), Mohammad Ali Maddah-Ali (Nokia Bell Labs, USA), Abolfazl Motahari (Sharif University of Technology, Iran) 190

<i>Redundancy Capacity Theorem for On-Line Learning Under a Certain Form of Hypotheses Class</i>	
Shachar Shayovitz (University of Tel Aviv, Israel), Meir Feder (Tel-Aviv University, Israel)	195
<i>The Geometric Structure of Generalized Softmax Learning</i>	
Xiangxiang Xu (Tsinghua University, P.R. China), Shao-Lun Huang (Tsinghua-Berkeley Shenzhen Institute, P.R. China), Lizhong Zheng (Massachusetts Institute of Technology, USA), Lin Zhang (Tsinghua-Berkeley Shenzhen Institute, P.R. China)	200
<i>Generalization error bounds using Wasserstein distances</i>	
Adrian Tovar-Lopez (UW-MADISON, USA), Varun Jog (University of Wisconsin - Madison, USA)	205

Coding for Memories

<i>Read-Voltage Optimization for Finite Code Length in MLC NAND Flash Memory</i>	
Kang Wei (Nanyang University of Science and Technology, P.R. China), Jun Li (Nanjing University of Science and Technology, P.R. China), Lingjun Kong (Nanjing University of Posts & Telecommunications, P.R. China), Feng Shu (Nanjing University of Science and Technology, P.R. China), Yonghui Li (University of Sydney, Australia)	210
<i>Reconstruction from Deletions in Racetrack Memories</i>	
Yeow Meng Chee (Nanyang Technological University, Singapore), Ryan Gabrys (SPAWAR Pacific, USA), Alexander Vardy (University of California San Diego, USA), Van Khu Vu (Nanyang Technological University, Singapore), Eitan Yaakobi (Technion, Israel)	215
<i>Information Theoretic Bounds Based Channel Quantization Design for Emerging Memories</i>	
Zhen Mei (Singapore University of Technology & Design, Singapore), Kui Cai (Singapore University of Technology and Design, Singapore), Long Shi (Singapore University of Technology and Design, Singapore)	220
<i>Coding Assisted Adaptive Thresholding for Sneak-Path Mitigation in Resistive Memories</i>	
Zehui Chen (University of California, Los Angeles, USA), Clayton Schoeny (University of California, Los Angeles, USA), Lara Dolecek (UCLA, USA)	225

Capacity 2

<i>Capacity bounds for bandlimited Gaussian channels with peak-to-average-power-ratio constraint</i>	
Yizhu Wang (University of Science and Technology of China, P.R. China), Jing Zhou (University of Science and Technology of China, P.R. China), Wenyi Zhang (University of Science and Technology of China, P.R. China)	230
<i>The Degrees of Freedom of the Oversampled Non-Coherent Channel</i>	
Luca Barletta (Politecnico di Milano, Italy), Stefano Rini (National Chiao Tung University, Taiwan)	235
<i>Approximate Nash Region of the Gaussian Interference Channel with Noisy Output Feedback</i>	
Victor Quintero (Universidad del Cauca, Colombia), Samir M. Perlaza (INRIA, France), Jean-Marie Gorce (INSA-Lyon & CITI, Inria, France), Vincent Poor (Princeton University, USA)	240
<i>Maximum Likelihood Upper Bounds on the Capacities of Discrete Information Stable Channels</i>	
Tongxin Li (California Institute of Technology, USA)	245

Locally Repairable Codes

<i>Local Reconstruction Codes: A Class of MDS-PIR Capacity-Achieving Codes</i>	
Siddhartha Kumar (University of Bergen & Simula Research Laboratory, Norway), Hsuan-Yin Lin (Simula UiB, Norway), Eirik Rosnes (Simula UiB, Norway), Alexandre Graell i Amat (Chalmers University of Technology, Sweden)	250
<i>Locally Repairable Codes with Heterogeneous Locality Constraints</i>	
Qi Chen (Advanced Institute of Engineering Science for Intelligent Manufacturing, Guangzhou University, P.R. China), Chunming Tang (Guangzhou University, P.R. China), Zhiqiang Lin (Guangzhou University, P.R. China)	255
<i>On Optimal (r, δ)-LRCs with Length $n \mid (q+1)$</i>	
Weijun Fang (Nankai University, P.R. China), Fang-Wei Fu (Nankai University, P.R. China), Bin Chen (Tsinghua University, P.R. China), Shutao Xia (Tsinghua University, P.R. China)	260
<i>Optimal cyclic (r, δ) locally repairable codes with unbounded length</i>	
Weijun Fang (Nankai University, P.R. China), Fang-Wei Fu (Nankai University, P.R. China)	265
<i>Bandwidth Efficiency of Distance-optimal Scalar Locally Repairable Codes</i>	
Bin Chen (Tsinghua University, P.R. China), Shutao Xia (Tsinghua University, P.R. China)	270

Statistics

<i>Nonparametric Direct Entropy Difference Estimation</i>	
Puning Zhao (University of California, Davis, USA), Lifeng Lai (University of California, Davis, USA)	275
<i>Testing Against Independence and a Rényi Information Measure</i>	
Amos Lapidoth (ETHZ, Switzerland), Christoph Pfister (ETH Zurich, Switzerland)	280
<i>Mixed Delay Constraints at Maximum Sum-Multiplexing Gain</i>	
Homa Nikbakht (Telecom Paristech, France), Michele A Wigger (Telecom ParisTech, France), Shlomo (Shitz) Shamai (The Technion, Israel)	285
<i>Variations on a Theme by Liu, Cuff, and Verdú: The Power of Posterior Sampling</i>	
Alankrita Bhatt (UCSD, USA), Jiun-Ting Huang (University of California, San Diego, USA), Young-Han Kim (UCSD, USA), Jongha Jon Ryu (UCSD, USA), Pinar Sen (University of California, San Diego, USA)	290
<i>Testing in Identification Systems</i>	
Minh Thanh Vu (KTH, Sweden), Tobias J. Oechtering (KTH Royal Institute of Technology, Sweden), Mikael Skoglund (KTH Royal Institute of Technology, Sweden)	295

Codes and Decoding Algorithms

<i>Iterative Multistage Soft Decoding of Multilevel Reed-Solomon Codes</i>	
Xin Huang (Sun Yat-sen University, P.R. China), Li Chen (Sun Yat-sen University, P.R. China)	300
<i>An Iterative Soft-Decision Decoding Algorithm with Dynamic Saturation for Short Reed-Solomon Codes</i>	
Bryan Liu (University of New South Wales, Australia), Yixuan Xie (University of New South Wales, Australia), Lei Yang (University of New South Wales, Australia), Jinhong Yuan (University of New South Wales, Australia)	305
<i>Efficient Decoding Algorithm for Cyclically Permutable Code</i>	
Minoru Kuribayashi (Okayama University, Japan), Shodai Suma (Okayama University, Japan), Nobuo Funabiki (Okayama University, Japan)	310
<i>Generalized Globally-Coupled Low-Density Parity Check Codes</i>	
Yen-Chin Liao (National Chiao Tung University, Taiwan), Hsie-Chia Chang (National Chiao Tung University, Taiwan), Shu Lin (University of California, Davis, USA)	315
<i>Deep MIMO Detection Based on Belief Propagation</i>	
Xiangfeng Liu (Xidian University, P.R. China), Ying Li (University of Xidian, P.R. China)	320

Private Information Retrieval

<i>Asynchronous Batch and PIR Codes from Hypergraphs</i>	
Ago-Erik Riet (University of Tartu, Estonia), Vitaly Skachek (University of Tartu, Estonia), Eldho K Thomas (University of Tartu, Estonia)	325
<i>Asymmetry Helps: Improved Private Information Retrieval Protocols for Distributed Storage</i>	
Hsuan-Yin Lin (Simula UiB, Norway), Siddhartha Kumar (University of Bergen & Simula Research Laboratory, Norway), Eirik Rosnes (Simula UiB, Norway), Alexandre Graell i Amat (Chalmers University of Technology, Sweden)	330
<i>Multi-Message Private Information Retrieval with Private Side Information</i>	
Seyed Pooya Shariatpanahi (Institute for Research in Fundamental Sciences (IPM), Iran), Mahdi Jafari Siavoshani (Sharif University of Technology, Iran), Mohammad Ali Maddah-Ali (Nokia Bell Labs, USA)	335
<i>Capacity of Single-Server Single-Message Private Information Retrieval with Coded Side Information</i>	
Anoosheh Heidarzadeh (Texas A&M University, USA), Fatemeh Kazemi (Texas A&M University, USA), Alex Sprintson (Texas A&M University, USA)	340
<i>Private Information Retrieval with Private Side Information Under Storage Constraints</i>	
Yi-Peng Wei (University of Maryland, USA), Sennur Ulukus (University of Maryland, USA)	345

Frontiers of Coding Theory and Practice 1 (Invited)

<i>Capacity of Locally Recoverable Codes</i>	
Arya Mazumdar (University of Massachusetts Amherst, USA)	350
<i>C[*]LES: Codes for Coded Computation that Leverage Stragglers</i>	
Anindya Bijoy Das (Iowa State University, USA), Li Tang (Iowa State University, USA), Aditya Ramamoorthy (Iowa State University, USA)	355
<i>Coding for Private and Secure Multiparty Computing</i>	
Qian Yu (University of Southern California, USA), Netanel Raviv (California Institute of Technology, USA), Salman Avestimehr (University of Southern California, USA)	360
<i>Sub-linear Time Stochastic Threshold Group Testing via Sparse-Graph Codes</i>	
Amirhossein Reisizadeh (University of California, Santa Barbara, USA), Pedro Abdalla (University of California at Santa Barbara, USA), Ramtin Pedarsani (University of California, Santa Barbara, USA)	365

Information Theory and Applications 1 (Invited)

<i>Capacity Limits of Full-Duplex Cellular Network</i>	
Reza K. Farsani (University of Toronto, Canada), Kaiming Shen (University of Toronto, Canada), Wei Yu (University of Toronto, Canada)	370
<i>Optimum Linear Codes with Support Constraints over Small Fields</i>	
Babak Hassibi (California Institute of Technology, USA), Hikmet Yildiz (California Institute of Technology, USA)	375
<i>Fronthaul Data Reduction in Massive MIMO Aided C-RAN via Two-timescale Hybrid Compression</i>	
An Liu (Zhejiang University, P.R. China), Xihan Chen (Zhejiang University, P.R. China), Wei Yu (University of Toronto, Canada), Vincent Lau (Hong Kong University of Science and Technology, Hong Kong), Minjian Zhao (Zhejiang University, P.R. China)	380
<i>Best Arm Identification for Both Stochastic and Adversarial Multi-armed Bandits</i>	
Hantao Zhang (University of Science and Technology of China, P.R. China), Cong Shen (University of Science and Technology of China, P.R. China)	385

Frontiers of Coding Theory and Practice 2 (Invited)

<i>Capacity-achieving sparse regression codes via spatial coupling</i>	
Cynthia Rush (Columbia University, USA), Kuan Hsieh (University of Cambridge, United Kingdom (Great Britain)), Ramji Venkataramanan (University of Cambridge, United Kingdom (Great Britain))	390
<i>Binary Linear Codes with Optimal Scaling: Polar Codes with Large Kernels</i>	
Hamed Hassani (University of Pennsylvania, USA), Arman Fazeli (University of California, San Diego, USA), Marco Mondelli (Stanford University, USA), Alexander Vardy (University of California San Diego, USA)	395

Geometric shaping: low-density coding of Gaussian-like constellations

Joseph Jean Boutros (Texas A&M University, USA), Uri Erez (Tel Aviv University, Israel), Johannes Van Wouwerghem (Ghent University, Belgium), Gil I. Shamir (Google, USA), Gilles Zémor (Université de Bordeaux, France) 400

Error Correction and Detection for Computing Memories Using System Side Information

Clayton Schoeny (University of California, Los Angeles, USA), Mark Gottscho (UCLA, USA), Irina Alam (UCLA, USA), Puneet Gupta (UCLA, USA), Lara Dolecek (UCLA, USA) 405

What Can Machine Learning Teach Us about Communications?

Mengke Lian (Duke University, USA), Christian Häger (Chalmers University of Technology, Sweden & Duke University, USA), Henry D Pfister (Duke University, USA) 410

Information Theory and Applications 2 (Invited)

Staircase-PIR: Universally Robust Private Information Retrieval

Rawad Bitar (Rutgers University, USA), Salim El Rouayheb (Rutgers University, USA) 415

Recommender Systems over Wireless: Challenges and Opportunities

Linqi Song (City University of Hong Kong, Hong Kong), Christina Fragouli (UCLA, USA), Devavrat Shah (Massachusetts Institute of Technology, USA) 420

Placement Delivery Array and Its Applications

Qifa Yan (Telecom ParisTech, France), Xiaohu Tang (Southwest Jiaotong University, P.R. China), Qingchun Chen (Guangzhou University, P.R. China) 425

Secure physical layer network coding versus secure network coding

Masahito Hayashi (Nagoya University, Japan) 430

On the Capacity Region for Secure Index Coding

Yuxin Liu (The Australian National University, Australia), Badri N Vellambi (University of Cincinnati, USA), Young-Han Kim (UCSD, USA), Parastoo Sadeghi (The Australian National University, Australia) 435

Statistics and Compressed Sensing

Gaussian Universal Features, Canonical Correlations, and Common Information

Shao-Lun Huang (Tsinghua-Berkeley Shenzhen Institute, P.R. China), Gregory Wornell (MIT, USA), Lizhong Zheng (Massachusetts Institute of Technology, USA) 440

Privacy-Utility Management of Hypothesis Tests

Zuxing Li (CentraleSupélec & L2S, France), Tobias J. Oechtering (KTH Royal Institute of Technology, Sweden) 445

Algebraic Optimization of Binary Spatially Coupled Measurement Matrices for Interval Passing

Salman Habib (New Jersey Institute of Technology, USA), Joerg Klierer (New Jersey Institute of Technology, USA) 450

Sparse Recovery of Sign Vectors under Uncertain Sensing Matrices

Hang Zhang (Georgia Institute of Technology, USA), Afshin Abdi (Georgia Institute of Technology, USA), Faramarz Fekri (Georgia Institute of Technology, USA) 455

Privacy

Optimal Utility-Privacy Trade-off with Total Variation Distance as a Privacy Measure

Borzoo Rassouli (University of Essex, United Kingdom (Great Britain)), Deniz Gündüz (Imperial College London, United Kingdom (Great Britain)) 460

Privacy Under Hard Distortion Constraints

Jiachun Liao (Arizona State University, USA), Oliver Kosut (Arizona State University, USA), Lalitha Sankar (Arizona State University, USA), Flavio P. Calmon (Harvard University, USA) 465

Distributed Hypothesis Testing Under Privacy Constraints

Sreejith Sreekumar (Imperial College London, United Kingdom (Great Britain)), Deniz Gündüz (Imperial College London, United Kingdom (Great Britain)), Asaf Cohen (Ben-Gurion University of the Negev, Israel) 470

Private Information Retrieval from Multiple Access Channels

Karim A. Banawan (University of Maryland, USA), Sennur Ulukus (University of Maryland, USA) 475

Lattice Codes and NOMA

Performance Limits of Lattice Reduction over Imaginary Quadratic Fields with Applications to Compute-and-Forward

Shanxiang Lyu (Imperial College London, United Kingdom (Great Britain)), Christian Porter (Imperial College London, United Kingdom (Great Britain)), Cong Ling (Imperial College London, United Kingdom (Great Britain)) 480

A Neural Network Lattice Decoding Algorithm

Mohammad-Reza Sadeghi (Amirkabir University of Technology, Iran), Farzane Amirzade (Amirkabir University of Technology, Iran), Daniel Panario (Carleton University, Canada), Amin Sakzad (Monash University, Australia) 485

Joint Channel-Network Decoding for Asynchronous Physical-Layer Network Coding

Xiaokang Wang (Hongkong University of Science and Technology, Hong Kong), Wai Ho Mow (Hong Kong University of Science and Technology & HKUST, Hong Kong) 490

Optimization of the Factor Graph for the Multiuser Superposition Transmission

Bing Dong (Beijing University of Posts and Telecommunications, P.R. China), Shaoguo Wen (Beijing University of Posts and Telecommunications, P.R. China), Zhongwei Si (Beijing University of Posts and Telecommunications, P.R. China) 495

Cloud-Edge Non-Orthogonal Transmission for Fog Networks with Delayed CSI at the Cloud

Jingjing Zhang (King's College London, United Kingdom (Great Britain)), Osvaldo Simeone (King's College London, United Kingdom (Great Britain)) 500

Source Coding

Multiple-Access Channel with Independent Sources: Error Exponent Analysis

Arezou Rezazadeh (Universitat Pompeu Fabra, Spain), Josep Font-Segura (Universitat Pompeu Fabra, Spain), Alfonso Martinez (Universitat Pompeu Fabra, Spain), Albert Guillén i Fàbregas (ICREA and Universitat Pompeu Fabra & University of Cambridge, Spain) 505

An Upper bound on the Error Exponent in Lossless Source Coding with A Helper

Wei Kang (Southeast University, P.R. China), Nan Liu (Southeast University, P.R. China) 510

Vector Gaussian CEO Problem Under Logarithmic Loss

Yigit Ugur (Université Paris-Est Marne la Vallée & Huawei Technologies, France Research Center, Mathematical and Algorithmic Sciences Lab, France), Inaki Estella (Huawei Technologies Co., Ltd., France), Abdellatif Zaidi (Université Paris-Est, France) 515

On the Rate Distortion Function of Arbitrarily Varying Remote Sources

Amitalok J Budkuley (The Chinese University of Hong Kong, Hong Kong), Bikash K Dey (Indian Institute of Technology Bombay, India), Sidharth Jaggi (Chinese University of Hong Kong, Hong Kong), Vinod M Prabhakaran (Tata Institute of Fundamental Research, India) 520

Timely Lossless Source Coding for Randomly Arriving Symbols

Jing Zhong (Rutgers University, USA), Roy Yates (Rutgers University, USA), Emina Soljanin (Rutgers University, USA) 525

Coding Theory and Practice

A New Kind of Nonbinary Uniquely Decodable Codes with Arbitrary Code Length for Multiple-Access Adder Channel

Shan Lu (Gifu University, Japan), Wei Hou (Xidian University, P.R. China), Jun Cheng (Doshisha University, Japan), Hiroshi Kamabe (Gifu University, Japan) 530

Circular-shift Linear Network Codes with Arbitrary Odd Block Lengths

Qifu T Sun (University of Science and Technology Beijing, P.R. China), Hanqi Tang (University of Science and Technology Beijing, P.R. China), Zongpeng Li (Wuhan University & University of Calgary, P.R. China), Xiaolong Yang (University of Science & Technology Beijing, P.R. China), Keping Long (University of Science and Technology Beijing, P.R. China) 535

Encoding of Non-binary Quasi-cyclic Codes by Lin-Chung-Han Transform

Runzhou Li (School of Electronic and Information Engineering, Beihang University, P.R. China), Qin Huang (Group 201, Beihang University, P.R. China), Zulin Wang (Beihang University, P.R. China) 540

Systematic $[n, n-2]$ codes with capability of correcting single- and adjacent transposition errors

Yanling Chen (University of Duisburg-Essen, Germany), Han Vinck (University of Duisburg-Essen & University of Johannesburg, Germany) 545

Private Streaming with Convolutional Codes

Lukas Holzbaur (Technical University of Munich, Germany), Ragnar Freij-Hollanti (Technical University of Munich, Germany), Antonia Wachter-Zeh (Technical University of Munich (TUM), Germany), Camilla Hollanti (Aalto University, Finland) 550

Communication Theory

The Age of Updates in a Simple Relay Network

Ali Maatouk (CentraleSupélec, France), Mohamad Assaad (CentraleSupélec, France), Anthony Ephremides (University of Maryland, USA) 555

On the Outage Probability of Distributed MAC with ZF Detection

Joseph Kampeas (Ben-Gurion University of the Negev, Israel), Asaf Cohen (Ben-Gurion University of the Negev, Israel), Omer Gurewitz (Ben-Gurion University Of The Negev, Israel) 560

Zero-error Function Computation on a Directed Acyclic Network

Ardendu Tripathy (Iowa State University, USA), Aditya Ramamoorthy (Iowa State University, USA) 565

Asymptotically Optimal Scheduling for Compute-and-Forward

Ori Shmuel (Ben Gurion University, Israel), Asaf Cohen (Ben-Gurion University of the Negev, Israel), Omer Gurewitz (Ben-Gurion University Of The Negev, Israel) 570

The ϵ -error Capacity of Symmetric PIR with Byzantine Adversaries

Qiwen Wang (KTH Royal Institute of Technology, Sweden), Hua Sun (University of North Texas, USA), Mikael Skoglund (KTH Royal Institute of Technology, Sweden) 575

Distributed Computing and Storage

Entangled Polynomial Coding in Limited-Sharing Multi-Party Computation

Hanzaleh Akbari Nodehi (Sharif University of Technology, Iran), Seyed Reza Hoseini Najarkolaei (Sharif University of Technology, Iran), Mohammad Ali Maddah-Ali (Nokia Bell Labs, USA) 580

Treeplication: An Erasure Code that is Almost as Painless as Replication

Michael Gandelman (Technion, Israel), Yuval Cassuto (Technion, Israel) 585

Repair Schemes with Optimal I/O Costs for Full-Length Reed-Solomon Codes with Two Parities

Hoang Dau (Monash University, Australia, USA), Emanuele Viterbo (Monash University, Australia) 590

Storage, Computation, and Communication: A Fundamental Tradeoff in Distributed Computing

Qifa Yan (Telecom ParisTech, France), Sheng Yang (CentraleSupélec, France), Michele A Wigger (Telecom ParisTech, France) 595

Service Rate Region of Content Access from Erasure Coded Storage

Sarah Anderson (University of St. Thomas, USA), Ann Johnston (Penn State University, USA), Gauri Joshi (Carnegie Mellon University, USA), Gretchen Matthews (Clemson University, USA), Carolyn Mayer (Worcester Polytechnic Institute, USA), Emina Soljanin (Rutgers University, USA) 600

Information Theoretic Security 2

Authentication Capacity of Adversarial Channels

Oliver Kosut (Arizona State University, USA), Joerg Kliewer (New Jersey Institute of Technology, USA) 605

Symmetric Multilevel Imperfect Secret Sharing

Tao Guo (Texas A&M University, USA), Xuan Guang (The Chinese University of Hong Kong & Nankai University, P.R. China), Kenneth W. Shum (Institute of Network Coding, Hong Kong) 610

New Results on the Wire-tap Channel with Noiseless Feedback

Bin Dai (Southwest Jiaotong University, P.R. China), Linman Yu (Chengdu Textile College, P.R. China), Yuan Luo (Shanghai Jiao Tong University, P.R. China) 615

Secure Computation-and-Forward Communication with Linear Codes

Masahito Hayashi (Nagoya University, Japan), Tadashi Wadayama (Nagoya Institute of Technology, Japan), Angeles Vazquez-Castro (Universidad Autónoma de Barcelona, Spain) 620

Covert Communication over Adversarially Jammed Channels

Qiaosheng Zhang (The Chinese University of Hong Kong, Hong Kong), Mayank Bakshi (The Chinese University of Hong Kong, Hong Kong), Sidharth Jaggi (Chinese University of Hong Kong, Hong Kong) 625
