2018 Prognostics and System Health Management Conference PHM-Chongqing 2018

Table of Contents

Message from the General Chair	xxviii
Organizing Committee	xxix
Reviewers	xxxii

2018 Prognostics and System Health Management Conference

A Study of Cutting Tool Wear Prediction Utilizing Generalized Regression Neural Network with Improved Fruit Fly Optimization	1
<i>Ling Kang (Chongqing University), Xin Xiong (Chongqing University), Lili Yi (Chongqing University), and Yijun Guo (Chongqing University)</i>	
Faults Diagnosis of Rolling Bearings Based on Adaptive Fault Frequency Band Detection	8
<i>Kai Zheng (Chongqing University of Posts and Telecommunications), Bin Zhang (Chongqing University of Posts and Telecommunications), Jiafu Wen (Chongqing University of Posts and Telecommunications), and Yi Zhang (Chongqing University of Posts and Telecommunications)</i>	
Application of Wavelet Transform in Intermittent Fault Feature Extraction	14
<i>Huakang Li (National University of Defense Technology, China), Kehong Lv (National University of Defense Technology, China), Jing Qiu (National University of Defense Technology, China), and Guanjun Liu (National University of Defense Technology, China)</i>	
Cluster-Based Anomaly Detection in Condition Monitoring of a Marine Engine System	20
<i>Erik Vanem (Group Technology and Research, DNV GL, Høvik, Norway; University of Oslo) and Andreas Brandsæter (Group Technology and Research, DNV GL, Høvik, Norway; University of Oslo)</i>	
An Experimental Study on Empirical Wavelet Transform	32
<i>Geng Shao (University of Electronic Science and Technology of China), Dandan Peng (University of Electronic Science and Technology of China), and Zhiliang Liu (University of Electronic Science and Technology of China)</i>	
Simulation and Analysis of Faults of Joint-less Track Circuit Based on Operating Environment	38
<i>Wei Li (Tongji University, China), Shuyuan Hou (Shanghai Tunnel Engineering & Rail Transit Design and Research Institute), and Dongxiu Ou (Tongji University, China)</i>	

A Class Incremental Learning Approach Based on Autoencoder Without Manual Feature Extraction for Rail Vehicle Fault Diagnosis	45
<i>Jinlong Kang (University of Electronic Science and Technology of China), Zhiliang Liu (University of Electronic Science and Technology of China), Wenjun Sun (University of Electronic Science and Technology of China), Ming J. Zuo (University of Alberta), and Yong Qin (Beijing Jiaotong University)</i>	
Tension Measurement for Wire Ropes Based on Magneto-Elastic Effect	50
<i>Shunqi Liu (University of Electronic Science and Technology of China), Xin Zeng (University of Electronic Science and Technology of China), Minghao Ni (University of Electronic Science and Technology of China), Zhiliang Liu (University of Electronic Science and Technology of China), and Li Mo (Chengdu University)</i>	
Fatigue Life Analysis of Liquid-Filled Pipeline Under the Combined Excitation of Random Vibration and Fluid-Structure Interaction	57
<i>Lei Zhu (National University of Defense Technology, Changsha, China), Yu Jiang (National University of Defense Technology, Changsha, China), Zhengwei Fan (National University of Defense Technology, Changsha, China), and Dianlong Yu (National University of Defense Technology, Changsha, China)</i>	
Angle Resample Based Non-Timing-Pulse Synchronous Averaging and K-S Test as Gearbox Condition Monitoring Indicators	65
<i>Huanhuan Luo (Nanchang Hang Kong University), Yadav Srijana (Nanchang Hang Kong University), and Xiyang Wang (Nanchang Hang Kong University)</i>	
A Method Using EEMD and L-Kurtosis to Detect Faults in Roller Bearings	71
<i>Qiang Gao (Wenzhou University) and Jiawei Xiang (Wenzhou University)</i>	
Research on Evaluation Method of Ship Equipment Environmental Adaptability	77
<i>Xiaotong Fang (China Institute of Marine Technology and Economy), Bai Liu (China Institute of Marine Technology and Economy), Han Xu (China Institute of Marine Technology and Economy), and Kunpeng Zhang (China State Shipbuilding Corporation)</i>	
An Age-State-Dependent Degradation Model	81
<i>Renyan Jiang (Changsha University of Science and Technology)</i>	
The Security Analysis of Inertial Navigation System Using Sequential Binary Decision Diagrams	86
<i>Senyang Bai (National University of Defense Technology, China), Qian Zhao (National University of Defense Technology, China), and Zhijun Cheng (National University of Defense Technology, China)</i>	
Evaluation of Time-Varying Mesh Stiffness of Gears with Tooth Spalls Modeled as Spherical Shapes	94
<i>Yang Luo (University of Ottawa), Natalie Baddour (University of Ottawa), and Ming Liang (University of Ottawa)</i>	
A Novel Weak Bearing Fault Detection Method Based on Vibrational Resonance	100
<i>Lei Xiao (Shanghai Jiao Tong University), Tangbin Xia (Shanghai Jiao Tong University), Ershun Pan (Shanghai Jiao Tong University), and Xinghui Zhang (Mechanical Engineering College, Shijiazhuang, China)</i>	
Integrity Analysis Inspection and Lifecycle Prediction of Subsea Power Cables	105
<i>Wenshuo Tang (Heriot-Watt University, Edinburgh), Keith Brown (Heriot-Watt University, Edinburgh), David Flynn (Heriot-Watt University, Edinburgh), and Hugues Pellae (Heriot-Watt University, Edinburgh)</i>	
Model-Based Quantitative Distributed Fault Diagnosis Using System Decomposition	115
<i>Chenyu Xiao (Hefei University of Technology) and Ming Yu (Hefei University of Technology)</i>	

Fault Diagnosis and RUL Prediction Strategy Based on Double Time-Scale Particle Filter for Nonlinear Electromechanical System	120
<i>Hang Li (Hefei University of Technology) and Ming Yu (Hefei University of Technology)</i>	
A LOF-Based Method for Abnormal Segment Detection in Machinery Condition Monitoring	125
<i>Xuefang Xu (Xi'an Jiaotong University), Yaguo Lei (Xi'an Jiaotong University), and Xin Zhou (Xi'an Jiaotong University)</i>	
A Simulation Based Band-Pass Filter to Improve the Polynomial Chirplet Transform in Fault Detection ...	129
<i>Lu Wang (Wenzhou University) and Jiawei Xiang (Wenzhou University)</i>	
Electrostatic Monitoring of Wind Turbine Gearbox Under Variable Operating Conditions	134
<i>Ruo Chen Liu (Jiangsu University of Technology), Jing Zhou (Jiangsu University of Technology), Wei Wang (Jiangsu University of Technology), and Xuelian Yao (Jiangsu University of Technology)</i>	
Reliability Modeling of Two-Component System with Degradation Interaction Based on Copulas	138
<i>Zhiyuan Yang (Army Engineering University, Shijiazhuang, China), Jianmin Zhao (Army Engineering University, Shijiazhuang, China), Zhonghua Cheng (Army Engineering University, Shijiazhuang, China), and Liying Li (Hebei University of Science and Technology, Shijiazhuang, China)</i>	
An Integrated Method for Condition Monitoring of Rotating Machines	144
<i>Guangyuan Chen (Shandong University), Guoliang Lu (Shandong University), and Peng Yan (Shandong University)</i>	
Research on the Calculation Method for the Parameters of the Simplified Schavemaker AC Arc Model	150
<i>Yang Gao (Nanjing University of Aeronautics and Astronautics), Li Wang (Nanjing University of Aeronautics and Astronautics), Yaojia Zhang (Nanjing University of Aeronautics and Astronautics), and Ke Zeng (Nanjing University of Aeronautics and Astronautics)</i>	
Research on Fault Diagnosis Method of Bogie Bearing Based on Microphone Arrays	157
<i>Ge Yan (Beijing University of Chemical Technology) and Bo Ma (Beijing University of Chemical Technology)</i>	
An Improved Binary Wolf Pack Algorithm for Solving Optimal Sensor Selection Problems	162
<i>Xiaoxuan Jiao (Air Force Engineering University, Xi'an, China), Bo Jing (Air Force Engineering University, Xi'an, China), Beiquan Jiao (Air Force Engineering University, Xi'an, China), Shuhao Si (Air Force Engineering University, Xi'an, China), and Yun Wang (Air Force Engineering University, Xi'an, China)</i>	
Fault Diagnosis of Planetary Gearbox Based on Complementary Ensemble Empirical Mode Decomposition and Teager Energy Operator	171
<i>Chaoge Wang (Dalian University of Technology, Canada), Hongkun Li (Dalian University of Technology, Canada), Rui Yang (Dalian University of Technology, Canada), Mengfan Hou (Dalian University of Technology, Canada), Daolong Tang (Dalian University of Technology, Canada), and Jiayu Ou (Dalian University of Technology, Canada)</i>	
A Classification of Milling TCM Based on Bandpass Filter and Kernel Extreme Learning Machine	176
<i>Zhi Lei (Wenzhou University), Yuqing Zhou (Wenzhou University), and Xianglei Zhang (Wenzhou University)</i>	
A Fuzzy Bayesian Based Zero-Failure Accelerated Life Demonstration Test Design Method	180
<i>Dan Xu (Beihang University, Beijing, China) and Zhixin Feng (Beihang University, Beijing, China)</i>	

On-line Crack Monitoring Technology of Steam Cooler Girth Welding Based on the Acoustic Emission Principle	186
<i>Shan Gao (Beijing University of Chemical Technology), Bo Ma (Beijing University of Chemical Technology), and Yuanzheng Li (Liaoning Hongyan River Nuclear Power Co, Ltd., Dalian, China)</i>	
Single Event Upset Reliability Assessment for RAM Based on Maximum Entropy Principle and Bootstrap	191
<i>Zhongqing Zhang (Beihang University), Guicui Fu (Beihang University), Wendi Guo (Beihang University), Yutai Su (Beihang University), and Bo Wang (Beihang University)</i>	
A New Approach for Analog Circuit Fault Diagnosis Based on Extreme Learning Machine	196
<i>Guangquan Zhao (Harbin Institute of Technology), Yuefeng Liu (Harbin Institute of Technology), Yongcheng Gao (Harbin Institute of Technology), Zedong Jiang (Harbin Institute of Technology), and Cong Hu (Harbin Institute of Technology)</i>	
A Survey on Prognostic and Health Management for Special Vehicles	201
<i>Xiaojian Yi (China North Vehicle Research Institute), Yuefeng Chen (Beijing Special Vehicle Institute), Peng Hou (Beijing Institute of Technology), and Qiufang Wang (China North Vehicle Research Institute)</i>	
Modeling Research of Electrochemical Migration Failure on Printed Circuit Board	209
<i>Yilin Zhou (Beijing University of Posts and Telecommunications), Yanyu Chen (Beijing University of Posts and Telecommunications), Qi Xie (Beijing University of Posts and Telecommunications), and Ying Li (Beijing University of Posts and Telecommunications)</i>	
Real-time Bayes Estimation of Residual Life Based on Multisource Information Fusion	215
<i>Qian Zhao (National University of Defense Technology, Changsha), Xiang Jia (National University of Defense Technology, Changsha), Bo Guo (National University of Defense Technology, Changsha), and Zhijun Cheng (National University of Defense Technology, Changsha)</i>	
Remaining Useful Life Prediction of Aircraft Auxiliary Power Unit with On-wing Sensing Data	223
<i>Liansheng Liu (Harbin Institute of Technology), Lulu Wang (Shenyang Maintenance Base, China Southern Airlines Company Limited), Shaonian Wang (Shenyang Maintenance Base, China Southern Airlines Company Limited), Daotong Liu (Harbin Institute of Technology), and Yu Peng (Harbin Institute of Technology)</i>	
Prediction of Product Degradation in Outside Environment Based on Cumulative Damage Degradation Model	229
<i>Wen Xi (Systems Engineering Research Institute, Beijing), Yijun Tong (Systems Engineering Research Institute, Beijing), Bohua Qiu (Systems Engineering Research Institute, Beijing), Zijie Liu (Systems Engineering Research Institute, Beijing), and Xiliang Xu (Systems Engineering Research Institute, Beijing)</i>	
Detecting and Locating Local Flaws Based on Magnetic Flux Leakage Imaging for Wire Ropes	234
<i>Zuopu Zhou (University of Electronic Science and Technology of China) and Zhiliang Liu (University of Electronic Science and Technology of China)</i>	
Reliability Testing Method for Subway Trains Acceptance Based on Bayesian Theory Modified by Fibonacci Algorithm	239
<i>Meng Ye (Beijing Jiaotong University) and Yong Qin (Beijing Jiaotong University)</i>	

Data-Driven Anomaly Detection Using OCSVM with Boundary Optimzation	244
<i>Kai Guo (Harbin Institute of Technology), Datong Liu (Harbin Institute of Technology), Yu Peng (Harbin Institute of Technology), and Xiyuan Peng (Harbin Institute of Technology)</i>	
Application of PHM Technology in the Design of Tank Fire Control System	249
<i>Jing Xu (China North Vehicle Research Institute), Yang Lei (China North Vehicle Research Institute), Bin Liu (China North Vehicle Research Institute), Chao Ji (China North Vehicle Research Institute), and Lijun Nan (China North Vehicle Research Institute)</i>	
Reliability Evaluation Based on Joint Model of Degradation and Failure Data	254
<i>Xiuting Liu (China Institute of Atomic Energy), Jipin Gu (China Institute of Atomic Energy), Xiao Zhai (China Institute of Atomic Energy), Lili Xiao (China Institute of Atomic Energy), Enshan Pu (China Institute of Atomic Energy), Jianxin Zhang (China Institute of Atomic Energy), and Xiaoxian Guo (China Institute of Atomic Energy)</i>	
Novel Fault Diagnostic Technology for Aviation General Processing Module	260
<i>Liye Cheng (The Fifth Electronics Research Institute of Ministry of Industry and Information Technology, Guangzhou, China), Chen Sun (The Fifth Electronics Research Institute of Ministry of Industry and Information Technology, Guangzhou, China), Yun Huang (The Fifth Electronics Research Institute of Ministry of Industry and Information Technology, Guangzhou, China), and Zhenwei Zhou (The Fifth Electronics Research Institute of Ministry of Industry and Information Technology, Guangzhou, China)</i>	
Research on Classification Methods of LOS for Urban Rail Transit Stations Passages	264
<i>Zhiwei Cao (Beijing Jiaotong University), Yong Qin (Beijing Jiaotong University), and Zhengyu Xie (Beijing Jiaotong University)</i>	
Basic Principles, Models and Algorithms for Creation of Self-Maintenance and Self-Recovery Systems for Engines, Gas Turbines and Mechanics	270
<i>Vitalii Iakimkin (SmartSys Prognosis Center, Moscow), Sergey Kirillov (SmartSys Prognosis Center, Moscow), Aleksandr Kirillov (SmartSys Prognosis Center, Moscow), and Michael Pecht (University of Maryland)</i>	
Certification of Safe and Trusted Robotic Inspection of Assets	276
<i>Fateme Dinmohammadi (Heriot-Watt University, UK), Vincent Page (University of Liverpool, UK), David Flynn (Heriot-Watt University, UK), Valentin Robu (Heriot-Watt University, UK), Michael Fisher (University of Liverpool, UK), Charles Patchett (Hartree Centre Sci-Tech Daresbury, UK), Michael Jump (University of Liverpool, UK), Wenshuo Tang (Heriot-Watt University, UK), and Matt Webster (University of Liverpool, UK)</i>	
Three-Stage Method for Rotating Machine Health Condition Monitoring Using Vibration Signals	285
<i>Hosameldin Ahmed (Brunel University London) and Asoke Nandi (Brunel University London)</i>	
Intelligent Fault Diagnosis of Rolling Element Bearings Based on HHT and CNN	292
<i>Zhuang Yuan (China University of Petroleum), Laibin Zhang (China University of Petroleum), Lixiang Duan (China University of Petroleum), and Tao Li (China University of Petroleum)</i>	
Feature Extraction for Rolling Bearing Diagnosis Based on Improved Local Mean Decomposition	297
<i>Yang Liu (China University of Petroleum), Bo Tang (Tarim Oilfield, Korla, China), Lixiang Duan (China University of Petroleum), and Faqi Fei (Tarim Oilfield, Korla, China)</i>	

Evaluation of Health Condition for IMA Module Based on Mahalanobis Distance	303
<i>Linlin Shi (The Fifth Electronics Research Institute of Ministry of Industry and Information Technology, Guangzhou, China), Zhenwei Zhou (The Fifth Electronics Research Institute of Ministry of Industry and Information Technology, Guangzhou, China), Hanguang Jia (The Fifth Electronics Research Institute of Ministry of Industry and Information Technology, Guangzhou, China), Liye Cheng (The Fifth Electronics Research Institute of Ministry of Industry and Information Technology, Guangzhou, China), Pengfei Yu (The Fifth Electronics Research Institute of Ministry of Industry and Information Technology, Guangzhou, China), Yun Huang (The Fifth Electronics Research Institute of Ministry of Industry and Information Technology, Guangzhou, China), and Yunfei En (The Fifth Electronics Research Institute of Ministry of Industry and Information Technology, Guangzhou, China)</i>	
An Indirect on-line Measurement Method of Crankshaft Clearance Based on Simulation Vibration Signal .	308
<i>Ning Wang (China University of Petroleum), Lixiang Duan (China University of Petroleum), Faqi Fei (Department of Exploitation and Project, Tarim Oilfield, China), and Bo Tang (Department of Equipment and Materials, Tarim Oilfield, China)</i>	
Fault Injection and Diagnosis for Civil Aircraft Cabin Pressure Control System	314
<i>Qingxiong Xiong (Nanjing University of Aeronautics and Astronautics) and Shaojie Zhang (Nanjing University of Aeronautics and Astronautics)</i>	
Adaptive Fault Diagnosis Observer-Based Fault Tolerant Control Design for a Jumbo Jet Transport Aircraft	319
<i>Jiao Gu (Nanjing University of Aeronautics & Astronautics) and Shaojie Zhang (Nanjing University of Aeronautics & Astronautics)</i>	
Multiple-Output-Gaussian-Process Regression-Based Anomaly Detection for Multivariate Monitoring Series	326
<i>Jingyue Pang (Harbin Institute of Technology, China), Datong Liu (Harbin Institute of Technology, China), Yu Peng (Harbin Institute of Technology, China), and Xiyuan Peng (Harbin Institute of Technology, China)</i>	
Fault Detection Method Based on the Condition Indicators of Compressive Sampling for the Gearbox in Helicopter	333
<i>Zhe Cheng (National University of Defense Technology, Changsha, China), Niaoqing Hu (National University of Defense Technology, Changsha, China), Yu Zhang (National University of Defense Technology, Changsha, China), and Xinpeng Zhang (Army Engineering University, Chongqing, China)</i>	
Perception and Diagnostic Prediction Based Turbines Oil on-Line Monitoring of Health Status Data	338
<i>Shuai Li (Wuhan University of Technology), Ping Song (China Changhang Bunker (Sinopec) Co.,Ltd.), Xia Wang (Wuhan University of Technology), and Kun Yang (Wuhan University of Technology)</i>	
Dynamic Modeling of the Aircraft Landing Gear Based on ISD Mechanism	344
<i>Yu Zhang (National University of Defense Technology, China), Niaoqing Hu (National University of Defense Technology, China), Zhe Cheng (National University of Defense Technology, China), Lun Zhang (National University of Defense Technology, China), and Huipeng Chen (National University of Defense Technology, China)</i>	
Research of Prognostic and Health Management for Avionics System Based on Massive Data Mining	350
<i>Xiaoxuan Jiao (Air Force Engineering University), Bo Jing (Air Force Engineering University), and Beiquan Jiao (Air Force Engineering University)</i>	

Bearing Fault Diagnosis Based on Multi-task Learning	358
<i>Wentao Mao (Henan Normal University, Xinxiang, China), Jianliang He (Henan Normal University, Xinxiang, China), Wushi Feng (Henan Normal University, Xinxiang, China), and Siyu Tian (Henan Normal University, Xinxiang, China)</i>	
Performance Degradation of Hydraulic Vehicle Dampers	364
<i>Xingyan Yao (Chongqing Engineering Laboratory for Detection Control and Integrated System) and Michael Pecht (University of Maryland)</i>	
Damage Detection in Composite Structures Using Time-Reversal Migration Technique	369
<i>Dan Xiang (X-wave Innovations, Inc., USA), Fuh-Gwo Yuan (North Carolina State University), and Jason He (North Carolina State University)</i>	
Remaining Useful Life Prediction of Wind Turbine Generator Bearing Based on EMD with an Indicator ...	375
<i>Lixiao Cao (Beihang University), Zheng Qian (Beihang University), and Yan Pei (Beihang University)</i>	
A Health Management System Design for Large-Scale Vertical Mill	380
<i>Ansheng Li (Zhengzhou University of Light Industry), Sugai Han (Zhengzhou University of Light Industry), Hongchao Wang (Zhengzhou University of Light Industry), Xiaoyun Gong (Zhengzhou University of Light Industry), Liangwen Wang (Zhengzhou University of Light Industry), Wenliao Du (Zhengzhou University of Light Industry), Yixiang Huang (Shanghai Jiao Tong University), and Yanming Li (Shanghai Jiao Tong University)</i>	
Research on Electrical and Mechanical Condition Monitoring System of the Special Vehicle	386
<i>Tingting Wu (China North Vehicle Research Institute), Chao Ji (China North Vehicle Research Institute), Yugang Li (China North Vehicle Research Institute), and Daocan Wang (China North Vehicle Research Institute)</i>	
Life Prediction Approach by Integrating Nonlinear Accelerated Degradation Model and Hazard Rate Model	392
<i>Zhenan Pang (Xi'an Institute of High-Tech), Changhua Hu (Xi'an Institute of High-Tech), Xiaosheng Si (Xi'an Institute of High-Tech), Jianxun Zhang (Xi'an Institute of High-Tech), and Hong Pei (Xi'an Institute of High-Tech)</i>	
Comprehensive Degradation Assessment for Urban Rail Traction Power Supply Equipment Considering Different Operation State	399
<i>Chao Yang (Southwest Jiaotong University), Zhen Cui (Southwest Jiaotong University), Lina Liu (State Grid Sichuan Electric Power Corporation Measurement Center), Ruidong Fan (Southwest Jiaotong University), and Sheng Lin (Southwest Jiaotong University)</i>	
High-Voltage Circuit Breaker Fault Diagnosis Model Based on Coil Current and KNN	405
<i>Tong Li (Southwest Jiao Tong University), Qi Zhou (Southwest Jiao Tong University), Lina Liu (State Grid Sichuan Electric Power Corporation), Sheng Lin (Southwest Jiao Tong University), and Zengchen Mou (Southwest Jiao Tong University)</i>	
Mathematical Modeling of Fuel Consumption of DENA Vehicle Based on Side Window Condition	410
<i>Maryam Rohani (R&D Unit), Masoomeh Karimi (R&D Unit), Reza Shamohammadi (R&D Unit), Omid Nazari (R&D Unit), Sayed Alireza Sadrossadat (Department of Electrical and Computer Engineering), Gholamreza Mortazavi (Ezam Electrical and electronic Groups), and Salman Kimiagar (Thompson rivers university)</i>	

Degradation Model of Photovoltaic Modules Under Multi-Environment Factors Coupling Based on FEM and Failure Physical Model	414
<i>Runfang Wang (Beihang University), Zheng Qian (Beihang University), Lixiao Cao (Beihang University), and Jingyi Wang (Beihang University)</i>	
Centrifugal Pumps Fault Diagnosis Using Multivariate Multiscale Symbolic Dynamic Entropy and Logistic Regression	422
<i>Yongbo Li (Northwestern Polytechnical University, Xi'an, China), Xianzhi Wang (Northwestern Polytechnical University, Xi'an, China), and Shubin Si (Northwestern Polytechnical University, Xi'an, China)</i>	
A Warranty Policy for Repairable Products with Bathtub-Shape Failure Rate	427
<i>Rui Zheng (Southeast University) and Chun Su (Southeast University)</i>	
An Integrated Model of kNN and GBDT for Fault Diagnosis of Wheel on Railway Vehicle	432
<i>Linlin Kou (Beijing Jiaotong University), Yong Qin (Beijing Jiaotong University), and Xuejun Zhao (Beijing Jiaotong University)</i>	
A Review on Neurocomputing Based wind Turbines Fault Diagnosis and Prognosis	437
<i>Sérgio Baltazar (University of Algarve, Portugal), Chuan Li (Chongqing Technology and Business University, China), Helder Daniel (University of Algarve, Portugal), and José Valente de Oliveira (University of Algarve, Portugal)</i>	
Big Operational Data Oriented Health Diagnosis Based on Weibull Proportional Hazards Model for Multi-State Manufacturing System	444
<i>Yixiao Zhao (Beihang University), Yihai He (Beihang University), Zhaoxiang Chen (Beihang University), Xiao Han (Beihang University), and Zheng He (Beihang University)</i>	
A Fast Time Domain Measuring Technique of Electrochemical Impedance Spectroscopy Based on FFT ...	450
<i>Chao Lyu (Harbin Institute of Technology), Haiyang Liu (Harbin Institute of Technology), Weilin Luo (Harbin Institute of Technology), Tao Zhang (Harbin Institute of Technology), and Wengang Zhao (State Grid Liaoning Electric Power Company Limited)</i>	
Fault Reconstruction for Three-Motor Web-Winding System Via Nonlinear Disturbance Observer	456
<i>Xiaoyan Chu (Central South University) and Xiaohong Nian (Central South University)</i>	
Multivariate Correlation Degradation Parameters Life Assessment Method of Component Based on the Cholesky Factorization	462
<i>Hongyan Leng (Beihang University), Guicui Fu (Beihang University), Maogong Jiang (Beihang University), and Ling Zhong (Beihang University)</i>	
Application of Adaptive Mono-Stable Stochastic Resonance Based on Cuckoo Search for Incipient Fault Diagnosis of Rolling Element Bearings	468
<i>Jianshe Kang (Army Engineering University of PLA, Shijiazhuang, China), Kuo Chi (Army Engineering University of PLA, Shijiazhuang, China), Xupeng Die (Army Engineering University of PLA, Shijiazhuang, China), Zhenya Wu (Army Engineering University of PLA, Shijiazhuang, China), and Xiaobo Su (Army Engineering University of PLA, Shijiazhuang, China)</i>	
Remaining Useful Lifetime Prediction of Nonlinear System with Random Effect and Measurement Error ..	474
<i>Zhongyi Cai (Air Force Engineering University), Zezhou Wang (Air Force Engineering University), Xiaoxiong Dong (Air Force Engineering University), Lili Wang (Air Force Engineering University), and Huachun Xiang (Air Force Engineering University)</i>	

Selection Optimization of Test Path Based on Bidirectional Breadth First Search and Binary Artificial Fish Swarm Algorithm	480
<i>Yerong Hu (National University of Defense Technology), Guanjun Liu (National University of Defense Technology), Yong Zhang (National University of Defense Technology), Peng Yang (National University of Defense Technology), and Jing Qiu (National University of Defense Technology)</i>	
Remaining Useful Lifetime Estimation with Random Failure Threshold and Measurement Error	487
<i>Zezhou Wang (Air Force Engineering University), Yunxiang Chen (Air Force Engineering University), Zhongyi Cai (Air Force Engineering University), and Tao Wang (The Unit 95616 of CPLA)</i>	
Diesel Engine Fault Diagnosis Based on Singular Value Energy Standard Spectrum, Intrinsic Time-Scale Decomposition and Kernel Independent Component Analysis	493
<i>Min Liu (Army Engineering University Shijiazhuang,), Yingtang Zhang (Army Engineering University Shijiazhuang), Zhining Li (Army Engineering University Shijiazhuang), Hongbo Fan (Army Engineering University Shijiazhuang), and Qiang Wang (Army Engineering University Shijiazhuang)</i>	
Study of Structural Reliability Evaluation Method Based on Deep BP Neural Network	500
<i>Jie Liu (China Academy of Engineering Physics), Lifang Liu (China Academy of Engineering Physics), Shun Li (China Academy of Engineering Physics), Zhangchun Tang (University of Electronic Science and Technology of China), and Chenjue Wang (University of Electronic Science and Technology of China)</i>	
A Probabilistic Classifier for Transformer Dissolved Gas Analysis Using Various Input Variables	506
<i>Mei Chen (University of Electronic Science and Technology of China), Ningcong Xiao (University of Electronic Science and Technology of China), Ming Jian Zuo (University of Alberta), and Chengning Zhou (University of Electronic Science and Technology of China)</i>	
Analysis of Radiation Effects for Monitoring Circuit Based on Deep Belief Network and Support Vector Method	511
<i>Zhanqiang Xing (China Academy of Engineering Physics), Lifang Liu (China Academy of Engineering Physics), Shun Li (China Academy of Engineering Physics), and Yinyu Liu (China Academy of Engineering Physics)</i>	
Reliability Prediction of High Power Laser Diodes for Space Application Considering the Effect of Temperature Drift	517
<i>Wenbo Wu (Chinese Academy of Sciences), Yang Wang (Chinese Academy of Sciences), Dequan Yu (Chinese Academy of Sciences), Hongyong Fu (Chinese Academy of Sciences), Ke Wang (Chinese Academy of Sciences), and Mingfang Wang (Chinese Academy of Sciences)</i>	
Remaining Useful Life Estimation Using ANFIS Algorithm: A Data-Driven Approach for Prognostics	522
<i>Seyed Ali Razavi (University of Tehran), Tooraj Abbasian Najafabadi (University of Tehran), and Ali Mahmoodian (University of Sharif)</i>	
Gearbox Fault Diagnosis Based on Multifractal Detrended Fluctuation Analysis and Improved K Means Clustering	527
<i>Xin Zhang (Army Engineering University), Jianmin Zhao (Army Engineering University), Haiping Li (Army Engineering University), Xianglong Ni (Electronic Equipment Test Centre of China), and Fucheng Sun (Electronic Equipment Test Centre of China)</i>	

The Design of the Hand Structure of a Kind of Exoskeleton Type Maintenance Power-Assisted Gloves	532
<i>Minhao Wu (National University of Defense Technology), Yanling Qian (National University of Defense Technology), Long Wang (National University of Defense Technology), and Xiangli Feng (National University of Defense Technology)</i>	
Fault Diagnosis of Asynchronous Motors Based on LSTM Neural Network	540
<i>Dengyu Xiao (Shanghai Jiao Tong University), Yixiang Huang (Shanghai Jiao Tong University), Xudong Zhang (Shanghai Jiao Tong University), Haotian Shi (Shanghai Jiao Tong University), Chengliang Liu (Shanghai Jiao Tong University), and Yanming Li (Shanghai Jiao Tong University)</i>	
Railway Turnout Fault Analysis Based on Monitoring Data of Point Machines	546
<i>Dongxiu Ou (Tongji University) and Rui Xue (Tongji University)</i>	
Research on Rail Surface Defect Detection Method Based on UAV Images	553
<i>Yunpeng Wu (Beijing Jiaotong University), Yong Qin (Beijing Jiaotong University), and Limin Jia (Beijing Jiaotong University)</i>	
Research on Armored Equipment Autonomic Logistics Mode Based on PHM Technology	559
<i>Pinwang Zhao (China North Vehicle Research Institute), Xiaojian Yi (China North Vehicle Research Institute), Qiufang Wang (China North Vehicle Research Institute), Shulin Liu (China North Vehicle Research Institute), and Yue Liu (China North Vehicle Research Institute)</i>	
Risk-Oriented Product Assembling System Health Analysis Approach Based on RQR Chain	567
<i>Fengdi Liu (Beihang University), Yihai He (Beihang University), Jiaming Cui (Beihang University), Panting Duan (Beihang University), and Yu Xu (Beihang University)</i>	
Gcforest-Based Fault Diagnosis Method For Rolling Bearing	572
<i>Qi Liu (Southwest Jiaotong University), Hongli Gao (Southwest Jiaotong University), Zhichao You (Southwest Jiaotong University), Hongliang Song (Southwest Jiaotong University), and Li Zhang (Southwest Jiaotong University)</i>	
Fault Diagnosis and Estimation of Electric Scooter Based on Double-Scale UKF	578
<i>Lulu Sun (Hefei University of Technology) and Ming Yu (Hefei University of Technology)</i>	
Fault Detection and Backtrace Based on Graphical Probability Model	584
<i>Xiaolu Chen (Beijing University of Chemical Technology), Jing Wang (Beijing University of Chemical Technology), and Jinglin Zhou (Beijing University of Chemical Technology)</i>	
Modeling and Simulation of Wing Skin Structural Pitting Corrosion	591
<i>Xiuping Zhu (Northwestern Polytechnical University), Fangyi Wan (Northwestern Polytechnical University), Xingliang Yu (Northwestern Polytechnical University), and Yingnan Guo (Northwestern Polytechnical University)</i>	
A Novel Health Assessment Approach for Multi-State Manufacturing Systems Based on Operational Quality Data	597
<i>Zhaoxiang Chen (Beihang University), Yihai He (Beihang University), Yixiao Zhao (Beihang University), Xiao Han (Beihang University), and Zheng He (Beihang University)</i>	
A General Fault Injection Method Based on JTAG	604
<i>Wentao Lu (China Aero-Polytechnology Establishment), Ruping Wang (China Aero-Polytechnology Establishment), Chenhui Zeng (China Aero-Polytechnology Establishment), Chenyan Liu (China Aero-Polytechnology Establishment), and Xin Wang (China Aero-Polytechnology Establishment)</i>	

Instantaneous Frequency Estimation Via Multiple Ridge Integration Scheme for Bearing Fault Diagnosis..	609
<i>Rongmei Ding (Soochow University), Juanjuan Shi (Soochow University), Xingxing Jiang (Soochow University), and Zhongkui Zhu (Soochow University)</i>	
State Recognition of Switch Matrix Based on Image Processing	614
<i>Shigang Zhang (National University of Defense Technology), Yongmin Yang (National University of Defense Technology), Yangyang Li (National University of Defense Technology), and Xu Luo (National University of Defense Technology)</i>	
Demagnetization Quantification of PMSM Based on Support Vector Regression	619
<i>Renjie Dou (University of Jinan), Fangzhen Song (University of Jinan), Haining Liu (University of Jinan), and Xiuhua Men (University of Jinan)</i>	
Experimental Study on Interconnected Structures Failure of Electronic Packaging Under Vibration Load...	624
<i>Yaojun Chen (Air Force Engineering University), Jiaxing Hu (Air Force Engineering University), Bo Jing (Air Force Engineering University), and Yulin Zhang (Air Force Engineering University)</i>	
An Iterative Parameters Estimator for Damped Exponential Signal in Noise	629
<i>Leng Han (Chongqing University of Posts and Telecommunications), Haitao Xu (Chongqing University of Posts and Telecommunications), Lingling Tao (Chongqing University of Posts and Telecommunications), and Wendong Li (Chongqing University of Posts and Telecommunications)</i>	
Establishment and Analysis of Dependency Model for Airborne Fuel Pump Based on Multi-Feature Quantity	
<i>Yun Wang (Air Force Engineering University), Bo Jing (Air Force Engineering University), Meng Sun (Air Force Engineering University), Xiaoxuan Jiao (Air Force Engineering University), Shuhao Si (Air Force Engineering University), and Qiang Fu (Air Force Engineering University)</i>	
Research on the Fault Warning Method Based on Dual-tree Complex Wavelet Transform and BP Neural Network	642

GKFP: A New Fuzzy Clustering Method Applied to Bearings Diagnosis	1295
<i>Chuan Li (Chongqing Technology and Business University), Luiz Ledo (Federal University of Technology of Paraná), and Myriam Delgado (Federal University of Technology of Paraná)</i>	
Issues and Tips:A Set of Integrated Experiments of Applying Auto-Encoder and Convolutional Neural Network in Feature Extraction and Fault Diagnosis	1301
<i>Xudong Li (National Space Science Center, CAS, China), Mingtao Li (National Space Science Center, CAS, China), Jianhua Zheng (National Space Science Center, CAS, China), and Yang Hu (Science and Technology on Complex Aviation System, Simulation Laboratory, Beijing, China)</i>	
Multi Information Fusion and Fault Diagnosis System for Motor Drive System in High Speed Train	1307
<i>Linghui Meng (China Electronic Product Reliability and Environmental Testing Research Institute), Yuanhang Wang (China Electronic Product Reliability and Environmental Testing Research Institute), Jian Zhou (China Electronic Product Reliability and Environmental Testing Research Institute), Xiaojian Ding (China Electronic Product Reliability and Environmental Testing Research Institute), and Xiaobing Li (China Electronic Product Reliability and Environmental Testing Research Institute)</i>	
Railway Comprehensive Monitoring and Warning System Framework Based on Space-air-Vehicle-Ground Integration Network	1314
<i>Jingfan Yang (Beijing Jiaotong University), Xiaoqing Cheng (Beijing Jiaotong University), Yunpeng Wu (Beijing Jiaotong University), Yong Qin (Beijing Jiaotong University), and Limin Jia (Beijing Jiaotong University)</i>	
Urban Road Network Traffic Volume Prediction Based on Road Section Speed	1320
<i>Yijun Miao (Beijing Jiaotong University) and Liying Wei (Beijing Jiaotong University)</i>	
Simulation Research on Traffic Flow Characteristics of Bus Stop Area Based on VISSIM Software	1325
<i>Yuan Pan (Beijing Jiaotong University) and Zhiwei Cao (Beijing Jiaotong University)</i>	
Gear Fault Feature Extraction Based on OMP and K-SVD	1331
<i>Jingqiang Zou (Chongqing University), Yi Qin (Chongqing University), and Aibing Zhang (Chongqing University)</i>	

Optimal Similarity Measurement for Discriminant Vector Machines	1337
<i>Tao Wang (Tianjin University)</i>	
Reliability Simulation and Test Evaluation Technology of Rail Transit Electronic Products Based on Load Spectrum Data	1343
<i>Xiaokai Huang (Beijing Institute of Spacecraft Environment Engineering), Hao Wang (Beijing Institute of Spacecraft Environment Engineering), Ruijun Chen (Beijing Traffic Control Technology co. LTD.), and Yinhao Chen (Beijing Traffic Control Technology co. LTD.)</i>
