Contents

Materials:

24 – Steeldesign and activated infiltration of metal-matrix composites for wearing parts P. Röhmer, TU Bergakademie Freiberg, Foundry Institute, Germany	13
27 – Oxidation resistant aluminum alloyed sinter cast iron for high temperature application N. Scheidhauer, Technical University Bergakademie Freiberg, Foundry Department, Germany	15
35 – Modeling of microstructure in hypoeutectic high chromium cast iron D. Siekaniec, AGH University of Science and Technology, Faculty of Foundry Engineering, Poland	17
37 – Possibility on estimation of fatigue limit using X-ray CT apparatus in spheroidal graphite cast iron K. Tanaka, Tokyo City University, Graduate school of Engineering, Japan	19
48 – Influence of solution hardening on microstructure and mechanical properties of Al-2.5Mg-0.7Li alloy F. Kozina, University of Zagreb Faculty of Metallurgy, Department for Process Metallurgy, Croatia	21
50 – Modification of non-metallic inclusions in steel by application of deoxidizing agents with alkaline metals (calcium and barium) J. Cerny, COMTES FHT, Czech Republic	23
77 – New possibilities in the thermal analysis of moulding materials J. Svidró, Jönköping University School of Engineering, Department of Materials and Manufacturing, Sweden	25
136 – Development of mathematical relationships for calculating of material-dependent-flowability of green moulding sand D. Abdulamer, IMKF. TU- Bergakademie Freiberg, Germany	27
147 – Spinel forming systems (Mg-/Fe-/Mn-Al-O) as functional coating materials on carbon-bonded filters for steel melt filtration B. Bock, TU Bergakademie Freiberg, Institute of Ceramic, Glass and Construction Materials, Germany	29
160 – Development of new heat – resistant steel to avoid the detrimental Z-phase precipitation at high temperatures W. Pasini, Federal University of Rio Grande do Sul, Metallurgy Department - School of Engineering, Brazil	31
170 – The deviation from eutectic composition in boundary layer for eutectic growth: a phase-field study Z. Tu, Huazhong University of Science and Technology, State Key Laboratory of Materials Processing and Die & Mould Technology, China	33
173 – Effect of cooling rate on constituent particle formation in high-speed twin-roll cast Al-Mn based alloy strips R. Song, Tokyo Institute of Technology, Department of Metallurgy and Ceramics Science, Japan	35
190 – Suppressing of ultra-high temperature wetting between molten Si and SiC by using h-BN spray coatings W. Polkowski, Foundry Research Institute, Poland	37
196 – Indicator of the efficient protection against the humidity W_{sor} as a new parameter characterising protective coatings N. Kaźnica, AGH University of Science and Technology, Faculty of Foundry Engineering, Poland	39
207 – The influence of remelting on the properties of AlSi9Cu3 alloy with higher iron content M. Matejka, University of Žilina, Department of Technological Engineering, Slovakia	41
215 – Study of damping properties of composite materials on a metallic matrix M. Poręba, AGH University of Science and Technology, Faculty of Foundry Engineering, Poland	43
216 – Tribological properties of composite materials on the metallic matrix B. Gospodarczyk, AGH University of Science and Technology, Faculty of Foundry Engineering, Poland	45
219 – Dynamic measurement and FEM analysis of restraint force from mold on gray cast iron castings and contraction of castings during cooling in green sand mold M. Kaneko, Waseda University, Modern mechanical engineering, Japan	47
250 – Deformations in chemically bonded moulding sands A. Grabarczyk, AGH University of Science and Technology, Faculty of Foundry Engineering, Poland	49
254 – Austempering in Zamak bath: influence of austempering time on the properties of ductile cast iron W. M. Pasini, Federal University of Rio Grande do Sul, Metallurgy Department - School of Engineering, Brazil	51
267 – Influence of AIP in solidification sequence of Al-10%Si-0.3%Mg Y. Zhao, University of Toyama, Graduate School of Science and Engineering for Education, Japan	53
268 – Effect of AIP in solidification sequence of Al-6%Mg-3%Si A. Osugi, University of Toyama, Graduate School of Science and Engineering for Research, Japan	55
269 – Influence of P content in eutectic crystallization of Al-10%Si-0.8%Mg H. Kazuta, University of Toyama, Graduate School of Science and Engineering for Education, Japan	57
278 – Influence of tellurium addition to spheroidal graphite cast iron on the number of graphite particles R. Saito, Graduate School of Kansai University, Department of Chemistry and Materials Engineering, Japan	59
286 – Influence of Ti and RE on primary crystallization and wear resistance of chromium cast iron M. Dojka, Silesian University of Technology, Department of Foundry Engineering, Poland	61

298 – Corrosion resistance of Ti30Nb alloy in Hank’s solution	63
J. Ryba, AGH University of Science and Technology, Faculty of Foundry Engineering, , Poland	
299 – Magnesium alloys for biomedical applications of implants	65
A. Fijołek, AGH University of Science and Technology, Faculty of Foundry Engineering, Poland	
300 – Modeling of the kinetics of carbonitrides precipitation process in HSLA steels using cellular automata method	67
P. Marynowski, AGH University of Science and Technology, Poland	
301 – Grain refinement of Al-2%Cu alloy using by vibrating mold	69
Y. Yoshitake, National Institute of Technology, Support Center of Education and Research, Kurume College, Japan	
310 – Settling effect of Ti on melt quality and mechanical properties in 356 cast alloy	71
Ö. Gürsoy, Istanbul University, Faculty of Engineering, Turkey	
317 – Hot tearing tendency and tensile property change of Ni and Cu added A356 casting alloys	73
K. Yildirim, Giesserei Institut RWTH, Germany	
319 – Efficiency of Ti addition in A356 alloy under different holding time	75
M. Gurtaran, Bursa Technical University, Material Science And Engineering, Turkey	
325 – Effect of thermal exposure on high temperature mechanical properties of secondary AlSi7Cu3Mg alloys	77
A. De Mori, University of Padova, Department of Management and Engineering, Italy	
330 – Increasing the lifetime of die casting molds made of the hot work tool steel H13 by means of a local surface heat treatment with the electron-beam	79
T. Schuchardt, TU Braunschweig, Institute of Joining and Welding, Germany	
336 – Effect of quenching mediums on mechanical properties of Al-Cu alloy	81
M. Gurtaran, Bursa Technical University, Metallurgical and Materials Engineering, Turkey	
360 – The examination of the modification effect of strontium in AlSi8Cu3 foundry alloy	83
M. Tokár, University of Miskolc, Foundry Institute, Hungary	
362 – Manganese in Compacted Graphite Iron	85
B. Kurowska, Łódź University of Technology, Department of Materials Engineering and Production Systems, Poland	
381 – Influence of evaluated temperature of intercritical treatment on mechanical properties of austempered ductile iron	87
P. Nawrocki, Warsaw Univeristy of Technology, Faculty of Production Engineering, Poland	
383 – Microstrutural and mechanical characterization of high-aluminium zinc alloy modified with 2.0% TiB₂	89
M. Roberto Bellé, Federal University of Rio Grande do Sul, Metallurgy Department, School of Engineering, Brazil	
390 – Effect of Al, Cr and Mo addition on mechanical properties of Nb-Si based alloys	91
T. Uemura, Kindai University, Faculty of Mechanical Engineering, Japan	
406 – Quality index - a way of illustrating diversified properties of a heat-treated Al-Zn-Mg-Cu aluminum alloys depending on homogenization parameters	93
Z. Kwak, AGH University od Science and Technology, Faculty of Foundry Engineering, Poland	
409 – Non-destructive testing methods in the analysis of metal artefacts	95
A. Sosnowska, AGH University od Science and Technology, Faculty of Management, Poland	
428 – Effect of predeformation and semisolid isothermal treatment time on the globular grains in MRI230 alloy during SIMA process	97
M. Roberto Bellé, Federal University of Rio Grande do Sul, Metallurgy Department - School of Engineering, Brazil	
443 – Wettability, reactivity and interfaces in Gd/Y₂O₃ system	99
P. Turalska, Foundry Research Institute, Poland	
446 – High-temperature interaction of molten high chromium cast iron with ZrO₂- Al₂O₃ ceramic	101
M. Kolev, Institute of Metal Science, Equipment and Technologies with Hydroaerodynamics Centre, Bulgaria	
458 – The effect of boron content on wetting kinetics in Si-B alloy/h-BN system	103
W. Polkowski, Foundry Research Institute, Poland	
Technology:	
15 – Technical capabilities for low-temperature waste heat recovery in foundries	107
T. Ludwig, Technical University Freiberg, Foundry Department, Germany	
32 – Design options to increase the service life of cast accessories for thermal and chemical treatment furnaces	109
A. Bajwoluk, West Pomeranian University of Technology, Faculty of Mechanical Engineering and Mechatronics, Poland	
33 – Suppressing the basket deformation process during heat treatment	111
A. Bajwoluk, West Pomeranian University of Technology, Faculty of Mechanical Engineering and Mechatronics, Poland	

53 – A novel measurement method to study the thermal aspects of moulding mixture decomposition	
J. T. Svidrů, Jönköping University School of Engineering, Department of Materials and Manufacturing, Sweden	113
56 – Development of casting genome for automotive piston casting: a study	
R. Ozah, North Eastern Regional Institute of Science and Technology, Mechanical Engineering, India	115
63 – Investigation of the impact of roughness on adhesion forces and filtration efficiency in a water-based model system with ceramic foam filters	
D. Hoppach, TU Freiberg, Institute of Mechanical Process Engineering and Mineral Processing, Germany	117
93 – Comparative study of waste foundry sand reclamation techniques	
M. Khan, Indian Institute of Technology Bombay, Chemical Engineering, India	119
157 – Exchangeable carbon-bonded alumina foam filter systems for the continuous casting of steel – development and testing	
T. Wetzig, TU Bergakademie Freiberg, Institute of Ceramics, Glass and Construction Materials, Germany	123
169 – Simulation of sand filling process and analysis of flow behavior with different binder ratio	
L. Tong, Huazhong University of Science and Technology, State Key Laboratory of Materials Processing and Die & Mould Technology, China	125
176 – Optimal gating system design of steel casting by fruit fly optimization algorithm based on casting simulation technology	
T. Wang, Huazhong University of Science and Technology, State Key Laboratory of Materials Processing and Die & Mould Technology, China	127
200 – Bayesian inference based optimization of process parameters for chemically bonded molding system	
H. Khandelwal, MPM Infosoft Pvt. Ltd., India	129
212 – Coupled methods of thermal analysis in the study of materials used in the foundry industry	
A. Rocznik, AGH University of Science and Technology, Faculty of Foundry Engineering, Poland	131
217 – Gating system design optimization for investment casted part	
M. Bruna, University of Žilina, Department of Technological Engineering, Slovakia	133
239 – Development of a method for measuring the ejector forces in the die casting process	
S. Kirschke, TU Braunschweig, Institute of Joining and Welding, High-Pressure Die Casting, Germany	135
260 – Teaching-and-playback approach based on pouring flow rate in tilting-ladle-type pouring machine	
T. Yajima, University of Yamanashi, Department of Mechanical Engineering, Japan	137
266 – Optimization of the runner shape considering the molten metal flow of product in die casting	
T. Okuno, Mie University, Faculty of Engineering, Department of Mechanical Engineering, Japan	139
282 – Multi-scale topologically optimized components made by casting and additive manufacturing	
K. Jalava, Aalto University, Department of Mechanical Engineering, Finland	141
294 – Product design and manufacturing in foundry industry using augmented virtual reality technology	
Y. Pandya, AGH University of Science and Technology, Faculty of Foundry Engineering, Poland	143
295 – Study of viscosity of water- and alcohol-based protective coatings	
E. Wildhirt, AGH University of Science and Technology, Faculty of Foundry Engineering, Poland	145
320 – Influence of manufacturing process parameters on the stability of layers printed from ceramic powders using additive technology	
A. Kania, AGH University of Science and Technology, Faculty of Foundry Engineering, Poland	147
337 – Foundry engineering and art. Casting of the bronze statuette inspired by Salvador Dali	
B. Chachurska, AGH University of Science and Technology, Faculty of Foundry Engineering, Poland	149
343 – The use of experimental and computer aided methods in reconstruction of casting process of metal artifacts from the bronze age	
D. Gruszka, AGH University of Science and Technology, Faculty of Foundry Engineering, Poland	151
419 – Influence of alloy additives and casting parameters on microstructure and mechanical properties of silicon bronzes	
D. Witasiak, AGH University of Science and Technology, Faculty of Foundry Engineering, Poland	153
447 – Analysis and evaluation of the effect of manganese content on the properties of aluminum alloy EN AC 46000	
M. Pasternak, AGH University of Science and Technology, Faculty of Foundry Engineering, Poland	155
449 – Analysis of the influence of the degree of wear of the pressing piston in cold chamber pressure machines on the quality of aluminium castings	
G. Piwowarczyk, AGH University of Science and Technology, Faculty of Foundry Engineering, Poland	157
Digitalization:	
165 – Adaptive product manufacturing technique for foundry industry using IoT technology an industry 4.0 initiative	
Y. Pandya, AGH University of Science and Technology, Faculty of Foundry Engineering, Poland	161
185 – Casting EMPS (ERP\MES\PDM\SCADA) integrated system architecture and its application in aeronautic titanium alloy foundry enterprise	
J. Zhou, Huazhong University of Science & Technology, State Key Laboratory of Materials Processing and Die & Mould Technology, China	163

198 – Application of 3D printing to produce an investment casting model of hip-joint endoprosthesis	
M. Skorupska, AGH University of Science and Technology, Faculty of Foundry Engineering, Poland	165
201 – Numerical modelling of SHSB metal matrix composite solidification	
A. Wojtyła, AGH University of Science and Technology, Faculty of Foundry Engineering, Poland	167
332 – Implementation of 3D printing in dentistry to improve the production of dental prosthetics restoration	
D. Dulian, AGH University of Science and Technology, Faculty of Foundry Engineering, Poland	169
335 – Numerical simulation of the impact of casting wall thickness and initial mould temperature on the ductile cast iron microstructure	
G. Witek, AGH University of Science and Technology , Faculty of Foundry Engineering , Poland	171
424 – Vision of the digitalized foundry -with cyper-physical systems to fully automatic cutting process for casting	
M. Füglistner, University of Applied Science and Arts Northwestern, Institute of Automation, School of Engineering, Switzerland	173
Ecology:	
145 – Thermal reclamation of foundry sands using repurposed sand dryer equipment	
T. Sappinen, Aalto University, School of Engineering, Finland	177
Management:	
45 – A six sigma framework for eliminating defects in sand casting foundries	
K. Nyembwe, University of Johannesburg, South Africa	181
