

PROCEEDINGS OF SPIE

Remote Sensing of Clouds and the Atmosphere XXIII

**Adolfo Comerón
Evgueni I. Kassianov
Klaus Schäfer
Richard H. Picard
Konradin Weber**
Editors

**12–13 September 2018
Berlin, Germany**

Sponsored by
SPIE

Volume 10786

Proceedings of SPIE 0277-786X, V. 10786

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Remote Sensing of Clouds and the Atmosphere XXIII*, edited by Adolfo Comerón, Evgueni I. Kassianov, Klaus Schäfer, Richard H. Picard, Konradin Weber, Proceedings of SPIE Vol. 10786 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>
xi	<i>Introduction</i>

SESSION 1	LIDAR, RADAR, AND PASSIVE ATMOSPHERIC MEASUREMENT TECHNIQUES I
------------------	---

10786 03	Validation activities for the level 2 geophysical products of the EUMETSAT Polar System-Second Generation (EPS-SG) visible/infrared imager (METimage) [10786-1]
10786 04	Strategies for shortwave radiances comparison of CERES instruments aboard the JPSS1 and Terra/Aqua satellites [10786-2]
10786 06	High-resolution satellite aerosol optical depth retrieval and its variability over highly industrialized hotspots in the Po Valley, Italy [10786-4]
10786 07	Evaluation of rainfall forecasts combining GNSS precipitable water vapor with ground and remote sensing meteorological variables in a neural network approach [10786-5]
10786 08	Information content analysis for a novel TES-based hyperspectral microwave atmospheric sounding instrument [10786-7]
10786 09	SHARC method for fast atmospheric correction of hyperspectral data [10786-8]

SESSION 2	LIDAR, RADAR, AND PASSIVE ATMOSPHERIC MEASUREMENT TECHNIQUES II
------------------	--

10786 0A	Comparing reflection signatures in radio occultation measurements using the full spectrum inversion and phase matching methods [10786-9]
10786 0B	Smart Air Quality Network for spatial high-resolution monitoring in urban area [10786-10]
10786 0C	Potential sources of reactive gases for the West of Moscow Oblast [10786-11]
10786 0F	Sensing of parameters of lightning discharges on the South of the European part of Russia [10786-45]

SESSION 3 ATMOSPHERIC PROFILING OF AEROSOL, TRACE GASES, AND METEOROLOGICAL PARAMETERS	
10786 OG	Four years of IASI CO₂, CH₄, N₂O retrievals: validation with in situ observations from the Mauna Loa station [10786-15]
10786 OH	Climatology of aerosol optical depth at mid-continental US site: ground-based observations [10786-16]
10786 OL	A first measurement of the planetary boundary layer top in Cali-Colombia: elastic LIDAR application [10786-21]
10786 OM	Aerosol profile measurements in the coastal zone of Antarctica: instrumentation and preliminary results [10786-47]
SESSION 4 REMOTE SENSING OF CLOUDS	
10786 OO	Shallow cumulus macrophysical properties at midcontinental US site: integrated multiyear active and passive observations [10786-23]
10786 OP	Qualification of a new short-term cloud forecasting method for the optimization of Earth observation satellite programs [10786-24]
10786 OR	Calculation of cirrus clouds backscattering for lidar studies within the physical optics approximation [10786-26]
10786 OU	Spatio-temporal distribution of rainfall and aerosols over urban areas of Karnataka (Best Student Paper) [10786-29]
10786 OV	On development of cross-platform software to continue long-term observations with the Brewer Ozone Spectrophotometer [10786-48]
POSTER SESSION	
10786 OW	Standards VDI 4211 and VDI 4212 on passive FTIR and DOAS remote sensing techniques [10786-6]
10786 OX	Development status of optical imaging technology in scattering media [10786-30]
10786 OZ	Thin semitransparent cloud removal in the coastal area of the South China Sea using an atmospheric correction method [10786-32]
10786 11	Study of influence of ice crystals orientation in cirrus on solar radiation transmission [10786-34]
10786 14	Analysis of climate change caused by aerosol-cloud-radiation interaction [10786-38]
10786 16	Low-level jet observational study for the Brazilian nuclear reactor region [10786-40]

10786 1A **Characteristics of lightning activity in the North Caucasus according to the LS 8000 from 2009 to 2016** [10786-46]
