

# PROCEEDINGS OF SPIE

## ***Micro-Optics and MOEMS***

**Yuelin Wang**  
**Huikai Xie**  
*Editors*

**22–24 May 2018**  
**Beijing, China**

*Organized by*

Chinese Society for Optical Engineering (CSOE) (China)  
Photoelectronic Technology Committee, Chinese Society of Astronautics (China)  
Photoelectronic Industrialization Committee, CHIA (China)  
Department of Cooperation and Coordination for Industry, Academe and Research, CHIA (China)  
Science and Technology on Low-light-level Night Vision Laboratory (China)

*Sponsored by*

Division of Information and Electronic Engineering of Chinese Academy of Engineering (China)  
Chinese Society for Optical Engineering (CSOE) (China)

*Published by*  
SPIE

**Volume 10848**

Proceedings of SPIE 0277-786X, V. 10848

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Micro-Optics and MOEMS*, edited by Yuelin Wang, Huikai Xie, Proceedings of SPIE Vol. 10848 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510623385

ISBN: 9781510623392 (electronic)

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## MICRO-OPTICS AND MOEMS

---

10848 02	<b>Intensifier performance test technology development [10848-1]</b>
10848 03	<b>Orbital rotation of multi-particle arrays in a dual-fiber optical trap [10848-2]</b>
10848 04	<b>Refractive index detection of nanolitre samples in a microfluidic chip with a Michelson interferometer [10848-3]</b>
10848 05	<b>Monte Carlo investigation of cell defects on detection properties in radial packed square-pore micro-channel optics [10848-4]</b>
10848 06	<b>Spoof surface plasmons on the corrugated metal surface with gradient groove depths [10848-5]</b>
10848 07	<b>Study on angle detection capability of silicon waveguide grating coupler [10848-6]</b>
10848 08	<b>Low loss terahertz devices based on polymer substrate [10848-7]</b>
10848 09	<b>Micro-scanning mechanism design based on dynamic model [10848-8]</b>
10848 0A	<b>Research on the graphene oxide's dielectric constant at the microwave frequency of 9.231GHz [10848-9]</b>
10848 0B	<b>Ultra-sensitive fluorescence detection based on helical micro optical fiber [10848-10]</b>
10848 0C	<b>Split nanofocusing spots beyond diffraction limit via a new near-field plasmonic structure [10848-11]</b>
10848 0D	<b>Design and analysis of a novel connective locking mechanism for future space mirrors assembly [10848-12]</b>
10848 0E	<b>Resonance characteristics of TE mode in slotted photonic crystal microring resonator [10848-15]</b>
10848 0F	<b>Estimating relative extent of scattering loss due to sidewall roughness in slot waveguides by <math>n_w</math> model [10848-16]</b>

- 10848 0G     **Optical design and analysis of a high resolution MOEMS accelerometer based on diffraction grating** [10848-17]
- 10848 0H     **Progress in atomic layer deposition based microchannel plate** [10848-18]
