The 23rd International Conference on
WATER JETTING
Seattle, USA: 16th – 18th November, 2016

CONTENTS

FOREWORD	1
KEYNOTE PAPER What's Past is Prologue <i>Professor Emeritus David Summers, Missouri University of Science and Technology, USA</i>	3
2D & 3D MACHINING	
An investigation into the effect upon flexural strength of different methods of cutting float glass and sintered recycled container glass <i>S Doolan, T Oseng-Rees, J Ferriz-Papi, University of Wales Trinity Saint David, UK</i>	13
The impact of machining parameters on the surface roughness and depth of cut while cutting Inconel 718 super alloy using abrasive water jet <i>F Kartal, Kastamonu University, Turkey</i>	23
Roles of taper compensation in AWJ ultra-precision machining <i>(Peter) H-T Liu, P Miles, A Henning, OMAX Corporation, USA</i>	33
Quantifying surface finishes using Rz measurements <i>P Miles, A Henning, (Peter) H-T Liu, OMAX Corporation, USA</i>	47
Interaction between metallurgical state and process parameters on AWJ kerf <i>M Monno, F Vigano, Politecnico di Milano; G Pellegrini, C Ravasio, Universita' di Bergamo, Italy</i>	59
Abrasive waterjet turning of titanium alluminides <i>E Uhlmann, F Faltin, K Flögel, Technische Universität Berlin, Germany</i>	71
Micro AWJ and Micro Milling for deep pocket hybrid machining <i>F Viganò, M Annoni, Politecnico di Milano; F Arleo, WatAJet S.r.l., Italy</i>	83
Interpreting handwritten scrawl <i>N Webers, V Cutler, OMAX Corporation, USA</i>	99

AEROSPACE APPLICATIONS

- Deep pocket milling with abrasive waterjets** 113
P Miles, A Henning, OMAX Corporation, USA
- Machinability of randomly chopped discontinuous fiber composites: A comparative assessment of conventional and abrasive waterjet** 127
R Pahuja, M Ramulu, University of Washington, USA

CLEANING, STRIPPING AND SURFACE PREPARATION

- What effect does waterjet cleaning have on the surface and surface preparation?** 151
L Frenzel, Advisory Council, Vancouver, USA
- Benefits of waterblasting at 380 MPa pressure** 167
M Hashish, R Schmid, R Gonzalez, Flow International Corporation, USA
- Surface modification of medical grade titanium alloy by forced pulsed water jet (FPWJ)** 181
D Kalliecharan, T L Monchesky, Dalhousie University, A Tieu, B Daniels, W Yan, M Xu, M Vijay, VLN Advanced Technologies Inc., Canada
- Enhancement of adhesion strength of thick copper coatings on used nuclear fuel steel containers prepared with the forced pulsed waterjet (FPWJ)** 191
A Nastic, B Jodoin, R Fernandez, D MacDonald, University of Ottawa; M Vijay, A Tieu, W Yan, B Daniels, M Xu, VLN Advanced Technologies, Canada
- Opposed cavitating jets and their application for cavitation peening of wall surrounding hole** 201
H Soyama, Tohoku University, Japan
- Digging of concrete by a cavitating jet in air comparing with a conventional water jet** 209
H Soyama, K Matsuda, M Mikami, Tohoku University, Japan
- Preventing hydrogen diffusion in stainless steel by cavitating jet in air** 215
O Takakuwa, H Soyama, Tohoku University, Japan
- Material processing by mechanical-electrochemical cavitation** 223
T Yoshimura, K Tanaka, Tokyo University of Science, Yamaguchi; N Yoshinaga, Kagawa University Faculty of Engineering, Japan

DEVELOPMENTS IN EQUIPMENT

- Optimization of abrasive waterjet nozzle design for precision and reduced wear using compressible multiphase CFD modelling** 239
C Narayanan, D Caviezel, D Lakehal, ASCOMP AG, Switzerland
- Optimized abrasive waterjet nozzle design using genetic algorithms** 251
J Schwartzenruber, M Papini, Ryerson University, Canada; C Narayanan, ASCOMP AG, Switzerland; (Peter) H-T Liu, OMAX Corporation, USA
- Observations of flow in an abrasive supply tube** 263
S Shimizu, S Watanabe, G Peng, Y Oguma, Nihon University, Japan

ECONOMIC COST COMPARISONS

- Pressure, power, and productivity** 273
M Hashish, Flow International Corporation, USA
- Efficiency drives cutting performance** 285
A Henning, P Miles, OMAX Corporation, USA

FUNDAMENTAL RESEARCH

- Waterjet impact force evaluations at pressures up to 600 MPa** 301
A Chillman, M Hashish, Flow International Corporation; M Ramulu, University of Washington, USA
- High-pressure jet cutting with liquid CO₂** 315
E Uhlmann, P John, Technische Universität Berlin, Germany
- Estimation of bubble fusion requirements during mechanical-electrochemical cavitation** 327
T Yoshimura, H Yoshiya, K Tanaka, Tokyo University of Science, Yamaguchi, Japan

MINING, QUARRYING AND TUNNELLING

- Waterjet rock cutting performance using recycled garnet** 337
G-W Joo, T-Z Ahn, Y Cha, G-C Cho, Korea Advanced Institute of Science and Technology (KAIST); T-M Oh, Korea Institute of Geoscience and Mineral Resources (KIGAM), Korea
- Abrasive waterjet applications for hard rock tunnelling in urban area** 345
T-M Oh, H B Lee, Korea Institute of Geoscience and Mineral Resources (KIGAM); G-C Cho, G-W Joo, Korea Advanced Institute of Science and Technology (KAIST), Korea

NUCLEAR AND OIL & GAS DECOMMISSIONING

Feasibility study of decontaminating steel ducts and pipes for decommissioning nuclear facilities with the forced pulsed waterjet (FPWJ) technique 357

A Jenkins, Sellafield Limited, UK; M Vijay, A Tieu, W Yan, B Daniels, M Xu, VLN Advanced Technologies Inc., Canada

Development of a radiological decontamination system for lakebeds – Bottom material collector with a ventilated submerged water jet 369

S Shimizu, G Peng, Y Oguma, Nihon University; M Tsujita, K Kodama, Eco-bond Environmental Engineering Research Co. Ltd., Japan
