Volume 10839

Proceedings of SPIE 0277-786X, V. 10839

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *9th International Symposium on Advanced Optical Manufacturing and Testing Technologies, Optical Test, Measurement Technology, and Equipment*, edited by Fan Wu, Yudong Zhang, Xiaoliang Ma, Xiong Li, Bin Fan, Proceedings of SPIE Vol. 10839 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

xi	<i>Symposium Committees</i>
xiii	<i>AOMATT 2018 Sponsors</i>

OPTICAL TEST, MEASUREMENT TECHNOLOGIES, AND EQUIPMENT

10839 02	Feasibility study of scanning optical focusing detection system [10839-1]
10839 03	Image tracking technology for dynamic angle measurement of machine vision [10839-2]
10839 04	An accelerated ICP registration algorithm for 3D point cloud data [10839-3]
10839 05	Feature extraction of three-point cloud images based on clustering analysis [10839-4]
10839 06	A high precision field angle detection technology applied to laser communication system [10839-7]
10839 07	Precision of the attitude algorithm of the strap-down inertial navigation system [10839-8]
10839 08	Study on the calibration technique for multi-directional affine projection in optical computerized tomography [10839-9]
10839 09	Real-time compensation of the time-skew and phase-mismatch for heterodyne DAS system [10839-10]
10839 0A	Experiment on phase correction of reflection fringe based on camera calibration [10839-12]
10839 0B	Research on reflection characteristics for a rectangular laser pulse passing through a Fabry-Perot interferometer [10839-13]
10839 0C	The application of the digital filtering algorithms in the signal processing system of the micro-displacement sensor [10839-14]
10839 0D	Research on photoelectric measurement method for filament diameter based on FPGA [10839-15]
10839 0E	The laser screen technology research of the firing dispersion and initial velocity test of the high shooting frequency weapons [10839-16]

10839 0F	Two methods comparison and verification for monochromator calibration of wavelength [10839-17]
10839 0G	Optimal modified lateral shearing interferometer for in-line damage morphology measurement [10839-18]
10839 0H	Research and design of synchronous phase shifting optical profile detection system [10839-19]
10839 0I	The design of motor vehicle exhaust carbon monoxide concentration detection system based on tunable diode laser absorption spectroscopy [10839-21]
10839 0J	Study on the effects of multiple factors on the photoacoustic detection of glucose [10839-22]
10839 0K	The theory model establishment and experiment measure of Lidar ranging signal in large incident angle condition [10839-23]
10839 0L	Application of variational mode decomposition method in Fourier transform profilometry [10839-24]
10839 0M	A spectral calibration approach for snapshot Image Mapping Spectrometer (IMS) [10839-27]
10839 0N	Analysis on uneven laser signal in laser guided weapon simulation [10839-28]
10839 0O	Develop the fiber coupling efficiency based on SPGD control algorithm [10839-30]
10839 0P	Research on obstacle detection and location of indoor robot based on LIDAR [10839-31]
10839 0Q	The comparisons between the preconditioned conjugate-gradient method and the Fourier transform method in lateral shearing interferometry [10839-35]
10839 0R	The research on absolute distance measurement based on large-bandwidth reverse-synchronous dynamic frequency scanning interference [10839-36]
10839 0S	Design and Instrumentation of transmission digital holographic microscopy [10839-39]
10839 0T	Improvement of specular gloss measurements in SIMT [10839-40]
10839 0U	A digital filtering algorithm based on four-channel wavelet and its application in active optical system [10839-42]
10839 0V	The studies of noninvasive blood glucose monitoring using optical coherence tomography [10839-44]
10839 0W	Research on the UV energy measurement based on UV LEDs [10839-45]
10839 0X	The angular measurement of the motion direction of the stack motion platform based on the dual-frequency laser interferometer [10839-46]
10839 0Y	A research on the dynamic range of the dual channel monochrome sCMOS [10839-47]

10839 0Z	Optical axis parallelism calibration in three-channel filter-based non-imaging passive ranging system based on oxygen absorption [10839-48]
10839 10	Study on irradiance metrology of single LED in comparison method [10839-49]
10839 11	A device for comprehensive performance test of photoelectric system [10839-50]
10839 12	Research on adaptive interferometric measurement of complex vibration environment [10839-53]
10839 13	Study on spectral distribution and coherence length of light source [10839-56]
10839 14	Optimized design of high-flux 2D magneto-optical trapping [10839-60]
10839 15	Wavefront reconstruction in square region based on improved two-dimension Legendre polynomials [10839-63]
10839 16	Study on image stitching algorithm of surface defects three-dimensional features measurement with transient interferometry [10839-64]
10839 17	An improved feedforward controller design method [10839-65]
10839 18	Fast measurement technique for obtaining the diffraction efficiency and its uniformity of a large-aperture pulse compression grating [10839-69]
10839 19	Thin film thickness measurement based on laser heterodyne interferometry [10839-71]
10839 1A	Refractive index gradient measurement method based on the principle of Mach-Zehnder interference [10839-74]
10839 1B	Research on the software of the micro-displacement sensor in the active optical system based on FPGA [10839-76]
10839 1C	Study of wavefront reconstruction based on four-wave lateral shear interferometer method [10839-80]
10839 1D	Multi-wavelength investigation of the influence of polarization orientation on bulk damage resistance of type I doubler KDP crystals [10839-83]
10839 1E	The combined application of two high speed cameras with different frequency in the study about explosion process [10839-84]
10839 1F	A Mueller matrix measurement technique based on a division-of-aperture polarimetric camera [10839-85]
10839 1G	Based on industrial inspection of the UV double-telecentric lens design [10839-88]
10839 1H	Spatial location measurements of point target based on ultra-sparse image [10839-90]

10839 1I	Research on key technology of the optical measurement device used in liquid oxygen tank of carrier rocket [10839-91]
10839 1J	Field registration and test for multi-module imaging spectrometer [10839-92]
10839 1K	Design of portable fundus camera system based on mobile phone [10839-96]
10839 1L	Detection of specular surface defects with eliminating dusts based on polarized structured-light illumination [10839-97]
10839 1M	Simulation probe of scanning optical focusing detection system design based on Zemax [10839-98]
10839 1N	Study on calibration and error compensation of laser scanning system [10839-100]
10839 1O	Spectrum-analysis study of parameters associated with laser-induced air breakdown plasma [10839-101]
10839 1P	Reconstruction of the free-falling body trajectory in an optical interferometric absolute gravimeter [10839-104]
10839 1Q	Mechanism design of a low temperature resistant and high precision zoom lens [10839-107]
10839 1R	A novel optical system of fingerprint and finger vein images acquisition [10839-111]
10839 1S	Optical free form surface metrology in adaptive polarized interferometry [10839-113]
10839 1T	Uncertainty analysis of dynamic goniometer based on fiber optic gyroscope [10839-115]
10839 1U	Measurement for the structure of microcosmic defects on optical surface with digital holographic microscopy [10839-117]
10839 1V	Comparison and analysis on the accurate measurement of spherical curvature radius [10839-118]
10839 1W	The compact high energy DPSSL driving circuit system [10839-119]
10839 1X	Glass viscoelasticity determination and analysis based on TMA compression creep [10839-124]
10839 1Y	An on-machine non-contact form measurement method for the high steepness elements [10839-130]
