2018 International Conference on Field-Programmable Technology (FPT)

FPT 2018

Table of Contents

Message from the General Chair and Program Co-Chairs xiv
Conference Organization xvi
Program Committee xviii
Supporters xx

Keynotes

FPGA Accelerated HPC and Data Analytics 1
Mike Strickland (Intel Programmable Solutions Group)

Accelerator-in-Switch: A Novel Cooperation Framework for FPGAs and GPUs 2
Hideharu Amano (Keio University)

Novel Neural Network Applications on New Python Enabled Platforms 3
Kees Vissers (Xilinx)

Invited Speaker

Digital Transformation of Automobile and Mobility Service 4
Hiroshi Miyata (Fujitsu Laboratories Limited)

Oral Session 1: Neural Networks

Dither NN: An Accurate Neural Network with Dithering for Low Bit-Precision Hardware 9
Kota Ando (Hokkaido University), Kodai Ueyoshi (Hokkaido University), Yuka Oba (Hokkaido University), Kazutoshi Hirose (Hokkaido University), Ryota Uematsu (Hokkaido University), Takumi Kudo (Hokkaido University), Masayuki Ikebe (Hokkaido University), Tetsuya Asai (Hokkaido University), Shinya Takamaeda-Yamazaki (Hokkaido University), and Masato Motomura (Hokkaido University)

A Real-Time Object Detection Accelerator with Compressed SSDLite on FPGA 17
Hongxiang Fan (Imperial College London), Shuanglong Liu (Imperial College London), Martin Ferianc (Imperial College London), Ho-Cheung Ng (Imperial College London), Zhiqiang Que (Imperial College London), Shen Liu (Imperial College London), Xinyu Niu (Corerain Technologies Ltd.), and Wayne Luk (Imperial College London)

Implementing NEF Neural Networks on Embedded FPGAs .25
Benjamin Morcos (University of Waterloo, Applied Brain Research Inc.), Terrence C. Stewart (Applied Brain Research Inc), Chris Eliasmith (Applied Brain Research Inc.), and Nachiket Kapre (University of Waterloo)

Memory-Efficient Architecture for Accelerating Generative Networks on FPGA .33
Shuanglong Liu (Imperial College London), Chenglong Zeng (Tianjin University), Hongxiang Fan (Imperial College London), Ho-Cheung Ng (Imperial College London), Jiuxi Meng (Imperial College London), Zhiqiang Que (Imperial College London), Xinyu Niu (Corerain Technologies Ltd.), and Wayne Luk (Imperial College London)

Oral Session 2: High Level Synthesis

Live Migration for OpenCL FPGA Accelerators .41
Anuj Vaishnav (The University of Manchester), Khoa Pham (University of Manchester), and Dirk Koch (The University of Manchester)

An Empirically Guided Optimization Framework for FPGA OpenCL .49
Ahmed Sanaullah (Boston University), Rushi Patel (Boston University), and Martin Herbordt (Boston University)

Software-Specified FPGA Accelerators for Elementary Functions .57
Jing Chen (McGill University), Xue Liu (McGill University), and Jason Anderson (University of Toronto)

Scaling Up Loop Pipelining for High-Level Synthesis: A Non-iterative Approach .65
Leandro de Souza Rosa (The University of São Paulo), Vanderlei Bonato (The University of São Paulo), and Christos-Savvas Bouganis (Imperial College London)

Application Acceleration on FPGAs with OmpSs@FPGA .73
Jaume Bosch (Barcelona Supercomputing Center), Xubin Tan (Barcelona Supercomputing Center), Antonio Filgueras (Barcelona Supercomputing Center), Miquel Vidal (Barcelona Supercomputing Center), Marc Mateu (Barcelona Supercomputing Center), Daniel Jiménez-González (Universitat Politècnica de Catalunya), Carlos Álvarez (Universitat Politècnica de Catalunya), Xavier Martorell (Universitat Politècnica de Catalunya), Eduard Ayguade (Barcelona Supercomputing Center), and Jesus Labarta (Barcelona Supercomputing Center)

Oral Session 3: Stream Processing

FLiMS: Fast Lightweight Merge Sorter .81
Philippos Papaphilippou (Imperial College London), Chris Brooks (dunnhumby), and Wayne Luk (Imperial College London)

Very Massive Hardware Merge Sorter .89
Makoto Saitoh (Tokyo Institute of Technology) and Kenji Kise (Tokyo Institute of Technology)

Stream-Based ORB Feature Extractor with Dynamic Power Optimization .97
Phong Tran (University of Technology, Vietnam), Thinh Hung Pham (Nanyang Technological University, Singapore), Siew Kei Lam (Nanyang Technological University, Singapore), Meiqing Wu (Nanyang Technological University, Singapore), and Bhavan A Jasani (Carnegie Mellon University, United States)

R3SGM: Real-Time Raster-Respecting Semi-Global Matching for Power-Constrained Systems .105
Oscar Rahnama (University of Oxford, FiveAI), Tommaso Cavalleri (University of Oxford, FiveAI), Stuart Golodetz (University of Oxford, FiveAI), Simon Walker (FiveAI), and Philip Torr (University of Oxford)

Oral Session 4: Design Methodologies and Tools

Tatum: Parallel Timing Analysis for Faster Design Cycles and Improved Optimization .113
Kevin E. Murray (University of Toronto) and Vaughn Betz (University of Toronto)

SAT Based Place-And-Route for High-Speed Designs on 2.5D FPGAs .121
Chirag Ravishankar (Xilinx Inc), Henri Fraisse (Xilinx Inc), and Dinesh Gaitonde (Xilinx Inc)

Compact Area and Performance Modelling for CGRA Architecture Evaluation .129
Kuang-Ping Niu (University of Toronto) and Jason H. Anderson (University of Toronto)

Oral Session 5: Networking and Data Applications

MultiMQC: A Multilevel Message Queuing Cache Combining In-NIC and In-Kernel Memories .137
Koya Mitsuzuka (Keio University), Yuta Tokusashi (Keio University), and Hiroki Matsutani (Keio University)

Ultra-Low-Latency and Flexible In-memory Key-Value Store System Design on CPU-FPGA .145
Yunhui Qiu (Fudan University), Hankun Lv (Fudan University), Jinyu Xie (Fudan University), Wenbo Yin (Fudan University), and Lingli Wang (Fudan University)

A Nearest Neighbor Search Engine Using Distance-Based Hashing .153
Toshitaka Ito (Hiroshima City University), Yuri Itotani (Hiroshima City University), Shin'ichi Wakabayashi (Hiroshima City University), Shinobu Nagayama (Hiroshima City University), and Masato Inagi (Hiroshima City University)

DaCO: A High-Performance Token Dataflow Coprocessor Overlay for FPGAs .161
Siddhartha Siddhartha (Nanyang Technological University, Singapore) and Nachiket Kapre (University of Waterloo, Canada)

Scheduling Algorithms for High Performance Network Switching on FPGAs: A Survey .169
Nadeen Gebara (Imperial College London), Jiuxi Meng (Imperial College London), Wayne Luk (Imperial College London), and Paolo Costa (Microsoft Research)

Oral Session 6: Security and Dependability

Enabling Overclocking Through Algorithm-Level Error Detection .177
Thibaut Marty (Univ Rennes, Inria, CNRS, IRISA), Tomofumi Yuki (Univ Rennes, Inria, CNRS, IRISA), and Steven Derrien (Univ Rennes, Inria, CNRS, IRISA)

Secure Hardware Kernels Execution in CPU+FPGA Heterogeneous Cloud .185
Festus Hategekimana (University of Arkansas), Joel Mandebi Mbongue (University of Arkansas), Md Jubaer Hossain Pantho (University of Arkansas), and Christophe Bobda (University of Arkansas)

A High-Speed Constant-Time Hardware Implementation of NTRUEncrypt SVES .193
Farnoud Farahmand (George Mason University), Malik Umar Sharif (George Mason University), Kevin Briggs (George Mason University), and Kris Gaj (George Mason University)

Injecting FPGA Configuration Faults in Parallel .201
Shane Fleming (Imperial College London) and David Thomas (Imperial College London)

Oral Session 7: FPGA Architectures

Evaluating The Highly-Pipelined Intel Stratix 10 FPGA Architecture Using Open-Source Benchmarks .209
Tian Tan (University of Texas at Austin), Eriko Nurvitadhi (Intel Corporation), David Shih (Intel Corporation), and Derek Chiou (Microsoft Corporation and University of Texas at Austin)

FPGA Architecture Enhancements for Efficient BNN Implementation .217
Jin Hee Kim (University of Toronto), Jongeun Lee (Ulsan National Institute of Science and Technology), and Jason Anderson (University of Toronto)

Synthesizable Heterogeneous FPGA Fabrics .225
Brett Grady (University of Toronto) and Jason H. Anderson (University of Toronto)

Poster Papers

QoS-Aware Cross-Layer Reliability-Integrated FPGA-Based Dynamic Partially Reconfigurable System Partitioning .233
Siva Satyendra Sahoo (National University of Singapore), Tuan D. A. Nguyen (Technische Universität Dresden), Bharadwaj Veeravalli (National University of Singapore), and Akash Kumar (Technische Universität Dresden)

High-Speed Computation of CRC Codes for FPGAs .237
Jakub Cabal (CESNET a.l.e.), Lukáš Kekely (CESNET a.l.e.), and Jan Koenek (IT4Innovations Centre of Excellence, FIT BUT)

FCLNN: A Flexible Framework for Fast CNN Prototyping on FPGA with OpenCL and Caffe .241
Xianchao Xu (Flex Services, Intel Corporation) and Brian Liu (Flex Services, Intel Corporation)

Accelerating Top-k ListNet Training for Ranking Using FPGA .245
Qiang Li (Imperial College London), Shane Fleming (Imperial College London), David Thomas (Imperial College London), and Peter Cheung (Imperial College London)

GridGAS: An I/O-Efficient Heterogeneous FPGA+CPU Computing Platform for Very Large-Scale Graph Analytics .249
Yu Zou (University of Central Florida) and Mingjie Lin (University of Central Florida)

Lossy Multiport Memory .253
Bowen P.Y. Kwan (Imperial College London), Gary C.T. Chow (Imperial College London), Tim Todman (Imperial College London), Wayne Luk (Imperial College London), and Wenguang Xu (Huawei Technologies)

An FPGA Implementation of Robust Matting .257
Takuya Yamazaki (University of Tsukuba) and Tsutomu Maruyama (University of Tsukuba)

Improving Confidentiality in Virtualized FPGAs .261
Sadegh Yazdanshenas (University of Toronto) and Vaughn Betz (University of Toronto)

High Performance High-Precision Floating-Point Operations on FPGAs Using OpenCL .265
Naohito Nakasato (University of Aizu), Hiroshi Daisaka (Hitotsubashi University), and Tadashi Ishikawa (High Energy Accelerator Research Organization)

Efficient Inter-Kernel Communication for OpenCL Database Operators on FPGAs .269
Tobias Drewes (Otto-von-Guericke University), Jan Moritz Joseph (Otto-von-Guericke University), Bala Gurumurthy (Otto-von-Guericke University), David Broneske (Otto-von-Guericke University), Gunter Saake (Otto-von-Guericke University), and Thilo Pionteck (Otto-von-Guericke University)

FPGA Acceleration of a Supervised Learning Method for Hyperspectral Image Classification .273
Kento Tajiri (University of Tsukuba) and Tsutomu Maruyama (University of Tsukuba)

High Throughput CNN Accelerator Design Based on FPGA .277
Liang Xie (Fudan University), Xitian Fan (Fudan University), Wei Cao (Fudan University), and Lingli Wang (Fudan University)

Hardware-Accelerated Index Construction for Semantic Web .281
Christopher Blochwitz (Universität zu Lübeck), Julian Wolff (Universität zu Lübeck), Mladen Berekovic (Universität zu Lübeck), Dennis Heinrich (Universität zu Lübeck), Sven Groppe (Universität zu Lübeck), Jan Moritz Joseph (Otto-von-Guericke-university Magdeburg), and Thilo Pionteck (Otto-von-Guericke-university Magdeburg)

DP-Pack: Distributed Parallel Packing for FPGAs .285
Qiangpu Chen (Sun Yat-Sen University), Minghua Shen (Sun Yat-Sen University), and Nong Xiao (Sun Yat-Sen University)

Checking for Electrical Level Security Threats in Bitstreams for Multi-tenant FPGAs .289
Dennis R. E. Gnad (Karlsruhe Institute of Technology), Sascha Rapp (Karlsruhe Institute of Technology), Jonas Krautter (Karlsruhe Institute of Technology), and Mehdi B. Tahoori (Karlsruhe Institute of Technology)

An Accelerated OpenVX Overlay for Pure Software Programmers .293
Hossein Omidian (Xilinx Inc.), Nick Ivanov (VectorBlox Computing, Inc.), and Guy G.F. Lemieux (University of British Columbia)

Mapping Estimator for OpenCL Heterogeneous Accelerators .297
André Bannwart Perina (University of São Paulo) and Vanderlei Bonato (University of São Paulo)

A Tri-State Weight Convolutional Neural Network for an FPGA: Applied to YOLOv2 Object Detector .301
Hiroki Nakahara (Tokyo Institute of Technology), Masayuki Shimoda (Tokyo Institute of Technology), and Shimpei Sato (Tokyo Institute of Technology)

Investigating How Hardware Architectures are Expressed in High-Level Languages for an SKA Algorithm .305
Krystine Dawn Sherwin (University of Auckland), Ben Stappers (University of Manchester), Prabu Thiagaraj (University of Manchester; Raman Research Institute, Bangalore), Kevin I-Kai Wang (University of Auckland), and Oliver Sinnen (University of Auckland)

Simultaneous Inference and Training Using On-FPGA Weight Perturbation Techniques .309
** Siddhartha (University of Sydney, Australia), Steven Wilton (University of British Columbia, Canada), David Boland (University of Sydney, Australia), Barry Flower (University of Sydney, Australia), Perry Blackmore (Defence Science and Technology Group, Australia), and Philip Leong (University of Sydney, Australia)*

An FPGA Realization of OpenPose Based on a Sparse Weight Convolutional Neural Network .313
Jinguji Akira (Tokyo Institute of Technology), Tomoya Fujii (Tokyo Institute of Technology), Shimpei Sato (Tokyo Institute of Technology), and Hiroki Nakahara (Tokyo Institute of Technology)

Performance Estimation for Exascale Reconfigurable Dataflow Platforms .317
Ryota Yasudo (Keio University), José Coutinho (Imperial College London), Ana Varbanescu (University of Amsterdam), Wayne Luk (Imperial College London), Hideharu Amano (Keio University), and Tobias Becker (Maxeler Technologies Ltd.)

Lattice-Based Scheduling for Multi-FPGA Systems .321
Teng Yu (University of St Andrews), Bo Feng (Tsinghua University), Mark Stillwell (Imperial College London), Liucheng Guo (Imperial College London), Yuchun Ma (Tsinghua University), and John Thomson (University of St Andrews)

ReFiRe: Efficient Deployment of Remote Fine-Grained Reconfigurable Accelerators .325
Emmanouil Pissadakis (Technical University of Crete), Nikolaos Alachiotis (Institute of Computer Science, Foundation for Research and Technology - Hellas), Panagiotis Skrimponis (University of Thessaly), Dimitris Theodoropoulos (Institute of Computer Science, Foundation for Research and Technology - Hellas), Thanasis Korakis (University of Thessaly), and Dionisios Pnevmatikatos (Institute of Computer Science, Foundation for Research and Technology - Hellas)

AConFPGA: A Multiple-Output Boolean Function Approximation DSE Technique Targeting FPGAs .329
Jorge Echavarria (Friedrich-Alexander-Universität Erlangen-Nürnberg (FAU)), Stefan Wildermann (Friedrich-Alexander-Universität Erlangen-Nürnberg (FAU)), and Jürgen Teich (Friedrich-Alexander-Universität Erlangen-Nürnberg (FAU))

Face-off Between the CAESAR Lightweight Finalists: ACORN vs. Ascon .333
Farnoud Farahmand (George Mason University), Abubakr Abdulgadir (George Mason University), Jens-Peter Kaps (George Mason University), and Kris Gaj (George Mason University)

Large Utility Sorting on FPGAs .337
Kristiyan Manev (University of Manchester) and Dirk Koch (University of Manchester)

A System-Level Transprecision FPGA Accelerator for BLSTM Using On-chip Memory Reshaping .341
Dionysios Diamantopoulos (IBM Research - Zurich) and Christoph Hagleitner (IBM Research - Zurich)

Transparent Acceleration of Image Processing Kernels on FPGA-Attached Hybrid Memory Cube Computers .345
Md Jubaer Hossain Pantho (University of Arkansas), Joel Mandebi Mbongue (University of Arkansas), Christophe Bobda (University of Arkansas), and David Andrews (University of Arkansas)

A Scalable Pipelined Dataflow Accelerator for Object Region Proposals on FPGA Platform .349
Wenzhi Fu (Beihang University), Jianlei Yang (Beihang University), Pengcheng Dai (Beihang University), Yiran Chen (Duke University), and Weisheng Zhao (Beihang University)

Distributed-Memory Based FPGA Debug: Design Timing Impact .353
Robert Hale (Brigham Young University) and Brad Hutchings (Brigham Young University)

Unified On-Chip Software and Hardware Debug for HLS-Accelerated Programs .357
Matthew B Ashcraft (Brigham Young University) and Jeffrey Goeders (Brigham Young University)

Optimisation of Convolution of Multiple Different Sized Filters in SKA Pulsar Search Engine .361
Haomiao Wang (PARC Lab, University of Auckland), Ben Stappers (Jodrell Bank Centre for Astrophysics, University of Manchester), Prabu Thiagaraj (Raman Research Institute, University of Manchester), and Oliver Sinnen (PARC Lab, University of Auckland)

Speed and Resource Optimization of BFGS Quasi-Newton Implementation on FPGA Using Inexact Line Search Method for Neural Network Training .365
Jia Liu (Tianjin University) and Qiang Liu (Tianjin University)

A Short-Transfer Model for Tightly-Coupled CPU-FPGA Platforms .369
Alexander Kroh (University of New South Wales Australia) and Oliver Diessel (University of New South Wales Australia)

PhD Forum Papers

An Automated FPGA-Based Fault Injection Platform for Granularly-Pipelined Fault Tolerant CORDIC .373
Yu Xie (Beijing Institue of Technology), He Chen (Beijing Institue of Technology), Yi-Zhuang Xie (Beijing Institue of Technology), Chuang-An Mao (Beijing Institue of Technology), and Bing-Yi Li (Beijing Institue of Technology)

An Area-Efficient Out-of-Order Soft-Core Processor Without Register Renaming .377
Junichiro Kadomoto (The Univerity of Tokyo), Toru Koizumi (The Univerity of Tokyo), Akifumi Fukuda (The Univerity of Tokyo), Reoma Matsuo (Nagoya University), Susumu Mashimo (Kyushu University), Akifumi Fujita (The Univerity of Tokyo), Ryota Shioya (The Univerity of Tokyo), Hidetsugu Irie (The Univerity of Tokyo), and Shuichi Sakai (The Univerity of Tokyo)

Enhancing Memory Bandwidth in a Single Stream Computation with Multiple FPGAs .381
Antoniette Mondigo (Tohoku University), Kentaro Sano (RIKEN Center for Computational Sciences (R-CCS)), and Hiroyuki Takizawa (Tohoku University)

Demonstration Papers

Demonstration of Full-Duplex Packet Transfers Over PCI Express with Sustained 200 Gbps Throughput .384
Lukáš Kekely (CESNET a.l.e.), Martin Špinler (CESNET a.l.e.), Štepán Friedl (CESNET a.l.e.), Jií Sikora (CESNET a.l.e.), Jan Koenek (CESNET a.l.e.), and Viktor Puš (Netcope Technologies a.s.)

Lens Distortion Self-Calibration Using the Hough Transform .388
Donald Bailey (Massey University), Yuan Chang (Massey University), and Steven Le Moan (Massey University)

Real-Time Object Detection and Semantic Segmentation Hardware System with Deep Learning Networks .392
Shaoxia Fang (Xilinx Inc.; Tsinghua University), Lu Tian (Tsinghua University; Xilinx Inc.), Junbin Wang (Xilinx Inc.), Shuang Liang (Tsinghua University), Dongliang Xie (Xilinx Inc.), Zhongmin Chen (Xilinx Inc.), Lingzhi Sui (Xilinx Inc.), Qian Yu (Xilinx Inc.), Xiaoming Sun (Xilinx Inc.), Yi Shan (Xilinx Inc.), and Yu Wang (Tsinghua University)

LeFlow: Automatic Compilation of TensorFlow Machine Learning Applications to FPGAs .396
Daniel Holanda Noronha (University of British Columbia), Kahlan Gibson (University of British Columbia), Bahar Salehpour (University of British Columbia), and Steven J.E. Wilton (University of British Columbia)

FPGA Design Competition

Introduction of MNSTbot .400
Kyosuke Mori (University of Aizu), Yuuki Saitoh (University of Aizu), and Naohito Nakasato (University of Aizu)

Development of an FPGA Controlled "Mini-Car" Toward Autonomous Driving .403
Musashi Aoto (Meisei Unniversity), Yasutaka Wada (Meisei University), and Yousuke Numata (Meisei University)

A Platform on All-Programmable SoC for Micro Autonomous Robots .406
Yuya Kudo (Ritsumeikan University), Atsushi Takada (Ritsumeikan University), Soji Tsuda (Ritsumeikan University), Takumi Sakai (Ritsumeikan University), and Tomonori Izumi (Ritsumeikan University)

Implementation of an Autonomous Driving System for FPT2018 FPGA Design Competition Using the Zynqberry Processing Board 410
Yohei Shimmyo (The University of Aizu), Maiko Arakawa (The University of Aizu), Shunsuke Mie (The University of Aizu), Hiroaki Saito (The University of Aizu), Yuichi Okuyama (The University of Aizu), and Hiroki Yomogita1 (The University of Aizu)

Development of an Autonomous Driving Robot Car Using FPGA 414
Akira Kojima (Hiroshima City University) and Yohei Nose (Hiroshima City University)

Development of a Robot Car by Single Line Search Method for White Line Detection with FPGA 418
Hiromichi Wakatsuki (Utsunomiya University), Takao Kido (Utsunomiya University), Kenta Arai (Utsunomiya University), Yuhei Sugata (Utsunomiya University), Kanemitsu Ootsu (Utsunomiya University), Takashi Yokota (Utsunomiya University), and Takeshi Ohkawa (Utsunomiya University)

Development of a Control Target Recognition for Autonomous Vehicle Using FPGA with Python 422
Hiroki Bingo (Kyushu Institute of Technology)

A Study on Introducing FPGA to ROS Based Autonomous Driving System 424
Yasuhiro Nitta (Kyoto University), Sou Tamura (Kyoto University), and Hideki Takase (Kyoto university)

FPGA Design for Autonomous Vehicle Driving Using Binarized Neural Networks 428
Kaijie Wei (Keio University), Koki Honda (Keio University), and Hideharu Amano (Keio University)

Author Index 433
