

International RILEM Conference on Materials, Systems and Structures in Civil Engineering 2016

Moisture in Materials and Structures

RILEM Proceedings Pro 112

Lyngby, Denmark
22-24 August 2016

Editors:

Kurt Kielsgaard Hansen Carsten Rode
Lars-Olof Nilsson

ISBN: 978-1-5108-8576-9

Contents

	<i>Page</i>
Preface	XI
Kurt Kielsgaard Hansen, Carsten Rode, Lars-Olof Nilsson	
Welcome	XII
Ole Mejlhede Jensen	
1. Water absorption into white cement mortars by capillarity	
Chunsheng Zhou, Fangzhou Ren, Wei Wang	1
2. Calibration samples for the measurement of moisture content in concrete	
Miguel-Ángel Climent, Carlos Antón, Guillem de Vera	11
3. Prediction of permeability from water vapor sorption isotherm of cement-based materials	
Dongdong Zhang, Kefei Li	21
4. Gas permeability and electrical resistivity of structural concretes: impact of pore saturation	
Qiang Gui, Minfeng Qin, Kefei Li	31
5. Drying of cement-based porous materials: a fractional kinetic approach	
Qiang Zeng, Dachuan Zheng, Baikun Chen	41
6. Analysis of wood and biomaterials by dynamic vapor sorption technique	
Majid Naderi, Manaswini Acharya, Damiano Cattaneo, Dan Burnett	51
7. Full scale laboratory test building for examining moisture penetration through different ceilings	
Thor Hansen, Eva B. Moeller	59
8. Numerical analysis of salt crystallization in non-isothermal moist porous materials	
Dariusz Gawin, Marcin Koniorczyk, Piotr Konca, Witold Grymin	69
9. The hygrothermal performance of a neolithic passage grave	
Lars Aasbjerg Jensen, Poul Klenz Larsen, Tim Padfield	77
10. Effect of moisture on tuff stone degradation	
Barbara Lubelli, Timo G. Nijland	87
11. Quantification of time-dependent moisture distributions in cement-based materials	
Peng Zhang, Qing Liu, Dan Li, Yanru Wang, Tiejun Zhao	97
12. Deterioration of concrete structures due to salt crystallization; influence of salt types and relative humidity	
Jan Sælensminde, S.M Samindi M.K Samarakoon	107
13. Monitoring and simulating humidity profiles in concrete elements during drying	
Miguel Azenha, José Granja	115
14. Electrical behavior of hardened cement paste at radio frequency under various moisture saturation degrees	
Gopinandan Dey, Abhijit Ganguli, Bishwajit Bhattacharjee, Tapan Kumar Gandhi	125

15. Internal relative humidity gradient of concrete under the one-dimensional drying condition Shuhui Dong, Shouheng Jiang, Wencui Yang, Yong Ge, Junqing Zhao	135
16. In situ concrete moisture measurement using gas permeability Franck Agostini, Frédéric Skoczylas, Ludovic Potier, Benoit Masson	141
17. Magnesium-oxide boards cause moisture damage inside facades in new danish buildings Kurt Kielsgaard Hansen, Tommy Bunch-Nielsen, Bent Grelk, Carsten Rode	151
18. The differences in water absorption rates of external thermal insulation composite system Edita Smetonaitė, Rosita Norvaišienė	163
19. Sensitivity analysis of moisture transport models in the framework of a reliability approach Sylvain Pradelle, Mickaël Thiéry, Véronique Baroghel-Bouny	171
20. Comparison of artificial neural networks and response surface methodology in stone mastic asphalt using waste granite filler Sedat Çetin, Murat Caner, Cahit Güner	183
21. Conservation of the danube spring zodiac reliefs based on continuous structural health monitoring Frank Lehmann, Markus Krüger, Friedrich Grüner	193
22. Electrical investigations for moisture assessment on civil engineering structures Jean-François Lataste	203
23. Numerical simulation of humidity fields in concrete considering the model code formulation Mateus Oliveira, Miguel Azenha, Paulo B. Lourenço	213
24. A case of peeling Anders Nielsen	223
25. Investigation methodology for moisture damages Lars-Olof Nilsson	231
26. Phenomenologic analysis on the moisture flux through cracks in masonry constructions Klaas Calle, Nathan Van Den Bossche	241
27. Non-destructive measurements of ^1H, ^{23}Na and ^{35}Cl profiles in building materials with NMR L. Pel, P.A.J. Donkers	253
28. Investigating the role of moisture on concrete carbonation using single-sided ^1H-NMR Charlotte Thiel, Robin E. Beddoe, Dirk Lowke, Christoph Gehlen	261
29. Experiences with hydrophobic impregnations in repair-measures Angelika Schießl-Pecka, Christoph Gehlen	269
30. Hygrothermal behaviour of hollow and filled ceramic masonry blocks Balázs Nagy, Elek Tóth	279
31. Potential of moisture dry-out from concrete wall in estonian climate Peep Pihelo, Magnus Lelumees, Targo Kalamees	289

32. Laboratory models for the assessment of the effectiveness of chemical damp-proofing in masonry: existing methods and some proposals for new fixtures Elisa Franzoni, Eric Rirsch, Yuri Paselli	299
33. Non-destructive wood moisture content measurements using computed tomography scanning Owe Lindgren	309
34. On the improvement of hygroscopic capacity of clay based materials Lorena F. Dutra, Anne-Cécile Grillet, Nathan Mendes, Monika Woloszyn	319
35. Study of hygrothermal behavior of very hygroscopic insulation Zakaria Slimani, Abdelkrim Trabelsi, Joseph Virgone	329
36. Development of interior relative humidity due to self-desiccation in blended cementitious system Yong Zhang, Guang Ye	341
37. Moisture transport properties of brick – comparison of exposed, impregnated and rendered brick Tessa Kvist Hansen, Søren Peter Bjarløv, Ruut Peuhkuri	351
38. Non-destructive moisture measurement in building materials using single-sided nuclear magnetic resonance Oliver Weichold, Sarah Hutt, Stephanie Keine, Robert Schulte Holthausen	361
Author Index	369
