

IV International Conference on Progress of Recycling in the Built Environment

RILEM Proceedings Pro 124

Lisbon, Portugal
11-12 October 2018

Editors:

Isabel M. Martins
Yury Villagran

Carina Ulsen

ISBN: 978-1-5108-8579-0

Printed from e-media with permission by:

Contents

Preface

Isabel Martins, Carina Ulsen, Yury Villagrán XXI

Keynote Lectures

30 Years Recycling as a RILEM Topic – what did we learn, what did we forget, what must we do?	
Anette Müller	1
Circular economy & Resource use efficiency and recycling on the built environment.	
Vanderley M John	11
Carbon dioxide sequestration: Relevance for recovering CDW	
Chi-Sun Poon	15
Construction and demolition waste: How to close the loop?	
Jorge de Brito	23

Communications

Processing Techniques

Recycling of ultra-high performance fiber-reinforced concrete with a high-voltage electric pulse fragmentation process	
Kathy Bru, Solène Touzé, Pascal Auger and Daniel Parvaz	31
Automated sorting of construction and demolition waste by advanced spectral imaging	
Frank Hollstein, Iñigo Cacho, Markus Wohllebe and Sixto Arnaiz	37
New possibilities for reducing deposited construction and demolition gypsum waste	
Pernilla Johansson, Linus Brander and Gunilla Bok	46
Liberation of cement paste in recycled aggregates by different comminution methods	
Paula Figueiredo, Carina Ulsen, Rafael Macedo, Guilherme Nery and Maurício Bergerman	54
Microwave-Induced Interfacial Failure to Enable Debonding of Composite Materials	
Steffen Liebezeit, Anette Mueller and Ulrich Palzer	62

Standards, Policy and legislation

The catalogue of the construction products and materials from secondary raw materials from construction and demolition waste	
Tereza Pavlu and Kristina Fortova	70
Specification for structural recycled aggregate concrete	
Rui Vasco Silva and Jorge de Brito	77
Guidelines to design structural concrete made with recycled coarse aggregates. From material properties to structural performance	
Sindy Seara-Paz, Belén González-Fonteboa, Fernando Martínez-Abella and Iris González-Taboada	85
How to combine CDW-recovery with groundwater protection	
Peter Dihlmann	93

Long-term leaching tests on construction and demolition recycled materials: 5-years lysimeters results	
António José Roque, Isabel Milagre Martins, Ana Cristina Freire, José Neves and Maria de Lurdes Antunes	100
<i>Quality and Confidence</i>	
Use of rheographs to analyse fresh state behavior of self-compacting recycled concrete	
Iris González-Taboada, Belén González-Fonteboa, Fernando Martínez-Abella and Sindy Seara-Paz	108
Minucious characterization of the granulometric fractions of two fine recycled aggregates	
Cássia Corrêa, João Henrique Rêgo and Cláudio Feitosa	116
Multi-recycled aggregate attached mortar volume analysed by X-ray microtomography	
Carlos Thomas, Jorge de Brito, José Sainz-Aja and Ana Cimenada	124
A novel machine learning method to detect different phases of concrete using X-ray microtomographic images	
Sanat Kumar Saha, Subhasis Pradhan and Sudhirkumar V Barai	130
Influence of the recycled aggregate on the mortars properties with different chemical admixtures	
Paulo Gomes, Alexandre Lima, Tassyano Amorim, Fábio Oliveira, Cássia Melo and Alysson Lima	138
<i>Performance of Alternative Materials</i>	
An environmental study of the use of steel slag aggregate in gabion cages	
Karmele Otegi, Tanya Richter, Diego Fernando Aponte Hernández and Marilda Barra	146
Industrial by-products as supplementary cementing materials in the manufacture of cement mortars	
Julia Rosales, Manuel Cabrera and Francisco Agrela	154
Textile fibres reinforcement in sanitary ware mortars	
Catarina Brazão Farinha, Jorge de Brito and Rosário Veiga	162
Biomass bottom ash. A sustainable alternative for the manufacture of cement-based materials	
Manuel Cabrera, Julia Rosales and Francisco Agrela	169
Recycled fine aggregate to design indoor furniture. concrete sinks	
Sindy Seara-Paz, Javier Eiras-López, Fernando Martínez-Abella, Belén González-Fonteboa, César Amil and José Millán-Pérez	178
Redesigning traditional lightweight gypsum with expanded and extruded polystyrene waste	
Paola Villoria Saez, Mercedes Del Río Merino, Jaime Santa Cruz Astorqui and Cesar Porras-Amores	186
<i>Life Cycle Analysis and Life Cycle Costs</i>	
Application of LCA to construction and demolition waste management in Lombardy Region (Italy)	
Giulia Borghi, Sara Pantini and Lucia Rigamonti	194
A proposal of multi-criteria decision analysis (MCDA) in construction and demolition waste (CDW) management: technology, environment and costs as input data	
Régis Pereira Waskow, Ana Carolina Passuello and Rejane Maria Candiota Tubino	202

Quantification of construction and demolition waste in the life cycle of residential buildings. economic and environmental analysis in case of study in Spain	
Cristina Rivero Camacho, Jaime Solís and Madelyn Marrero	210
A LCA study to identify best effective strategies for recycling post-consumer gypsum-based waste in Lombardy Region (Italy)	
Sara Pantini, Giulia Borghi and Lucia Rigamonti	219
Life cycle analysis of recycled materials from construction and demolition waste (CDW) provided by transport infrastructures	
Ana Cristina Freire, José Neves, Isabel Milagre Martins, António José Roque, Eugénia Correia, Claudia Ferreira, Castorina Silva Vieira, Isabel Pinto and Jorge Rodrigues Gonçalves	226
Promoting the circular economy through economic databases for the end-of-life stage of buildings	
Filipa Salvado, Nuno Almeida and Álvaro Vale e Azevedo	234
Advantages of recycling gypsum plaster boards	
Karin Weimann and Christian Adam	243
A BIM-compatible tool for demolition waste prediction and management	
David Garcia, Iñigo Vegas and Jaime Moreno	251
The use of BIM in the quantification of demolition waste	
George Yun and Conrado De Souza Rodrigues	258
<i>CDW Resources – Opportunities</i>	
Experimental and practical experience with alternative binders in asphalt pavement cold recycling	
Jan Valentin, Zuzana Čížková and Jan Suda	266
Resistance to moisture damage of bituminous mixtures with recycled concrete aggregates	
José Neves and Ana Cristina Freire	274
Comparison of performance characteristics for asphalt concrete mixtures with 30-40% reclaimed asphalt and different binder solutions	
Jan Valentin, Pavla Vacková and Majda Belhadj	282
Corrosion durability and mechanical performance of green hybrid fiber reinforced concrete utilizing recycled concrete aggregates and high volume fly ash	
Jacob Duncan, Wilson Nguyen, Daniela Martinez, Gabriel Jen and Claudia Ostertag	291
Influence of the nature of fraction unbound natural aggregates on the durability of recycled aggregates stabilized with cement	
Marilda Barra, Susanna Valls, Diego Aponte and Enric Vazquez	299
Durability assessment of geopolymer façade panels based on CDW	
Vilma Ducman, Ana Frankovic, Sabina Kramar, Sergio Tamburini, Marco Natali and Adriana Bernardi	307
Upgrading of mixed masonry construction and demolition waste to expanded lightweight aggregates	
Anette Mueller, Steffen Liebezeit and Ulrich Palzer	315
Lightweight concrete with recycling aggregates made from masonry rubble and rubbleclay mixtures	
Katrin Rübner, Alexander Schnell, Toni Ihlenfeldt and Manuel Vöge	323
<i>Efficient CDW Use – Concrete</i>	
Dry cast concrete with recycled aggregates: volume control during compaction	
Danilo Niza, Sergio Angulo and Rafael Pileggi	332

High temperature behaviour of recycled aggregate concretes Susanna Romagnosi, Prosper Pliya, Anne-Lise Beaucour, Albert Noumowe and Danilo di Coste	340
Water migration during mixing of recycled aggregate concrete Eliane Khoury, Bogdan Cazacliu and Sébastien Remond	349
Durability of recycled aggregate concrete coated in the fraction of 5-9 mm Sandra Lichtblau, Fernando Martirena and Stefan Linsel	357
High quality recycled concrete aggregates in UHPC: a preliminary study Zeger Sierens, Miquel Joseph, Brecht Vandevyvere and Jiabin Li	366
Effects of the use of recycled concrete aggregates on the drying shrinkage of normal and high strength concrete Mayara Amario, Caroline Santana Rangel, Marco Pepe and Romildo Dias Toledo Filho	374
The role of waste segregation on the performance of structural concretes using construction and demolition wastes as aggregates Pedro V. Salles, Conrado Rodrigues and Flávia S. J. Poggiali	382
<i>Fine CDW Resources – Challenges</i>	
Influence of total and effective water-cement ratio on the compressive strength of concretes made with fine recycled concrete aggregates Maria Eva Sosa, Yury Andres Villagrán Zaccardi and Claudio Javier Zega	390
Importance of fineness of CDW as cement replacement Sabina Rocha and Joana Sousa Coutinho	398
Effect of saturation state of fines recycled concrete aggregates on the properties of mortars Zengfeng Zhao, Sébastien Remond, Denis Damidot and Luc Courard	406
Water absorption of fine recycled concrete aggregates as an indicator of their quality María Eva Sosa, Leandro Carrizo, Yury Andres Villagrán Zaccardi and Claudio Javier Zega	414
Using recycled concrete sands in new structural concrete: a practical approach Jeroen Vrijders, Bram Dooms, Luc Boehme, Gerdi Goderis, Filip Props and Jean-Pierre Andries	422
Water absorption kinetic of recycled sand during mortar mixing Assia Djerbi, Aiman Yacoub and Teddy Fen-Chong	430
The experimental verification of utilization of fine fraction of recycled aggregate Kristina Fortova and Tereza Pavlu	438
Posters	
Innovative admixture for concrete produced with re-cycled aggregates Ivana Torresan, Riccardo Chinosi and Luigi Coppola	446
Test for geometrical properties of recycled aggregates: comparisons of EN 933-3:2003 and NBR 7809:2008 Regis Waskow, Viviane Lopes Gschwenter Dos Santos and Rejane Maria Candiota Tubino	456
Study of the addition of different fly ash types in cement mortar tile adhesive Ana Lourenço, Pedro Sequeira, Luis Silva and Victor Ferreira	464
Performance of waste glass powder as supplementary cementitious material Tahsin Alper Yikici, Yigitcan Demir, Meryem Bilen, Mehmet Bagdu, Muhammed Huseyin Yasar and Omer Enes Velioglu	472
Using war demolition bulk materials in rural houses construction in Syria Salah Haj Ismail, Carlos Thomas and Jesus Setién	480

Reaction to fire properties of CDW-based geopolymer panels Nataša Knez, Friderik Knez, Vilma Ducman, Sergio Tamburini, Marco Stefano Natali and Adriana Bernardi	488
Closing the loop - Innovative solutions for converting C&DW into new prefabricated elements. Jaime Moreno, Iñigo Vegas and Eunáte Goiti	496
Methodology of life cycle cost analysis as a tool to support the management of physical assets: Application to public research institutions Catarina Simões, Maria João Silva and Paula Couto	504
Tools for the valorization of secondary materials in the Flemish region Liesbet Van Cauwenberghe	511
