2018 12th International Conference on Reliability, Maintainability, and Safety (ICRMS) ICRMS 2018

Table of Contents

Message from the ICRMS 2018 Chairs xv
ICRMS 2018 Organizing Committee xvi
ICRMS 2018 Steering Committee xvii
ICRMS 2018 Program Committee xviii
ICRMS 2018 Additional Reviewers xx
ICRMS 2018 Keynotes xxii

Session I: RAMS Management and Quality

Product Assembling Quality Risk Control Strategy Based on Reverse RQR Chain .1 Fengdi Liu (Beihang University), Yihai He (Beihang University), Anqi Zhang (Beihang University), Jiaming Cui (Beihang University), Panting Duan (Beihang University), and Yu Xu (Beihang University)
Big Data Oriented Root Cause Heuristic Identification Approach Based on FWARM for Quality Accident .7.
Panting Duan (Beihang University), Yihai He (Beihang University), Anqing Zhang (Beihang University), Jiaming Cui (Beihang University), and Fengdi Liu (Beihang University)
Optimal Reallocation and Replacement Policy for Degradation Management with Unbalanced Workload .1.3 <i>Qiuzhuang Sun (National University of Singapore), Zhi-Sheng Ye</i> <i>(National University of Singapore), and Xiaoyan Zhu (University of</i> <i>Chinese Academy of Sciences)</i>
Identification of Key Roads with Minimal Resilience in City Traffic .1.8 Qingfeng Tong (Beihang University), Shengmin Guo (Beihang University), and Daqing Li (Beihang University)
Mission Reliability Optimization Method Based on Integrated Production Scheduling .22 Xiao Han (Beihang University), Yihai He (Beihang University), Zhaoxiang Chen (Beihang University), Bingyin Chen (Beihang University), and Changchao Gu (China Academy of Launch Vehicle Technology)

A New Index for SoS Reliability-Viability .27 Hongjun Zhang (CSSC Systems Engineering Research Institute), Baiqiao Huang (CSSC Systems Engineering Research Institute), Peng Zhang (CSSC Systems Engineering Research Institute), and Hongbin Ju (CSSC Systems Engineering Research Institute)
A New Cost-Based Importance Measure for Multiple-Working Conditions .31 Chen Zhiqiang (University of Chinese Academy of Sciences), Yaqian Hao (University of Chinese Academy of Sciences), and Xiaoyan Zhu (University of Chinese Academy of Sciences)
Quality and Reliability Improvement Based on the Quality Function Deployment Method .38 Xing Pan (Beihang University) and Manli Zhang (Beihang University)
Session II: Modeling and Simulation
A Systematic Modeling Approach for Failure Indicators of Complex Software-Intensive
Luyi Li (Beihang University), Minyan Lu (Beihang University), and Tingyang Gu (Beihang University)
Runtime Models for Analysing and Evaluating Quality Attributes of Self-Adaptive Software:
Tingyang Gu (Beihang University), Minyan Lu (Beihang University), and Luyi Li (Beihang University)
Multi-Agent Based Helicopter Landing Process Modeling and Uncertainty Analysis Method .62 Long Fan (Beihang University), Shengkui Zeng (Beihang University), and Jianbin Guo (Beihang University)
Study on the Cumulative Rule of Vibration Damage of BGA Solder Joint under Multi-Phase Condition .67.
Qichao Ma (Beihang University) and Ying Chen (Beihang University)
Research on Trust Degree Model of Fault Alarms Based on Neural Network .7.3 Shuo Ma (Beihang University), Shengkui Zeng (Beihang University), and Jianbin Guo (Beihang University)
Reliability Modeling for Linear Consecutive-k-Out-of-n:F Systems Subject to Dependent Competing Failure Processes 78
Yongguang Shen (Beihang University), Jianbin Guo (Beihang University), and Shengkui Zeng (Beihang University)
K-Coverage Reliability Evaluation for Wireless Sensor Networks Using 2 Dimensional k / r×s / m×n:F System .83
Reliability Evaluation Based on Sentiment Analysis of Online Comment .88 Xinyu Zhang (Beihang University), Guanxu Xie (Beihang University), Daqing Li (Beihang University), and Rui Kang (Beihang University)
Reliability Evaluation of CNC Machine Tools Based on Function Monotonicity .92 Zhu Xiaocui (Jilin University), Yang Zhaojun (Jilin University), Du Xuejiao (Jilin University), Chen Fei (Jilin University), Li Qiang (Jilin University), and Li Xiaobing (China Electronic Product Relibility and Environmental)

A Novel Reliability Assessment Method Based on Virtual Sample Generation and Failure Physical Model .99 Yurong Zhu (Beihang University) and Jun Yao (Beihang University)
Reliability Modeling for Products Subject to Generalized Extreme Shock <u>103</u> Bo Peng (Beihang University), Tingting Huang (Beihang University), Zixuan Yu (Beihang University), and Zhanjuan Zhao (Beihang University)
Ultimate Tensile Strength in Fused Deposition Modeling Considering Process Parameters of Flow Rate and Printing Head Speed .1.1.1 Tao Hou (Beihang University), Tingting Huang (Beihang University), Fuqiang Sun (Beihang University), and Shanggang Wang (Beihang University)
Research on the Mission Effectiveness of Mathematical Models Based on PMS .1.1.7 Chenglong Nie (Hebei Jiaotong Vocational and Technical College), Zhizhong Liu (Hebei Jiaotong Vocational and Technical College), Yuquan Zhang (Hebei Jiaotong Vocational and Technical College), and Lei Luo (Hebei Jiaotong Vocational and Technical College)
Mission Reliability Simulation of Time Redundancy PMS with Multiple Missions .124 Haiyue Yu (National University of Defense Technology) and Xiaoyue Wu (National University of Defense Technology)
Systematic Combat Effectiveness Evaluation Model Based on Xgboost .1.30 Bei Xiao (National University of Defense Technology), Peng-Cheng Luo (National University of Defense Technology), Zhi-Jun Cheng (National University of Defense Technology), Xiao-Nan Zhang (National University of Defense Technology), and Xin-Wu Hu (National University of Defense Technology)
Reliability Growth Prediction Method Based on GA-Elman Neural Network .1.35 Yusheng Sun (Beihang University), Lizhi Wang (Beihang University), Xiaohong Wang (Beihang University), and Xinlei Zhao (Beihang University)

Session III: Safety and Risk Assessment

Aircraft Tail Strike Events during Take-off Phase: A Risk Evaluation Model .1.42 Xin Wang (China Academy of Civil Aviation Science and Technology), Haofeng Wang (China Academy of Civil Aviation Science and Technology), and Liling Yu (China Academy of Civil Aviation Science and Technology)	
A Comprehensive Risk Evaluation Model for Airport Operation Safety .1.46 Mingliang Chen (China Academy of Civil Aviation Science and Technology), Min Luo (China Academy of Civil Aviation Science and Technology), Hao Sun (China Academy of Civil Aviation Science and Technology), and Yanqiu Chen (China Academy of Civil Aviation Science and Technology)	
Safety Analysis and Risk Assessment of LPAR Software System .1.50 Liang Xia (Air Force Early Warning Academy), Jiangping Yang (Air Force Farly Warning Academy), Hanzhong Wang (Air Force Farly Warning	

Early Warning Academy), Hanzhong Wang (Air Force Early Warning Academy), and Xiaodong Hou (Air Force Early Warning Academy)

Designing Trustworthy Monitoring Systems: Forensic Readiness for Safety and Security .1.55 Venesa Watson (Framatome GmbH & University of Siegen), Edita Bajramovic (Franatome GmbH & Friedrich-Alexander University), Mahlet Bejiga (Framatome GmbH & Friedrich-Alexander University), and Karl Waedt (Framatome GmbH)
Probabilistic Security Risk Assessment of Systems Subject to Sequential Attacks .1.6.1 Qisi Liu (University of Massachusetts–Dartmouth), Liudong Xing (University of Massachusetts–Dartmouth), Chengcheng Zhou (University of North Carolina), and Yujie Wang (University of Electronic Science and Technology of China)
A Vision-Based Method for Improving the Safety of Self-Driving .1.6.7 Dong Dong (Beihang University), Xiaoyang Li (Beihang University), and Xiaotong Sun (Beihang University)
Safety Assessment and Certification Methodology for Landing Gear Integrated Health Monitoring System .1.72 Syed Haider (UTC Aerospace Systems)
Change Risk Management in Civil Aviation .1.79 Yuan Zhang (China Academy of Civil Aviation Science and Technology), Yijie Sun (China Academy of Civil Aviation Science and Technology), Yanqiu Chen (China Academy of Civil Aviation Science and Technology), and Rong Zhao (China Academy of Civil Aviation Science and Technology)
Current Challenges of the Joint Consideration of Functional Safety & Cyber Security, Their Interoperability and Impact on Organizations: How to Manage RAMS + S (Reliability Availability Maintainability Safety + Security) .1.85 Jochen Link (ING-LINK), Karl Waedt (Framatome GmbH), Ines Ben Zid (Framatome GmbH), and Xinxin Lou (Framatome GmbH)

Session IV: Software Reliability

A DSP Chip IO Fault Injection Method Based on Boundary Scan Technology .192..... Chengjun Song (AVIC China Aero-Polytechnology Establishment), Du Yi (AVIC China Aero-Polytechnology Establishment), Liu Mengmeng (AVIC China Aero-Polytechnology Establishment), and Zeng Chenhui (AVIC China Aero-Polytechnology Establishment)
Software Reliability Case Development Method Based on the 4+1 Principles .197..... Shihao Zhu (Beihang University), Minyan Lu (Beihang University), and Biao Xu (Beihang University)
Obtain Datasets for Self-Driving Perception from Video Games Automatically .203...... Yifeng Huang (Beihang University), Dong Dong (Beihang University), and Chuan Lv (Beihang University)
A Resilience Test Case Design Method for Network Function Virtualization Platforms .208..... Huang Ruolin (Tongji University), Qingfeng Du (Tongji University), Kecheng Guo (Tongji University), Weiya You (Tongji University), Zheng Ni (Tongji University), Kanglin Yin (Tongji University), Ruian Zhu (Tongji University), Kanglin Yin (Tongji University), and Qibin Zheng (Tongji University)

Software Runtime Accumulative Testing .218. Baiqiao Huang (CSSC Systems Engineering Research Institute) and Pengyi Zhang (CSSC Systems Engineering Research Institute)
Access Control in Safety Critical Environments .223 Christoph Ruland (University of Siegen) and Jochen Sassmannshausen (University of Siegen)
Robustness Verification of Railway Level Crossing Control System by Formal Method .230 Keming Wang (Southwest Jiaotong University) and Zheng Wang (Southwest Jiaotong University)
Session V: Reliability Testing and Design
Effect of Uncertainty of Ground Simulation Test on the Thermal Performance of ACR-1 White Paint under NUV Irradiation 234
Zicai Shen (Beijing Institute of Spacecraft Environment Engineering) and Yan Xia (Beijing Institute of Spacecraft Environment Engineering)
Product Environment Test Equipment Design Evaluation Method Based on Temperature Field Distribution 237
Yu Xin (Beihang University), Yinhua Shao (Beihang University), Pengyu Li (Beihang University), and Qihang Jiang (Beihang University)
Stress Simulation Analysis of Electronic Devices on Cloud Platform .243 Jiayue Fang (Beihang University), Yin Chen (Beihang University), and Rui Kang (Beihang University)
Accelerated Degradation Testing Optimal Design Based on Uncertain Process .249 Zuo-Chen Guo (Beihang University), Xiao-Yang Li (Beihang University), and Wen-Bin Chen (Beihang University)
A Service-Based Testing Framework for NFV Platform Performance Evaluation .254 Qingfeng Du (Tongji University), Zheng Ni (Tongji University), Ruian Zhu (Tongji University), Mengyi Xu (Tongji University), Kecheng Guo (Tongji University), Weiya You (Tongji University), Ruolin Huang (Tongji University), Kanglin Yin (Tongji University), and Qibin Zheng (Tongji University)
Research on Electrical Characteristics of CMOS Device at Cryogenic Temperature .262 Hongyan Leng (Beihang University), Guicui Fu (Beihang University), Maogong Jiang (Beihang University), Bo Wan (Beihang University), and Zhongqing Zhang (Beihang University)
Method of Establishing Spindle Durability Test Spectrum Considering Cutting Load Sequence .266 Yang Li (Jilin University), Fei Chen (Jilin University), Yixuan Song (Jilin University), and Wei Luo (Jilin University)
Control of Mutual Dragging Test for Motorized Spindle Based on Improved Direct Torque Control .270 Hailong Tian (Jilin University), Zhaojun Yang (Jilin University), Lei Chen (Jilin University), Chuanhai Chen (Jilin University), Jinyan Guo (Jilin University), Jun Ying (Jilin University), and Hongxun Zhao (Jilin University)

Session VI: Fault Diagnosis, Prognosis, and PHM

A Failure Prediction Method for Spacecraft Loads Based on Time Series Model .277 Yinghua Shao (Beihang University) and Yuanhang Zhang (Beihang University)
 Fault Diagnosis Approach Based on Operational Quality Data for Manufacturing System .282 Zhaoxiang Chen (Beihang University), Yihai He (Beihang University), Yixiao Zhao (Beihang University), Xiao Han (Beihang University), and Zheng He (Beihang University)
Fault Prognosis Based on Restricted Boltzmann Machine and Data Label for Switching Power Amplifiers .287. Jinyong Yao (Beihang University), Tao Sheng (Beihang University), Jiangyun Zhen (Beihang University), and Xiaolong Bao (Beijing BoiMingKun Tachnology Co. Ltd.)
Fault Detection of Motorized Spindle Based on Clustering by Density Peaks .292 Li Qiang (Jilin University), Chen Weizheng (Jilin University), Chen Fei (Jilin University), Chen Chao (Jilin University), and Yang Zhaojun (Jilin University)
Detection for Cutting Tool Wear Based on Convolution Neural Networks .297 Yue Wang (Beihang University), Wei Dai (Beihang University), and Jianglin Xiao (CRRC Zhuzhou Electric Locomotive Research Institute Co., Ltd.)
Dynamic Bayesian Network Based Fault Prediction of High Power Switching-Mode Amplifiers .30.1 Yao Jinyong (Beihang University), Zhen Jiangyun (Beihang University), Sheng Tao (Beihang University), and Zhang Zhaofeng (Beijing HAZT Testing Co. Ltd.)
Spindle Radial Accuracy Evaluation and Fault Diagnosis Based on a Normal Distribution .307 Binbin Zhang (Tsinghua University), Liping Wang (Tsinghua University), Jun Wu (Tsinghua University), and Jianhong Liang (Southwest University of Science and Technology)
Lithium-Ion Battery Capacity Estimation Based on Features Selection by Grey Relational Analysis .312 Hang Yao (National University of Defense Technology), Qian Zhao (National University of Defense Technology), Zhao-Li Song (National University of Defense Technology), Zhi-Jun Cheng (National University of Defense Technology), Xiang Jia (National University of Defense Technology), and Bo Guo (National University of Defense Technology) Lithium-Ion Battery Remaining Useful Life Prediction Based on GRU-RNN .317
Yuchen Song (Harbin Institute of Technology), Lyu Li (Harbin Institute of Technology), Yu Peng (Harbin Institute of Technology), and Datong Liu (Harbin Institute of Technology)

Session VII: Failure Analysis

Discussion on Failure Mechanism and Modeling of Electrochemical Migration of High Density Printed Circuit Boards in Dust Environment .323..... Yilin Zhou (Beijing University of Posts and Telecommunications), Yanyu Chen, and Wenrui Lu (Beijing University of Posts and Telecommunications)

Investigation on the Degradation of Stress Relaxation of Hyperbolic Wire Spring Connectors.329
Yilin Zhou (Beijing University of Posts and Telecommunications) and
Mengru Wan (Beijing University of Posts and Telecommunications)

Typical Components Failure Mode under Compressive Mechanic Stress within All Sea Depth .335... Tao Lu (Fifth Research Institute of MIIT), Weiping Du (Fifth Research Institute of MIIT), and Fuyao Mo (Fifth Research Institute of MIIT)

Failure Mechanisms Cumulative Model for Reliability Evaluation of k-Out-of-n System with Different Types of Failure Mechanisms .339..... Xiaoyong Yu (Beihang University) and Ying Chen (Beihang University)

Functional Model-Driven FMEA Method and Its System Implementation .345..... Xiangli Feng (National University of Defense Technology), Yanling Qian (National University of Defense Technology), Zezhong Li (National University of Defense Technology), Long Wang (National University of Defense Technology), and Minhao Wu (National University of Defense Technology)

Failure Analysis of the Fracture of a Spring Hanger .35.1.....
Chunchen Yao (Jiangnan Industries Group Co., Ltd.), Menglin Wang (Beijing Technology and Business University), Yingying Ruan (Jiangnan Industries Group Co., Ltd.), Xiaopeng Liang (Central South University), Fan Liu (Jiangnan Industries Group Co., Ltd.), and Song Tang (Jiangnan Industries Group Co., Ltd.)

Failure Behavior Analysis of 1-Out-of-N Hot-Standby System with Imperfect Switch .355..... Ze Wang (Beihang University), Ying Chen (Beihang University), and Weiyang Men (Beihang University)

Accident Cause Analysis and Prevention of Commercial Flight Based on the "2-4" Model .363...... Zhenyu Zhang (Beihang University) and Pan Xing (Beihang University)

Failure Mechanism and Effect Analysis of Metering Module of Smart Meter .370..... Jiaolan He (Beihang University), Haibo Yu (China Electric Power Research Institute Beijing), and Helong Li (China Electric Power Research Institute Beijing)

Integrated Modular Avionics Fault Propagation Model Establishment and Reliability Allocation .377.... Hao Dong (Beihang University), Xiaohong Bao (Beihang University), Tingdi Zhao (Beihang University), and Yu Xin (Beihang University)

Session VIII: Reliability Analysis and Reliability Assessment

University)

An Assessment Model for the Continuous Working Ability of Radars .395..... Xiaoxi Liu (CEPREI; Guangdong Key Laboratory of Electronics and Information Technology Product Reliability;Guangzhou Key Laboratory of Reliability and Environmental Engineering of Electronic Information Product), Yan Song (CEPREI: Guangdong Key Laboratory of Electronics and Information Technology Product Reliability; Guangzhou Key Laboratory of Reliability and Environmental Engineering of Electronic Information Product), Zongke He (CEPREI: Guangdong Key Laboratory of Electronics and Information Technology Product Reliability: Guangzhou Key Laboratory of Reliability and Environmental Engineering of Electronic Information Product), Kaiwei Wang (CEPREI;Guangdong Key Laboratory of Electronics and Information Technology Product Reliability;Guangzhou Key Laboratory of Reliability and Environmental Engineering of Electronic Information Product), and Kai Li (CEPREI; Guangdong Key Laboratory of Electronics and Information Technology Product Reliability: Guangzhou Key Laboratory of Reliability and Environmental Engineering of Electronic Information Product) Interval Estimation of Process Capability Indices Based on the Quality Data of Supplied Products .400. Yanhe Cui (Beihang University), Jun Yang (Beihang University), and Shuo Huang (Beihang University) A PoF-Based Storage Lifetime Evaluation Method for High Precision Quartz Flexible Accelerometers .405 Guangze Pan (China Electronic Product Reliability and Environmental Testing Research Institute), Yaqiu Li (China Electronic Product Reliability and Environmental Testing Research Institute), Xiaobing Li (China Electronic Product Reliability and Environmental Testing Research Institute), Yuanhang Wang (China Electronic Product Reliability and Environmental Testing Research Institute), and Wenwei Liu (China Electronic Product Reliability and Environmental Testing Research Institute) Research on Reliability Evaluation of Computer Numerical Control Machine Tool System Based on Man-Machine System .409..... Wei Dai (Beihang University) and Jiahuan Sun (Beihang University) A PoF Based Reliability Assessment Framework for Complex Systems .413..... Qian Li (China Electronic Product Reliability and Environmental Testing Research Institute), Yaqiu Li (China Electronic Product Reliability and Environmental Testing Research Institute), Guangze Pan (China Electronic Product Reliability and Environmental Testing Research Institute), JiaWei Zhu (China Electronic Product Reliability and Environmental Testing Research Institute), Baimao Lei (China Electronic Product Reliability and Environmental Testing Research Institute), and Xiaobing Li (China Electronic Product Reliability and

- Environmental Testing Research Institute)
- Research on Bridge Crack Detection with Neural Network Based Image Processing Methods .419.... Jiafan Peng (Beihang University), Shunong Zhang (Beihang University), Dongmu Peng (Shenzhen Municipal Engineering Institute), and Kan Liang (Moody's Analytic)

Session IX: Maintenance and Supportability

Location Optimization for Spare Parts Depots Based on (r, Q) Inventory Policy .429 Bohan Lu (Beihang University), Meilin Wen (Beihang University), and Rui Kang (Beihang University)
Research on Multi-Echelon Inventory System for Civil Aircraft Spare Parts with Lateral Transshipments and Importance Degree .434 Yuchang Liu (Northwestern Polytechnical University), Yunwen Feng (Northwestern Polytechnical University), Xiaofeng Xue (Northwestern Polytechnical University), and Cheng Lu (Northwestern Polytechnical University)
Integrated Scheduling of Maintenance Workers and Activities for Nuclear Power Plant Subsystem .442 Mengyu Du (Tsinghua University), Sai Zhang (Tsinghua University), and Yan-Fu Li (Tsinghua University)
Cost-Minimization Preventive Maintenance for the Data Storage System of a Supercomputer .448 Jun Wang (University of Chinese Academy of Sciences), Xiaoyan Zhu (University of Chinese Academy of Sciences), and Tao Yuan (Ohio University)
Optimal Price, Reliability, Extended Warranty Price and Extended Warranty Sales Promotion Timing for New Products .452 Can Jiao (University of Chinese Academy of Sciences), Xiaoyan Zhu (University of Chinese Academy of Sciences), and Yuqiang Fu (University of Chinese Academy of Sciences)

Session X: Human Reliability and Others

Reliability Allocation Optimization of Aero Engine Based on Grey Prediction Theory .457 Haiyang Li (Northeastern University), Liyang Xie (Northeastern University), Jiaxin Song (Northeastern University), and Zhiqiang Zhao (Northeastern University)
Summary of Integrated Application of Functional Safety and Information Security in Industry .463.
Wenze Xiong (Instrumentation Technology and Economy institute) and Jianghong Jin (Beijing Municipal Institute of Labor Protection)
Collaborative Cluster Architecture for Bio-Inspired Electronic Array .470. Xiubin Liu (National University of Defense Technology), Yanling Qian (National University of Defense Technology), Xiangli Feng (National University of Defense Technology), Yue Li (National University of Defense Technology), and Long Wang (National University of Defense Technology)
A New Quantification Strategy for HEP of CREAM in the Fueling Processes of Aircraft Launch Operations .476 Xiaoxia Wang (Beihang University), Wenjin Zhang (Beihang University), Zekun Wu (Beihang University), and Xing Pan (Beihang University)

Research on Architectural Constraints Analysis and an Improvement Method for Safety Instrumented Systems .48.1.... Jianghong Jin (Beijing Municipal Institute of Labor Protection), Wenze Xiong (Instrumentation Technology and Economy Institute), and Peihui Xu (China University of Mining and Technology)

Author Index 485
