Saratov Fall Meeting 2018

Laser Physics, Photonic Technologies and Molecular Modeling

Vladimir L. Derbov
Editor

24–28 September 2018
Saratov, Russian Federation

Sponsored by
Russian Foundation for Basic Research (Russian Federation) • Russian Academy of Sciences (Russian Federation) • SPIE • OSA—The Optical Society • IEEE — The Photonics Society • Russian Technology Platform “The Medicine of the Future” (Russian Federation) • Russian Technology Platform “Photonics” (Russian Federation) • European Technology Platform “Photonics21” • EPIC – European Photonics Industry Consortium • LLC SPE “Nanostructured Glass Technology” (Russian Federation) • RME “INJECT” LLC (Russian Federation) • LLC SPE Nanostructured Glass Technology (Russian Federation) • BioVitrum, Ltd. LASER SYSTEMS AND PHOTONIC TECHNOLOGIES

11066 02 Nonlinear dynamics of intracavity difference-frequency generator pumped by a dual-wavelength semiconductor disk laser: model of single-mode optical fields with strong time-delay feedback [11066-3]

11066 03 Femtosecond thulium-doped fiber-ring laser for mid-IR spectroscopic breath analysis [11066-8]

11066 04 Analysis of steady-state stability and quasiperiodic oscillations in intracavity optical parametric oscillator pumped by semiconductor disk laser [11066-39]

11066 05 Analysis of temporal dynamics of two-wavelength MEMS-VCSEL with optical injection for difference frequency generation [11066-40]

11066 06 Suppression of transverse spatio-temporal instabilities in broad-area lasers emission by external optical injection [11066-63]

11066 07 Optimization of parameters in a modified laser triangulation method [11066-13]

11066 08 Numerical and experimental selection of optimal parameters in the interferometric method of measuring the thickness of the cornea [11066-14]

11066 09 Autodyne interferometry of distance by injected current modulation of laser diode [11066-26]

11066 0A Spectral and polarization characteristics of a broadband vacuum photosensor with tunnel emission from a metal nanoscale blade [11066-46]

11066 0B Development of an original technology for manufacturing of RF antennas on flexible substrates [11066-55]

11066 0C Resistive thin-film coatings as an alternative to classical slow wave structures in millimeter-wave vacuum electron devices [11066-54]
11066 OD  Nonsatationary elliptically polarized normal modes of electromagnetically induced transparency [11066-6]

11066 OE  Phase-matched conditions for waves interactions on photo-induced susceptibility gratings [11066-20]

11066 OF  Analysis of harmonic's generation in susceptibility gratings [11066-9]

11066 OG  Squeezed solitons via soliton fission in dispersion variable fibers [11066-50]

11066 OH  The propagation of ultrashort laser pulses in phototropic media [11066-43]

11066 OI  The conditions for the propagation of soliton-like pulses in nonlinear media with reverse saturable absorption [11066-47]

QUANTUM OPTICS AND ENTANGLED STATES

11066 OJ  Entanglement in a detuned double Jaynes-Cumming model [11066-5]

11066 OK  Entanglement of two dipole-coupled qubits interacting with a detuned cavity thermal field [11066-24]

11066 OL  Symmetry, coherent states, and control of quantum dynamics [11066-51]

11066 OM  Quantum fluctuations of pump and Stokes pulses in Raman amplifier [11066-19]

11066 ON  Influence of atomic coherence on entanglement between dipole-coupled Jaynes-Cummings and isolated atom [11066-23]

11066 OO  Entanglement between two atoms taking into account a Stark shift [11066-42]

ELECTRODYNAMICS OF LASER AND PHOTONIC SYSTEMS

11066 OP  Finslerian representation of the Maxwell equations [11066-57]

11066 OQ  Constrained Hamiltonian approach to the Maxwell theory [11066-58]

11066 OR  Numerical modeling of leaky electromagnetic waves in planar dielectric waveguides [11066-59]

11066 OS  Advantages and limitations of the matrix record of the Wentzel-Kramers-Brillouin solution in the problem of the distribution of electromagnetic waves in planar structures [11066-22]
Reflection of light by a planar inhomogeneous gyrotropic layer with torsion

Numerical analysis of eikonal equation

Backward plasmon-polaritones in multilayered dissipative structures

ADVANCED POLARIZATION AND CORRELATION TECHNOLOGIES

Low-coherence reflectometry of the foamed polymer matrices

A comparison of different phase scattering functions in modeling wave radiative transfer applied to the tissues with complex structures and dynamics

Low-coherence reflectometry in applications to media structure characterization

Structure diagnostics of dispersive two-phase systems using speckle correlation technique

High-speed visualization of aluminum nanopowder combustion in air

Signal detrending in low-coherence reflectometry: physical basis and simulation results

Line field swept source optical coherence tomography system with compensation of chromatic aberrations

SOURCES AND APPLICATIONS OF TERAHERTZ RADIATION

Spectra of mode loss in THz quantum cascade laser with double metal waveguide based on Au, Cu and Ag

Amplification of optical and THZ surface plasmon-polaritons by electron beams

Numerical simulation of the THz lasing in the cavity with graphene-based hyperbolic medium

Amplification of terahertz plasma waves in tapered metal-insulator-graphene heterostructure

Excitation of plasmon resonances in periodic double-layer graphene-based PT system

Experimental and numerical study of electromagnetic parameters of planar slow-wave structures for millimeter-wave vacuum electronic devices
