Volume 10950

Part One of Two Parts

Proceedings of SPIE, 1605-7422, V. 10950

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Medical Imaging 2019: Computer-Aided Diagnosis*, edited by Kensaku Mori, Horst K. Hahn, Proceedings of SPIE Vol. 10950 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xv *Authors*

xxi *Conference Committee*

xxv *2019 Medical Imaging Award Recipients*

Part One

BREAST I

10950 02 **Vendor-independent soft tissue lesion detection using weakly supervised and unsupervised adversarial domain adaptation** [10950-1]

10950 03 **Detecting mammographically occult cancer in women with dense breasts using deep convolutional neural network and radon cumulative distribution transform** [10950-2]

10950 04 **Reducing overfitting of a deep learning breast mass detection algorithm in mammography using synthetic images** [10950-3]

10950 05 **Deep learning for identifying breast cancer malignancy and false recalls: a robustness study on training strategy** [10950-4]

10950 06 **Evaluating deep learning techniques for dynamic contrast-enhanced MRI in the diagnosis of breast cancer** [10950-5]

BRAIN

10950 07 **Registration based detection and quantification of intracranial aneurysm growth** [10950-6]

10950 08 **Reliability of computer-aided diagnosis tools with multi-center MR datasets: impact of training protocol** [10950-7]

10950 09 **Automatic multi-modality segmentation of gross tumor volume for head and neck cancer radiotherapy using 3D U-Net** [10950-8]

10950 0A **Automatic strategy for extraction of anthropometric measurements for the diagnostic and evaluation of deformational plagiocephaly from infant head models** [10950-9]

10950 0B **Radiomics of the lesion habitat on pre-treatment MRI predicts response to chemo-radiation therapy in Glioblastoma** [10950-10]

10950 0C **Modeling normal brain asymmetry in MR images applied to anomaly detection without segmentation and data annotation** [10950-11]

BREAST II

10950 0D **Response monitoring of breast cancer on DCE-MRI using convolutional neural network-generated seed points and constrained volume growing** [10950-12]

10950 0E **Multiview mammographic mass detection based on a single shot detection system** [10950-13]

10950 0F **A deep learning method for volumetric breast density estimation from processed full field digital mammograms** [10950-14]

10950 0G **Breast density follow-up decision support system using deep convolutional models** [10950-15]

10950 0H **DCE-MRI based analysis of intratumor heterogeneity by decomposing method for prediction of HER2 status in breast cancer** [10950-16]

BREAST III AND HEART

10950 0I **Association of computer-aided detection results and breast cancer risk** [10950-17]

10950 0J **Breast parenchyma analysis and classification for breast masses detection using texture feature descriptors and neural networks in dedicated breast CT images** [10950-18]

10950 0K **Visual evidence for interpreting diagnostic decision of deep neural network in computer-aided diagnosis** [10950-19]

10950 0L **Automated measurement of fetal right-myocardial performance index from pulsed wave Doppler spectrum** [10950-20]

10950 0M **An ensemble of U-Net architecture variants for left atrial segmentation** [10950-21]

10950 0N **A deep learning approach to classify atherosclerosis using intracoronary optical coherence tomography** [10950-22]

LUNG I

10950 0O **PHT-bot: deep learning based system for automatic risk stratification of COPD patients based upon signs of pulmonary hypertension** [10950-23]

10950 0P **Identifying disease-free chest x-ray images with deep transfer learning** [10950-24]

10950 0Q **Analysis of deep convolutional features for detection of lung nodules in computed tomography** [10950-25]

10950 0R **A combination of intra- and peritumoral features on baseline CT scans is associated with overall survival in non-small cell lung cancer patients treated with immune checkpoint inhibitors: a multi-agent multi-site study** [10950-26]

10950 0S **Visualizing and explaining deep learning predictions for pneumonia detection in pediatric chest radiographs** [10950-27]

ABDOMEN

10950 0T **Artifact-driven sampling schemes for robust female pelvis CBCT segmentation using deep learning** [10950-28]

10950 0U **A probabilistic approach for interpretable deep learning in liver cancer diagnosis** [10950-29]

10950 0V **Combining deep learning methods and human knowledge to identify abnormalities in computed tomography (CT) reports** [10950-30]

10950 0W **Bladder cancer staging in CT urography: estimation and validation of decision thresholds for a radiomics-based decision support system** [10950-31]

10950 0X **Automatic MR kidney segmentation for autosomal dominant polycystic kidney disease** [10950-32]

10950 0Y **2D and 3D bladder segmentation using U-Net-based deep-learning** [10950-33]

MULTIORGAN AND COLON

10950 0Z **Automatic anatomy partitioning of the torso region on CT images by using a deep convolutional network with majority voting** [10950-34]

10950 10 **Automatic multi-organ segmentation in thorax CT images using U-Net-GAN** [10950-35]

10950 12 **Computer-aided classification of colorectal polyps using blue-light and linked-color imaging** [10950-37]

10950 15 **Polyp-size classification with RGB-D features for colonoscopy** [10950-40]

LUNG II

10950 16 **Handling label noise through model confidence and uncertainty: application to chest radiograph classification** [10950-41]

10950 17 **Classification of chest CT using case-level weak supervision** [10950-42]

10950 18 **Deep adversarial one-class learning for normal and abnormal chest radiograph classification** [10950-43]

10950 19 **Image biomarkers for quantitative analysis of idiopathic interstitial pneumonia** [10950-44]

RADIOMICS I

10950 1A **Effect of diversity of patient population and acquisition systems on the use of radiomics and machine learning for classification of 2,397 breast lesions** [10950-46]

10950 1B **Radiogenomic characterization of response to chemo-radiation therapy in glioblastoma is associated with PI3K/AKT/mTOR and apoptosis signaling pathways** [10950-47]

10950 1C **Identifying optimal input using multilevel radiomics and nested cross-validation for predicting pulmonary function in lung cancer patients treated with radiotherapy** [10950-48]

10950 1D **Texture-based prostate cancer classification on MRI: how does inter-class size mismatch affect measured system performance?** [10950-49]

10950 1E **Deformation heterogeneity radiomics to predict molecular subtypes of pediatric Medulloblastoma on routine MRI** [10950-50]

10950 1F **Quantitative vessel tortuosity radiomics on baseline non-contrast lung CT predict response to immunotherapy and are prognostic of overall survival** [10950-51]

LUNG III

10950 1H **Weakly-supervised deep learning of interstitial lung disease types on CT images** [10950-53]

10950 1I **Efficient learning in computer-aided diagnosis through label propagation** [10950-54]

10950 1J **Computer-aided CT image features improving the malignant risk prediction in pulmonary nodules suspicious for lung cancer** [10950-55]

10950 1K **Augmenting LIDC dataset using 3D generative adversarial networks to improve lung nodule detection** [10950-56]

VASCULAR AND RADIOMICS II

10950 1L **A semi-supervised CNN learning method with pseudo-class labels for vascular calcification detection on low dose CT scans** [10950-57]

10950 1M **Variability in radiomics features among iDose^4 reconstruction levels** [10950-58]

10950 1N **Development and validation of a radiomics-based method for macrovascular invasion prediction in hepatocellular carcinoma with prognostic implication** [10950-59]

10950 1P **Efficient detection of vascular structures using locally connected filters** [10950-61]

EYES AND NEW APPROACHES

10950 1Q **Deep learning for automated screening and semantic segmentation of age-related and juvenile atrophic macular degeneration** [10950-62]

10950 1R **Improved interpretability for computer-aided severity assessment of retinopathy of prematurity** [10950-63]

10950 1S **Reproducibility of CT-based texture feature quantification of simulated and 3D-printed trabecular bone: influence of noise and reconstruction kernel** [10950-64]

10950 1U **Age prediction using a large chest x-ray dataset** [10950-66]

10950 1V **Using multi-task learning to improve diagnostic performance of convolutional neural networks** [10950-67]

RADIOMICS III AND ONCOLOGY

10950 1W **Stability of radiomic features of liver lesions from manual delineation in CT scans** [10950-68]

10950 1X **Use of convolutional neural networks to predict risk of masking by mammographic density** [10950-69]

10950 1Y **A novel clinical gland feature for detection of early Barrett's neoplasia using volumetric laser endomicroscopy** [10950-70]

10950 1Z **Radiomics analysis potentially reduces over-diagnosis of prostate cancer with PSA levels of 4-10 ng/ml based on DWI data** [10950-71]

10950 20 **Homogenization of breast MRI across imaging centers and feature analysis using unsupervised deep embedding** [10950-72]

POSTER SESSION: BONE

10950 21 **Shape variation analyzer: a classifier for temporomandibular joint damaged by osteoarthritis** [10950-73]

10950 22 **Automatic detection and localization of bone erosion in hand HR-pQCT** [10950-74]

10950 23 **Spinal vertebrae segmentation and localization by transfer learning** [10950-75]

10950 24 **Ensembles of sparse classifiers for osteoporosis characterization in digital radiographs** [10950-76]

10950 25 **Multiclass vertebral fracture classification using ensemble probability SVM with multi-feature selection** [10950-77]

Part Two

POSTER SESSION: BRAIN

10950 26 **Cranial localization in 2D cranial ultrasound images using deep neural networks** [10950-78]

10950 27 **Learning imbalanced semantic segmentation through cross-domain relations of multi-agent generative adversarial networks** [10950-79]

10950 28 **Spatial and depth weighted neural network for diagnosis of Alzheimer's disease** [10950-80]

10950 29 **Study on discrimination of Alzheimer's disease states using an ensemble neural network's model** [10950-81]

10950 2A **Feasibility study of deep neural networks to classify intracranial aneurysms using angiographic parametric imaging** [10950-82]

10950 2B **Non-invasive genotype prediction of chromosome 1p/19q co-deletion by development and validation of an MRI-based radiomics signature in lower-grade gliomas** [10950-83]

10950 2C **Diagnosis of OCD using functional connectome and Riemann kernel PCA** [10950-84]

POSTER SESSION: BREAST

10950 2D **Evaluation of U-net segmentation models for infarct volume measurement in acute ischemic stroke: comparison with fixed ADC threshold-based methods** [10950-85]

10950 2E **Multi-path deep learning model for automated mammographic density categorization** [10950-86]

10950 2F **Exploratory learning with convolutional autoencoder for discrimination of architectural distortion in digital mammography** [10950-87]

10950 2G **Computationally-efficient wavelet-based characterization of breast tumors using conventional B-mode ultrasound images** [10950-88]

10950 2H **Breast dispersion imaging using undersampled rapid dynamic contrast-enhanced MRI** [10950-89]

10950 2I **Deep learning approach predicting breast tumor response to neoadjuvant treatment using DCE-MRI volumes acquired before and after chemotherapy** [10950-90]

10950 2J **Computer-aided detection and classification of microcalcification clusters on full field digital mammograms using deep convolution neural network** [10950-91]

10950 2K **Associations between mammographic phenotypes and histopathologic features in ductal carcinoma in situ** [10950-92]

10950 2M **Synthesis and texture manipulation of screening mammograms using conditional generative adversarial network** [10950-94]

10950 2N **Breast MRI radiomics for the pre-treatment prediction of response to neoadjuvant chemotherapy in node-positive breast cancer patients** [10950-95]

10950 2O **Developing a new quantitative imaging marker to predict pathological complete response to neoadjuvant chemotherapy** [10950-96]

10950 2P **Deep learning of sub-regional breast parenchyma in mammograms for localized breast cancer risk prediction** [10950-97]

10950 2Q **Malignant microcalcification clusters detection using unsupervised deep autoencoders** [10950-98]

10950 2R **Automated deep-learning method for whole-breast segmentation in diffusion-weighted breast MRI** [10950-99]

10950 2S **A shell and kernel descriptor based joint deep learning model for predicting breast lesion malignancy** [10950-100]

POSTER SESSION: CELL

10950 2T **Automatic cell segmentation using mini-u-net on fluorescence in situ hybridization images** [10950-101]

POSTER SESSION: COLON

10950 2V **Polyp classification by Weber's Law as texture descriptor for clinical colonoscopy** [10950-103]

10950 2W **Texture feature analysis of neighboring colon wall for colorectal polyp classification** [10950-104]

10950 2X **The detection of non-polypoid colorectal lesions using the texture feature extracted from intact colon wall: a pilot study** [10950-105]

10950 2Y **Differentiation of polyps by clinical colonoscopy via integrated color information, image derivatives and machine learning** [10950-106]

POSTER SESSION: EYES

10950 2Z **Early detection of retinopathy of prematurity stage using deep learning approach** [10950-107]

10950 30 **Longitudinal matching of in vivo adaptive optics images of fluorescent cells in the human eye using stochastically consistent superpixels** [10950-108]

10950 31 **Computer-based detection of age-related macular degeneration and glaucoma using retinal images and clinical data** [10950-109]

10950 32 **Fully-automated segmentation of optic disk from retinal images using deep learning techniques** [10950-110]

POSTER SESSION: HEAD

10950 34 **Deep learning-based detection of anthropometric landmarks in 3D infants head models** [10950-112]

10950 35 **Quantitative evaluation of local head malformations from three-dimensional photography: application to craniosynostosis** [10950-113]

10950 36 **Predicting resection volumes within the nasal cavity to improve patients' breathing** [10950-114]

POSTER SESSION: HEART

10950 38 **Automated scoring of aortic calcification in vertebral fracture assessment images** [10950-116]

10950 39 **Detection and classification of coronary artery calcifications in low dose thoracic CT using deep learning** [10950-117]

10950 3A **Computerized identification of early ischemic changes in acute stroke in noncontrast CT using deep learning** [10950-118]

10950 3C **Fully automated segmentation of left ventricular myocardium from 3D late gadolinium enhancement magnetic resonance images using a U-net convolutional neural network-based model** [10950-120]

POSTER SESSION: KIDNEYS

10950 3D **Deep learning based bladder cancer treatment response assessment** [10950-121]

POSTER SESSION: LIVER

10950 3E **Deep learning convolutional neural networks for the estimation of liver fibrosis severity from ultrasound texture** [10950-122]

POSTER SESSION: LUNG

10950 3F **Automated identification of thoracic pathology from chest radiographs with enhanced training pipeline** [10950-123]

10950 3G **3D fully convolutional network-based segmentation of lung nodules in CT images with a clinically inspired data synthesis method** [10950-124]

10950 3H **A lung graph model for the classification of interstitial lung diseases on CT images** [10950-125]

10950 3I **Improving pulmonary lobe segmentation on expiratory CTs by using aligned inspiratory CTs** [10950-126]

10950 3J **Pre-trained deep convolutional neural networks for the segmentation of malignant pleural mesothelioma tumor on CT scans** [10950-127]

10950 3K **Artificial intelligence for point of care radiograph quality assessment** [10950-128]

10950 3L **Exploring features towards semantic characterization of lung nodules in computed tomography images** [10950-129]

10950 3M **Lung segmentation based on a deep learning approach for dynamic chest radiography** [10950-130]

10950 3N **Computer-aided detection using non-convolutional neural network Gaussian processes** [10950-131]

10950 3O **2.5D CNN model for detecting lung disease using weak supervision** [10950-132]

10950 3P **Lung nodule retrieval using semantic similarity estimates** [10950-133]

10950 3Q **Predicting unnecessary nodule biopsy for a small lung cancer screening dataset by less-abstractive deep features** [10950-134]

10950 3R **Lung tissue characterization for emphysema differential diagnosis using deep convolutional neural networks** [10950-135]

10950 3S **Fine-grained lung nodule segmentation with pyramid deconvolutional neural network** [10950-136]

10950 3T **Similar CT image retrieval method based on lesion nature and its three-dimensional distribution** [10950-137]

POSTER SESSION: LYMPH NODES AND THYROID

10950 3U **Metastatic lymph node analysis of colorectal cancer using quadruple-phase CT images** [10950-138]

10950 3V **CT-realistic data augmentation using generative adversarial network for robust lymph node segmentation** [10950-139]

10950 3W **Transfer learning for automatic cancer tissue detection using multispectral photoacoustic imaging** [10950-140]

POSTER SESSION: PROSTATE

10950 3X **Automatic MRI prostate segmentation using 3D deeply supervised FCN with concatenated atrous convolution** [10950-141]

10950 3Y **Radiomic features derived from pre-operative multi-parametric MRI of prostate cancer are associated with Decipher risk score** [10950-142]

POSTER SESSION: RADIOMICS

10950 3Z **Towards deep radiomics: nodule malignancy prediction using CNNs on feature images** [10950-143]

10950 40 **Radiomics analysis on T2-MR image to predict lymphovascular space invasion in cervical cancer** [10950-144]

10950 41 **Temporal mammographic registration for evaluation of architecture changes in cancer risk assessment** [10950-145]

10950 42 **PI-RADS guided discovery radiomics for characterization of prostate lesions with diffusion-weighted MRI** [10950-146]

10950 43 **Non-invasive transcriptomic classification of de novo Glioblastoma patients through multivariate quantitative analysis of baseline preoperative multimodal magnetic resonance imaging** [10950-147]

10950 44 **Radiomics analysis of MRI for predicting molecular subtypes of breast cancer in young women** [10950-148]

10950 46 **General purpose radiomics for multi-modal clinical research** [10950-150]

10950 47 **Quantitative MRI biomarker for treatment response assessment of multiple myeloma: robustness evaluation using independent test set of prospective cases** [10950-151]

10950 48 **Machine-learning-based classification of glioblastoma using MRI** [10950-152]

10950 49 **Prediction of low-grade glioma progression using MR imaging** [10950-160]

10950 4A **Radiomics and deep learning of diffusion-weighted MRI in the diagnosis of breast cancer** [10950-161]

POSTER SESSION: SKIN

10950 4B **Acral melanocytic lesion segmentation with a convolution neural network (U-Net)** [10950-153]

POSTER SESSION: STAGING

10950 4C **Dose distribution as outcome predictor for gamma knife radiosurgery on vestibular schwannoma** [10950-154]

POSTER SESSION: VASCULAR

10950 4D **Learning-based automatic segmentation on arteriovenous malformations from contrast CT images** [10950-155]

10950 4E **Use of a convolutional neural network for aneurysm identification in digital subtraction angiography** [10950-156]

10950 4F **U-Net based automatic carotid plaque segmentation from 3D ultrasound images** [10950-157]

POSTER SESSION: NEW APPROACHES

10950 4G **Machine learning for segmenting cells in corneal endothelium images** [10950-158]

10950 4H **Classifying abnormalities in computed tomography radiology reports with rule-based and natural language processing models** [10950-159]
