

PROCEEDINGS OF SPIE

*Sensing for Agriculture and Food
Quality and Safety XI*

Moon S. Kim
Bryan A. Chin
Byoung-Kwan Cho
Editors

16–17 April 2019
Baltimore, Maryland, United States

Sponsored and Published by
SPIE

Volume 11016

Proceedings of SPIE 0277-786X, V. 11016

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Sensing for Agriculture and Food Quality and Safety XI*, edited by Moon S. Kim, Bryan A. Chin, Byoung-Kwan Cho, Proceedings of SPIE Vol. 11016 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$18.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

SESSION 1 FOOD ADULTERANT AND TOXIN

- | | |
|----------|---|
| 11016 02 | Authentication of turmeric powder using hyperspectral Raman system [11016-1] |
| 11016 03 | Potential of near-infrared hyperspectral imaging in discriminating corn kernels infected with aflatoxigenic and non-aflatoxigenic <i>Aspergillus flavus</i> [11016-2] |

SESSION 2 MEAT QUALITY AND SAFETY

- | | |
|----------|--|
| 11016 07 | Development and validation of a multi gas optical sensor for the meat industry [11016-6] |
|----------|--|

SESSION 3 PATHOGEN DETECTION

- | | |
|----------|---|
| 11016 08 | Classification of <i>Arcobacter</i> species using variational autoencoders (Invited Paper) [11016-7] |
| 11016 09 | Multiplexed detection of lanthanides using laser-induced breakdown spectroscopy: a survey of data analysis techniques [11016-8] |
| 11016 0B | Rapid detection of pathogens using direct and surface enhanced Raman spectroscopy [11016-10] |

SESSION 4 FOOD SAFETY AND QUALITY

- | | |
|----------|--|
| 11016 0C | Multivariate predictive models for the prediction of fatty acids in the EU high added-value "acorn Iberian pig ham" using a miniature near-infrared spectroscopy instrument (Invited Paper) [11016-11] |
| 11016 0E | Portable bioluminescence detection for food safety: smartphone vs. silicon photomultiplier [11016-13] |
| 11016 0F | Selection of optimal bands for developing multispectral system for inspecting apples for defects [11016-14] |

POSTER SESSION

- 11016 0G Nondestructive rapid detection of benzoyl peroxide in flour based on Raman hyperspectral technique [11016-15]
- 11016 0O Detection of produce residues on processing equipment surfaces using fluorescence imaging [11016-23]
