

PROCEEDINGS OF SPIE

Big Data: Learning, Analytics, and Applications

Fauzia Ahmad

Editor

17–18 April 2019

Baltimore, Maryland, United States

Sponsored and Published by

SPIE

Volume 10989

Proceedings of SPIE 0277-786X, V. 10989

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Big Data: Learning, Analytics, and Applications*, edited by Fauzia Ahmad, Proceedings of SPIE Vol. 10989 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

BIG DATA ANALYTICS, MODELING, AND PROCESSING I

- 10989 02 **A big data inspired preprocessing scheme for bandwidth use optimization in smart cities applications** [10989-1]
- 10989 03 **Edge-to-fog computing for color-assisted moving object detection** [10989-2]
- 10989 04 **Sparsity-based collaborative sensing in a scalable wireless network** [10989-3]
- 10989 05 **Near-field source localization with an underwater inflatable sonar co-prime array** [10989-4]
- 10989 07 **RF sensing for continuous monitoring of human activities for home consumer applications** [10989-6]

MACHINE LEARNING FOR BIG DATA

- 10989 08 **A compressed sensing approach to hyperspectral classification** [10989-7]
- 10989 0A **Machine learning application to hydraulic fracturing** [10989-9]
- 10989 0B **Learning to rank faulty source files for dependent bug reports** [10989-10]
- 10989 0D **Fake news identification: a comparison of parts-of-speech and N-grams with neural networks** [10989-12]

BIG DATA ANALYTICS, MODELING, AND PROCESSING II

- 10989 0E **Big data analytics in medical imaging using deep learning** [10989-13]
- 10989 0G **Unsupervised automatic target generation process via compressive sensing** [10989-15]

10989 OH **Human activity monitoring using a compressive active sensing electro-optical sensor**
[10989-16]

SIGNAL PROCESSING FOR BIG DATA

10989 OI **Super-resolution via bilinear fusion of multimodal imaging data** [10989-17]

10989 OJ **Two dimensional sparse array design for wideband signals** [10989-18]

10989 OK **Performance trade-off analysis of co-design of radar and phase modulated communication signals in frequency hopping MIMO systems** [10989-19]

10989 OL **Clutter identification based on sparse recovery with dynamically changing dictionary sizes for cognitive radar** [10989-20]

10989 OM **Compressive hyperspectral image reconstruction with deep neural networks** [10989-21]

TENSOR METHODS FOR SIGNAL PROCESSING AND MACHINE LEARNING

10989 ON **Separation of composite tensors with sparse Tucker representations** [10989-22]

10989 OO **Options for multimodal classification based on L1-Tucker decomposition** [10989-23]

10989 OP **Conformity evaluation and L_1 -norm principal-component analysis of tensor data** [10989-24]

POSTER SESSION

10989 OR **Security analysis and recommendations for AI/ML enabled automated cyber medical systems**
[10989-26]
