

PROCEEDINGS OF SPIE

Geospatial Informatics IX

Kannappan Palaniappan
Peter J. Doucette
Gunasekaran Seetharaman
Joshua D. Harguess
Editors

15–16 April 2019
Baltimore, Maryland, United States

Sponsored and Published by
SPIE

Volume 10992

Proceedings of SPIE 0277-786X, V. 10992

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Geospatial Informatics IX*, edited by Kannappan Palaniappan, Peter J. Doucette, Gunasekaran Seetharaman, Joshua D. Harguess, Proceedings of SPIE Vol. 10992 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$18.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

FULL MOTION VIDEO ANALYTICS

10992 02	Captioning of full motion video from unmanned aerial platforms [10992-1]
10992 03	Towards image and video super-resolution for improved analytics from overhead imagery [10992-2]
10992 04	Fully convolutional adaptive tracker with real time performance [10992-3]
10992 05	Modeling and assessing VNIIRS using in-scene metrics [10992-4]

ENVIRONMENTAL AND DISASTER ANALYTICS

10992 08	Geospatial analytics of Hurricane Florence flooding effects using overhead imagery [10992-8]
10992 0B	Detection of illegal fishing [10992-11]
10992 0C	A sensor selection model in simultaneous monitoring of multiple types of disaster [10992-28]

GEOSPATIAL INFORMATICS APPLICATIONS I

10992 0D	Into the wild: a study in rendered synthetic data and domain adaptation methods [10992-13]
----------	---

GEOSPATIAL INFORMATICS APPLICATIONS II

10992 0G	Representation of predicted accuracy of 3d geospatial products and their subsequent fusion with other products [10992-16]
10992 0H	Deep learning for automatic ordnance recognition [10992-17]

- 10992 0I **Precision sensing of AC magnetic fields from moving platforms** [10992-18]
- 10992 0J **Object extraction in the context of an image registration workflow** [10992-19]
- 10992 0L **Quantitative assessment of image quality for maritime surveillance applications** [10992-21]

POSTER SESSION

- 10992 0M **Fusing sensor data with publicly available information (PAI) for autonomy applications**
[10992-22]
- 10992 0N **Evaluation of unsupervised optical flow methods for deep learning in real world datasets**
[10992-23]
