

PROCEEDINGS OF SPIE

Anomaly Detection and Imaging with X-Rays (ADIX) IV

**Amit Ashok
Joel A. Greenberg
Michael E. Gehm**
Editors

**15–16 April 2019
Baltimore, Maryland, United States**

Sponsored and Published by
SPIE

Volume 10999

Proceedings of SPIE 0277-786X, V. 10999

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Anomaly Detection and Imaging with X-Rays (ADIX) IV*, edited by Amit Ashok, Joel A. Greenberg, Michael E. Gehm, Proceedings of SPIE Vol. 10999 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$18.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

SYSTEM DESIGN AND ANALYSIS I

10999 02	Simulation-based x-ray system design and analysis: past, present, and future (Invited Paper) [10999-1]
10999 03	Effective atomic number and electron density determination using spectral x-ray CT (Invited Paper) [10999-2]
10999 06	Modeling real-world system geometry and detector response within a high-throughput x-ray simulation framework [10999-5]

DIFFRACTION AND PHASE CONTRAST I

10999 08	Motivations and methods for the analysis of multi-modality x-ray systems for explosives detection [10999-7]
10999 09	Coding versus collimation in pencil-beam X-ray diffraction tomography [10999-8]

MACHINE LEARNING ALGORITHMS

10999 0A	Adaptation of self-tuning spectral clustering and CNN texture model for detection of threats in volumetric CT images (Invited Paper) [10999-9]
10999 0D	Emergence and distinction of classes in XRD data via machine learning [10999-12]

SYSTEM DESIGN AND ANALYSIS II

10999 0J	X-ray measurement model and information-theoretic metric incorporating material variability with energy correlations [10999-18]
10999 0L	High-speed 300keV flash x-ray cinematography for investigations of the ballistic impact behavior of target materials and structures [10999-20]

ALGORITHMS

- 10999 OM **Lessons learned: data mining and aviation explosives detection systems (Invited Paper)**
[10999-21]
- 10999 ON **Hierarchical reconstruction of x-ray phase tomography based on transferred non-local structural features** [10999-22]
- 10999 OO **An algorithm to improve the accuracy of search boundaries for objects obtained in the x-ray**
[10999-23]
- 10999 OP **Automated firearms detection in cargo x-ray images using RetinaNet** [10999-24]
- 10999 OQ **Medical image segmentation by combining the local, global enhancement, and active contour model** [10999-25]

DIFFRACTION AND PHASE CONTRAST II

- 10999 OS **Optimization of hardware and image processing for improved image quality in x-ray phase contrast imaging** [10999-27]
- 10999 OU **Combining spatially and energy-resolved CdZnTe detectors with multiplexed collimations to improve performance of x-ray diffraction systems for baggage scanning** [10999-29]
