

PROCEEDINGS OF SPIE

Infrared Imaging Systems: Design, Analysis, Modeling, and Testing XXX

**Gerald C. Holst
Keith A. Krapels**
Editors

**16–18 April 2019
Baltimore, Maryland, United States**

Sponsored and Published by
SPIE

Volume 11001

Proceedings of SPIE 0277-786X, V. 11001

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Infrared Imaging Systems: Design, Analysis, Modeling, and Testing XXX*, edited by Gerald C. Holst, Keith A. Krapels, Proceedings of SPIE Vol. 11001 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>
xiii	<i>Introduction</i>

SESSION 1 MODELING I

11001 02	30 years of value engineering to the IR community (Invited Paper) [11001-1]
----------	--

SESSION 2 MODELING II

11001 03	Evaluating the performance of reflective band imaging systems: a tutorial (Invited Paper) [11001-2]
11001 04	Nonlinear pixel non-uniformity: emulation and correction [11001-3]
11001 05	SWIR sensor "see-spot" modelling and analysis [11001-4]
11001 06	Sunburn study of VO_x microbolometers [11001-5]

SESSION 3 MODELING III

11001 07	Experiments in detecting obscured objects using longwave infrared polarimetric passive imaging [11001-33]
11001 08	Range performance across the field of view of a camera [11001-6]
11001 09	An intensified camera module for the range performance model TRM4 [11001-7]
11001 0A	Simulating human vehicle identification performance with infrared imagery and augmented reality assistance [11001-8]
11001 0C	Implementation of a non-linear CMOS and CCD focal plane array model in ASSET [11001-10]

- 11001 0D **Image quality for an IRFPA: a system integrator point of view** [11001-11]
- 11001 0E **Validation of an infrared sensor model with field collected imagery of unresolved unmanned aerial vehicle (UAV) targets** [11001-44]

SESSION 4 MODELING IV

- 11001 0G **EO system design and performance optimization by image-based end-to-end modeling** [11001-13]
- 11001 0H **Generalization of active radar imaging and passive imaging models applied to wide band terahertz array imaging systems** [11001-14]
- 11001 0J **A data-constrained algorithm for the emulation of long-range turbulence-degraded video** [11001-16]
- 11001 0K **Image visualization for infrared cameras using radiometry** [11001-17]

SESSION 5 MODELING V

- 11001 0L **Using synthetic environments to assess multi-sensor system performance** [11001-20]
- 11001 0M **An update on PWP enhancement for LWIR target acquisition sensors** [11001-18]
- 11001 0N **Meteorological property and temporal variable effect on spatial semivariance of infrared thermography of soil surfaces for detection of foreign objects** [11001-19]
- 11001 0O **Design of target source for missile tracking capabilities and guarantee vehicle** [11001-21]

SESSION 6 MODELING VI

- 11001 0Q **Canonical images** [11001-22]
- 11001 0R **Optimizing microscan for radiometry with cooled IR cameras** [11001-23]

SESSION 7 TEST I

- 11001 0T **Parameter exploration for spectral estimation of speckle imagery in modulation transfer function measurements** [11001-25]
- 11001 0U **Through display measurement of signal intensity transfer function and noise for thermal systems** [11001-26]

11001 0V **Advancing the performance of extended area blackbody sources in order to stay ahead of the IR camera improvements** [11001-27]

SESSION 8 TEST II

11001 0W **Vantablack properties in commercial thermal infrared imaging systems** [11001-28]

SESSION 9 ATMOSPHERIC EFFECTS I

11001 0Z **Multispectral short-range imaging through artificial fog** [11001-31]

11001 10 **Measuring optical turbulence using a laser DIMM in support of characterization of imaging system performance** [11001-32]

11001 12 **Profiling atmospheric turbulence using time-lapse imagery from two cameras** [11001-34]

SESSION 10 ATMOSPHERIC EFFECTS II

11001 14 **Measurement and analysis of infrared atmospheric aerosol blur** [11001-36]

11001 15 **Probabilistic metrics to quantify the accuracy of sparse and redundant representation models of atmospheric turbulence** [11001-37]

11001 16 **Identifying low-profile objects from low-light UAS imagery using cascading deep learning** [11001-38]

POSTER SESSION

11001 17 **Inverse analysis of NIR and SWIR reflectance spectra for dye mixtures in fabrics using analytical basis functions** [11001-39]

11001 18 **Simple correction model for blurred images of uncooled bolometer type infrared cameras** [11001-40]

11001 19 **Mode-selective read-in integrated circuit with improved input range for infrared scene projectors** [11001-41]

11001 1A **Residual stress analysis of anodic aluminum oxide thin films for infrared emitter device application** [11001-42]

11001 1B **Introducing a general purpose S/W for IR image generation and analysis** [11001-43]
