

Thirteenth North American Masonry Conference

Salt Lake City, Utah, USA
June 16-19 2019

Volume 1 of 3

Editors:

Patrick B. Dillon
Fernando S. Fonseca

ISBN: 978-1-5108-9019-0

Printed from e-media with permission by:

Contents

Arching	2
Diagnosis of Damage in Masonry Structures: Repair for Non-Destructive Geometric Restitution	3
Influence of Soil Backfill Depth on the Strength and Behavior of Masonry Arch Bridges in the Transverse Direction	15
Masonry Structures Using Lightweight Materials	26
Reinforcement of Masonry Dome Structures for Seismic Loading	37
Confined Masonry	49
Confined Masonry: The Current Design Standards	50
Cyclic Load Behavior of Confined Masonry Walls Using Silica Lime 11H Bricks	63
Design Procedure for Confined Masonry Walls Subjected to Uniform Out-of-Plane Loads	71
Ductility of Confined Masonry Walls: Results from Several Experimental Campaigns in Mexico	82
In-Plane Loading Tests for Confined and In-Filled Masonry Panels in RC Frames with Eccentric Door and Window Openings	94
Seismic Performance of Confined Masonry Buildings Designed with the Mexico City Building Code	108
Shake-Table Testing of a Small-Scale Five-Story Confined Masonry Building	121
Shear Strength of Autoclaved Aerated Concrete Confined Masonry Walls Subjected to Lateral Loads	132
Education and Codes	142
Ergonomic Assessment of Standard vs. Heavy-Weight CMU Lifts	143
An International Perspective of Masonry Promotion	151
Practical Construction Detailing for CMU Special Shear Walls: A Student's Experience	163
Reflections on Writing a Building Code	171
The Unification and Update of the Brazilian Masonry Codes	180
What We Wish Your Students Knew About Masonry: The Industry's Perspective	191
Energy Transfer	202
Air Flow Within a Brick Veneer Cavity Wall	203
Critical Analysis of Codes and Standards of Structural Fire Design of Masonry Structures	215
Development of Enclosure Masonry Walls Made with Improved Thermal Performance Blocks	227
Dynamic Thermal Performance Measurements of Residential Wall Systems Part II, with Numerical Validation of Steady-State Performance	240
The Effect of Fire Temperatures on the Mechanical Performance of Concrete Masonry Materials	252
The Impact of Green Codes and Standards on the Masonry Industry in the US	265
Masonry Wall Partitions Acoustic Performance: Components and Thickness Contributions	278

The Need to Improve Standard Test Methods to Determine CO ₂ Sequestration in Cementitious Units for Carbon Footprint Changes	292
Thermal and Acoustic Retrofitting of Concrete Masonry Units	300
Thermo-Mechanical Behavior of Refractory Masonry Linings: An Overview on Numerical Simulation	311
Existing Masonry	324
Challenges of Stabilization and Adaptive Re-Use of Historic Unreinforced Masonry Buildings .	325
Engineering Judgment for Historic Building Façades	336
Integrated Approach for Unreinforced Masonry Stabilization in Historic Buildings of New York City	348
A New Penetrometric Test for in Situ Mechanical Characterization of Historic Mortar: Preliminary Results on Different Hydrated Lime Mortar Specimens	356
An Overview of Masonry Cleaning Techniques for Historic Masonry	367
Salt Attack of Masonry: Adhesive Forces in Damage	379
Suggested Method for the Determination of the Weathering Index of Ancient Fired Clay Bricks .	390
Typical Failure Modes of Hollow Load-Bearing Block Walls	399
Flexure and Shear	409
An Alternative to Using Steel Beams Supporting Long Span Openings in Masonry Walls	410
Evaluation of Construction Provisions to Avoid Cracking in Masonry Partitions Affected by Structural Deformations of Concrete Slabs	417
Experimental Investigation in Cohesive-Frictional Interface Fracture Response in Soft Brick Masonry	430
Experimental Investigation of the Capacity of Masonry Beams with Different Aspect Ratios and Quantities of Steel	437
Experimental Investigations on the In-Plane Shear Behavior of Unreinforced and Reinforced Masonry Panels	447
Influence of the Multi-Layer Bed Joint on the Crack Distribution in Masonry Walls Subjected to Static-Cyclic Loading	459
Predicting the Strength of Masonry Beams with Openings and Varying Vertical Reinforcement Using the Strut-and-Tie Method	471
Historic Masonry Cases Studies	482
Analysis of the Last Standing Arch of the Roman Aqueduct at Blaundos	483
Damage Analysis of an Early 20th Century Masonry Church Due to Soil Settlement	494
A Decade of Deterioration: Evaluation of Limestone Cladding at the Daily Planet	507
Discrete Element Analysis of the Seismic Behavior of an Ancient Roman Temple Façade	517
Dynamic Analysis of the Bell Action on the South Tower of the National Palace of Mafra	530
Investigation and Assessment of the Early Phrygian Gate Complex at Gordion, Turkey	541
Preventive Conservation Efforts and a Preliminary Preservation Management Plan for the Roman Temple at Antioch Ad Cragum	553
Strengthening and Conservation of the Early Phrygian Gate Complex at Gordion, Turkey	564
A Two-Story Italian Masonry Dwelling: Structural Reliability	574
Written in Stone: In-Situ Study of Historic Edinburgh Sandstone Structures Relating Deterioration Type and Extent to Physical Properties and Mineralogy	585
Infill Masonry	598

The Behavior of Masonry-Infilled R/C Frames Under Horizontal Seismic-Type Loading	599
Characteristics of One- and Two-Way Arching Behavior of Masonry Infills Under Out-of-Plane Loading	612
Effect of Gap Between Column and Masonry Infill on the Response of Masonry-Infilled Reinforced Concrete Frames	623
Macro-Model for Steel Frames with Reinforced Masonry Infill Walls	636
Strengthened Thin Clay Masonry Infills: In-Plane and Out-of-Plane Experimental Tests	650
Material Innovations	663
Development of Light Transmitting Mortar	664
Influence of Distributed Fiber Reinforcement on Concrete Masonry Ductility	676
Performance of Reclaimed Waste to Energy Aggregates as Lightweight Sand in Concrete Masonry Units	687
Preliminary Results on Surface Coating Strengthening Concrete Block Masonry with Eco-Friendly Ductile Cementitious Composite	696
The Use of Portland Limestone Cements in Masonry Applications.	707
Zeolite Geopolymers: A New Class of Concretes and Composites for the Masonry Industry	714
Material Properties	725
Air Content and the Performance of Masonry Cement Mortars	726
Assessment of the Compressive Strength of Masonry Prisms Using the Eurocode 6 Approach	736
Correlating Brick Compressive Strength to Its Fundamental Transverse Natural Frequency	746
The Development of a Standard Masonry Bond Wrench for International Use	756
Durability of Brick Masonry and the Absorption Alternate	767
Evaluation of the Adherence Between Clay Blocks and Grouts	780
Impact of Moisture Curing Conditions on Mechanical Properties of Lime-Cement Mortars in Early Ages	789
Influence of Water Content and Cure-Time of Factory-Made Mortar on Mortar Properties and Bond Strength to Clinker Brick	799
Investigating the Role of Masonry Typology Using a Detailed Micro-Modeling Approach	810
Most Common Myths for Masonry Mortar and Grout	823
Relationship Between Compressive Strength and Modulus for Existing Masonry Construction	836
Shear Resistance of Thermal Insulating Clay Unit Masonry	847
Statistical Analysis of Total Absorption Results in Hot and Cold Water for Ceramic Blocks	858
The Use of Hydrated Lime and Its Impact on the Pore Structure of Masonry Mortars	867
Non-Traditional Masonry	878
Application of Artificial Intelligence in Predicting the Behavior of Semi-Interlocking Masonry (SIM) Panels	879
Clogging Progression of Permeable Interlocking Concrete Pavers	892
Dynamic Behavior of Box Type Scaled Stabilized Earth and Fired Clay Block Masonry Building Models	904
Effect of Side-Wall Openings on Out-of-Plane Behavior of Dry Stack Brick Walls	916
Experimental and Numerical Study of Uniaxial Compression Behavior of Compressed and Stabilized Earth Blocks	925
Finite Element Simulation of Confined Semi-Interlocking Masonry Walls	937
Out-of-Plane Load and Displacement Capacities of SIM Infill Panel with Mechanical Interlocking of Bricks: Experimental Investigation	950

Response of Masonry Walls at Corners Under Shake Table Generated Motions	962
Seismic Performance Factors for Dry-Stacked Reinforced Masonry Shear Walls	974
Strengthening of Reinforced Brick Slabs Using Section Enlargement Scheme	985
Testing Compressive Strength and Young's Modulus of Semi-Interlocking Masonry	996
Unexpected High Performance of Modern Adobe Precision Flat Block Masonry	1004
Numerical Methods	1016
Analytical Models for Shear–Displacement Curves of Unreinforced Masonry Panels With and Without Bending Moments	1017
Evaluation of Macro Models for Masonry-Infilled Reinforced Concrete Frames	1029
A Homogenized Distinct Macro-Block (HDM) Model for Simulating the In-Plane Cyclic Response of URM Walls	1042
Interface Parameters Between Masonry Concrete Blocks and Mortar for Modeling of Masonry Structures	1055
A New Simplified Truss Model of Semi-Infilled Frames Based on Behavior Predicted by Finite Element Analysis	1065
A Simplified Modeling and Analysis Approach for RCM Shear Wall Buildings Under Lateral Loading	1077
Vectorized and Parallelized Finite Element Method for Modeling Masonry Infilled RC Frames .	1088
Out-of-Plane Flexure	1099
Experimental Study of Out-of-Plane Behavior of Timber Retrofitted Masonry Prisms	1100
Finite Element Analysis of Hollow Concrete Block Masonry Walls	1110
Flexure Behavior of Reinforced Masonry Assemblages Under Monotonic and Cyclic Loading .	1123
Proposal of Simplified Design Methods to Evaluate Second-Order Effects in Tall Reinforced Masonry Walls	1135
Reliability-Based Analysis Model of Slender Masonry Walls	1148
Reliability-Based Assessment of Safety Factors for Masonry Walls in Vertical Bending	1159
Seismic Behavior of Infill Walls Made of Horizontally-Hollow Masonry Units	1171
Strength of Random Rubble Masonry Panels Under Compression and Flexure	1181
Tall Masonry Walls with In-Line Cage Reinforcing	1190
Textile Reinforcement in the Bed Joints of Basement Walls: Increase of Out-of-Plane Flexural Capacity	1202
Partially Grouted Masonry	1215
Effect of Interior Vertical Reinforcement on the Performance of Partially Grouted Masonry Shear Walls	1216
The Failure of Partially Grouted Masonry Walls Subject to In-Plane Shear Is Affected by the Stiffness of the Grouted “Frame”	1227
Influence of Brick and Mortar Properties on the In-Plane Lateral Behavior of Partially Grouted Reinforced Masonry Shear Walls	1240
An Investigation of the Canadian Code-Based Shear Strength Equation of Partially Grouted Masonry Shear Walls	1252
Partially Grouted Reinforced Brick Masonry Wall Specimens Made in Greece Subjected to In-Plane Seismic Loading: Experimental Observations and Numerical Predictions	1261
Seismic Resistance Mechanisms in Partially Grouted Shear Walls with New Design Details . . .	1274
Simulation of the Lateral Response of Partially Grouted Reinforced Masonry Shear Walls: Validation of the Detailed Micro-modeling Approach and Solving Strategy	1287

Reinforcement	1300
The Effect of Impact Energy Loss in Seismic Response of Unbonded Post-Tensioned Rocking Masonry Walls	1301
Improving Performance of Unbonded Post-Tensioned Masonry Walls with the Use of Rubber Interface	1314
Numerical Modeling of Controlled Rocking Post-Tensioned Fully-Grouted Masonry Shear Walls With and Without Energy Dissipation	1327
Proposed Design Provisions for Post-Tensioned Masonry Beams	1340
Reinforcing Bar Splice Performance in Masonry with Self-Consolidating Grout	1352
A Simple Test to Evaluate Direct Tension Pullout Strength of Reinforcing Bars Embedded Within Grout and Preliminary Results	1362
Retrofitting	1372
Best Practices for Masonry Resilience Based on Performance During the 2018 Wilkes-Barre Tornado	1373
An Experimental Validation of a Procedure to Distinguish Global and Local Modes of Masonry Structures	1387
Seismic Assessment of Historical Masonry Buildings and the Influence of Structural Retrofitting: A Case Study	1399
Seismic Retrofitting of Existing Unreinforced Masonry Structures Using Post-Tensioning Technique: A Case Study and Lessons Learned	1414
Strengthening the Past, Building the Future: Lessons Learned from School Buildings in Indonesia and Sub-Standard Housing in Colombia and Philippines	1426
Seismic Analysis and Testing	1439
Applied Element Modeling of the Dynamic Response of a Full-Scale Clay Brick Masonry Specimen with Flexible Diaphragms	1440
Displacement Demand Equations for the Non-Linear Static Analysis of Short-Period Masonry Structures	1449
Influence of Ductile Shear Wall Ratio on the Seismic Performance of Reinforced Concrete Masonry Shear Wall Buildings	1462
Preliminary Test Results of Seismic Response of Reinforced Concrete Masonry Shear Walls with C-Shape Block Boundary Element	1475
Seismic Fragility Assessment of Masonry Structural Units and Masonry Aggregates	1487
A Shake-Table Test Investigating the Drift Capacity of Reinforced Masonry Wall Systems	1500
Structural Reliability of Reinforced Concrete Block Masonry Wall Subjected to Seismic Force	1512
Surface-Mounted Reinforcement	1522
Compressive Strength of FRP-Confined Concrete Masonry With and Without Longitudinal Steel Reinforcement	1523
Experimental Evaluation of an Unreinforced Masonry Building Strengthened with Steel Bands	1530
Flexural Testing of a Concrete Masonry Unit Wall with Near-Surface Mounted Steel Reinforcement	1542
Numerical Analysis of Capacity Interaction of Brick Masonry Wallettes Strengthened with Geosynthetic	1554
Seismic Performance Assessment of a Historic Masonry Structure Retrofitted with Various Distributions of FRP Laminates	1565

Simplified Method for Predicting Flexural Behavior of Reinforced Masonry Walls Strengthened with FRP	1577
The Use of SRG to Improve the Displacement Ductility of Confined Masonry Walls	1593
Unreinforced Masonry	1605
Case Study on URM Parapet Bracing: Research and Application	1606
Cyclic In-Plane Testing of Simulated Australian Historical Perforated URM Walls	1615
Experimental and Computational Study of the Influence of Pre-Damage Patterns in Unreinforced Masonry Crack Propagation Due to Induced, Repeated Earthquakes	1628
Failure Mechanism of Top Corner in Unreinforced Masonry	1646
Force-Displacement Response of Semi Interlocking Masonry Panel Under Large In-Plane Displacement: An Experimental Study	1654
Limit States of Unreinforced Masonry Shear Walls: Discussion on Standards Approaches and Regulations	1668
A Mechanical Model for the Cyclic In-Plane Force-Displacement Response of URM Walls . . .	1681
Parametric Study of the Behavior of Perforated URM Walls Under In-Plane Loading and Comparison with NZSEE Strength Prediction Formula	1694
Shake-Table Tests on a URM Building with Chimneys	1707
Shear to Elastic Modulus Ratio in Unreinforced Masonry	1721
Simplified Numerical Model of URM Wall-to-Timber Floor Connections	1733
Veneer	1745
The Design and Construction of the City Creek Center Masonry Façade	1746
Experimental Determination of the Behavior of Lag Screws in Masonry Veneer Shelf Angles . .	1757
Nonlinear Finite Element Analysis of Unreinforced Masonry Veneer Wall Systems Under Out-of-Plane Loading	1769
Preliminary Study of Galvanic Corrosion on Veneer Anchors	1782
Proposed Changes to the TMS 402 Anchored Veneer Provisions	1795
Proposed Changes to the TMS 402/602 Adhered Veneer Provisions	1808
The Resistance of Masonry Veneer Walls Against Driving Rain Considering Windows and Door-Openings	1818
Shadows Cast by Outward Things: Incorporating Texture into Brick Veneer	1828
