**Volume 11031**

Proceedings of SPIE 0277-786X, V. 11031

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Integrated Optics: Design, Devices, Systems, and Applications V*, edited by Pavel Cheben, Jiří Čtyroký, Iñigo Molina-Fernández, Proceedings of SPIE Vol. 11031 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$18.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE

Publication of record for individual papers is online in the SPIE Digital Library.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

vii	<i>Authors</i>
ix	<i>Conference Committee</i>

---

## INTEGRATED OPTICS I

11031 04	<b>Enhanced performance of integrated silicon nanophotonic devices engineered by sub-wavelength grating structures (Invited Paper) [11031-2]</b>
11031 05	<b>Analysis of surface-emitting thin-film superluminescent diodes with high efficiency [11031-3]</b>
11031 06	<b>High coupling efficiency surface illuminated 2D metasurface waveguide coupler for mid-IR wavelengths [11031-4]</b>

---

## INTEGRATED OPTICS II

11031 07	<b>Surface plasmon optoelectronics and exceptional point waveguides on silicon (Keynote Paper) [11031-5]</b>
11031 09	<b>Black-silicon-structured back-illuminated Ge-on-Si photodiode arrays [11031-7]</b>

---

## INTEGRATED OPTICS IV

11031 0G	<b>Optimization of the threshold pump power of a photonic crystal nanolaser: experiment and theory [11031-15]</b>
11031 0H	<b>Refractive index engineered Bragg grating filters in wide SOI waveguides [11031-16]</b>
11031 0I	<b>Thermomechanical local stress in assembled GaN LEDs investigated by Raman optical spectroscopy [11031-17]</b>

---

## INTEGRATED OPTICS V

11031 0M	<b>Designing polarization management devices by tilting subwavelength grating [11031-21]</b>

**INTEGRATED OPTICS VI**

---

- 11031 0Q     **Optical gain evaluation on rare-earth doped Yttria-stabilized zirconia for hybrid integration on silicon photonics platforms (Best Student Paper Award) [11031-25]**
- 11031 0R     **Diffraction sidewall grating coupler: towards 2D free-space optics on chip [11031-26]**

---

**INTEGRATED OPTICS VII**

---

- 11031 0V     **Spectral behavior of integrated distributed-feedback resonators utilizing a distributed phase shift [11031-30]**

---

**POSTER SESSION**

---

- 11031 0Y     **The fast quasiadiabatic approach to optical waveguide design [11031-33]**
- 11031 10     **Crosstalk analysis in high speed two-dimensional photodetector array directly coupled to multi-core fibers [11031-35]**
- 11031 11     **Self-assemble organic molecular micron-sized tubular structures for active and passive wave-guiding regimes [11031-36]**
- 11031 13     **Antimonide-based visible to short wavelength infrared bispectral photodetector [11031-38]**
- 11031 14     **Selective polarization generation in an amplifying photonic crystal with 2D array of metal nanoparticles [11031-39]**
- 11031 15     **High-Q mid-infrared 1D photonic crystal waveguide resonator in SOI [11031-40]**
- 11031 16     **Analysis of ring resonator structure with quality factor enhancement [11031-41]**
- 11031 18     **Photonics enabled generation of multiband millimeter-wave radio over fiber signals for frequency band 200 GHz-300 GHz [11031-43]**
- 11031 1A     **A performance comparison between lumped, distributed and optical phase locked local oscillator used in the photonic generation of millimeter-wave signals for radio over fiber systems [11031-46]**
- 11031 1B     **Integrated silicon-on-insulator broadband spectrometer with a high resolution [11031-47]**
- 11031 1D     **Analysis of the effect of long-time thermal load on the total losses of the selected fiber-optic couplers [11031-50]**
- 11031 1E     **Design and modeling of long-range hybrid plasmonic waveguides [11031-51]**
- 11031 1F     **Design of electro-optic modulators and switches based on graphene and phase change materials [11031-52]**
